Preface *xiii*

Acknowledgments *xv*

1	Fluoropolymers for Membranes	1
1.1	Membrane Technology	1
1.2	Fluoropolymers for Membranes	4
1.3	PVDF and Its Copolymer	4
1.3.1	Homopolymeric PVDF	10
1.3.2	Poly(Vinylidene Fluoride-co-Tetrafluoroethylene) (P(VDF-co-TFE))	14
1.3.3	Poly(Vinylidene Fluoride-co-Hexafluoropropene) (P(VDF-co-HFP))	18
1.3.4	Poly(Vinylidene Fluoride-co-Chlorotrifluoroethylene) P(VDF-co-CTFE)	19
1.3.5	Poly(Vinylidene Fluoride)-g-Poly(Styrene Sulfonic Acid) PVDF-g-PSSA	19
1.3.6	Poly(Vinylidene Fluoride-Trifluoroethylene) (P(VDF-TrFE))	21
1.4	PTFE and Its Copolymer	22
1.4.1	Homopolymeric PTFE	22
1.4.2	Perfluorosulfonic Acid-PFSA	25
1.4.3	Poly(Tetrafluoroethylene-co-Perfluoropropyl Vinyl ether) (PFA)	27
1.4.4	Tetrafluoroethylene Hexafluoropropylene Copolymer-FEP	28
1.4.5	Ethylene Tetrafluoroethylene Copolymer-ETFE	29
1.5	ECTFE and Other Fluoropolymers	29
	References	31
2	Fabrication and Modification of Fluoropolymeric Membranes	41
2.1	Overview of Fluoropolymeric Membrane Fabrication and Modification	41
2.2	Fluoropolymeric Membrane Fabrication	41
2.2.1	Solvent Evaporation	42
2.2.2	Non-Solvent Induced Phase Separation	42
2.2.3	Thermally Induced Phase Separation	46
2.2.4	Vapor-Induced Phase Separation	49
2.2.5	Electrospinning	52

2.2.6	Stretching	54
2.2.7	Newly Emerging Fabrication Methods	55
2.3	Fluoropolymeric Membrane Modification	58
2.3.1	Surface Coating	58
2.3.2	Surface Grafting	60
2.3.3	Blending	61
2.3.4	Pore Filling	61
2.3.5	Copolymerization	61
2.3.6	Atom Transfer Radical Polymerization	62
	References	63
3	Poly(Vinylidene Fluoride) (PVDF) Membrane	71
3.1	Overview of PVDF Membrane	71
3.2	Fabrication of PVDF Membrane	71
3.2.1	Phase Separation Method	71
3.2.1.1	Non-Solvent-Induced Phase Separation (NIPS) Process	72
3.2.1.2	Thermally Induced Phase Separation	73
3.2.1.3	Non-Solvent Thermally Induced Phase Separation	75
3.2.1.4	Vapor-Induced Phase Separation	77
3.2.2	Electrospinning	77
3.2.3	Evaporation-Induced Phase Separation Method	79
3.2.4	Freezing	81
3.3	Modification of PVDF Membrane	82
3.3.1	Hydrophilic Modification	82
3.3.2	Hydrophobic Modification	84
3.3.3	Piezoelectric Modification	85
3.4	Processes of PVDF Membrane	87
3.4.1	PVDF Membrane for Membrane Distillation and Crystallization	87
3.4.1.1	Membrane Distillation	87
3.4.1.2	Membrane Crystallization	87
3.4.2	PVDF Membrane for Membrane Condenser	94
3.4.3	Piezoelectric PVDF Membrane Process	96
3.4.3.1	Reducing Membrane Fouling	96
3.4.3.2	Biomaterials and Tissue Engineering	98
	References	100
4	Poly(tetrafluoroethylene) (PTFE) Membrane	111
4.1	Overview of PTFE Membrane	111
4.1.1	Structure of PTFE	111
4.1.2	Properties of PTFE	112
4.1.3	PTFE Membranes	114
4.2	Fabrication of PTFE Membrane	115
4.2.1	Preparation of PTFE Flat Membrane	117
4.2.2	Preparation of PTFE Hollow Membrane	117
4.2.2.1	Pressing-Stretching-Sintering Method	118

4.2.2.2	Dry-Wet Spinning	119
4.2.2.3	Paste Extrusion-Stretching	120
4.2.2.4	Pore-Forming Agent-Assisted Sintering Method	121
4.2.2.5	Wrapping	122
4.2.3	Electrospinning	124
4.3	Modification of PTFE Membrane	125
4.3.1	Surface Modification	125
4.3.2	Filler Modification	127
4.4	PTFE Coating	128
4.5	Processes of PTFE Membrane	129
4.5.1	Membrane Distillation	129
4.5.2	Oil-in-Water Emulsions	129
4.5.3	Membrane Absorption	130
4.5.4	Membrane Degassing	132
4.5.5	MBR/MABR	133
4.5.5.1	MBR	133
4.5.5.2	MABR	135
4.5.6	Membrane Emulsification	135
	References	137
5	ECTFE Membrane	143
5.1	Overview of ECTFE Membrane	143
5.2	Fabrication of ECTFE Membrane	144
5.2.1	ECTFE Membrane Fabricated by TIPS Method	144
5.3	Modification of ECTFE Membrane	149
5.3.1	Graft Copolymerization	149
5.3.2	Surface Oxidation	150
5.4	Processes of ECTFE Membrane	151
5.4.1	ECTFE Membrane for Membrane Condenser	151
5.4.2	ECTFE Membrane for Membrane Distillation	154
5.4.3	ECTFE Membrane for Organic Solvent Filtration	154
5.4.4	ECTFE Membrane for Proton Exchange Membrane Fuel Cell (PEMFC)	157
5.4.5	ECTFE Membrane for Oil–Water Emulsion Separation	157
	References	159
6	Other Fluoropolymers for Membranes	161
6.1	Fluorinated Copolymers	162
6.1.1	Fluorinated Block Copolymers	162
6.1.2	Graft Copolymer	163
6.2	Hyflon AD	163
6.2.1	Introduction	163
6.2.2	Preparation Process	164
6.2.3	Application	164
6.3	PFPE	166

