**Forewords** *xi*

**Preface** *xiii*

<b>1</b>	<b>Overview</b>	<i>1</i>
1.1	Introduction	<i>1</i>
1.2	Hybridized Nanogenerators	<i>2</i>
1.2.1	Hybrid Energy Cells	<i>2</i>
1.2.2	Electromagnetic–Triboelectric Hybridized Nanogenerators	<i>4</i>
1.2.3	Other Hybridized Nanogenerators	<i>6</i>
1.3	Coupled Nanogenerators	<i>9</i>
1.3.1	Pyroelectric and Photovoltaic Coupled Nanogenerators	<i>10</i>
1.3.2	Multi-effects Coupled Nanogenerators	<i>10</i>
1.4	Applications	<i>13</i>
1.5	Conclusion and Prospects	<i>14</i>
	References	<i>15</i>
<b>2</b>	<b>Wind-Driven Triboelectric Nanogenerators</b>	<i>19</i>
2.1	Introduction	<i>19</i>
2.2	Conventional Wind Harvester	<i>19</i>
2.2.1	Working Mechanisms and Devices Structure	<i>19</i>
2.2.2	Applications	<i>21</i>
2.3	Triboelectric Nanogenerators for Scavenging Wind Energy	<i>21</i>
2.3.1	Fundamental Modes and Structure	<i>21</i>
2.3.1.1	Vibrating Plate-Based TENGs	<i>21</i>
2.3.1.2	Enhanced Plate-Based TEGs	<i>22</i>
2.3.1.3	Elasto-aerodynamics-Driven TENGs	<i>25</i>
2.3.1.4	Others	<i>25</i>
2.3.2	Materials	<i>27</i>
2.3.2.1	Cellulose	<i>27</i>
2.3.2.2	Metal	<i>29</i>
2.3.2.3	Polymer	<i>30</i>
2.3.2.4	Nanoparticle and Nanowire	<i>31</i>
2.3.3	Performance	<i>33</i>
2.3.3.1	Mechanical Behavior	<i>33</i>

2.3.3.2	Electrical Output	37
2.3.4	Applications	41
2.3.4.1	Self-Powered Printer	41
2.3.4.2	Wind Gauging System	42
2.3.4.3	Polarization of Ferroelectric Materials	43
2.3.4.4	Self-Powered Wearable Electronics	43
2.3.4.5	Others	46
2.4	Comparison	52
2.5	Conclusion	53
	References	53
<b>3</b>	<b>Electromagnetic–Triboelectric Hybridized Nanogenerators</b>	<b>59</b>
3.1	Introduction	59
3.2	Working Mechanisms	59
3.3	Hybridized Devices Structure and Working Mechanisms	61
3.3.1	Shared-Electrode-Based EMG–TENG	61
3.3.2	Rotating-Disk-Based EMG–TENG	61
3.3.3	Spring-Based EMG–TENG	64
3.3.4	Stretchable EMG–TENG	66
3.3.5	Others	67
3.4	Materials	73
3.4.1	Glass Fibers/Silver Nanowires	74
3.4.2	Composite Materials	74
3.4.3	Materials with Rough Structures	74
3.4.4	Others	75
3.5	Performance	76
3.5.1	Conjunction Manipulation	76
3.5.2	Output Characteristics	77
3.6	Applications	84
3.6.1	Powering Electronic Devices	85
3.6.2	Self-Powered Wearable Electronics	86
3.6.3	Others	87
3.7	Summary and Perspectives	90
	References	91
<b>4</b>	<b>Other Hybridized Nanogenerators</b>	<b>97</b>
4.1	Introduction	97
4.1.1	Nanogenerators for Harvesting Solar Energy	97
4.1.2	Nanogenerators for Harvesting Electrochemical Energy	101
4.2	Hybridized Photoelectric and Piezoelectric Nanogenerator	107
4.2.1	Typical Materials and Structure Design	110
4.2.2	Principles	110
4.2.3	Applications and Performances	115
4.3	Hybridized Photoelectric and Triboelectric Nanogenerator	116
4.3.1	Materials and Fabrication	116
4.3.2	Principles and Performances	116

4.3.3	Applications	119
4.4	Hybridized Photoelectric and Pyroelectric Nanogenerator	122
4.4.1	Materials and Structure Design	122
4.4.2	Principles and Applications	122
4.4.3	Performances	126
4.5	Conclusions and Prospects	128
	References	128
<b>5</b>	<b>Hybridizing Nanogenerators and Sensors</b>	<b>133</b>
5.1	Introduction	133
5.2	Materials	133
5.2.1	Organic Materials	133
5.2.2	Inorganic Materials	134
5.3	Design of Self-Powered Sensors	137
5.3.1	Pressure Sensors	137
5.3.2	Strain Sensors	140
5.3.3	Temperature Sensors	142
5.3.4	Photodetectors	144
5.3.5	Magnetic Sensors	147
5.4	Performance	148
5.4.1	Sensitivity	148
5.4.2	Response Speed	154
5.4.3	Stability	157
5.5	Applications	162
5.5.1	Touch and Motion Detection	162
5.5.2	Strain Detection	163
5.5.3	Temperature Detection	166
5.5.4	Image Sensor	166
5.6	Conclusion and Prospects	168
	References	170
<b>6</b>	<b>Hybridizing Nanogenerators and Energy Storage Devices</b>	<b>173</b>
6.1	Introduction	173
6.2	Working Mechanisms	177
6.2.1	Piezoelectric Nanogenerator-Based Energy Storage Devices	177
6.2.1.1	PENG-Based Li-ion Batteries	177
6.2.1.2	PENG-Based Supercapacitors	178
6.2.2	Triboelectric Nanogenerator-Based Energy Storage Devices	180
6.2.2.1	TENG-Based Lithium-Ion Batteries	180
6.2.2.2	TENG-Based Supercapacitors	186
6.3	Materials	188
6.3.1	Typical Piezoelectric Materials	188
6.3.2	Typical Triboelectric Materials	191
6.3.3	Materials for Lithium-Ion Batteries	194
6.3.4	Materials for Supercapacitors	196
6.4	Devices Structure and Design	198
6.4.1	Piezoelectric Nanogenerator-Based Energy Storage Devices	198

