Contents

Preface ix

1	Interestination to New steeless I am 1
1	Introduction to Nanotechnology 1
1.1	Introduction 1
1.2	Importance of Size in Nanotechnology 2
1.3	Approaches in Nanotechnology 2
1.3.1	Top-Down Approach 2
1.3.2	Bottom-Up Approach 3
1.4	Impact of Nanotechnology 4
1.4.1	Sensors for the Automotive Industry 4
1.4.2	Health and Medicine 5
1.4.3	Energy and Environment 5
1.4.4	National Security 5
1.5	Nanotechnology Applications 6
1.5.1	Information Technology 6
1.5.2	Energy 6
1.5.3	Medicine 6
1.5.4	Consumer Goods 6
1.6	Summary and Challenges 6
	References 8
2	Biomaterials in Medicine 11
2.1	Introduction 11
2.2	Biodegradable Polymers 20
2.3	Natural Biomaterials 25
2.3.1	Gelatin 26
2.3.2	Pectin 27
2.3.3	Chitosan 28
2.3.4	Cyclodextrins (CDs) 29
2.3.5	Dextran, Dextran–Spermine (D-SPM) 30
2.3.6	Miscellaneous Polysaccharide Polymers 32
2.3.6.1	Pullulan 32
2.3.6.2	Schizophyllan 33
2.3.6.3	Alginic Acid 33
	č
2.3.6.4	Hydroxypropyl Cellulose 33

Nanoparticle Uptake by the Cells 80 4.5 Summary 91 References 92 5 Nanomaterials in Gene-Silencing Technology 109 5.1 Introduction 109 5.2 Gene Silencing 110 5.2.1 siRNAs 110	2.3.6.5 Glycosaminoglycans 33 2.3.7 Modified Polysaccharides as Gene Delivering Agents 35 2.3.8 Cationic Lipid 38 2.4 Biodegradable Nanoparticles 39 References 40 3 Classification of Nanomaterials 47 3.1 Introduction 47 3.2 Classification of Nanomaterials 48 3.2.1 Nanoparticles 48 3.2.2 Nanofibers, Nanowires, and Nanorods 49 3.2.3 Self-assembly of Proteins and Peptides 52 3.3 Nanocarriers 54 3.3.1 Nanocarriers in Gene Therapy Technology 54 3.3.2 Nanocarriers in Gene Therapy Technology 54 3.3.3 Colloidal Carrier System 57 3.3.4 Nanoparticulate System 59 3.4 Nanoscaffolding Materials 59 References 60 4 Nanomaterials in Gene Therapy Technology 63 4.1 Introduction 63 4.2 Approaches to Gene Therapy 64 4.2.1 Viral Vectors for Gene Delivery 64 4.2.2 Nonviral Vectors for Gene Delivery 65 4.2.2.1 Cationic Polymers 65 4.2.2.2 Cationic Lipid 72 4.2.2.3 Conventional Phosphate Method 72 4.2.2.4 Cell-Receptor-Mediated Uptake 72 4.3 Physical Methods for Gene Delivery 78 4.4 Combination of Physical and Nonviral Methods to Enhance DNA Nanoparticle Uptake by the Cells 80 4.5 Summary 91 References 92 5 Nanomaterials in Gene-Silencing Technology 109 5.1 Introduction 109 5.2 Gene Silencing 110 5.2.1 siRNAs 110 5.2.2 shRNAs 110			
 2.3.6.5 Glycosaminoglycans 33 2.3.7 Modified Polysaccharides as Gene Delivering Agents 35 2.3.8 Cationic Lipid 38 2.4 Biodegradable Nanoparticles 39 References 40 3 Classification of Nanomaterials 47 3.1 Introduction 47 3.2 Classification of Nanomaterials 48 3.2.1 Nanoparticles 48 3.2.2 Nanofibers, Nanowires, and Nanorods 49 3.2.3 Self-assembly of Proteins and Peptides 52 3.3 Nanocarriers 54 3.3.1 Nanocarriers in Gene Therapy Technology 54 3.3.2 Nanocarriers in siRNA Technology 55 3.3.3 Colloidal Carrier System 57 3.3.4 Nanoparticulate System 59 3.4 