6.3.1	Introduction	166
6.3.2	Preparation Process	166
6.3.3	Application	167
6.4	Copolymerization of Chlorotrifluoroethylene (CTFE) and Vinyl Ethers (VEs)	168
6.4.1	Introduction	168
6.4.2	Application	169
6.4.3	Polymer/Protein Complexes	169
6.5	PCTFE	170
6.5.1	Introduction	170
6.5.2	Preparation Process	171
6.5.3	Application	171
	References	172
7	Fluoropolymer Membranes in Water Treatment	175
7.1	Introduction	175
7.2	Fluoropolymer Membranes for Producing Drinking Water	175
7.2.1	Introduction to the Application of Membrane Technology in Drinking Water Treatment	175
7.2.2	Fluoropolymer Membrane for Producing Drinking Water	177
7.2.3	Typical Application Cases	178
7.2.3.1	Household Water Purification System	178
7.2.3.2	Municipal Tap Water Treatment	178
7.3	Fluoropolymer Membranes for Treating Municipal Sewage	179
7.3.1	Introduction of Municipal Sewage	179
7.3.2	Fluoropolymer Membrane for Treating Municipal Sewage	179
7.4	Fluoropolymer Membrane for Desalinating Seawater	183
7.4.1	Typical Purification Technology of Desalinating Seawater	183
7.4.2	Fluoropolymer Membrane for Desalinating Seawater	184
7.5	Fluoropolymer Membrane for Treating Industrial Wastewater	185
7.5.1	Typical Membrane Separation Technology for Treating Industrial Wastewater	185
7.5.2	Fluoropolymer Membrane for Treating Industrial Wastewater	186
	References	189
8	Fluoropolymers for Membrane Contactor and Pressure-Driven Applications	197
8.1	Introduction	197
8.1.1	Poly(Vinylidene Fluoride)	198
8.1.2	Polytetrafluoroethylene	199
8.1.3	Ethylene-chlorotrifluoroethylene	200
8.1.4	Other Fluoropolymers	200
8.1.4.1	Hyflon	200
8.2	Fluoropolymers in Membrane Contactors	201

8.2.1	Membrane Distillation	201
8.2.1.1	Poly(Vinylidene Fluoride) Membranes in MD: Some Examples	204
8.2.1.2	Polytetrafluoroethylene Membranes in MD: Some Examples	204
8.2.1.3	Ethylene-Chlorotrifluoroethylene Membranes in MD: Some Examples	205
8.2.1.4	Hydrophobicity in MD Applications	205
8.2.1.5	Wetting and Fouling Prevention in MD Applications	207
8.2.1.6	Omniphobicity	207
8.2.1.7	Amphiphilicity	208
8.2.2	Membrane Crystallization	208
8.2.3	Membrane Dryers	210
8.2.4	Membrane Emulsification	210
8.2.5	Membrane Condenser	214
8.3	Pressure-Driven Membrane Processes	216
8.3.1	Ultrafiltration	217
8.3.2	Microfiltration	218
8.4	Conclusions	219
	References	220
9	Fluoropolymers for Fuel Cell: Membranes and Ionomers	233
9.1	Introduction	233
9.1.1	Fuel Cell Technology	233
9.1.2	Proton Exchange Membrane Fuel Cell	233
9.1.3	Direct Methanol Fuel Cell	235
9.1.4	Anion Exchange Membrane Fuel Cell	236
9.2	Fluoropolymers for Fuel Cells	237
9.3	Radiation Grafting	241
9.4	Fluoropolymers for PEMFC	243
9.5	Fluoropolymers for Direct Methanol Fuel Cell	248
9.6	Fluoropolymers for Anion Exchange Membrane Fuel Cell	250
9.7	Fluoropolymers as Binder Materials	254
9.8	Conclusions	257
	References	258
10	Fluoropolymers for Lithium-Ion Battery Separator	265
10.1	Introduction	265
10.1.1	Li-Ion Battery	265
10.2	Requirements of Li-Ion Battery Separators	268
10.3	Types and Fabrication of Separators	270
10.4	Gel Polymer Electrolytes	272
10.5	Fluoropolymers for Membrane Separators and Polymer Electrolytes	273
10.5.1	PVDF	273
10.5.2	Poly(Vinylidene Fluoride-Hexafluoro Propylene)	276

10.6	Next-Generation Li Battery	277
10.6.1	Li-Air Battery Separator	279
10.6.2	Li-S Battery Separator	280
10.7	Conclusions	281
	References	282
