**Preface** *xiii*

**About the Editors** *xv*

<b>1</b>	<b>Introduction to Natural Materials for Food Packaging</b>	<b>1</b>
	<i>Manickam Ramesh, Lakshminarasimhan Rajeshkumar, Venkateswaran Bhuvaneshwari, and Devarajan Balaji</i>	
1.1	Introduction	1
1.2	Natural Biodegradable Polymers	4
1.2.1	Starch-Based Natural Materials	4
1.2.2	Poly-Lactic Acid-Based Natural Materials	5
1.2.3	Poly-Caprolactone (PCL)-Based Natural Materials	5
1.2.4	Poly-Hydroxy Alkanoate-Based Natural Materials	6
1.2.5	Polyglycolide-Based Natural Materials	6
1.2.6	Polycarbonate-Based Natural Materials	7
1.2.7	Soy-Based Bio-degradable Polymers	7
1.2.8	Polyurethanes	7
1.2.9	Polyanhydrides	7
1.3	Biodegradable Polymer Blends and Composites	8
1.3.1	Poly(lactic Acid) and Poly(ethylene) Blends	8
1.3.2	PLA and Acrylonitrile Butadiene Styrene (ABS) Blends	8
1.3.3	PCL and Poly(ethylene) Blends	8
1.3.4	PCL and Poly(vinyl Chloride) Blends	9
1.3.5	TPS and Poly(propylene) Blends	9
1.3.6	TPS/PE Blends	9
1.3.7	Poly(butylene Succinate) Blends	10
1.4	Properties of Natural Materials for Food Packaging	10
1.4.1	Barrier Properties	10
1.4.2	Biodegradation Properties	11
1.4.3	Consequences of Storage Time	12
1.5	Environmental Impact of Food Packaging Materials	14
1.6	Conclusion	14
	References	15

<b>2</b>	<b>Plant Extracts-Based Food Packaging Films</b>	<b>23</b>
	<i>Aris E. Giannakas</i>	
2.1	Introduction	23
2.2	Extraction Methods for Plant Extracts	24
2.3	Research Investigation of Bibliographic Data	25
2.4	Chitosan Plant Extract-Based Food Packaging Films	27
2.5	Starch/Extract-Based Food Packaging Films	30
2.6	Cellulose and Cellulosic Derivatives-Based Food Packaging Films Modified with Plant Extract	32
2.7	Gelatin and Alginate/Plant Extract-Based Food Packaging Films	34
2.8	Composites/Plant Extract-Based Food Packaging Films	35
2.8.1	Chitosan Composites/Plant Extract-Based Food Packaging Films	36
2.8.2	Starch Composites/Extract-Based Food Packaging Films	38
2.8.3	Other Composites Plant Extract-Based Food Packaging Films	39
2.9	Conclusion	41
	Acknowledgment	41
	References	42
<b>3</b>	<b>Essential Oils in Food Packaging Applications</b>	<b>51</b>
	<i>Madhushree Hegde, Akshatha Chandrashekar, Mouna Nataraja, Niranjana Prabhu, Jineesh A. Gopi, and Jyotishkumar Parameswaranpillai</i>	
3.1	Introduction	51
3.2	Chemistry and Classification of Essential Oils	52
3.3	Essential Oils in Food Packaging Applications	55
3.3.1	Effect of Essential Oil on the Mechanical, Barrier, and Other Physical Properties of Food Packaging Materials	55
3.3.1.1	Tensile Properties	55
3.3.1.2	Barrier Properties	56
3.3.1.3	Other Physical Properties	56
3.3.2	Antioxidant Properties of Essential Oil Incorporated Food Packaging Materials	58
3.3.3	Antibacterial Properties of Essential Oil Incorporated Food Packaging Materials	61
3.4	Challenges and Future Trends Associated with the Use of Essential Oil in Food Packaging Applications and Future Trends	65
3.5	Conclusions	65
	References	66
<b>4</b>	<b>Agro-Waste Residue-Based Food Packaging Films</b>	<b>75</b>
	<i>Rajarathinam Nithya and Arunachalam Thirunavukkarasu</i>	
4.1	Introduction	75
4.2	Agro-Waste-Based Biopolymers	76
4.2.1	Cellulose	76
4.2.2	Hemicellulose	77
4.2.3	Lignin	77
4.2.4	Starch	78
4.2.5	Pectin	79