6.4.2	Triboelectric Nanogenerator-Based Energy Storage Devices	201
6.5	Performance	203
6.5.1	The Charging/Discharging Performance of Lithium-ion Batteries and Supercapacitors Based on Piezoelectric Nanogenerators	204
6.5.2	The Charging/Discharging Performance of Triboelectric Nanogenerator-Based Lithium-Ion Batteries and Supercapacitors	205
6.6	Applications	209
6.6.1	Powering Electronic Devices	209
6.6.2	Wearable/Portable Electronics	211
6.6.3	Other Applications	212
6.7	Conclusions and Prospects	212
	References	214
<b>7</b>	<b>Pyroelectric and Thermoelectric Nanogenerators</b>	<b>219</b>
7.1	Introduction	219
7.2	Working Mechanisms	220
7.2.1	Pyroelectric Nanogenerators	220
7.2.2	Thermoelectric Nanogenerators	222
7.2.3	Comparison of Pyroelectric and Thermoelectric Nanogenerators	222
7.3	Progress of Pyroelectric Nanogenerators	223
7.3.1	Typical Pyroelectric Materials	223
7.3.2	Structure Design	227
7.3.3	Performance of Pyroelectric Nanogenerators	231
7.3.4	Applications for Sensing and Electrochemistry	235
7.4	Progress of Thermoelectric Nanogenerators	238
7.4.1	Typical Thermoelectric Materials	238
7.4.2	Structure Design	241
7.4.3	Thermoelectric Performance	245
7.4.4	Applications in Various Fields	247
7.5	Conclusions and Prospects	250
	References	252
<b>8</b>	<b>Photovoltaic–Pyroelectric Coupled Effect Nanogenerators</b>	<b>259</b>
8.1	Introduction	259
8.2	Basic Principle	260
8.2.1	Pyroelectric Effect	260
8.2.2	Photovoltaic Effect	261
8.2.3	Photovoltaic–Pyroelectric Coupled Effect	262
8.2.4	Temperature Dependence of Photovoltaic–Pyroelectric Coupled Effect	265
8.3	Materials	266
8.3.1	ZnO Nanowires	266
8.3.2	BTO Materials	268
8.3.3	BFO Materials	268
8.3.4	Other Materials	269

8.4	Device Design	270
8.4.1	Vertical Structure	270
8.4.2	Planar Structure	271
8.5	Performance	272
8.5.1	Output Electric Signals	272
8.5.2	Resistance	273
8.5.3	Comparison of Vertical- and Planar-Structured Nanogenerators	275
8.5.4	Temperature Dependence	277
8.6	Applications	278
8.6.1	Common Photodetection	279
8.6.2	Image Photodetection	281
8.7	Conclusions and Prospects	286
	References	287
<b>9</b>	<b>Multi-effects Coupled Nanogenerators</b>	<b>293</b>
9.1	Introduction	293
9.2	Materials	294
9.2.1	Semiconductors	294
9.2.2	Inorganic Ferroelectrics	296
9.2.3	Polymeric Ferroelectrics	297
9.3	Device Design and Working Principle	298
9.3.1	Electrode/Bulk Semiconductor/Electrode Structure	298
9.3.2	Electrode/Heterojunction/Electrode Structure	302
9.3.3	Electrode/Ferroelectrics/Electrode Structure	303
9.3.4	Other Structures	306
9.4	Performance	310
9.4.1	Output Characteristics for Harvesting Thermal and Light Energies	310
9.4.2	Output Performance for Scavenging Thermal and Mechanical Energies	315
9.4.3	Output Characteristics for Harvesting Light and Mechanical Energies	315
9.4.4	Output Characteristics for Harvesting Thermal, Light, and Mechanical Energies	316
9.5	Applications	320
9.5.1	Energy-Storage Device Charging	320
9.5.2	Electrics Powering	322
9.5.3	General Sensing	322
9.5.4	Multifunctional Sensing	323
9.5.5	Image Sensing	326
9.6	Conclusions and Prospects	331
	References	331
<b>10</b>	<b>Coupled Nanogenerators for New Physical Effects</b>	<b>337</b>
10.1	Introduction	337
10.2	Pyro-Phototronic Effect	338
10.2.1	Introduction	338

10.2.2	Possible Semiconducting Materials	338
10.2.3	Applications	339
10.3	Ferro-Pyro-Phototronic Effect	341
10.3.1	Introduction	341
10.3.2	Possible Ferroelectric Materials	341
10.3.3	Applications	342
10.4	Thermo-Phototronic Effect	346
10.4.1	Introduction	346
10.4.2	Possible Thermoelectric Materials	346
10.4.3	Applications	347
10.5	Conclusions and Prospects	350
	References	352