Nanoscaffolding Materials 59 References 60 4 Nanomaterials in Gene Therapy Technology 63 4.1 Introduction 63 4.2 Approaches to Gene Therapy 64 4.2.1 Viral Vectors for Gene Delivery 64 4.2.2 Nonviral Vectors for Gene Delivery 65 4.2.2.1 Cationic Polymers 65 4.2.2.2 Cationic Lipid 72 4.2.2.3 Conventional Phosphate Method 72 4.2.2.4 Cell-Receptor-Mediated Uptake 72 4.3 Physical Methods for Gene Delivery 78 4.4 Combination of Physical and Nonviral Methods to Enhance DN Nanoparticle Uptake by the Cells 80 4.5 Summary 91 References 92 5 Nanomaterials in Gene-Silencing Technology 109 5.1 Introduction 109 5.2 Gene Silencing 110 5.2.1 siRNAs 110 	2.3.6.5 Glycosaminoglycans 33 2.3.7 Modified Polysaccharides as Gene Delivering Agents 35 2.3.8 Cationic Lipid 38 2.4 Biodegradable Nanoparticles 39 References 40 3 Classification of Nanomaterials 47 3.1 Introduction 47 3.2 Classification of Nanomaterials 48 3.2.1 Nanoparticles 48 3.2.2 Nanofibers, Nanowires, and Nanorods 49 3.2.3 Self-assembly of Proteins and Peptides 52 3.3 Nanocarriers 54 3.3.1 Nanocarriers in Gene Therapy Technology 54 3.3.2 Nanocarriers in Gene Therapy Technology 54 3.3.3 Colloidal Carrier System 57 3.3.4 Nanoparticulate System 59 3.4 Nanoscaffolding Materials 59 References 60 4 Nanomaterials in Gene Therapy Technology 63 4.1 Introduction 63 4.2 Approaches to Gene Therapy 64 4.2.1 Viral Vectors for Gene Delivery 64 4.2.2 Nonviral Vectors for Gene Delivery 65 4.2.2.1 Cationic Polymers 65 4.2.2.2 Cationic Lipid 72 4.2.2.3 Conventional Phosphate Method 72 4.2.2.4 Cell-Receptor-Mediated Uptake 72 4.3 Physical Methods for Gene Delivery 78 4.4 Combination of Physical and Nonviral Methods to Enhance DNA Nanoparticle Uptake by the Cells 80 4.5 Summary 91 References 92 5 Nanomaterials in Gene-Silencing Technology 109 5.1 Introduction 109 5.2 Gene Silencing 110 5.2.1 siRNAs 110 5.2.2 shRNAs 110	I	C	
 2.3.7 Modified Polysaccharides as Gene Delivering Agents 35 2.3.8 Cationic Lipid 38 2.4 Biodegradable Nanoparticles 39 References 40 3 Classification of Nanomaterials 47 3.1 Introduction 47 3.2 Classification of Nanomaterials 48 3.2.1 Nanoparticles 48 3.2.2 Nanofibers, Nanowires, and Nanorods 49 3.2.3 Self-assembly of Proteins and Peptides 52 3.3 Nanocarriers 54 3.3.1 Nanocarriers in Gene Therapy Technology 54 3.3.2 Nanocarriers in siRNA Technology 55 3.3.3 Colloidal Carrier System 57 3.3.4 Nanoparticulate System 59 3.4 Nanoparticulate System 59 3.4 Nanoscaffolding Materials 59 References 60 4 Nanomaterials in Gene Therapy Technology 63 4.1 Introduction 63 4.2 Approaches to Gene Therapy 64 4.2.1 Viral Vectors for Gene Delivery 65 4.2.2.1 Cationic Polymers 65 4.2.2.2 Cationic Lipid 72 4.2.2.3 Conventional Phosphate Method 72 4.2.2.4 Cell-Receptor-Mediated Uptake 72 4.3 Physical Methods for Gene Delivery 78 4.4 Combination of Physical and Nonviral Methods to Enhance DN Nanoparticle Uptake by the Cells 80 4.5 Summary 91 References 