About the Editor *xv*

1	Overview of the Global Cable Industry – Markets and Materials	1
	<i>Astrid Aupetit</i>	
1.1	Demand for Polymeric Material	3
1.1.1	Main Companies Profile	3
1.1.1.1	Prysmian	4
1.1.1.2	Nexans	4
1.1.1.3	Southwire	5
1.1.1.4	Sumitomo Electric Industries	5
1.1.1.5	Furukawa Electric Co., Ltd.	5
1.1.1.6	LS Cable & System	6
1.1.1.7	Leoni AG	6
1.1.1.8	Hengtong Group	6
1.1.2	Global Demand	7
1.2	Asia and Australasia	10
1.2.1	Demand for Cable	10
1.2.2	Demand for Polymeric Material	11
1.3	Europe	12
1.3.1	Demand for Cables	12
1.3.2	Demand for Polymeric Materials	13
1.4	The Middle East and Africa	14
1.4.1	Demand for Cables	14
1.4.2	Demand for Polymeric Materials	14
1.5	North America	16
1.5.1	Demand for Cables	16
1.5.2	Demand for Polymeric Materials	17
1.6	South and Central America	18
1.6.1	Demand for Cables	18
1.6.2	Demand for Polymeric Materials	19

2	Thermoplastics for Cables	21
	<i>Theo Geussens</i>	
2.1	Introduction	21
2.2	Polyolefin Materials	21
2.2.1	Polyethylene	22
2.2.1.1	Manufacturing Processes	25
2.2.1.2	Cable Applications	26
2.2.2	Polypropylene (PP)	32
2.2.2.1	Manufacturing Processes	33
2.2.2.2	Applications	33
2.3	Chlorinated Polymers	35
2.3.1	Polyvinylchloride (PVC)	35
2.3.2	Chlorinated Polyethylene (CPE)	36
2.4	Fluoropolymers	37
2.4.1	Fluoro-Ethylene Propylene polymer	37
2.4.2	Polytetrafluoroethylene (PTFE), Ethylene Tetrafluoroethylene (ETFE), and Perfluoroalkoxy Polymer (PFA)	38
2.4.3	Ethylene Chlorotrifluoroethylene (ECTFE)	40
2.4.4	Polyvinylidene fluoride (PVDF)	40
2.5	Polyamide (PA)	40
2.6	Polyesters	41
2.6.1	Polybutylphthalate (PBT)	41
2.6.2	Polyester Elastomers	41
2.7	Thermoplastic Polyurethane	42
	References	43
3	Elastomers for Cables	57
	<i>Burkhard Herpich</i>	
3.1	Introduction	57
3.2	Rubber Compounds	63
3.2.1	Rubber	63
3.2.2	Fillers	66
3.2.3	Plasticizer	68
3.2.4	Stabilizers	70
3.2.5	Classical Cross-linking Systems	71
3.2.5.1	Cross-linking with Sulfur Systems	71
3.2.5.2	Cross-linking with Peroxide Systems	71
3.2.5.3	Moving Die Rheometers (MDRs)	72
3.2.6	Other Cross-linking Systems	73
3.2.6.1	Cross-linking by Irradiation	73
3.2.6.2	Cross-linking with Silanes	73
3.3	Compounding	73
3.4	Extrusion	76
3.5	Cross-linking/Vulcanization	78
3.5.1	Vulcanization in Saturated Hot Water Steam	78
3.5.2	Vulcanization in Liquid Salt Mixtures under Pressure	80
3.5.3	Electron Beam Cross-linking	81
	References	82

4	Extrusion of Cables	85
	<i>Stéphan Puissant</i>	
4.1	Historical Introduction to Cable Extrusion	85
4.2	Extruder in Cable Lines	87
4.2.1	Description of the Single Screw Extruder	87
4.2.1.1	Different Functional Screw Zones	87
4.2.1.2	Description of a Screw Geometry	88
4.2.2	Feeding Zone of the Extrusion Screw	89
4.2.2.1	Friction-Based Feeding Mechanism	89
4.2.2.2	Simple Modeling of the Feeding Zone	90
4.2.2.3	Improvement of the Feeding Zone: Use of Helical Grooved Barrel	95
4.2.3	Thin Film Plastification	97
4.2.3.1	Melting on the Backside of Flight	97
4.2.3.2	Initiation of Liquid Film	98
4.2.3.3	Melt Flow Rate in the Liquid Film	99
4.2.3.4	Influence of Different Parameters on Melting Length	99
4.2.3.5	Thin Film Melting with the Help of a Barrier Zone	103
4.2.3.6	Barrier Zone, Its Advantages, and Its Drawbacks	103
4.2.4	Metering Zone	104
4.2.4.1	Representation of the Metering Zone	104
4.2.4.2	1D Analysis	105
4.2.5	Example of Results for 1D Model Including the Three Zones of the Screw	105
4.2.5.1	Influence of Friction Coefficients on the Screw Characteristics	105
4.2.5.2	Interaction Between Compression and Friction in the Feeding Zone	106
4.3	Accessories for Extruders	107
4.3.1	Mixing Zones	107
4.3.1.1	Observed Defaults	107
4.3.1.2	Devices Selection Criteria	109
4.3.1.3	Example of Results for Finathene HDPE	111
4.3.2	Melt Filtration Systems	113
4.3.3	Melt Gear Pumps	114
4.4	Extrusion Heads or Dies	115
4.4.1	Description of the Extrusion Head	115
4.4.1.1	Extrusion Head Function	115
4.4.2	Distributors	117
4.4.2.1	Head with Coat Hanger Type Distribution Channels	117
4.4.2.2	Distribution Function Through Flattened Distribution Channels	119
4.4.2.3	Distributor with Helical Channels	119
4.4.3	Diameter Adaptation Function (Tooling)	119
4.4.3.1	Tube Tooling, DDR	120
4.4.3.2	Tube Tooling, DRB	121
4.4.4	Relation Between Pressure and Average Temperature Increase in an Extrusion Head	121
4.5	Cooling	122
4.5.1	Cooling Length Analytical Calculation for Fine Wires	122

- 4.5.2 Cooling Length Finite Difference Calculation for a Wire of Radius >1 mm with Copper Core and PE Insulation 123
- 4.6 Quality 124
 - 4.6.1 The Quality Parameter and Its Measurement 124
 - 4.6.1.1 Diameter and Product Circularity Measurement 125
 - 4.6.1.2 Concentricity Measurement 126
 - 4.6.1.3 Insulation Defects Measurements (Cable or Wire) 126
 - 4.6.1.4 Capacity Measurement (Telecommunication Wire) 127
