Contents

Preface *xiii*

1 Vapor Phase Growth of Metal-Oxide Thin Films and Nanostructures *1*
Lynette Keeney and Ian M. Povey
1.1 Introduction to Vapor Phase Deposition *1*
1.2 Vapor Phase Deposition Methodologies *1*
1.2.1 Chemical Vapor Deposition *2*
1.2.2 Atomic Layer Deposition *2*
1.3 Precursors and Chemistry *3*
1.4 Applications of Metal-Oxide Vapor Phase Deposition *4*
1.4.1 Case Study 1: Ferroelectric Oxide Materials *4*
1.4.1.1 Ferroic Thin Films *5*
1.4.2 Case Study 2: Dielectric Oxide Materials *18*
1.5 Conclusions *27*
References *28*

2 Addressing Complex Transition Metal Oxides at the Nanoscale: Bottom-Up Syntheses of Nano-objects and Properties *43*
David Portehault, Francisco Gonell, and Isabel Gómez-Recio
2.1 Introduction *43*
2.2 Multicationic Oxides *45*
2.2.1 Layered Oxide-Based Materials *45*
2.2.2 Oxidation States Stable in Organic Media: The Case of Perovskites *50*
2.2.3 Oxidation States Poorly Stable in Organic Media: The Case of Perovskites *54*
2.3 Oxides with Uncommon Metal Oxidation States: The Case of Titanium(III) in Oxides and Extension to Tungsten Oxides *58*
2.3.1 Crystal Structures and Requirements for the Synthesis of Oxides Bearing Titanium(III) Species *59*
2.3.2 Ti_2O_3 Nanostructures *61*
2.3.3 Mixed Valence Ti(III)/Ti(IV) Oxides: Magnéli Phases *63*

2.3.4 Comparison to Metal Oxidation States Stable in Organic Media: Mixed W(V)/W(VI) Oxides *68*
2.4 Stabilization of New Crystal Structures at the Nanoscale *73*
2.4.1 Hard Templating to Isolate Bulk Metastable Oxides at High Temperatures *74*
2.4.2 Beyond Hard Templating for Isolating Nanostructures of Metastable Oxides *75*
2.4.3 Colloidal Syntheses *75*
2.5 Concluding Remarks *76*
References *77*

3 Nanosized Oxides Supported on Arrays of Carbon Nanotubes: Synthesis Strategies and Performances of TiO_2/CNT Systems *89*
Maria Letizia Terranova and Emanuela Tamburri
3.1 Introduction *89*
3.2 Synthesis Strategies for Preparation of CNT Arrays *90*
3.3 Selected Examples of Supported Nano-oxides *91*
3.4 A Focus on the TiO_2/CNT Systems *93*
3.4.1 Synthesis of TiO_2 on CNT *99*
3.4.1.1 Wet Chemistry *100*
3.4.1.2 Vacuum Techniques *103*
3.5 Concluding Remarks *107*
References *108*

4 Computational Approaches to the Study of Oxide Nanomaterials and Nanoporous Oxides *111*
Ettore Fois and Gloria Tabacchi
4.1 Introduction *111*
4.2 Overview of Theoretical Approaches *113*
4.3 Molecular Behavior at Nanomaterials Surfaces *114*
4.3.1 Molecular Interactions on Manganese Oxide Nanomaterials *114*
4.3.2 Insight on Molecule-to-Material Conversion in Chemical Vapor Deposition *116*
4.4 Oxide Porous Materials *121*
4.4.1 Structural Properties *121*
4.4.2 Behavior Under High-Pressure Conditions *124*
4.4.3 Hybrid Microporous Functional Materials *127*
4.5 Outlook and Perspectives *131*
References *133*

5 Functional Spinel Oxide Nanomaterials: Tailored Synthesis and Applications *137*
Zheng Fu and Mark T. Swihart
5.1 Introduction and Topic Overview *137*

