Preface *xi*

- 1 Organometallic Manganese Compounds in Organic Synthesis** *1*
Alina A. Grineva, Noël Lugan, and Dmitry A. Valyaev
- 1.1 Introduction *1*
- 1.2 Basic Manganese Precursors Relevant to Organometallic Chemistry *1*
- 1.3 Overview of the Synthetic Chemistry for Main Classes of Mn(I) Complexes *3*
- 1.4 Planar Chiral Ligands Based on Cymantrene Scaffold *7*
- 1.5 Mn(I)-Mediated Transformations in Organic Synthesis *11*
- 1.5.1 Ring-Centered Reactivity in Half-Sandwich Mn(I) π -Complexes *11*
- 1.5.2 Preparation of Allenes Using [Cp'(CO)₂Mn] Auxiliary *16*
- 1.5.3 Synthetic Applications of Mn(I) Fischer Carbenes *18*
- 1.5.4 Carbonyl-Containing Manganese σ -Complexes in Organic Synthesis *23*
- 1.5.5 Mn-Mediated Synthesis of Organophosphorous Compounds *25*
- 1.5.6 Backbone Modification of N-heterocyclic Carbenes in Mn(I) Coordination Sphere *30*
- 1.6 Summary and Conclusions *30*
References *32*
- 2 Manganese-Catalyzed Hydrogenation and Hydrogen Transfer Reactions** *39*
Jean-Baptiste Sortais, Ruqaya Buhaibeh, and Yves Canac
- 2.1 Introduction *39*
- 2.2 Pincer-Type Manganese Complexes *40*
- 2.2.1 PNP Ligands *40*
- 2.2.1.1 PN-sp³P Ligand *41*
- 2.2.1.2 PN-sp²P Ligand *43*
- 2.2.2 PNN Ligands *47*
- 2.2.2.1 PN-sp³N Ligand *48*
- 2.2.2.2 PN-sp²N Ligand *50*
- 2.2.3 NNN Ligands *51*

2.3	Non-pincer-Type Manganese Complexes	52
2.3.1	NN Ligands	52
2.3.1.1	N-sp ³ ,N-sp ³ Ligand	52
2.3.1.2	N-sp ² ,N-sp ² Ligand	53
2.3.1.3	N-sp ² ,N-sp ³ Ligand	54
2.3.2	PP Ligands	55
2.3.3	NP Ligands	57
2.3.3.1	N-sp ³ ,P-sp ³ Ligand	57
2.3.3.2	N-sp ² ,P-sp ³ Ligand	58
2.3.4	CP Ligand	59
2.3.5	CN Ligand	60
2.4	Other Manganese Complexes	61
2.4.1	Monodentate Ligand	61
2.4.2	Tetradentate Ligand	62
2.5	Conclusions	63
	References	63
3	Manganese-Catalyzed Hydrogen-Borrowing and Dehydrogenative Coupling Reactions	67
	<i>Stefan Weber and Karl Kirchner</i>	
3.1	Introduction	67
3.2	Acceptorless Dehydrogenative Coupling (ADC)	68
3.2.1	Synthesis of Aldimines, Cyclic Imides, and Amides	69
3.2.2	Synthesis of Esters and Functionalizations of Nitriles and Alkanes	73
3.2.3	Synthesis and Derivatization of Heterocycles	76
3.3	Hydrogen-Borrowing Reactions	79
3.3.1	Alkylation of Amines	82
3.3.2	Alkylation of Alcohols and Ketones	85
3.3.3	Alkylation of Amides and Esters	89
3.3.4	Alkylation of Nitriles and Sulfonamide	90
3.3.5	Upgrading of Ethanol into 1-Butanol	93
3.3.6	Alkylation of Hydrazine	94
3.3.7	Combining Acceptorless Dehydrogenative Coupling with Hydrogen-Borrowing	94
3.4	Conclusions and Perspectives	96
	References	96
4	Manganese-Catalyzed Hydrosilylation and Hydroboration Reactions	101
	<i>Thao T. Nguyen and Ryan J. Trovitch</i>	
4.1	Introduction	101
4.2	Hydrosilylation	102
4.2.1	Hydrosilylation of Carbonyls and Carboxylates	102
4.2.2	Hydrosilylation of Amides	115
4.2.3	Hydrosilylation of Carbon Dioxide	117
4.2.4	Hydrosilylation of C=C and C≡C Bonds	118
4.2.4.1	Olefin Hydrosilylation	118

