

## Contents

### Preface *xi*

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	What Is an Explosion? Types of Explosions Covered in this Book	1
1.1.1	Nuclear Explosions	2
1.1.2	Pressure Vessel Bursts	3
1.1.3	Explosives	3
1.1.4	Closed Vessel Detonation	4
1.1.5	Steam Explosions	6
1.1.6	Closed Vessel Deflagrations	6
1.1.7	Building Deflagrations	8
1.1.8	Vapor Cloud Explosions	9
1.2	Controlling Parameters of a Combustible Gas/Vapor Explosion Hazard	10
1.3	Flame Propagation	12
1.4	Mixture Concentration – Definition of Flammability Limits	23
1.5	Minimum Ignition Energy (MIE) and Auto Ignition Temperature (AIT)	25
	Exercise Problems	27
	Nomenclature	27
	Greek Symbols	28
	Subscripts	28
	Other Notations	29
	References	29
<b>2</b>	<b>Synopses of Explosion Incidents</b>	<b>31</b>
2.1	Hydrogen Cylinder Trailer Module Explosion	31
2.2	Nylon Flock Dust Explosion	33
2.3	Flammable Vapor Explosion at Ink and Paint Manufacturing Plant	36
2.4	Jahn Foundry Dust Explosion	40
2.5	Upper Big Branch Coal Mine Explosion	45
	Nomenclature	51
	Subscripts	51

Other Notations 51  
References 52

### **3 Explosion in a Closed Vessel 55**

- 3.1 Introduction 55
- 3.2 The Movement of a Flame in a Premixed Gas–Air Mixture 57
- 3.3 Explosion Pressure Rise vs. Time in a Confined Vessel (Theory) 59
- 3.4 The Closed Vessel as an Experimental Platform for Standard Testing 68
- 3.5 Influence of Flame Wrinkling, Turbulence, and Dust on Flame Propagation 72
  - Nomenclature 75
  - Greek Symbols 75
  - Subscripts 75
  - Other Notations 76
  - References 76

### **4 Explosion in a Vented Vessel 79**

- 4.1 Introduction: How Does Pressure Develop in a Vented Vessel? 79
- 4.2 Explosion in a Vented Vessel Neglecting Transient Effects 81
- 4.3 Pressure Generation in a Vented Vessel with Transient Effects 83
- 4.4 Flame Instabilities 85
- 4.5 Flame Front Turbulence and the Concept of Turbulent Burning Velocity  $S_T$  86
  - 4.5.1 What Happens with Dust? 88
- 4.6 Pressures Generated in Vented Vessels – Experiments 89
  - 4.6.1 Influence of Ignition Location 89
  - 4.6.2 Effect of Obstacles 91
  - 4.6.3 Influence of Vent Size and Turbulence with Obstacles 92
  - 4.6.4 Influence of Turbulence with Vented Dust Explosions 94
- 4.7 Modeling Pressure Generated as a Function of Time in a Vented Vessel 97
  - 4.7.1 Conservation of Mass 98
  - 4.7.2 Expression for  $\bar{m}_u$  in Terms of  $P$  99
  - 4.7.3 Expression for  $\bar{m}_b$  in Terms of  $P$  99
  - 4.7.4 Expression for  $\bar{m}_v$  in Terms of  $P$  100
  - 4.7.5 Conservation of Energy: Expression for  $V_b$  in Terms of  $P$  102
  - 4.7.6 Final Equations for the Model 104
    - 4.7.6.1 Calculation of Total Enthalpy of the Gas–Air Mixture 105
    - 4.7.6.2 Burning Velocity 106
- 4.8 Pressure Developed Outside the Enclosure 113
- 4.9 Vent Design in Engineering Codes and Standards 115
  - Nomenclature 121
  - Greek Symbols 122
  - Subscripts 122
  - Superscript 122

