Contents

Foreword *xv*
Preface *xvii*

1 Science and Technology of Nanomaterials: Introduction *1*
Merin Sara Thomas, Sabu Thomas, and Laly A. Pothen
1.1 Introduction *1*
1.2 Classification of Nanomaterials *2*
1.3 Classes of Nanomaterials *2*
1.3.1 Organic Nanoparticles *3*
1.3.2 Inorganic Nanoparticles *3*
1.3.3 Carbon-Based Nanoparticles *3*
1.4 Properties of Nanomaterials *3*
1.4.1 Size and Surface Area *3*
1.4.2 Mechanical Properties *4*
1.4.3 Optical and Electrical Properties *6*
1.4.4 Magnetic Properties *6*
1.5 Characterization of Nanomaterials *6*
1.5.1 Surface Morphology, Surface Area, Size, and Shape of Nanoparticles *7*
1.5.2 Elemental and Mineral Composition *7*
1.5.3 Structures and Bonds in Nanoparticles *8*
1.6 Current State of Nanotechnology *8*
1.7 Safety Issues of Nanotechnology *8*
1.8 Conclusion *9*
References *10*

2 Nanoremediation: A Brief Introduction *17*
Renjitha P. Rajan, Merin Sara Thomas, Sabu Thomas, and Laly A. Pothen
2.1 Introduction *17*
2.2 Mechanism of Nanoremediation *18*
2.3 Nanotechnology for Disinfection *18*
2.4 Nanotechnology for Removal of Heavy Metals and Ions *20*
2.5 Nanotechnology for Removal of Organic Contaminants *20*

2.6 Nanotechnology for Oil/Water Separation *21*
2.7 Challenges in Nanoremediation *22*
2.8 Conclusion *23*
References *23*

3 Nanotechnology in Soil Remediation *27*
Alice Alex, Sithara Raj, Sunish K. Sugunan, and Gigi George
3.1 Impact of ENMs on the Environment and Microorganisms *27*
3.2 Engineered Nanomaterials in Soil Remediation *29*
3.2.1 Iron-Based Nanomaterials *30*
3.2.2 TiO_2-Based Nanomaterials *31*
3.2.3 Carbon-Based Nanomaterials *31*
3.2.4 Silica-Based Nanomaterials *32*
3.3 Nanotechnology in Soil Remediation *32*
3.3.1 TiO_2 Nanoparticles *33*
3.3.2 Iron Nanoparticles *34*
3.3.3 Silica Nanoparticles *36*
3.3.4 Carbon-Based Nanoparticles *36*
3.3.5 Silver Nanoparticles *37*
3.4 Conclusion *38*
References *38*

4 Nanotechnology for Water Treatment: Recent Advancement in the Remediation of Organic and Inorganic Compounds *45*
Charulata Sivodia and Alok Sinha
4.1 Introduction *45*
4.1.1 Classification and Synthesis Routes of Nanomaterials *45*
4.2 Application of Nanotechnology *46*
4.2.1 Heavy Metal Removal *46*
4.2.2 Dye Removal *47*
4.2.3 Organochlorine Compounds (OCCs) Removal *48*
4.2.4 Inorganic Anions *49*
4.3 Conclusions *52*
References *52*

5 Nanotechnology in Air Pollution Remediation *59*
Haleema Saleem, Syed J. Zaidi, Ahmad F. Ismail, and Pei S. Goh
5.1 Introduction *59*
5.2 Recent Developments in Nanotechnology for Air Pollution Remediation *60*
5.2.1 Nanoadsorbents *61*
5.2.2 Nanofilters and Nanostructured Membranes *62*
5.2.3 Nanocatalysts *65*
5.2.4 Nanosensors *66*
5.2.4.1 Detection of NO_2 *66*

5.2.4.2 Detection of H_2S *67*
5.2.4.3 Detection of SO_2 *68*
5.3 Adverse Impact of the Nanomaterials in the Environment *69*
5.4 Future Directions *70*
Acknowledgment *71*
References *71*

6 Nanomaterials in Filtration *77*
Ahmed Ibrahim Abd-Elhamid and AbdElAziz Ahmed Nayl
6.1 Introduction *77*
6.2 Nanofiber in Air Filtration *79*
6.2.1 Pure Nanofiber in Air Filtration *79*
6.2.2 Polymer–Nanofiber Composite in Air Filtration *80*
6.2.3 MOF–Nanofiber Composite in Air Filtration *81*
6.2.4 Nanomaterial–Nanofiber Hybrid in Air Filtration *82*
6.2.5 Window Screening *84*
6.3 Nanofiber in Wastewater Filtration *85*
6.3.1 Oil–Water Separation *85*
6.3.2 Antifouling *87*
6.3.3 Organic and Inorganic Pollutant Removal *88*
6.3.4 Microorganism Removal *92*
6.4 Conclusion *94*
References *94*

