

## Index

### **a**

accelerated solvent extraction 329  
 acid-catalyzed activations 27  
 acid impregnation 162  
 acoustic cavitation 316, 332  
 acoustic density 317  
 acoustic frequency 317  
 acridinium photocatalysts 269, 279  
 activated carbon (AC) 94, 298  
 agricultural biomass 4, 114  
 agricultural residues 130, 227, 319  
 aldol condensation 58, 59  
   of furanic aldehydes 60–63  
   self-aldol condensation of acetone  
     63–64  
 algal polysaccharides 125  
 alginate 126  
 alkali and alkaline earth metals 155,  
   162, 163  
 alkoxide–vanadium complexes 281  
 alkyl glycosides 35, 36  
 alkyl levulinates 27, 40–42, 47  
 alkyl phenols 46  
 angelica lactone 62, 63, 244  
 (1*R*,5*S*)-anhydroisosaccharino- $\delta$ -lactone  
   (LAC) 157–160  
 anhydrosugars 151–155, 159, 171, 183,  
   298  
 animal fat 325  
 anthocyanins 332  
 aquatic microbial oxygenic autotrophs  
   (AMOPs) 116

aqueous phase reforming (APR) 372  
 Ar–O bond cleavage 278–281  
 aromatic hydrocarbons 167  
 asymmetric bubble collapse 317  
 AuPt alloy electrocatalysts 247  
 azelaic and pelargonic acids 382–385

### **b**

ball milling 33, 359  
 bifunctional basic metal catalysts 61  
 bio-based plastics 2, 9, 113  
 bio-based polyesters 129, 131–132,  
   382–385  
 biobased solvents 11  
 bio-butadiene 388–391  
 bio-1-butanol 127, 388  
 biocatalyst 116  
 biochar 40, 182, 187, 199, 200, 202,  
   205–207, 209, 211, 322  
 biochemical conversion assisted by  
   ultrasound 324  
 biodiesel 3, 4, 6, 8, 28, 58, 68–71, 73, 113,  
   115, 132–133, 192, 238, 246, 325,  
   327, 371–374, 376  
   fatty acid methyl esters (FAME) 59,  
     70, 71, 371, 374  
 bio-ethanol 6, 388, 389  
 biofine process 40, 41  
 biomass extraction process 326  
 biomass pyrolysis 151, 155, 162–164,  
   166–168, 170  
 biomass valorization 2, 59, 315

- biomass valorization (*contd.*)  
 first-generation biomass 3, 149  
 fourth generation 4  
 lignocellulosic biomass 4  
 second-generation biomass 3, 149  
 third-generation biomass 4, 115, 116
- bio-oil 67, 151, 296, 298, 322
- bio-propylene 389
- biorefineries 28, 61, 265
- Bobbit's salt 272
- branched chain unsaturated fatty acids  
 379
- Broido-Shafizadeh model 153
- Brønsted acid 26, 33
- 1,4-butanediol (1,4-BDO) 131, 382, 388
- C**
- $C_{\alpha}-C_{\beta}$  bond cleavage 268–272, 278
- carbazole-derived donor (DCB) 277
- carbohydrates 3, 5, 6, 12, 13, 25, 26, 28,  
 29, 31, 33–37, 39, 41, 43, 44, 47, 113,  
 115, 119, 126–132, 149, 159, 189,  
 207, 244, 265–267, 322, 345, 356
- carbon nanofibers (CNFs) 94
- $C_{\beta}-O$  bond cleavage 272–278
- $[C_4C_{1im}]Cl/CrCl_3$  325
- cellulose 123, 149, 153, 159, 265, 320  
 depolymerization 352–355  
 transformations 351
- cellulosomes 123
- chemical hydrolysis 114, 115
- chemical oxygen demand (COD) 184
- chitinases 356
- chrysolaminarin 124
- commodity chemicals  
 fermentative production  
 of diols 128  
 lower alcohols and olefins 127  
 mono- and di-carboxylic acids 128
- coniferyl alcohol 265
- conventional heating techniques 294,  
 295
- copper-based nanoparticulate co-catalyst  
 278
- co-precipitation method 69
- $C_4$  products 64, 65
- cross-linked enzyme aggregates (CLEAs)  
 119, 120
- crystallinity index (CrI) 154, 349
- $CuBr_2$  catalyst 276
- $Cu^{II}$  co-catalyst 269
- cumulative energy demand (CED) 376
- cyclometallated iridium complex 270
- d**
- deep eutectic solvents (DES) 39, 331
- density functional theory (DFT) 99,  
 242
- deoxygenation 58, 114, 126, 129, 232,  
 299, 324
- deposition-precipitation (DP) 84
- $\alpha$ -D-glucopyranose 231
- $\beta$ -D-glucopyranose 231, 319
- D-glucose 130, 230–233, 244, 302, 354
- 2,3-dichloro-5,6-dicyano-1,4-  
 benzoquinone (DDQ)  
 photocatalyst 277
- 9,10-dicyanoanthracene (DCA)  
 photocatalyst 268
- dielectric heating 291
- dielectric properties of biomass 292
- diethylene glycol 322
- 2,5-dihydroxymethyl tetrahydrofuran  
 (DHMTHF) 95
- 9,10-dihydroxystearic acid 384
- 2,5-dimethyl-2,3-dihydrofuran (DMDHF)  
 238
- 2,5-dimethylfuran (2,5-DMF) 238
- dioxasolv lignin 271
- 4,4'-bis(diphenylamino)benzophenone  
 (DPA-BP) photocatalyst 276
- discrete element method (DEM) 348
- drop-in chemicals 182, 207, 209, 369
- dual photocatalytic system 275

