Part I Introduction 1

- 1 **Overview** 3
Masayoshi Esashi
References 10

Part II System on Chip 13

- 2 **Bulk Micromachining** 15
Xinxin Li and Heng Yang
 - 2.1 Process Basis of Bulk Micromachining Technologies 16
 - 2.2 Bulk Micromachining Based on Wafer Bonding 20
 - 2.2.1 SOI MEMS 20
 - 2.2.2 Cavity SOI Technology 27
 - 2.2.3 Silicon on Glass Processes: Dissolved Wafer Process (DWP) 29
 - 2.3 Single-Wafer Single-Side Processes 34
 - 2.3.1 Single-Crystal Reactive Etching and Metallization Process (SCREAM) 34
 - 2.3.2 Sacrificial Bulk Micromachining (SBM) 38
 - 2.3.3 Silicon on Nothing (SON) 40
 - References 45
- 3 **Enhanced Bulk Micromachining Based on MIS Process** 49
Xinxin Li and Heng Yang
 - 3.1 Repeating MIS Cycle for Multilayer 3D structures or Multi-sensor Integration 49
 - 3.1.1 Pressure Sensors with PS³ Structure 49
 - 3.1.2 P+G Integrated Sensors 52
 - 3.2 Pressure Sensor Fabrication – From MIS Updated to TUB 54
 - 3.3 Extension of MIS Process for Various Advanced MEMS Devices 58
 - References 58