4.3	Edible Coatings and Films – Classification and Properties	80
4.4	Conclusion and Future Prospects	83
	References	83
<b>5</b>	<b>Hydrogel-Based Food Packaging Films</b>	<b>89</b>
	<i>Kunal Singha and Kumar Rohit</i>	
5.1	Introduction	89
5.2	Hydrogel Nature, Definition	91
5.2.1	Hydrogel Types and Features	91
5.2.1.1	Classification According to Polymeric Composition	91
5.2.1.2	Classification Based on Configuration: Classification is Done Based on the Setting	91
5.2.1.3	Classification Based on the Type of Cross-Linking	91
5.2.1.4	Classification Based on Physical Appearance	92
5.2.1.5	Classification According to Network Electrical Charge	92
5.3	Preparation of Hydrogel Film	92
5.4	Hydrogel as Food Packaging Material	92
5.4.1	Hydrogels Functional Properties	93
5.5	Classification of Hydrogel	93
5.6	Hydrogels Functional Properties	93
5.7	Potential Application of Hydrogel in Food Packaging Systems	95
5.7.1	Applications of Hydrogels In Vitro and Food Matrices	96
5.7.2	Biodegradable Packaging	96
5.7.3	Biodegradability	97
5.7.4	Other Potential Applications in the Food Industry	98
5.8	Latest Development in the Hydrogel in the Field of Food Packaging	98
5.9	Futuristic Uses of Hydrogel in Miscellaneous Process	99
5.10	Conclusions	100
	References	101
<b>6</b>	<b>Natural Fiber-Based Food Packaging Films</b>	<b>105</b>
	<i>G. Rajeshkumar, M. Karthick, A.K. Aseel Ahmed, T. Vikram Raj, V. Abinaya, K. Madhu Mitha, and R. Ronia Richelle</i>	
6.1	Introduction	105
6.2	Manufacturing of Fiber-Reinforced Biofilms	107
6.3	Rice Straw-Based Films	109
6.4	Wheat Straw-Based Films	109
6.5	Jute-Based Films	111
6.6	Pineapple-Based Films	112
6.7	Flax-Based Films	113
6.8	Kenaf-Based Films	114
6.9	Hemp-Based Films	115
6.10	Conclusions	115
	References	116

<b>7</b>	<b>Natural Clay-Based Food Packaging Films</b>	<b>121</b>
	<i>Ram Kumar Deshmukh, Dakuri Ramakanth, Konala Akhila, and Kirtiraj K. Gaikwad</i>	
7.1	Introduction	121
7.2	Clay Materials Classification	127
7.2.1	TO or 1:1 Type (One-One Tetra-octahedral Layer)	127
7.2.2	TOT or 2:1 Type (One-Octahedral in Between Two Tetrahedral Layers)	128
7.2.3	2:1:1 or TOTO Type (Two Tetrahedral with Two Octahedral)	128
7.3	Preparation of Natural Clay Nanocomposites	128
7.3.1	In situ Polymerization Method	130
7.3.2	Solution-Induced Intercalation	130
7.3.3	Melt Processing	130
7.4	Properties of Natural Clay-Based Nanocomposite Polymer	130
7.4.1	Mechanical Properties	131
7.4.2	Barrier Properties	132
7.4.3	Thermal Stability of Clay-Based Polymer Composites	133
7.4.4	Oxygen and Ethylene Scavenging Activity of Nano-Clay Polymer Composite	133
7.5	Application of Natural Clay in Food Packaging Film	135
7.5.1	Montmorillonite (MMT)-Based Nanocomposite	139
7.5.2	Laponite-Reinforced Polymer Nanocomposite	141
7.5.3	Sepiolite-Reinforced PNC	141
7.5.4	Bentonite-Reinforced Polymer Nanocomposite	142
7.5.5	Hectorite-Reinforced Polymer Nanocomposite	143
7.5.6	Rectorite-Reinforced Polymer Nanocomposite	144
7.5.7	Other Nanoclay Materials-Based Nanocomposites	145
7.6	Challenges of Using Clay in Food Packaging Applications	145
7.6.1	Migration and Exposure of Nanoclay Materials to Humans and the Environment	146
7.6.2	Toxicity of Nanoclay	148
7.7	Future Outlook and Conclusion	149
	References	150
<b>8</b>	<b>Curcumin-Based Food Packaging Material</b>	<b>165</b>
	<i>Leidy T. Sanchez, Andres F. Cañon-Ibarra, J. Alejandro Arboleda-Murillo, and Cristian C. Villa</i>	
8.1	Structural Characteristics of Curcumin	165
8.2	Antimicrobial, Antifungal, and Antioxidant Properties of Curcumin	166
8.3	Nanoencapsulation of Curcumin	167
8.4	Curcumin-Based Food Packaging	168
8.5	Curcumin-Based Nanocomposite Food Packaging	169
8.6	Curcumin-Based Active Food Packaging	169
8.7	Curcumin-Based Intelligent Food Packaging	170
8.8	Perspectives	171
	References	171

