Preface xv

- 1 The Photochemical Approach to Helicenes 1**
Jan Storch, Jaroslav Žádný, Vladimír Církva, Martin Jakubec, Jan Hrbáč, and Jan Vacek
- 1.1 Introduction 1
- 1.2 General Features 1
- 1.3 Photochemical Preparation of Carbohelicenes 6
- 1.3.1 Oxidative Photocyclizations of Unsubstituted Carbo[*n*]helicenes 6
- 1.3.2 Oxidative Photocyclizations of Substituted Carbo[*n*]helicenes 9
- 1.3.3 Oxidative Photocyclizations of Benzocarbo[*n*]helicenes 11
- 1.3.4 Oxidative Photocyclizations of Multiple Carbo[*n*]helicenes 13
- 1.3.5 Eliminative Photocyclizations of Carbo[*n*]helicenes 14
- 1.4 Photochemical Preparation of Heterohelicenes 15
- 1.4.1 Azahelicenes 15
- 1.4.2 Thiahelicenes 23
- 1.4.3 Phosphahelicenes and Other Heterohelicenes 27
- 1.5 Photochemical Preparation of Helicene-Like Molecules 28
- 1.6 Photochemical Transformations of Helicenes 31
- 1.7 Conclusions 33
- References 36
- 2 Synthesis of Helicenes by [2 + 2 + 2] Cycloisomerization of Alkynes and Related Systems 53**
Irena G. Stará and Ivo Starý
- 2.1 Introduction 53
- 2.2 Helicenes via [2 + 2 + 2] Cycloisomerization of π -Electron Systems 54
- 2.2.1 Intramolecular [2 + 2 + 2] Cycloisomerization 54
- 2.2.2 Intermolecular [2 + 2 + 2] Cycloisomerization 59
- 2.3 Carbo- and Heterohelicenes 62
- 2.3.1 Carbohelicenes 62
- 2.3.2 Azahelicenes 63
- 2.3.3 Azoniahelicenes 68

- 2.3.4 Oxahelicenes 71
- 2.3.5 Sila-, Phospha-, and Thiahelicenes 73
- 2.4 Functionalized Helicenes 76
- 2.5 Asymmetric Synthesis of Nonracemic Helicenes 76
 - 2.5.1 Stoichiometric Diastereoselective Synthesis 76
 - 2.5.2 Catalytic Enantioselective Synthesis 82
- 2.6 Advanced Helicene Architectures 85
- 2.7 Summary and Outlook 89
- 2.8 Abbreviations 89
- References 91

- 3 Enantioselective Synthesis of Helicenes 103**
Ken Tanaka
 - 3.1 Introduction 103
 - 3.2 Metal-Catalyzed [2 + 2 + 2] Cycloaddition 103
 - 3.2.1 Ni- and Co-catalyzed [2 + 2 + 2] Cycloaddition 104
 - 3.2.2 Rh- and Ir-Catalyzed [2 + 2 + 2] Cycloaddition 105
 - 3.2.3 Pd-catalyzed [2 + 2 + 2] Cycloaddition 114
 - 3.3 Metal-catalyzed Hydroarylation 115
 - 3.4 Metal-catalyzed Oxidative Annulation 120
 - 3.5 Organocatalyzed Annulation 121
 - 3.6 Conclusion 124
 - References 124

- 4 Cationic Triarylcarbenium Helicenes: Synthesis, Resolution, and Applications 127**
Johann Bosson, Niels Bisballe, Bo W. Laursen, and Jérôme Lacour
 - 4.1 Introduction 127
 - 4.2 Synthesis and Resolution of Cationic [4]-, [5]-, and [6]Helicenes 128
 - 4.2.1 [4]Helicenes 128
 - 4.2.2 [6]Helicenes 131
 - 4.2.3 [5]Helicenes 133
 - 4.3 Regioselective Functionalization 135
 - 4.3.1 Generalities: Nomenclature 135
 - 4.3.2 Late-stage Functionalization 135
 - 4.3.2.1 North Functionalization of Cationic [4]- and [6]Helicenes 135
 - 4.3.2.2 South Functionalization of Cationic [4]- and [6]helicenes 137
 - 4.3.2.3 Tropical Functionalization Cationic [6]Helicenes 139
 - 4.3.2.4 Central Nucleophilic Additions on [4]-, [5]-, and [6]Helicenes 140
 - 4.3.3 Early-stage Equatorial Functionalization of [4]Helicene 141
 - 4.4 Structural Properties 142
 - 4.4.1 Helical Pitch and Configurational Stability 142
 - 4.4.2 pK_{R+} and Chemical Stability 143
 - 4.5 Optical and Chiroptical Properties and Applications of Cationic Helicenes 144
 - 4.5.1 Absorption and Fluorescence Properties 144