**e**

- ENI/UOP Ecofining™ technology 377
- electrocatalytic oxidation 231, 232, 236
- electrochemical conversions
  - bio-based molecules 228–230
  - conversion of sugars 230–234
- electrochemical CO<sub>2</sub> reduction reaction (CO<sub>2</sub>RR) 252
- electrochemical reductive ring opening 240
- electrogenerated acid (EGA) 234
- electrolysis 228
- electromagnetic energy 291, 294–296, 304
- electron energy loss spectroscopy (EELS) 102
- electrosynthesis 228
- enzymatic depolymerization 122–123, 126
- enzymatic hydrolysis
  - cellulose and hemicellulose 123–124
  - of starch 121–122
  - 3G polysaccharides 124–126
- enzyme–ferromagnetic particle composites 120
- enzyme immobilization 119
- essential oils 328
- esterifications 355

**f**

- fatty acid/glycerol-based solvents 12
- fatty acid polymerisation 379
- ferrierites 379
- ferromagnetic magnetite 120
- Fischer–Tropsch process 114
- flavonoids 332
- fluidized bed reactors 249
- formic acid (HCO<sub>2</sub>H) 273
- 5-formyl-2-furancarboxylic acid (FFCA) 102
- free fatty acids (FFA) 376
- furanic aldehydes 36, 60–63

- 2,5-furandicarboxylic acid (FDCA) 9, 234, 385
- furanochalcones 61, 62
- furanic compounds synthesis 325
- furans 36, 38–40, 57, 67, 82, 151, 166, 297
- furfural 62, 115, 164, 240, 325
- furfuryl alcohol 87–89, 325
- furoic acid 325

**g**

- glucanases 125
- β-glucosidases 123–125, 355
- glycerol 59, 246, 267, 372
- glycerol carbonate (GC) 71
- glycerol carbonylation 72
- gluconic acid 8, 82, 128, 129, 231, 253
- green diesel 374–376
- green solvents 320
- guaiacyl alcohol 265
- Guerbet reaction 58, 64–65

**h**

- hardwood lignin 265
- hemicelluloses 3, 5, 10, 13–15, 29, 36–40, 81, 82, 86, 113–115, 123–125, 149, 150, 163, 164, 166, 181, 228, 240, 265, 298, 299, 301–303, 315, 319, 320, 322–324, 332, 359, 370
- heterogeneous acid catalysts 57, 58, 379
- heterogeneous base catalysts 64, 68
- heterogeneous semiconductor photocatalysts 267
- 2,5-hexanedione 240
- high-speed microjets 317
- humins 9
- hybrid thermochemical–biological approach 182–185, 191, 195, 197, 289
- hydrodeoxygenation (HDO) 62, 374
- hydrogenation 93
- hydroisomerisation catalysts 377
- hydrolytic processing 30