<b>9</b>	<b>Sustainable Materials from Starch-Based Plastics</b>	<b>179</b>
	<i>Asanda Mtibe and Maya J. John</i>	
9.1	Introduction	179
9.1.1	Starch	179
9.1.2	Preparation of Thermoplastic Starch (TPS)	180
9.1.3	Plasticization of Starch	180
9.1.4	Processing of TPS	183
9.1.5	Properties of TPS	185
9.1.5.1	Mechanical Properties	185
9.1.5.2	Thermal Properties	186
9.1.5.3	Barrier Properties	186
9.2	TPS-Biopolymer Blends	187
9.3	TPS-Biopolymer Composites	188
9.4	Global Producers, Market Volumes, and Applications of Starch-Based Plastics	191
9.5	Conclusions	193
	References	193
<b>10</b>	<b>Main Marine Biopolymers for Food Packaging Film Applications</b>	<b>199</b>
	<i>Jesús Rubén Rodríguez-Núñez, Diana Gabriela Montoya-Anaya, Judith Fortiz-Hernández, Yolanda Freile-Pelegrín, and Tomás Jesús Madera-Santana</i>	
10.1	Introduction	199
10.2	Polysaccharides from Seaweeds	200
10.2.1	Main Seaweed Polysaccharides	201
10.2.2	Alginate	202
10.2.2.1	Properties and Limitations of Alginate	204
10.2.2.2	Applications of Alginate in Edible Films and Coatings	205
10.2.3	Agar	205
10.2.3.1	Applications of Agar in Edible Films and Coatings	210
10.2.4	Carrageenan	213
10.2.5	Fucoidan	216
10.2.6	Ulvan	218
10.3	Modified Chitosan for Food Film Applications	220
10.3.1	Chemical Modifications of Chitosan for Food Packaging	220
10.3.2	Chitosan Blends/Composites for Films and Coating for Food Applications	222
10.3.3	Nanomaterials of Chitosan for Food Packaging	224
10.4	Conclusions and Future Trends	226
	References	227
<b>11</b>	<b>Chitosan-Based Food Packaging Films</b>	<b>241</b>
	<i>Kunal Singha and Kumar Rohit</i>	
11.1	Introduction	241
11.1.1	A Brief History of Food Packaging Materials Used	241
11.1.2	Characteristics of Typical Food Packaging Materials	242
11.1.3	Need for Biodegradable Food Packaging Materials	242
11.2	Chitin and Chitosan Chemical Structure	243

