Preface *xi*

- 1 Heterocycles as Inputs in MCRs: An Update 1**
Ouldouz Ghashghaei, Marina Pedrola, Carmen Escolano, and Rodolfo Lavilla
- 1.1 Introduction 1
1.2 Concerted MCRs 1
1.3 Radical MCRs 11
1.4 Metal-catalyzed MCRs 16
1.5 Carbonyl/Imine Polar MCRs 19
1.6 Isocyanide-based MCRs 24
1.7 Miscellany Processes 33
1.8 Conclusion 36
Acknowledgment 40
References 40
- 2 Heterocycles and Multicomponent Polymerizations 45**
Susan Sieben, Jordy M. Saya, Dean Johnson, and Romano V.A. Orru
- 2.1 Introduction 45
2.2 Ugi-type Multicomponent Polymerizations 48
2.3 Mannich-type Multicomponent Polymerizations 52
2.4 Biginelli-type Multicomponent Polymerizations 64
2.5 Hantzsch-type Multicomponent Polymerizations 71
2.6 Debus–Radziszewski-type Multicomponent Polymerizations 73
2.7 Other Multicomponent Polymerizations 76
2.7.1 The Cu(I)-catalyzed MCP of Diynes, Azides, and Carbodiimides/Nitriles 78
2.7.2 The Pd-catalyzed MCP of Imines, Acyl Chlorides, and *N*-Sulfonyl Imines 78
2.7.3 The Mercaptoacetic Acid Locking Imine Reaction 80
2.8 Conclusions and Outlook 83
References 84

3	Multicomponent Reactions in Medicinal Chemistry	91
	<i>Zefeng Wang and Alexander Domling</i>	
3.1	Introduction	91
3.1.1	Example: Protein–Protein Interaction p53-MDM2	94
3.2	Scaffolds and the Chemical Space of MCR	108
3.2.1	Marketed and Clinical Stage Drugs	110
3.3	Some Biopharmaceutical Application of MCR	121
3.3.1	Computational Methods of MCR Chemical Space Screening	122
3.4	Conclusion	127
	References	127
4	Solid-Phase Heterocycle Synthesis Using Multicomponent Reactions	139
	<i>Leonardo G. Ceballos, Daylin F. Pacheco, Bernhard Westermann, and Daniel G. Rivera</i>	
4.1	Introduction	139
4.2	Synthesis of Five-Membered Ring Heterocycles	140
4.3	Synthesis of Six-Membered Ring Heterocycles	144
4.4	Synthesis of Fused Heterocyclic Ring Systems	147
4.5	Synthesis of Heterocycles on Solid-Supported Amino Acids	150
4.6	Solid-Phase Multicomponent Construction of DNA-Encoded Heterocycle Libraries	153
4.7	Miscellaneous Supports for Multicomponent Synthesis of Heterocycles	154
4.8	Conclusions	157
	References	157
5	Green Synthesis of Heterocycles Via MCRs	163
	<i>Wei Zhang</i>	
5.1	Introduction	163
5.2	High-Order MCRs	164
5.3	Consecutive MCRs	176
5.4	MCRs Followed by Cyclization Reactions	187
5.5	MCRs Followed by Cycloaddition or Annulation Reactions	200
5.6	Conclusion and Outlook	207
	References	207
6	The Use of Flow Chemistry in the Multicomponent Synthesis of Heterocycles	211
	<i>Chiara Lambruschini, Lisa Moni, and Andrea Basso</i>	
6.1	Introduction	211
6.2	Multicomponent Reactions Under Standard Flow Conditions	212
6.3	Multicomponent Reactions with Hazardous Reagents	217
6.4	Multicomponent Reactions Under Special Conditions	219
6.4.1	Reactions with Microwave or Inductive Heating	220

- 6.4.2 Reactions with Active Packed-Bed Columns 223
- 6.4.3 Reactions Under Other Conditions 226
- 6.5 Telescoped Reactions 229
- 6.6 Conclusions 233
- References 235

- 7 C–H Functionalization as an Imperative Tool Toward Multicomponent Synthesis and Modification of Heterocycles 239**
Alexey A. Festa and Leonid G. Voskressensky
- 7.1 Introduction 239
- 7.2 Transition-metal-involved C–H Functionalization 240
 - 7.2.1 Multicomponent Synthesis of Heterocycles Through C–H Functionalization 240
- 7.3 Transition-metal-involved C–H Functionalization 259
 - 7.3.1 Multicomponent C–H Functionalization of Heterocycles 259
 - 7.3.1.1 C(sp²)-H Functionalization 259
 - 7.3.1.2 C(sp³)-H Functionalization 267
 - 7.4 Transition-metal-free C–H Functionalization 269
 - 7.4.1 Multicomponent Synthesis of Heterocycles Through C–H-functionalization 269
 - 7.4.2 Multicomponent C–H Functionalization of Heterocycles 273
- References 277

- 8 Multicomponent-Switched Reactions in Synthesis of Heterocycles 287**
Valentyn A. Chebanov, Serhiy M. Desenko, Victoria V. Lipson, and Nikolay Yu. Gorobets
- References 329

- 9 Recent Applications of Multicomponent Reactions Toward Heterocyclic Drug Discovery 339**
Nathan Bedard, Alessandra Fistrovich, Kevin Schofield, Arthur Shaw, and Christopher Hulme
- 9.1 Introduction 339
- 9.2 Multicomponent Reactions 339
- 9.3 The Ugi Reaction 340
 - 9.3.1 The Ugi Reaction Used in Natural Product Synthesis 343
 - 9.3.2 The Ugi Reaction in FDA-approved Drugs and Drug Candidates 343
 - 9.3.2.1 Synthesis of Lipitor Using Ugi 4CR 349
 - 9.3.2.2 Synthesis of Ivosidenib Utilizing Ugi 4CR 349
 - 9.3.3 Rapid Lead Optimization with Ugi 4CR 349
- 9.4 The Passerini Reaction 353
 - 9.4.1 The Passerini Reaction in Natural Products 353
- 9.5 Groebke–Blackburn–Bienaymé (GBB-3CR) MCR 353