7 Nanoadsorbents for Environmental Remediation *103*
Adnan Khan, Sumeet Malik, Sumaira Shah, Nisar Ali, Farman Ali, Suresh Ghotekar, Harshal Dabhane, and Muhammad Bilal
7.1 Introduction *103*
7.2 Properties and Synthesis of Nanomaterials *105*
7.3 Different Classes of Nanoadsorbents for Removal of Contaminants from Wastewater *106*
7.3.1 Carbon-Based Nanoadsorbents *106*
7.3.2 Silica-Based Nanoadsorbents *107*
7.3.3 Metal-Based Nanoadsorbents *109*
7.3.4 Polymer-Based Nanoadsorbents *112*
7.4 Conclusion *114*
References *114*

8 Visible-Light Photocatalytic Degradation of Heavy Metal Ion Hexavalent Chromium [Cr(VI)] *121*
Priya Rawat, Harshita Chawla, and Seema Garg
8.1 Introduction *121*
8.2 Modifications in TiO_2 for Visible-Light Activity *126*
8.2.1 Coupling of Transition Metal Oxide *126*
8.2.1.1 Simple Metal Oxides *126*

8.2.1.2 Spinel-Type Mixed Metal Oxides *127*
8.2.2 Coupling of Metal Sulfides *128*
8.2.3 Coupling of Noble Metals *129*
8.2.4 Synergetic Conversion and Capacitive Deionization *130*
8.3 Stability of the Photocatalyst *131*
8.4 Conclusion *132*
8.4.1 Current Scenario *132*
8.4.2 Challenges *133*
8.4.3 Future Perspectives *133*
References *133*

9 Phytonanotechnology for Remediation of Heavy Metals and Dyes *139*
Lakhan Kumar, Pragya Kamal, Kaniska Soni, and Navneeta Bharadvaja
9.1 Introduction *139*
9.2 Environmental Pollution and Health Impacts *141*
9.2.1 Heavy Metals and Associated Environmental and Public Health Issues *141*
9.2.2 Dyes and Associated Environmental and Public Health Issues *142*
9.3 Environmental Pollution and Remediation Strategies *143*
9.3.1 Mycoremediation *143*
9.3.2 Phytoremediation *144*
9.3.3 Phycoremediation *144*
9.3.4 Biostimulation *144*
9.3.5 Rhizofiltration *144*
9.4 Phyto-nanotechnological Approach for Remediation of Environmental Pollutants *145*
9.4.1 Heavy Metals Remediation Potential of Plant-Based Nanomaterials *146*
9.4.2 Dyes Remediation Potential of Plant-Based Nanomaterials *147*
9.5 Prospect and Challenges to Phytonanoremediation *147*
9.6 Concluding Remarks *154*
References *155*

10 Surface-Functionalized Gold Nanoparticles for Environmental Remediation *163*
Daniel T. Thangadurai, Nandhakumar Manjubaashini, and Devaraj Nataraj
10.1 Introduction *163*
10.2 Fundamentals of Gold Nanoparticles *164*
10.3 Significance of Gold Nanoparticles *164*
10.4 Importance of Surface-Functionalized Gold Nanoparticles *166*
10.5 Applications of Gold Nanoparticles *166*
10.6 Synthesis and Characterization of Rhodamine 6G-Functionalized Gold Nanoparticles (Rh6G-AuNPs) *167*
10.6.1 Synthesis of Rh6G-AuNPs by Reduction Method *167*

10.6.2 Characterization of Rh6G-AuNPs *168*
10.6.2.1 X-ray Diffraction Studies *168*
10.6.2.2 Morphological Analysis *168*
10.6.2.3 XPS studies *170*
10.6.2.4 Raman Spectroscopy Analysis *170*
10.6.2.5 Thermal Studies *172*
10.7 Interaction of Rhodamine 6G-Functionalized AuNPs with Heavy Metal Ion *174*
10.7.1 Selectivity and Sensitivity Studies *174*
10.7.1.1 Time-Resolved Fluorescence Measurements *174*
10.7.1.2 Stability Measurements *176*
10.8 Application of Rh6G-AuNPs *178*
10.8.1 Real Water Sample Analysis *178*
10.8.2 Cytotoxicity Test *178*
10.9 Conclusion *180*
Acknowledgments *180*
References *180*