Other Notations	122
References	122
<b>5</b>	<b>Accumulation of a Flammable Mixture in an Enclosure</b> 127
5.1	Introduction 127
5.2	Gas Filling in an Enclosure with <i>Forced</i> Ventilation 128
5.3	Gas Filling in an Enclosure with <i>Passive</i> Ventilation 130
5.4	Criteria for Mixture Uniformity 134
5.5	Concentration Buildup in an Enclosure by a Liquid Spill 137
5.5.1	Size of Spill 137
5.5.2	Evaporation of a Flammable Liquid Spill 137
5.6	Concentration Buildup in an Enclosure due to Dust 142
	Nomenclature 145
	Greek Symbols 146
	Subscripts 146
	Other Notations 147
	References 147
<b>6</b>	<b>Dimensionless Analysis</b> 149
6.1	Introduction 149
6.2	Dimensional and Nondimensional Quantities 149
6.3	The Buckingham Pi Theorem 150
6.4	Procedure for Obtaining Pi Terms 150
6.4.1	Creating a Correlation 154
	Nomenclature 161
	Greek Symbols 161
	Subscripts 161
	References 162
<b>7</b>	<b>Vapor Cloud Explosions</b> 163
7.1	Introduction 163
7.2	Shape of Overpressure Curves: Pressure Wave, Shock Wave, and Blast Wave 164
7.3	The Classical Model of Pressure Developed by a Spherically Expanding Flame 166
7.4	TNT Equivalent Model 168
7.5	The Multienergy Models 172
7.6	Baker–Strehlow–Tang Model 172
7.7	TNO Model 175
7.8	The Williams Model 186
7.9	Computational Fluid Dynamics (CFD) Modeling of VCE 189
7.10	Summary 190
	Nomenclature 190
	Greek Symbols 191
	Subscripts 191

Other Notations 191

References 192

## **8 Dust Flames and Dust Explosions 195**

8.1 Introduction 195

8.2 Elements of a Dust Explosion 196

8.3 Flame Structure – What Is a Dust Flame? 200

8.4 Dust Explosion Test Platforms 208

8.4.1 Hybrid Flame Analyzer 208

8.4.2 The Standard 1 m<sup>3</sup> and 20-l Explosion Spheres 213

8.4.3 Minimum Ignition Energy (MIE) Tests 216

8.4.4 Dust Ignition Temperature Tests 218

8.4.5 Limiting Oxygen Concentration 222

8.4.6 Open Dust Deflagration Test Apparatus by Dobashi 223

8.5 Powder and Dust Processing Equipment 223

8.5.1 Particle Size Reduction Equipment 224

8.5.2 Ovens and Dryers 226

8.5.3 Dust Collectors 228

8.5.4 Other Powder and Dust Handling Equipment 231

8.6 Dust Hazard Analyses 231

8.7 Dust Explosion Venting 238

Exercise Problems 242

Nomenclature 242

Greek Symbols 243

Subscripts 243

Other Notations 243

References 244

## **9 Other Explosion Protection Methods 249**

9.1 Introduction 249

9.2 Gas/Vapor Concentration Dilution 249

9.3 Inerting 251

9.4 Explosion Suppression Systems 253

9.5 Isolation 259

Nomenclature 267

Greek Symbols 268

Subscripts 268

Other Notations 268

References 269

## **Appendix A A Review of Chemistry and Thermodynamics 271**

A.1 Mole fraction ( $X_i$ ) and a Mass fraction ( $Y_i$ ) 271

A.1.1 Mole 271

A.1.2 Molar volume of a gas 271

A.1.3 Gram-mole 271

A.2	Stoichiometry	273
A.3	Combustion Chemistry	275
A.3.1	Combustion of Propane	276
A.3.2	Combustion of Butane	277
A.3.3	Represent as a Mixture	277
A.3.4	Determine Volume Percent of Fuel	278
A.3.5	Determine Weight Percent of Fuel	278
A.4	Pressure	279
A.5	Energy Terms and Adiabatic Flame Temperature	280
A.5.1	Ethane in Air	282
A.6	Equivalence Ratio	284
A.6.1	Stoichiometric Coefficient ( $s$ or $r$ Depending on Reference)	285
A.7	Heat and Heat Capacity	285
A.8	Entropy and Isentropic Process	285
A.8.1	Definitions	286
A.8.2	Ideal Gas Temperature – Entropy Relationships	286
A.8.3	Isentropic Relations	288
	Exercises	289
	References	289

**Appendix B Mathematica Code for Solved Examples** 291

**Index** 299