5.2 Syntheses *138*
5.2.1 Vapor Phase *138*
5.2.1.1 Chemical Vapor Deposition *138*
5.2.1.2 Atomic Layer Deposition *138*
5.2.1.3 Spray Pyrolysis *140*
5.2.1.4 Laser Pyrolysis *141*
5.2.1.5 Plasma Methods *142*
5.2.2 Solution Phase *143*
5.2.2.1 Sol–Gel Methods *143*
5.2.2.2 Hydrothermal Methods *143*
5.2.2.3 Thermal Decomposition *143*
5.2.2.4 Solvothermal Methods *145*
5.2.3 Solid Phase *146*
5.2.3.1 Solid-State Thermal Decomposition *146*
5.2.3.2 Combustion *147*
5.2.3.3 Ball Milling *148*
5.2.3.4 High-Temperature Solid Solution Method *148*
5.3 Structure–Effect Applications *150*
5.3.1 One-Dimensional (1D) Structures *151*
5.3.1.1 Nanorods *151*
5.3.1.2 Nanowires *154*
5.3.1.3 Nanotubes *154*
5.3.2 Two-Dimensional (2D) Structures *159*
5.3.2.1 Nanofilms *159*
5.3.2.2 Nanosheets *159*
5.3.2.3 Nanoplatelets *163*
5.3.3 Three-Dimensional (3D) Structures *165*
5.3.4 One- and Two-Dimensional (1&2D) Structure *170*
5.3.5 One- and Three-Dimensional (1&3D) Structures *171*
5.3.6 Two- and Three-Dimensional (2&3D) Structure *173*
5.4 Self-Assembled Structures *175*
5.5 Conclusions and Future Perspectives *180*
References *184*

6 Photoinduced Processes in Metal Oxide Nanomaterials *193*
Nikolai V. Tkachenko and Ramsha Khan
6.1 Introduction *193*
6.2 Photophysics of Bulk MOs *195*
6.2.1 Energy-Level Structure and Steady-State Spectra *195*
6.2.2 Photoexcitation and Relaxation Dynamics *201*
6.2.3 Emission Decay Kinetics, Time-Resolved PL *203*
6.2.4 Transient Absorption (TA) Spectroscopy *205*
6.3 Nanostructures *208*
6.3.1 Quantum Confinement *208*
6.3.2 Surfaces and Interfaces *211*

6.4 Photophysical Aspects of MO Applications *218*
6.4.1 Solar Cells *218*
6.4.2 Light Emitting Devices *219*
6.4.3 Photocatalysis *219*
6.4.4 Photodegradation *219*
6.4.5 Solar Driven Chemistry *220*
6.5 Conclusions *220*
References *221*

7 Metal Oxide Nanomaterials for Nitrogen Oxides Removal in Urban Environments *229*
M. Cruz-Yusta, M. Sánchez, and L. Sánchez
7.1 Introduction: Photocatalytic Removal of Nitrogen Oxides Gases *229*
7.2 TiO_2-Based Materials *230*
7.2.1 Tailoring the Energy Band Gap and Edges' Potentials *231*
7.2.2 Dopant Elements and Quantum Dots *234*
7.2.3 Defects, Vacancies, and Crystal Facets in the TiO_2 Nanostructure *235*
7.2.4 Composites/Substrates *236*
7.2.5 Titanium-Based Oxides *237*
7.3 Alternative Advanced Photocatalysts *238*
7.3.1 Bismuth Oxides *238*
7.3.2 Tin- and Zinc-Based Oxides *242*
7.3.3 Transition Metal Oxides *247*
7.4 New Insights into the NOx Gases Photochemical Oxidation Mechanism *251*
7.5 Field Studies in Urban Areas *253*
7.5.1 Photocatalytic Construction Materials *253*
7.5.2 Field Studies of NOx Abatement in Real Environments *254*
7.6 Conclusions and Perspectives *256*
References *259*

8 Synthesis and Characterization of Oxide Photocatalysts for CO_2 Reduction *277*
Fernando Fresno and Patricia García-Muñoz
8.1 Introduction *277*
8.2 Fundamentals of Heterogeneous Photocatalysis *279*
8.3 Applications of Heterogeneous Photocatalysis *281*
8.4 Photocatalytic CO_2 Reduction: State of the Art and Main Current Issues *283*
8.4.1 TiO_2-Based Photocatalysts for CO_2 Reduction *286*
8.4.2 Other Oxide Photocatalysts *291*
8.5 Oxide-Based Heterojunctions and Z-Scheme Photocatalytic Systems *295*
8.5.1 Cocatalysts for CO_2 Reduction: Metal-Oxide Synergies *299*
8.6 Conclusions and Future Perspectives *303*
References *303*

9 Functionalized Titania Coatings for Photocatalytic Air and Water Cleaning *317*
Ksenija Maver, Andraž Šuligoj, Urška Lavrenčič Štangar, and Nataša Novak Tušar
9.1 Introduction *317*
9.1.1 Titania as a Photocatalyst for Air and Water Cleaning *317*
9.1.2 Titania Functionalization *319*
9.1.3 Fabrication of Titania-Based Coatings *320*
9.1.4 Characterization of Titania-Based Materials *321*
9.2 Case Studies *323*
9.2.1 SiO_2-Supported TiO_2 for Removal of Volatile Organic Pollutants from Indoor Air Under UV Light *323*
9.2.2 Sn-Functionalized TiO_2 as a Photocatalytic Thin Coating for Removal of Organic Pollutants from Water Under UV Light *325*
9.2.3 SiO_2-Supported TiO_2 Functionalized with Transition Metals for Removal of Organic Pollutants from Water Under Visible Light *329*
9.3 Conclusion and Further Outlook *335*
References *335*

