

## Index

### **a**

absorption refrigerator 233, 234  
 acentric factor 69, 73, 75, 79, 84, 90, 176, 177  
 activity 411, 437  
 activity coefficient 301–307, 310–314, 316–318, 323, 336, 340, 342, 345, 362, 378, 394, 399, 400, 402, 416, 423, 426, 437–439, 455  
   density dependent EOS 302  
   pressure dependent EOS 302  
 adiabatic  
   adiabatic flame temperature 95  
   adiabatic process 60, 102, 125, 182, 195, 198, 244  
 Antoine equation 89, 398, 399, 454  
 Azeotrope 333, 335, 382, 409

### **b**

Benedict-Webb-Rubin 83  
 Boyle temperature 67, 69, 71  
 Brayton cycle 220, 221, 230  
 bubble point 332  
   calculations 349

### **c**

Carnot  
   cycle 116–118, 120, 121, 125, 196–198, 200–202, 225, 233  
   engine 117, 196  
   refrigerator 117, 128, 196, 225

chemical potential 260, 264, 274, 284, 328, 329, 336, 359, 360, 365, 366, 383, 388, 406, 436  
 chemical reaction 108, 257, 277  
   equilibria 405  
   stoichiometry 406, 407  
 Clausius–Clapeyron equation 170  
 Clausius inequality 122  
 coefficient of performance 128  
 combining rule 293  
 combustion  
   combustion engines 211  
   heat of combustion 92  
   standard heat of combustion 92  
 compressibility factor 65, 67, 70, 83, 88, 162, 166, 182, 279, 281, 282, 287, 288, 295, 296, 303, 357, 361, 370  
   critical compressibility factor 75, 82  
   generalized correlations 166–168  
   residual compressibility factor 303  
 compressor 34, 35  
 continuity equation 135, 136, 180, 181  
 cricondenbar 334  
 cricondentherm 334  
 critical point 48, 50, 51, 53, 75, 77, 78, 171, 334  
 cubic equation of state 77, 244

### **d**

De Santis–correlation 73  
 density 4, 15  
   mass density 8  
   special equations 75, 76

 heat engine 116, 196, 226, 235  
 heat exchanger 36, 116  
 heat pump 116  
 Helmholtz energy 160, 162  
   fundamental equation 151  
 Henry's constant 305  
 Henry's law 423

**i**

ideal gas 57  
   enthalpy changes 91  
   entropy changes 130  
   fugacity 275

  process simulator 242  
   residual properties 331  
   reversible process 58  
   standard state 93, 420  
   temperature 120  
 ideal gas mixtures 271  
   fugacity in solution 305  
   in phase equilibrium 330  
 ideal solution 298  
 Iglesias-Silva-Hall correlation 73  
 intensive properties 262  
 internal combustion engine 211–214  
 internal energy 23  
   fundamental equation 151  
   of an ideal gas 58  
   of perfect gas 58  
 irreversible process 62, 101, 113, 114,  
   118, 123–125, 127, 133  
 isentropic process 125, 175, 188, 199,  
   200, 210, 222, 224, 230  
 isobaric process 59  
 isothermal compressibility 193  
 isothermal process 243

**j**

jet engine 222  
 Joule-Thompson  
   coefficient 85  
   expansion 236

**k**

K-value 352  
 kinetic energy 23, 134, 184, 222

**l**

Lee-Kesler correlation 167, 281  
 Legendre transform 149–151  
 Lewis-Randall rule 299, 304, 305  
 liquefaction 235–237  
 liquid  
   PVT region 66  
   standard state 420  
   volume 86, 104  
 liquid liquid equilibria 374, 375, 378–381  
 liquid solid equilibrium 391

**m**

- Margules equation 400, 437
- Maxwell 151
  - equal area rule 331
  - relations 151–153
- measurables variables 153
- mixing process 307
- mixing rule 292
  - virial equation 292
- modified Raoult's law 340
- Multiphase Equilibria based upon Gibbs energy 365

**n**

- Newton's second law 4
- Newton-Raphson method 86
- normal boiling point temperature 75, 90, 106
- nozzle 183, 196, 222
- NRTL model 314

**o**

- open system 15, 28, 39
  - chemical potential 155
  - entropy balance 133
  - process simulator 242
- Orbey-Vera correlation 73
- Otto cycle 211–217

**S**

saturated liquid 51  
 saturated vapor 51, 330  
 second law of thermodynamics 113  
 second virial coefficient 167  
   correlations 76  
 Soave-Redlich-Kwong equation 82  
 solid solid equilibrium 391  
 specific heat 128  
 standard state 420–424  
 state function 63, 118, 122,  
   130, 146  
 steady state 30, 33–36, 38  
 steam turbine 199, 252  
 sub-cooled liquid 184  
 surroundings 14  
 system  
   closed 15  
   isolated 15

**t**

temperature 3, 6, 10  
   scale 10  
     Celsius 11  
     Fahrenheit 11  
     Kelvin 11  
     Rankine 11  
 thermal efficiency 217  
 thermodynamic consistency  
   269, 335  
 third virial coefficient 68  
   correlations 69  
 throttling process 220  
 Tsonopolous correlation 71  
 turbine 35  
 two phase system-Clapeyron equation  
   169–171

**U**

UNIQUAC 314  
 units 13  
 unsteady state 39

**V**

valve 184  
 van't Hoff equation 418  
 van der Waals equation 77, 105  
 van Laar equation 312  
 vapor liquid equilibria 170, 336, 366  
   phase calculations gamma-phi 338  
   phase calculations phi-phi 349  
 vapor pressure correlations 89, 90  
   Antoine equation 89  
   Gomez-Nieto-Thodos equation 90  
   Wagner equation 89  
 vapor pressure curve 170, 334  
 virial coefficients 66  
   correlations 69–71  
 virial equation of state 65  
 volume, roots 295

**W**

Wagner equation 89  
 Watson equation 90  
 Wilson equation 313  
 work 25–27, 62  
   ideal gas, adiabatic process 60  
   isobaric process 59  
   isothermal process 141

**Z**

Zeroth law of thermodynamics 16