11.3	Chitosan as a Potential Biodegradable Food Packaging Material	243
11.3.1	Chitosan as Food Packaging Material	244
11.3.2	Chitosan Film in Food Packaging and Their Types	244
11.3.2.1	Chitosan-Based Films	245
11.3.2.2	Flexible Packaging Films	245
11.3.3	Chitosan Film in Food Packaging	245
11.3.4	Films Embedded with Nanomaterials	245
11.3.5	Films Embedded with Clays	246
11.3.6	Films Embedded with Polysaccharide Particles, Fibres, and Whiskers	247
11.3.7	Films Embedded with Natural Oils and Extracts	247
11.4	Future Research Directions and Developments	249
11.4.1	Chitin/Chitosan Derivatives and Their Interactions with Microorganisms: A Comprehensive Review and Future Perspectives	249
11.4.2	A Future Perspective in Crop Protection: Chitosan and its Oligosaccharides	249
11.4.3	Chitosan in Molecularly-Imprinted Polymers: Current and Future Prospects	250
11.4.4	Crosstalk Between Chitosan and Cell Signaling Pathways	250
11.4.5	Resorbable Chitosan Matrix – As a Promising Biomaterial for the Future	250
11.5	Conclusions	251
	References	251
<b>12</b>	<b>Effect of Natural Materials on Thermal Properties of Food Packaging Film: An Overview</b>	<b>255</b>
	<i>H. M. Prathibhani C. Kumarihami, Nishant Kumar, Pratibha, Anka T. Petkoska, and Neeraj</i>	
	Abbreviations	255
12.1	Introduction	256
12.2	Biodegradable Films: An Alternative for Food Packaging	257
12.2.1	Biodegradable Polymers	258
12.3	Thermal Properties of Food Packaging	259
12.4	Effects of Natural Materials on the Thermal Stability of Food Packaging	260
12.4.1	Effects of Plant Extract	260
12.4.2	Effects of Essential Oils	261
12.4.3	Effects of Color Agent	262
12.4.4	Effects of Nanomaterials	263
12.4.5	Effects of Plasticizers	265
12.4.6	Effects of Emulsifiers	266
12.5	Conclusions	266

**14 Effects of Natural Materials on Food Preservation and Storage 313**

*Subhanki Padhi and Winny Routray*

- 14.1 Introduction 313
- 14.1.1 Major Objective of Food Preservation and Storage 313
- 14.1.2 Available Solutions from the Natural Resources and Combination with Technology 314
- 14.2 Biomolecules Utilized for Preservation, Their Properties, and Uses 315
  - 14.2.1 Polysaccharides 315
  - 14.2.2 Essential Oil 316
  - 14.2.3 Phenolic Compounds 318
  - 14.2.4 Aromatic Compounds 319
  - 14.2.5 Proteins 320
  - 14.2.6 Bacteriocins 320
  - 14.2.7 Other Animal-Based Antimicrobials 321
- 14.3 Different Extraction Processes Employed for Natural Materials 321
- 14.4 Effects of Natural Materials on Different Product Quality and Storage 323
  - 14.4.1 Drying Methods and Corresponding Properties 323
  - 14.4.2 Enhancement of Packaging Characteristics 323
  - 14.4.3 Maintenance of Physiochemical Properties of Raw and Processed Products 324
- 14.5 Conclusion 325
- References 326

**15 Marketing, Environmental, and Future Perspectives of Natural Materials in Packaging 333**

*Prakash Binu, Sasi Arun Sasi, Velamparambil Gopalakrishnan Gopikrishna, Abdul Shukkur, Balu Balachandran, and Mahesh Mohan*

- 15.1 Introduction 333
- 15.2 Biodegradable Food Packaging 334
- 15.3 Different Bio-Based Packaging Materials 336
  - 15.3.1 Bioplastics 336
  - 15.3.2 Biopolymers 336
- 15.4 Nano Food Packaging 338
- 15.5 Natural Antimicrobial Agents in Food Packaging 338
- 15.6 Edible Films in Food Packaging 339
- 15.7 Environment and Food Packaging 341
- 15.8 Sustainable Packaging 342
- 15.9 Marketing of Natural Materials in Packaging 343
- 15.10 Future Perspectives of Natural Materials in Packaging 344
- 15.11 Conclusion 345
- References 345