4.2.4.2	Alkyne Hydrosilylation	122
4.3	Hydroboration	124
4.3.1	Hydroboration of C=O Bonds	125
4.3.2	Hydroboration of Alkenes	129
4.3.3	Hydroboration of Alkynes	130
4.3.4	Hydroboration of Nitriles	131
4.4	Summary and Conclusions	132
	References	133
5	Manganese Complexes for Electro- and Photocatalytic Transformations	137
	<i>Sergio Fernandez, Geyla C. Dubed Bandomo, and Julio Lloret-Fillol</i>	
5.1	Introduction	137
5.2	Mn-Catalyzed Organic Oxidations	138
5.3	Mn-Catalyzed Reductions and Other Organic Transformations	145
5.4	Mn-Catalyzed CO ₂ Reduction	157
5.4.1	Electrocatalytic CO ₂ Reduction with Manganese-Based Catalysts	158
5.4.1.1	Pyridine-Based Complexes	160
5.4.1.2	Diimine-Based Complexes	167
5.4.1.3	N-Heterocyclic Carbene-Based Complexes	167
5.4.2	Photochemical CO ₂ Reduction	171
5.4.3	Heterogenization of Molecular Mn Catalysts for the CO ₂ Reduction Reaction	174
5.5	Conclusions	175
	References	176
6	Manganese-Catalyzed C–H Oxygenation Reactions	183
	<i>Konstantin P. Bryliakov</i>	
6.1	Introduction	183
6.2	Selective Manganese-Catalyzed C–H Oxidation Reactions: Early Studies	184
6.3	Manganese-Catalyzed Chemo- and Regioselective C–H Oxidations with Hydrogen Peroxide	187
6.4	Manganese-Catalyzed Enantioselective C–H Oxidations	191
6.5	Manganese-Catalyzed Oxidative Desymmetrizations	194
6.6	Mn-Catalyzed Oxidative Kinetic Resolution of <i>sec</i> -Alcohols	195
6.7	Mn-Catalyzed Oxidation of Aromatic Compounds	197
6.8	Summary and Conclusions	199
	Acknowledgment	199
	References	200
7	Manganese-Catalyzed Organometallic C–H Activation	203
	<i>Yunhui Yang and Congyang Wang</i>	
7.1	Introduction	203
7.2	Stoichiometric Cyclometalation with Manganese Complexes	204
7.3	Manganese-Catalyzed C–C Bond Formation via Directed C–H Activation	206

- 7.3.1 Insertion of $C\equiv C$ Bonds into Manganacycles 206
- 7.3.2 Insertion of $C=C$ Bonds into Manganacycles 222
- 7.3.3 Insertion of Allene into Manganacycles 231
- 7.3.4 Insertion of $C=X$ ($X = O, N$) Bond into Manganacycles 236
- 7.3.5 Miscellaneous Reactions Involving C–H Activation 244
- 7.4 Summary and Outlook 252
- References 252

- 8 Manganese-Catalyzed Cross-Coupling Processes 257**
Xiaoping Liu, Florian Jaroschik, and Marc Taillefer
- 8.1 Introduction 257
- 8.2 C–C Bond Formation via Mn-Catalyzed Cross-Coupling Reactions 258
 - 8.2.1 Mn-Catalyzed Kumada Cross-Coupling Reactions 258
 - 8.2.1.1 Aryl Halides with Grignard Reagents 258
 - 8.2.1.2 Heteroaryl Halides with Grignard Reagents 263
 - 8.2.1.3 Vinyl(Pseudo)Halides with Grignard Reagents 266
 - 8.2.1.4 Conclusion on Mn-Catalyzed Kumada Cross-Coupling Reactions 269
 - 8.2.2 Mn-Catalyzed Stille Cross-Coupling Reactions 270
 - 8.2.3 Mn-Catalyzed Coupling Reactions of Organometallic Reagents Under Oxidative Conditions 273
 - 8.2.3.1 Homocoupling Reactions 274
 - 8.2.3.2 Heterocoupling Reactions 276
 - 8.2.4 Mechanistic Insights 279
 - 8.2.5 Conclusion on Mn-Catalyzed Coupling Reactions of Organometallic Reagents Under Oxidative Conditions 282
- 8.3 Mn-Catalyzed Carbon–Heteroatom Bond Formation 282
 - 8.3.1 C–N Bond Formation 282
 - 8.3.2 C–O Bond Formation 285
 - 8.3.3 C–S Bond Formation 286
 - 8.3.4 C–B Bond Formation 288
 - 8.3.5 Conclusion on Mn-Catalyzed C–Y Bond Formation 289
- 8.4 Summary and Conclusions 290
- Acknowledgment 291
- References 291

- 9 Manganese(III) Acetate-Mediated Cyclizations 293**
Barry B. Snider
- 9.1 Introduction 293
- 9.2 Mechanistic Considerations 293
- 9.3 Monocyclizations 296
 - 9.3.1 Radicals Derived from β -Keto Esters and β -Diketones that Lead to Cycloalkanones 296
 - 9.3.2 Radicals Derived from β -Keto Esters, β -Diketones, or Malonate Esters that Lead to Cycloalkanes 298
 - 9.3.3 Formation of Lactones 301

9.3.4	Formation of Lactams	302
9.3.5	Cyclizations to Aromatic Rings	304
9.4	Tandem, Triple, and Tetra Cyclizations	306
9.4.1	Addition to a Double Bond and Then an Aromatic Ring	306
9.4.2	Addition to Two Double Bonds	307
9.4.3	Triple and Tetra Cyclizations	311
9.4.3.1	Triple Cyclizations	311
9.4.3.2	Tetracyclizations	311
9.5	Asymmetric Induction	313
9.6	Oxidations of Ketones	315
9.7	Summary and Conclusions	316
9.8	Addendum	317
	References	318
10	Manganese-Catalyzed Dihydroxylation and Epoxidation of Olefins	323
	<i>Niek N.H.M. Eisink and Wesley R. Browne</i>	
10.1	Introduction	323
10.2	Oxidant	326
10.3	Use of Additives	326
10.4	<i>In Situ</i> Generated Catalysts	330
10.5	Activation of H ₂ O ₂ : Beyond High Valent Manganese Intermediates	334
10.6	Enantioselective Manganese-Based Oxidation Catalysts	338
10.7	Conclusions	341
	References	341
	Index	345