- hydrotreated vegetable oil (HVO) 374  
 5-hydroxy-furan-2(5H)-one (5-HFO) 243  
 2,5-bis(hydroxymethyl)furan (BHMF)  
   131, 234, 237, 239  
 5-hydroxymethyl-2-furancarboxylic  
   (HMFCA) acid 237  
 5-hydroxymethylfurfural (5-HMF) 36,  
   115, 325, 385  
   ECH and direct electroreduction  
     238–240  
   oxidation 96, 235–238  
 3-hydroxypropionic acid 8, 129
- i**
- IFP-Michelin patent 390  
 imidazolium salts 34, 36, 46  
 impregnation method 83  
 incipient wetness impregnation (IWI)  
   procedure 84  
 indirect electrolysis 229  
 inner-sphere electron transfer approach  
   270  
 intramolecular proton-coupled electron  
   transfer (PCET) reaction 270,  
   281  
*in vitro* evolution techniques 118  
 ionic liquids (IL) 11, 14, 33, 122, 123,  
   163, 164, 171, 242, 325, 327, 331  
 Ir-based photocatalyst 273  
 isostearic acids 379, 382
- k**
- ketonization reaction 58, 59, 65  
 ketyl radical-anion intermediates 281  
 Kolbe electrolysis reaction 245
- l**
- lactic acid 8, 28, 42, 128, 247, 252, 303,  
   385  
 laminarin 124  
 levoglucosan (LG) 154  
 levoglucosenone (LGO) 156  
 levulinic acid 244  
 Lewis acid 26–29, 35–37, 40, 41, 43, 46,  
   66, 72, 94, 153, 155, 391  
 life cycle assessment (LCA) 369, 379
- ligand-to-metal charge transfer (LMCT)  
   271  
 light-absorbing photoredox catalyst 266  
 lignin 5, 44, 150, 265, 320  
   depolymerization 248  
   fraction 319  
 lignin pyrolysis 160  
 lignocellulosic 4, 5, 57, 114, 150, 152,  
   161, 168, 265, 315, 319  
 lipases 119, 132, 133, 359  
 liquefaction 324, 345  
 liquid assisted grinding (LAG) 344, 356  
 low ultrasound frequencies 316, 324, 326
- m**
- macroalgae 116  
 magnetizable immobilized enzymes 124  
 maleic acid (MA) 243  
 mechanochemical transformations  
   amino acids and nucleotides 357–359  
   chitin 355–357  
 mechanochemistry  
   cellulose depolymerization 352–355  
   cellulose modification 355  
   chitin and lignin 343  
   crystallinity reduction in biopolymers  
     348–351  
   lignin 359  
 mechanoenzymatic reactions 355, 358  
 Meisenheimer-type intermediate 280  
 metal oxide anodes 232, 237  
 metal trifluoromethanesulfonates 41  
 methanogens 191, 194, 196, 203–206,  
   209  
 mesocellular siliceous foam (MCF) 274  
 metal-based nanocatalysts 82  
 metal chlorides 163  
 metal nanoparticles (NPs) 81  
 2-methylfuran 90–92  
 5-methylfurfural (5-MF) 240  
 methyl furoate 87  
 methyl isobutyl ketone (MIBK) 63  
 2-methyl tetrahydrofuran (2-MeTHF) 87  
 microalgae 40, 115, 116, 124, 168, 378  
 microbial mixed consortia (MMC) 183,  
   185, 191–193, 198

- microbubbles 316, 325  
microflow reactors 249  
microjets 326  
microwave absorbing biomasses 294  
microwave-assisted extraction (MAE) 304  
microwave-assisted hydrolysis 299–303  
microwave-assisted hydrothermal processes 291  
microwave-assisted pyrolysis 291, 296–299  
microwave-assisted solvent extraction (MASE) 304, 305  
microwave co-absorber materials 296  
microwave energy (MW) 330  
microwave heating-based techniques 291  
microwave hydrodiffusion and gravity (MHG) 304  
milling process 353  
mixed culture biotechnology (MCB) 184  
mixed metal oxides 58, 63, 64, 69, 71  
mixer/shaker mills and planetary mills 346–348  
monoglycerides 70, 71  
monolignols 265  
monometallic catalysts 100  
monooxygenase 123  
multienzyme complexes 123