10 Metal Oxides for Photoelectrochemical Fuel Production *339*
Gian Andrea Rizzi and Leonardo Girardi
10.1 Introduction to Photoelectrochemical Cells *339*
10.1.1 The Photoelectrochemistry Approach *344*
10.2 Metal Oxides Photoelectrode Candidate Materials *347*
10.2.1 Photoanodes *349*
10.2.2 Photocathodes *349*
10.3 Tailoring Surface Catalytic Sites and Catalyst Use *350*
10.4 Metal Oxide Heterostructures *353*
10.5 Metal Oxides as a Protective Anti-corrosion Layer in Photoelectrodes *354*
10.6 Evaluation of Photoelectrode Efficiencies *359*
10.7 Conclusions and Perspectives *365*
References *367*

11 Tailoring Porous Electrode Structures by Materials Chemistry and 3D Printing for Electrochemical Energy Storage *379*
Sally O'Hanlon and Colm O'Dwyer
11.1 Strategies for Functional Porosity in Electrochemical Systems *379*
11.2 Benefits and Limitations of Structural Engineering for Electrochemical Performance *382*
11.3 Tailoring the Pore Structure of Metal Oxides for Li-ion Battery Cathodes and Anodes *383*
11.4 Developments in 3D Printing of Porous Electrodes for Electrochemical Energy Storage *389*
11.5 Porous Current Collectors by 3D Printing *390*

11.6 Battery and Supercapacitor Materials from 3D Printing *392*
11.7 Conclusions and Outlook *394*
References *396*

12 Ferroic Transition Metal Oxide Nano-heterostructures: From Fundamentals to Applications *405*
G. Varvaro, A. Omelyanchik, and D. Peddis
12.1 Introduction *405*
12.2 Ferroic Properties of Complex Transition Metal Oxides *408*
12.2.1 Spinel Ferrites *408*
12.2.2 Perovskites *411*
12.2.3 Other Magnetic Oxides *412*
12.3 Magnetic Oxide Heterostructures *413*
12.3.1 Hard/Soft Exchange-Coupled Systems *413*
12.3.2 Ferro(i)magnetic/Antiferromagnetic Systems *416*
12.3.3 All-Oxide Synthetic Antiferromagnets *419*
12.4 Artificial Multiferroic Oxide Heterostructures *421*
12.4.1 Strain Transfer Mechanism *423*
12.4.2 Charge Modulation Mechanism *426*
12.4.3 Exchange Interaction Mechanism *427*
12.5 All-Oxide Spintronic Heterostructures *427*
12.6 Conclusion and Perspectives *430*
References *431*

13 Metal-Oxide Nanomaterials for Gas-Sensing Applications *439*
Pritamkumar V. Shinde, Nanasaheb M. Shinde, Shoyebmohamad F. Shaikh, and Rajaram S. Mane
13.1 Introduction *439*
13.2 Types of Gas Sensors *442*
13.3 Metal-Oxide Nanomaterial-Based Gas Sensors *443*
13.4 Preparation of Metal-Oxide Gas Sensors *446*
13.4.1 Operation Mechanism *446*
13.4.2 Morphology-Related Structural Parameters *448*
13.4.2.1 Grain Size *448*
13.4.2.2 Pore Size *449*
13.4.3 Crystallographic Defective and Heterointerface Structures *453*
13.4.3.1 Defect Structure *453*
13.4.3.2 Heterointerface Structure *455*
13.4.4 Chemical Composition *458*
13.4.5 Addition of Noble Metal Particles *458*
13.4.6 Humidity and Temperature *461*
13.5 Gas-Sensing Mechanisms *462*
13.5.1 Adsorption/Desorption Model *462*
13.5.1.1 Oxygen Adsorption Model *464*

13.5.1.2 Chemical Adsorption/Desorption *467*
13.5.1.3 Physical Adsorption/Desorption *470*
13.5.2 Bulk Resistance Control Mechanism *471*
13.5.3 Gas Diffusion Control Mechanism *472*
13.6 Conclusions and Future Perspectives *474*
References *475*