4.5.2	Chiroptical Properties	148
4.5.3	Biological Applications	150
4.5.3.1	Interaction with DNA	151
4.5.3.2	Cellular Imaging	151
4.5.4	Applications Based on Redox Chemistry	153
4.5.4.1	Generalities	153
4.5.4.2	Electrochemiluminescence	154
4.5.4.3	Thin Film Voltammetry	156
4.5.4.4	Stable Radicals	157
4.5.5	Organometallic Chemistry and Photocatalysis	159
4.5.6	Spintronics	161
4.6	Conclusion	161
	References	162

5 Organometallic and Coordination Chemistry of Helicenes 167

Rafael Rodriguez, Natalia Del Rio, and Jeanne Crassous

5.1	Introduction	167
5.2	Coordination Chemistry	168
5.2.1	Coordination of Monodentate Helicenes	168
5.2.2	Coordination of Bidentate Helicenes	171
5.2.3	Coordination of Polydentate Helicenes	177
5.3	Organometallic Chemistry	179
5.3.1	Metal-vinyl- and Metal-ethynyl-helicenes	179
5.3.1.1	Metal-vinyl-helicene Complexes (Ru, Os)	179
5.3.1.2	Metal-ethynyl-helicene Complexes (Fe, Ru, Au)	179
5.3.2	Cyclometalated Helicenic Complexes	182
5.3.2.1	Cyclometalated Helicenic Complexes Bearing C ^N Chelate Ligands (Pt, Ir, Os)	182
5.3.2.2	Cyclometalated Helicenic Complexes Bearing NHCs (Ir, Re) and Related Complexes	184
5.3.3	Sandwich-type Helicenic Complexes	188
5.4	Conclusion	192
	Abbreviations	192
	References	194

6 Tetrathiahelicenes: An Infinite Source of Inspiration 199

Silvia Cauteruccio, Andreas Dreuw, Emanuela Licandro, and Patrizia Romana Mussini

6.1	Introduction	199
6.2	Synthesis of 7-TH Scaffold	200
6.2.1	Oxidative Cyclization of Bis(benzodithienyl)ethenes	200
6.2.1.1	Photochemical Oxidative Cyclization	201
6.2.2	Annulation of 3,3'-Bis(benzo[1,2- <i>b</i> :4,3- <i>b'</i>]dithiophene) Derivatives	204
6.3	Functionalization	206

6.4	Resolution of Enantiomers	209
6.4.1	Chiral HPLC	209
6.4.2	Enzymatic Resolution	210
6.4.3	Formation of Diastereoisomers	210
6.4.4	Kinetic Resolution	210
6.5	Electrochemical Properties and Applications of Tetrathiahelicenes	211
6.5.1	Investigation of Tetrathiahelicene Electroactivity on a Systematic Compound Series	211
6.5.2	Investigation of Electronic Properties of Electroactive 7-TH Adducts With Advanced Functional Properties	213
6.5.3	Application of 7-TH-based Inherently Chiral Films for Enantioselective Electroanalysis	214
6.6	Computational Studies on Tetrathiahelicenes	216
6.6.1	General Remarks	216
6.6.2	Electron-Detached and Attached States of 7-TH Phosphorus Derivatives	216
6.6.3	Optical Properties of Chiral Tetrathiahelicene-Based Alkyl Phosphine–Borane Complexes	219
6.6.4	Computational Study on Vibrational Raman Optical Activity of Helicenes	220
6.7	Materials	220
6.7.1	NLO	220
6.7.2	Self-Assembly	222
6.7.3	Molecular Spring	223
6.7.4	Photoswitches	223
6.8	Catalysis	224
6.8.1	Organometallic Catalysis	224
6.8.2	Organocatalysis	225
6.9	Interaction with Biomolecules	226
6.9.1	Chiral Recognition of Biomolecules	226
6.9.2	Delivery Systems for 7-TH	227
6.10	Conclusion	229
	References	229
7	Synthesis and Properties of Helicenes with Small Numbers of Benzene Rings	237
	<i>Masahiko Yamaguchi</i>	
7.1	Helicenes with Small Numbers of Benzene Rings	237
7.1.1	Helicenes	237
7.2	Synthesis of Helicene Derivatives	238
7.2.1	Tetracyclic Helicenes	238
7.2.2	Bicyclic Helicenes	241
7.3	Noncovalent Bond Interactions and Chiral Recognition	242
7.3.1	Complexation and Chiral Recognition by Oligosaccharides in Water	242
7.3.2	Formation of Langmuir–Blodgett (LB) Films	244