11 Metal Oxide Nanoparticles for Environmental Remediation *183*
Abhilash Venkateshaiah, Miroslav Černík, and Vinod V.T. Padil
11.1 Introduction *183*
11.2 Synthesis of Metal Oxide Nanoparticles *185*
11.2.1 Physical Methods *185*
11.2.1.1 Chemical Vapor Synthesis *185*
11.2.1.2 Laser Ablation Method *186*
11.2.1.3 Mechanical Milling Technique *186*
11.2.2 Chemical Methods *187*
11.2.2.1 Co-precipitation Method *187*
11.2.2.2 Sol–Gel Method *188*
11.2.2.3 Solvothermal Method *188*
11.2.3 Biological Methods *188*
11.2.3.1 Plant Mediated Synthesis *189*
11.2.3.2 Microbial Mediated Synthesis *189*
11.3 Environmental Remediation Using MeO NPs *190*
11.3.1 Adsorption *190*
11.3.2 Catalysis *191*
11.3.3 Antimicrobial Activity *192*
11.4 Different MeO NPs in Remediation *193*
11.4.1 Titanium Oxide Nanoparticles *193*
11.4.2 Zinc Oxide Nanoparticles *195*
11.4.3 Iron-Based Oxides *197*
11.4.4 Copper Oxide *199*
11.4.5 Tin Oxide Nanoparticles *200*
11.4.6 Tungsten Oxide Nanoparticles *201*

11.4.7 Other Metal Oxide Nanoparticles *201*
11.5 Conclusion and Prospects *202*
Acknowledgments *203*
References *204*

12 Functionalized Nanoparticles for Environmental Remediation *215*
Beatriz Jurado-Sánchez
12.1 Introduction *215*
12.2 Nanoparticles for Environmental Remediation and Functionalization *216*
12.2.1 Metallic and Metal Oxide NPs *216*
12.2.1.1 Silver and Gold NPs *216*
12.2.1.2 Titanium Dioxide NPs *217*
12.2.1.3 Magnetic Iron Oxide NPs *218*
12.2.2 Silica and Polymeric NPs *218*
12.2.3 Carbon NMs *219*
12.2.4 2D NMs *219*
12.2.5 Micromotors *220*
12.3 Nanofiltration with Functionalized NPs *220*
12.4 Nanophotocatalytic Degradation with Functionalized NPs *224*
12.5 Chemical Degradation of Pollutants Assisted with Functionalized NPs *230*
Acknowledgments *232*
References *232*

13 Dendrimers for Environmental Remediation *243*
Uyiosa O. Aigbe, Kingsley E. Ukhurebor, Robert B. Onyancha, Onoyivwe M. Ama, Otolorin A. Osibote, Heri S. Kusuma, Philomina N. Okanigbuan, Samuel O. Azi, and Peter O. Osifo
13.1 Introduction *243*
13.2 Synthesis Methods *246*
13.2.1 Divergent Approach *247*
13.2.2 Convergent Method *247*
13.3 Physicochemical Properties of Dendrimers *247*
13.4 Environmental Application of Dendrimers *248*
13.4.1 Water Purification Process Using Functionalized Dendrimers *249*
13.4.2 Dendrimers Application in Photocatalysis *252*
13.4.3 Dendrimers Application in Soil Remediation *254*
13.4.4 Dendrimers Application in Air Remediation *255*
13.5 Conclusion *258*
Acknowledgment *259*
References *259*

14 Nanocrystals for Environmental Remediation *265*
Muhammad N. Ashiq, Sumaira Manzoor, Abdul G. Abid, and Muhammad Najam-Ul-Haq
14.1 Introduction *265*
14.1.1 Environmental Remediation Techniques *266*
14.1.1.1 Photocatalysis *266*
14.1.2 Different Types of Nanomaterial Used for Environmental Remediation *268*
14.1.2.1 Metal Oxides-Based Nanostructure *268*
14.1.2.2 Nanocomposite-Based Photocatalyst *269*
14.1.2.3 Magnetic Nanomaterial *271*
14.1.3 Nanostructured Material as Efficient Antibacterial Agents *273*
References *276*

