Preface *xi*

1	Two-Terminal Neuromorphic Memristors	1
	<i>Hui-Kai He, He-Ming Huang, and Rui Yang</i>	
1.1	Memristive Devices	1
1.1.1	Memristive Device Structure and Materials	1
1.1.1.1	Memristive Device Structure	1
1.1.1.2	Memristive Materials	2
1.1.2	Resistive Switching Behavior	4
1.1.2.1	Volatile Resistive Switching	5
1.1.2.2	Nonvolatile Resistive Switching	7
1.2	Resistive Switching Mechanisms	7
1.2.1	Filamentary-Type Resistive Switching	8
1.2.1.1	Cation Migration-Related Filaments	8
1.2.1.2	Anion Migration-Related Filaments	11
1.2.2	Interface-Type Resistive Switching	14
1.3	Memristive Bioinspired Devices	17
1.3.1	Memristive Synapses	18
1.3.1.1	Short-Term Memristive Synapses	20
1.3.1.2	Long-Term Memristive Synapses	23
1.3.2	Memristive Neurons	27
1.3.2.1	Bioplausible Memristive Neurons	31
1.3.2.2	Biophysical Memristive Neurons	34
1.4	Memristive Neural Networks	36
1.4.1	Memristive ANN Computing	36
1.4.2	Memristive SNN Computing	39
1.5	Summary and Outlook	41
	References	42
2	Spintronic Neuromorphic Devices	47
	<i>Deming Zhang, Sai Li, Xinran Wang, Ao Du, Wang Kang, Lang Zeng, and Weisheng Zhao</i>	
2.1	Introduction	47
2.2	Magnetic Tunnel Junction for Neuromorphic Computing	48

2.2.1	Device Structure and the Write/Read Operation	48
2.2.1.1	Binary Magnetic Tunnel Junction	48
2.2.1.2	Multi-level Spintronic Memristor	49
2.2.2	Working as the Synaptic Device	51
2.2.2.1	Stochastic Binary Synaptic Device	51
2.2.2.2	Analog-Like Synaptic Device	52
2.2.3	Working as the Neural Device	54
2.2.3.1	Spiking Neural Device	54
2.2.3.2	Artificial Neural Device	57
2.2.4	All-Spin Neural Network	61
2.2.4.1	All-Spin Artificial Neural Network with Compound Scheme	61
2.2.4.2	All-Spin Spiking Neural Network with Spintronic Memristor	62
2.2.5	Summary and Outlook	62
2.3	Skyrmion-Based Neuromorphic Computing	62
2.3.1	The Introduction of Skyrmions	62
2.3.2	Skyrmion-Based Synapse Devices	64
2.3.3	Skyrmion-Based Neuron Devices	65
2.3.4	Skyrmion-Based Reservoir Computing	67
2.3.5	Skyrmion-Based Stochastic Computing	68
2.3.6	Challenges and Perspectives	69
2.4	Spin Torque Oscillators for Neuromorphic Computing	72
2.4.1	Introduction to Spin Torque Oscillator	72
2.4.2	Associative Memory Based on Injection Locking of STO	73
2.4.3	Reservoir Computing Based on STO	74
2.4.4	Recurrent Neural Network based on Delayed Feedback of STO	75
2.4.5	Neuromorphic Computing Based on the Synchronization of STO	77
2.4.6	Problems and Perspectives	77
2.5	Conclusion and Outlook	80
	References	80

3 Multiterminal Neuromorphic Devices with Cognitive Behaviors 91

Li Qiang Zhu, Jia Cheng Cai, Zheng Yu Ren, Wen Xiong, and Qing Wan

3.1	Introduction	91
3.2	Multiterminal Neuromorphic Memristors	92
3.2.1	Memristor-Based Neuromorphic Devices	92
3.2.2	Multiterminal Memristor for Neuromorphic System	96
3.2.2.1	Synaptic Competition and Cooperation on Multiterminal Memristor	96
3.2.2.2	Heterosynaptic Plasticity on Multiterminal Memristor	97
3.2.2.3	Multiterminal Memtransistor	98
3.3	Multiterminal Neuromorphic Transistors	99
3.3.1	Neuron Transistors	99
3.3.2	Neuromorphic Devices for Chemical Biosensor Applications	101
3.3.2.1	Chemical Biosensors	101
3.3.2.2	Neuron Transistors for Chemical Biosensor	102