92 5 Nanomaterials in Gene-Silencing Technology 109 5.1 Introduction 109 5.2 Gene Silencing 110 5.2.1 siRNAs 110 	2.3.7 Modified Polysaccharides as Gene Delivering Agents 35 2.3.8 Cationic Lipid 38 2.4 Biodegradable Nanoparticles 39 References 40 3 Classification of Nanomaterials 47 3.1 Introduction 47 3.2 Classification of Nanomaterials 48 3.2.1 Nanoparticles 48 3.2.2 Nanofibers, Nanowires, and Nanorods 49 3.2.3 Self-assembly of Proteins and Peptides 52 3.3 Nanocarriers 54 3.3.1 Nanocarriers in Gene Therapy Technology 54 3.3.2 Nanocarriers in siRNA Technology 55 3.3.3 Colloidal Carrier System 57 3.3.4 Nanoparticulate System 59 3.4 Nanoscaffolding Materials 59 References 60 4 Nanomaterials in Gene Therapy Technology 63 4.1 Introduction 63 4.2 Approaches to Gene Therapy 64 4.2.1 Viral Vectors for Gene Delivery 64 4.2.2.1 Cationic Polymers 65 4.2.2.2 Cationic Lipid 72 4.2.2.3 Conventional Phosphate Method 72 4.2.2.4 Cell-Receptor-Mediated Uptake 72 4.3 Physical Methods for Gene Delivery 78 4.4 Combination of Physical and Nonviral Methods to Enhance DNA Nanoparticle Uptake by the Cells 80 4.5 Summary 91 References 92 5 Nanomaterials in Gene-Silencing Technology 109 5.1 Introduction 109 5.2 Gene Silencing 110 5.2.1 siRNAs 110 5.2.2 shRNAs 110	VI	Contents	
 2.3.7 Modified Polysaccharides as Gene Delivering Agents 35 2.3.8 Cationic Lipid 38 2.4 Biodegradable Nanoparticles 39 References 40 3 Classification of Nanomaterials 47 3.1 Introduction 47 3.2 Classification of Nanomaterials 48 3.2.1 Nanoparticles 48 3.2.2 Nanofibers, Nanowires, and Nanorods 49 3.2.3 Self-assembly of Proteins and Peptides 52 3.3 Nanocarriers 54 3.3.1 Nanocarriers in Gene Therapy Technology 54 3.3.2 Nanocarriers in siRNA Technology 55 3.3.3 Colloidal Carrier System 57 3.3.4 Nanoparticulate System 59 3.4 Nanoparticulate System 59 3.4 Nanoscaffolding Materials 59 References 60 4 Nanomaterials in Gene Therapy Technology 63 4.1 Introduction 63 4.2 Approaches to Gene Therapy 64 4.2.1 Viral Vectors for Gene Delivery 65 4.2.2.1 Cationic Polymers 65 4.2.2.2 Cationic Lipid 72 4.2.2.3 Conventional Phosphate Method 72 4.2.2.4 Cell-Receptor-Mediated Uptake 72 4.3 Physical Methods for Gene Delivery 78 4.4 Combination of Physical and Nonviral Methods to Enhance DN Nanoparticle Uptake by the Cells 80 4.5 Summary 91 References 92 5 Nanomaterials in Gene-Silencing Technology 109 5.1 Introduction 109 5.2 Gene Silencing 110 5.2.1 siRNAs 110 	2.3.7 Modified Polysaccharides as Gene Delivering Agents 35 2.3.8 Cationic Lipid 38 2.4 Biodegradable Nanoparticles 39 References 40 3 Classification of Nanomaterials 47 3.1 Introduction 47 3.2 Classification of Nanomaterials 48 3.2.1 Nanoparticles 48 3.2.2 Nanofibers, Nanowires, and Nanorods 49 3.2.3 Self-assembly of Proteins and Peptides 52 3.3 Nanocarriers 54 3.3.1 Nanocarriers in Gene Therapy Technology 54 3.3.2 Nanocarriers in siRNA Technology 55 3.3.3 Colloidal Carrier System 