15 Enzyme Nanoparticles for Environmental Remediation *283*
Neha Tiwari and Deenan Santhiya
15.1 Introduction *283*
15.2 Sources of Various Enzymes Used for Environmental Remediation *285*
15.3 Various Enzyme-Immobilized Nanoparticles for Environmental Remediation *285*
15.3.1 Magnetic Nanoparticles *285*
15.3.2 Mesoporous Nanoparticles *287*
15.3.3 Carbon-Based Nanoparticles *287*
15.3.4 Carbon Nanotubes *287*
15.3.5 Role of Nanoparticles in Environmental Remediation *288*
15.4 Importance of Enzyme Nanoparticles in Remediation *288*
15.4.1 Advantages of Enzyme Nanoparticles *290*
15.5 Challenges in the Bioremediation Through Enzyme Nanoparticles *290*
15.6 Conclusion *292*
References *292*

16 Nanofibers for Environmental Remediation *301*
Daniel Pasquini, Luís C. de Morais, and Pedro E. Costa
16.1 Introduction *301*
16.2 Cellulose *301*
16.2.1 Chemical Structure and Reactivity *301*
16.2.2 The Origin of Cellulose Nanofibers *302*
16.2.3 Surface Modification of Cellulose Nanofibers *305*
16.2.4 Treatments to Modify Cellulose Nanofiber Surface *306*
16.3 Use of Nanofibers in Contaminant Removal Processes *309*
16.3.1 Nanoremediation for Dyes *309*
16.3.2 Nanoremediation for Lead(II) *312*

16.4 Conclusion *316*
References *316*

17 Bio-inspired Nanocomposites for Remediation of Pharmaceutical Pollutants *323*
Pavan K. Gautam, Saurabh Shivalkar, Anirudh Singh, M. Shivapriya Pingali, Shrutika Chaudhary, Sushmita Banerjee, Pritish K. Varadwaj, and Sintu K. Samanta
17.1 Introduction *323*
17.2 Environmental Hazards from Pharmaceuticals *324*
17.3 Mechanism for Synthesis of NMs *326*
17.3.1 Bioreduction of Metallic Salt and Capping of Synthesized NMs *326*
17.3.1.1 Protein-Assisted Reduction of Metallic Salts *326*
17.3.1.2 Polysaccharides-Assisted Reduction of Metallic Salts *326*
17.3.2 Different Parameters Affecting the Synthesis of NMs *327*
17.3.3 Living Organisms Applied for Fabrication of NMs *328*
17.3.3.1 Bacterial-Oriented Synthesis *328*
17.3.3.2 Fungus-Assisted Synthesis *329*
17.3.3.3 Algae-Assisted Synthesis *329*
17.3.3.4 Plants-Assisted Synthesis *329*
17.4 Different Biofabricated NMs Used for Removal of Pharmaceutical Pollutants *330*
17.4.1 Biogenic Palladium Nanoparticles *330*
17.4.2 Biogenic Manganese Nanoparticles *330*
17.4.3 Other Metallic/Bimetallic Nanocomposites *332*
17.5 Basic Degradation Mechanism of Pharmaceuticals *333*
17.6 Concluding Remarks *333*
References *334*

18 Nanomaterials and Their Thin Films for Photocatalytic Air Purification *341*
Juliane Z. Marinho and Antonio Otavio T. Patrocinio
18.1 Indoor and Outdoor Air Purification Technologies *341*
18.2 Mechanisms of Photocatalytic Degradation for Air Purification *342*
18.3 Photocatalysts Used for Air Purification *345*
18.3.1 Metal Oxides *345*
18.3.2 Ternary Oxides *348*
18.3.3 Metal Sulfides *348*
18.3.4 Metal-Free Materials *349*
18.4 Building Strategies for More Efficient Photocatalysts for Air Purification *349*
18.4.1 Chemical Modification of Photocatalysts by Doping *350*
18.4.2 Modification with Surface Heterostructures *351*
18.4.3 Large Scale Applications of Photocatalytic Materials for Air Pollution *352*

18.5 Conclusion and Perspectives *353*
References *353*

19 Aerogel for Environmental Remediation *361*
Abdul S. Jatoi, Zubair Hashmi, Nabisab Mujawar Mubarak, Faisal A. Tanjung, Muhammad Ahmed, Shaukat A. Mazari, Faheem Akhter, and Shoaib Ahmed
19.1 Introduction *361*
19.2 Aerogel Applications in Air Cleaning *363*
19.2.1 Aerogels in CO_2 Capture *363*
19.2.2 Aerogels in Removal of Volatile Organic Compounds (VOC) *364*
19.3 Aerogel Applications for Water Treatment *365*
19.3.1 Aerogels in Oil and Toxic Organic Compounds Cleanup *365*
19.3.2 Aerogels in Removal of Heavy Metal Ions *366*
19.4 Conclusion and Outlook *370*
Acknowledgment *371*
References *371*