9.6	Gewald (G-3CR) Reaction	361
9.7	The Hantzsch Dihydropyridine (DHP) Synthesis	364
9.7.1	FDA-approved Hantzsch Dihydropyridines	368
9.7.2	Anti-bacterial Hantzsch DHPs	368
9.8	The Biginelli Reaction	370
9.8.1	Biginelli Reactions and Natural Products	371
9.8.2	Biginelli DHPMs as CNS Agents	371
9.8.3	Biginelli Products Antitumor Capabilities	371
9.9	van Leusen Reaction	379
9.9.1	Tosmic-mediated Cyclization Toward Nitrogen-containing Heterocycles	379
9.9.2	Applications of the van Leusen Reaction	383
9.9.2.1	Sequential One-pot Three-step 3C-van Leusen Reaction/Deprotection/Cyclization	383
9.9.2.2	Sequential van Leusen Reaction/Staudinger/aza-Wittig/Cyclization	386
9.9.2.3	DNA-conjugated van Leusen Reaction	386
9.9.3	Applications of the van Leusen Reaction in Drug Discovery	388
9.9.3.1	Purinergic P2X7 Receptor Antagonists	388
9.9.3.2	Indoleamine 2,3-Dioxygenase (IDO1) Inhibitors	391
9.9.3.3	Disruptors of P53/MDM2 Protein-Protein Interactions	392
9.9.3.4	Disruptors of PCSK9/LDLR Protein-Protein Interactions	392
9.9.3.5	Inhibitors of TGF β R1 as Immuno-oncology Therapeutics	397
	References	397
10	Multicomponent Syntheses of Heterocycles by Catalytic Generation of Alkynoyl Intermediates	411
	<i>Jonas Niedballa and Thomas J.J. Müller</i>	
10.1	Introduction	411
10.2	Catalytic Generation of Alkynones	412
10.3	Multicomponent Syntheses of Five-membered Heterocycles	415
10.3.1	Pyrazolines	415
10.3.2	Pyrazoles	416
10.3.3	Isoxazoles	420
10.3.4	Triazoles	420
10.3.5	Thiophenes	422
10.3.6	Indolones	424
10.4	Multicomponent Syntheses of Six-membered Heterocycles	427
10.4.1	Pyranones	427
10.4.2	Pyridines	427
10.4.3	Pyrimidines	429
10.4.4	Oxazaborinines	432
10.4.5	Coumarines	432
10.4.6	Quinolines	435
10.4.7	Quinoxalines	435
10.5	Conclusion and Outlook	442
	References	442

11	Synthesis of Saturated Heterocycles via Multicomponent Reactions	447
	<i>Carlos K.Z. Andrade, Carlos E.M. Salvador, Thaissa P.F. Rosalba, Lucília Z.A. Correa, Luan A. Martinho, and Yuri R.B. Sousa</i>	
11.1	Introduction	447
11.2	Three-membered Ring Heterocycles	447
11.3	Four-membered Ring Heterocycles	448
11.4	Five-membered Ring Heterocycles	449
11.5	Six-membered Ring Heterocycles	456
11.6	Seven-membered Ring Heterocycles	462
11.7	Macrocycles	463
11.8	Fused Heterocycles	464
11.9	Spiro Heterocycles	482
	References	485
12	Multicomponent Reactions and Asymmetric Catalysis	493
	<i>Melody E. Boëtius and Eelco Ruijter</i>	
12.1	Introduction	493
12.2	Imine-based MCRs	494
12.2.1	Strecker Reaction	494
12.2.2	Mannich Reaction	494
12.2.2.1	Aza-Henry Reaction	498
12.2.2.2	Petasis Reaction	498
12.2.2.3	Aza-Diels–Alder Via Mannich Reaction Pathway	500
12.2.2.4	[2 + 2 + 2]-Cycloaddition	504
12.2.3	Hantzsch Reaction	504
12.2.4	Biginelli Reaction	506
12.3	Michael Addition-based MCRs	509
12.3.1	Oxa-Michael/Michael/Michael/Aldol Condensation Cascade Reactions	509
12.3.2	Knoevenagel–Michael Cascade Reaction	511
12.3.3	Michael–Henry Cascade Reaction	514
12.4	Isocyanide-Based MCRs	514
12.4.1	Passerini Reactions	521
12.4.1.1	Passerini-type Two-component Reactions	521
12.4.1.2	Passerini Three-component Reaction	522
12.4.2	Isocyanide-Based [3 + 2]-Cycloaddition	525
12.4.3	Ugi-type Reactions	525
12.5	Conclusion	529
	References	536
13	Recent Trends in Metal-catalyzed MCRs Toward Heterocycles	551
	<i>Lilia Fuentes-Morales and Luis D. Miranda</i>	
13.1	Introduction	551
13.2	Five-membered Heterocycles with One Heteroatom	552

13.3	Five-membered Systems with Two Heteroatoms	558
13.4	Five-membered Systems with Three Heteroatoms	561
13.5	Six-membered Heterocycles with One Heteroatom and Their Benzo-fused Derivatives	566
13.6	Six-membered <i>O</i> -heterocycles and their Benzofused Derivatives	571
13.7	Four-membered <i>N</i> -heterocycles and Seven-membered Benzofused <i>N</i> -heterocycles	574
13.8	Conclusion	576
	References	576
