

Index

a

acoustic waves 173, 180
 acousto-optic deflector (AOD) 226–227
 Alzheimer's disease (AD) 130
 5-aminolevulinic acid (ALA) 137, 138,
 140–144, 166, 169, 170, 185, 186, 189,
 190, 270
 animal behavior testing 206
 animal depression 235
 animal eating behavior 234–235
 animal pain behavior 235
 animal reward behavior 235
 anxiety behavior 235
 α -synuclein (α -Syn) 237
 axillary lymph nodes 147

b

bacteriorhodopsin (BR) 209, 211, 212, 214
 blood flow perfusion 86
 brain tumor resection 141, 143–145

c

calcium imaging technology 225, 229
 cancer resection 137, 138, 141, 145–147, 150,
 151
 cardiac electrophysiology 235
 caspase-3 41, 60, 62
 cellular pathways, regulating 233–234
 channelrhodopsin (ChR) 209, 212–214, 216
 cholecystectomy 148–150
 coherent anti-stokes Raman scattering (CARS)
 microscopy 119
 endoscopic 120–121
 principle and limitations 120
 coherent Raman scattering (CRS) microscopy
 119
 biomedical applications
 label-free histology 127–131

Raman tagging and imaging 130, 132,
 133
 challenges 134
 confocal fluorescence microscope 54

d

dark field imaging 260–261
 depth of field (D) 2, 3
 diffraction optical elements (DOE) 25
 digital mirror device (DMD) 3, 5, 222, 223,
 227
 direct dosimetry 180, 181, 184–188
 Doxorubicin (DOX) 178, 269
 dual-modal therapy
 chemotherapy 178
 immunotherapy 179
 magnetic hyperthermia therapy 179
 photothermal therapy 179
 radiotherapy 178
 sonodynamic therapy 179–180
 surgery 177–178

e

electrophysiological signal 205
 epilepsy 216, 231, 236
 explicit dosimetry
 irradiation light 182
 PS concentration 182
 tissue oxygen partial pressure 182–183

f

ferroelectric-liquid-crystal-on-silicon (LCoS)
 display 15
 fiber implantation 219, 221
 fluorescein sodium (FS) 137–138, 140–142,
 182
 fluorescence and luminescence imaging
 261–262

- fluorescence image-guided surgery 137
- advantages 138
 - basics 138–140
 - brain tumor resection 143–145
 - cancer resection 145–147
 - challenges and possible solutions 157–158
 - minimal invasive laparoscopic/endoscopic surgeries 148–152
 - organ transplant surgery 151–152
 - orthopedic surgery 153–155
 - parathyroid gland identification 156–157
 - plastic surgery 152–153