3.3.2.3	Multi-gate Neuromorphic Transistor for pH Sensor	103
3.3.3	Dendritic Algorithm on Multiterminal Neuromorphic Transistors	103
3.3.3.1	EGT-Based Neuromorphic Transistors	103
3.3.3.2	Multi-gate Neuromorphic Transistor	105
3.3.3.3	Dendrite Neuron and Dendritic Algorithm	106
3.3.3.4	Multi-gate Neuromorphic Transistor for Pattern Recognition	109
3.4	Neuromorphic Transistors for Perception Learning Activities	109
3.4.1	Artificial Tactile Device	109
3.4.2	Artificial Vision Device	112
3.4.3	Artificial Auditory Device	113
3.5	Conclusion and Outlook	114
	Acknowledgments	116
	References	116
4	Neuromorphic Devices Based on Chalcogenide Materials	125
	<i>Jia Chen, Yifan Lu, Zhe Yang, Yi Li, and Xiangshui Miao</i>	
4.1	Introduction	125
4.2	Ovonic Memory Switching (OMS) and Threshold Switching (OTS) in Chalcogenide Materials	126
4.3	Artificial Synapses Based on MS Behaviors	129
4.4	Artificial Neurons Based on TS Effects	136
4.5	Hardware Neural Networks	139
4.6	Summary and Outlook	143
	References	144
5	Neuromorphic Devices Based on Organic Materials	149
	<i>Junyao Zhang and Jia Huang</i>	
5.1	Introduction	149
5.2	Two-Terminal Organic Neuromorphic Devices	149
5.2.1	Metal Filament Conducting-Based Memristors	150
5.2.2	Redox Reaction-Based Memristors	152
5.2.3	Ion Migration-Based Memristors	153
5.2.4	Charge Trapping-Based Memristors	155
5.3	Three-Terminal Organic Neuromorphic Devices	157
5.3.1	Floating-Gate Transistors	157
5.3.2	Electrolyte-Gate Transistors	158
5.3.3	Ferroelectric-Gate Transistors	162
5.3.4	Optoelectronic Transistors	164
5.4	Innovative Applications of Organic Neuromorphic Devices for Bionic Perception Systems	165
5.4.1	Artificial Visualization Systems	166
5.4.2	Tactile-Perception Systems	167
5.5	Summary and Outlook	169
	References	170

6	Neuromorphic Computing Systems with Emerging Devices	173
	<i>Qiumeng Wei, Jianshi Tang, Bin Gao, Xinyi Li, He Qian, and Huaqiang Wu</i>	
6.1	Introduction	173
6.1.1	Background Introduction	173
6.1.2	The Motivation for Neuromorphic Computing	174
6.1.3	Progress and Challenges of CMOS-Based Neuromorphic Computing	174
6.1.4	Principles of Memristors	176
6.2	DNNs Based on Synaptic Devices	178
6.2.1	Device Performance Requirements	178
6.2.2	Array Demonstrations	179
6.2.3	Chip and System Implementations	183
6.2.4	Architecture and Algorithm Optimization	185
6.2.4.1	Quantization	185
6.2.4.2	Nonideal Analog Switching Characteristics	186
6.2.4.3	Synaptic Array Size	186
6.3	SNNs Based on Neuromorphic Devices	187
6.3.1	Learning Rules and Memory Principles	188
6.3.1.1	Synapses and Neurons in SNNs	188
6.3.1.2	Learning Algorithms and Benchmarks for SNNs	188
6.3.2	SNNs with Synaptic Devices and Neuronal Devices	189
6.3.2.1	Synaptic Devices with Plasticity	189
6.3.2.2	Neuronal Devices	191
6.3.3	SNN Implementations with Synaptic Arrays	192
6.4	Other Neuromorphic Systems	196
6.4.1	Hyperdimensional Computing	196
6.4.2	Dendritic Computing	196
6.4.3	Reservoir Computing	202
6.4.4	Oscillatory Neural Network	203
6.4.5	Hopfield Neural Network and Simulated Annealing	203
6.5	Summary and Outlook	204
	References	206
7	Neuromorphic Perceptual Systems with Emerging Devices	217
	<i>Ying Zhu, Changjin Wan, and Qing Wan</i>	
7.1	Background	217
7.2	Sensation and Perception	218
7.2.1	From Sensation to Perception	218
7.2.2	Pursing Artificial Perception by Neuromorphic Devices	219
7.3	Implementation of Artificial Perception	221
7.3.1	Building Block of Artificial Perception: Artificial Sensory Neuron	221
7.3.2	Intelligent Tasks Based on Artificial Perception	223
7.3.2.1	Pattern Recognition Tasks	224

7.3.2.2	Prosthetics and Robotics Applications	226
7.3.3	A Roadmap Toward Neuromorphic Perceptual System	226
7.4	Challenges and Perspectives	228
7.4.1	Challenges	228
7.4.2	Conclusions and Perspectives	229
	References	229
	Index	235