57 3.3.4 Nanoparticulate System 59 3.4 Nanoscaffolding Materials 59 References 60 4 Nanomaterials in Gene Therapy Technology 63 4.1 Introduction 63 4.2 Approaches to Gene Therapy 64 4.2.1 Viral Vectors for Gene Delivery 64 4.2.2.1 Cationic Polymers 65 4.2.2.2 Cationic Lipid 72 4.2.2.3 Conventional Phosphate Method 72 4.2.2.4 Cell-Receptor-Mediated Uptake 72 4.3 Physical Methods for Gene Delivery 78 4.4 Combination of Physical and Nonviral Methods to Enhance DNA Nanoparticle Uptake by the Cells 80 4.5 Summary 91 References 92 5 Nanomaterials in Gene-Silencing Technology 109 5.1 Introduction 109 5.2 Gene Silencing 110 5.2.1 siRNAs 110 5.2.2 shRNAs 110		2.3.6.5	Glycosaminoglycans 33
2.3.8 Cationic Lipid 38 2.4 Biodegradable Nanoparticles 39 References 40 3 Classification of Nanomaterials 47 3.1 Introduction 47 3.2 Classification of Nanomaterials 48 3.2.1 Nanoparticles 48 3.2.2 Nanofibers, Nanowires, and Nanorods 49 3.2.3 Self-assembly of Proteins and Peptides 52 3.3 Nanocarriers 54 3.3.1 Nanocarriers in Gene Therapy Technology 54 3.3.2 Nanocarriers in siRNA Technology 55 3.3.3 Colloidal Carrier System 57 3.3.4 Nanoparticulate System 59 3.4 Nanoscaffolding Materials 59 References 60 4 Nanomaterials in Gene Therapy Technology 63 4.1 Introduction 63 4.2 Approaches to Gene Therapy 64 4.2.1 Viral Vectors for Gene Delivery 65 4.2.2.1 Cationic Polymers 65 4.2.2.2 Cationic Lipid 72 4.2.2.3 Conventional Phosphate Method 72 4.2.2.4 Cell-Receptor-Mediated Uptake 72 4.2.2.5 Conventional Phosphate Method 72 4.2.2.6 Combination of Physical and Nonviral Methods to Enhance DN Nanoparticle Uptake by the Cells 80 4.5 Summary 91 References 92 5 Nanomaterials in Gene-Silencing Technology 109 5.1 Introduction 109 5.2 Gene Silencing 110 5.2.1 siRNAs 110	2.3.8 Cationic Lipid 38 2.4 Biodegradable Nanoparticles 39 References 40 3 Classification of Nanomaterials 47 3.1 Introduction 47 3.2 Classification of Nanomaterials 48 3.2.1 Nanoparticles 48 3.2.2 Nanofibers, Nanowires, and Nanorods 49 3.2.3 Self-assembly of Proteins and Peptides 52 3.3 Nanocarriers 54 3.3.1 Nanocarriers in Gene Therapy Technology 54 3.3.2 Nanocarriers in siRNA Technology 55 3.3.3 Colloidal Carrier System 57 3.3.4 Nanoparticulate System 59 3.4 Nanoparticulate System 59 3.4 Nanoscaffolding Materials 59 References 60 4 Nanomaterials in Gene Therapy Technology 63 4.1 Introduction 63 4.2 Approaches to Gene Therapy 64 4.2.1 Viral Vectors for Gene Delivery 64 4.2.2 Nonviral Vectors for Gene Delivery 65 4.2.2.1 Cationic Polymers 65 4.2.2.2 Cationic Lipid 72 4.2.2.3 Conventional Phosphate Method 72 4.2.2.4 Cell-Receptor-Mediated Uptake 72 4.3 Physical Methods for Gene Delivery 78 4.4 Combination of Physical and Nonviral Methods to Enhance DNA Nanoparticle Uptake by the Cells 80 4.5 Summary 91 References 92 5 Nanomaterials in Gene-Silencing Technology 109 5.1 Introduction 109 5.2 Gene Silencing 110 5.2.1 siRNAs 110 5.2.2 shRNAs 110