7.3.3	Charge Transfer (CT) Complexation	244
7.3.4	Formation of Self-assembly Gel	246
7.4	Asymmetric Catalysis	246
7.5	Electronic Properties	247
7.5.1	Reversible Switching of Charge Injection Barriers Using Helicenedithiol	247
7.5.2	Ferroelectricity	248
7.6	Interactions with Biological Macromolecules	249
7.6.1	Nucleic Acid Binding	249
7.6.2	Enzyme Inhibitor	250
7.7	Separation Involving Aggregation of Helicene-Grafted Nanoparticles	251
7.7.1	Separation of Molecules by Aggregation of Nanoparticles	251
7.7.2	Chiral Recognition in Aggregation of Helicene-Grafted Gold Nanoparticles	251
7.7.3	Optical Resolution Using Helicene-Grafted Silica Nanoparticles	251
7.7.4	Molecular Recognition and Separation of Small Molecules from Metal-Catalyzed Chemical Equilibrium	252
7.7.5	Molecular Recognition and Separation of Homo- and Hetero-double-helix Complexes by Helicene-Grafted Silica Nanoparticles	252
7.7.6	Time Event by Helicene-Grafted Silica Nanoparticles	256
7.8	Conclusion	257
	Acknowledgment	257

12.1	General Aspects	395
12.1.1	Introduction	395
12.1.2	Theory Developments in the Context of Helicene Optical Activity	396

- 12.2 Case Studies 400
 - 12.2.1 Azahelicene-Phosphole Pd(II) and Cu(I) Complexes: OR and ECD Analyses 400
 - 12.2.1.1 Complexes with Extended π -Conjugated Helicenic P,N Bidentate Ligands 400
 - 12.2.1.2 Assemblies with Multitopic Helicenic Ligands 402
 - 12.2.2 Ru- and Fe-[6]helicene Redox-Triggered Chiroptical Switches: UV-vis, OR, ECD, VCD, and ROA Analyses 404
 - 12.2.2.1 Ruthenium-vinyl-helicenes 404
 - 12.2.2.2 Iron-Ethynyl-Helicenes 406
 - 12.2.3 Platinahelicenes: UV-vis, OR, ECD, Non-polarized Emission and CPL Analyses 407
 - 12.2.3.1 Mono- and Bis-cycloplatinated Helicenes 407
 - 12.2.3.2 Bipyridine-Helicene-Based Multifunctional pH-Switchable Platform 408
 - 12.2.4 Re(I) and Ir(III) Helicenic Phosphors: OR, ECD and Non-polarized Emission Analyses 410
 - 12.2.4.1 Bipyridine-Helicene-Rhenium Complexes 410
 - 12.2.4.2 Cycloiridiated Complexes with Helicenic N-Heterocyclic Carbene 411
- 12.3 Concluding Remarks 413

14 Helicenes and Nonlinear Optical Properties: A Good Match? 453

Benoît Champagne

- 14.1 Introduction 453
- 14.2 Electric Second-Order NLO Responses 456

14.2.1	Effect of the Nature and Position of the Substituents	456
14.2.2	Effect of the Nature of the Helicene Backbone, Including Oxidation Effects	461
14.2.3	Effect of the Size of the Helicene	464
14.2.4	Three-Wave Mixing	465
14.2.5	Other Helicenes and Related Helical Systems	465
14.3	Third-Order NLO Responses	466
14.4	Beyond the Electric Dipole Approximation	466
14.5	Helicene Aggregates and Self-Assembled Monolayers	467
14.6	Conclusions and Outlook	468
