Preface xv

1	New-Age Nano Adsorbents for Water Purification	1
	<i>Subhadeep Biswas, Abhishek Johri, and Anjali Pal</i>	
1.1	Introduction	1
1.2	Different New-Age Nanoadsorbents	2
1.2.1	Metal–Organic Framework (MOF)-Based Nanoadsorbents	2
1.2.2	Graphene, Graphene Oxide (GO), and Reduced Graphene Oxide (rGO)-Based Nanoadsorbents	3
1.2.3	ZVI-Based Nanoadsorbents	4
1.2.4	Polysaccharide-Based Nanoadsorbents	5
1.2.4.1	Chitin and Chitosan-Based Adsorbents	5
1.2.4.2	Cellulose-Based Adsorbents	6
1.2.4.3	Starch-Based Adsorbents	6
1.2.4.4	Pectin-Based Adsorbents	7
1.2.4.5	Alginate-Based Adsorbents	8
1.2.5	MXene-Based Nanoadsorbents	8
1.2.6	Biochar-Based Nanoadsorbents	9
1.2.7	Hybrid Nanoadsorbents	10
1.2.8	Other Nanoadsorbents	10
1.3	Different Mechanisms	14
1.4	Different Characterization Techniques	17
1.4.1	FTIR Analysis	17
1.4.2	Electron Microscopic Analysis	17
1.4.3	X-Ray Diffraction (XRD) Analysis	17
1.4.4	UV-Diffuse Reflectance Spectra (DRS) Analysis	18
1.4.5	Brunauer–Emmett–Teller (BET) Analysis	19
1.5	Current Challenges and Future Perspectives	19
	Acknowledgment	20
	Conflicts of Interest	20
	References	20

2	Nanomaterials: Prospects for Water Purification and Relevance of Biosensing in Drinking Water 27
	<i>Seemesh Bhaskar and Sai Sathish Ramamurthy</i>
2.1	Introduction: Water Pollution and Relevance of Biosensing 27
2.2	Utility of Nanomaterials for Biosensing 29
2.3	Utility of Surface Plasmon-Coupled and Photonic Crystal-Coupled Emission Platforms 30
2.4	Nano-Engineering in SPCE and PCCE Platforms 32
2.5	Case Study: Tannic Acid Sensing in Drinking Water Using SPCE Platform 32
2.6	Case Studies of Sensing Ions such as Cu^{2+} , Zn^{2+} , Hg^{2+} , Al^{3+} , and I^- in Drinking Water 33
2.7	Water Purification via Defluoridation: Introduction 37
2.8	Development of Material for Adsorption Studies and Characterization 40
2.9	Batch Equilibrium and Kinetic Experiments to Investigate the Fluoride Adsorption Capacity 42
2.9.1	Effect of pH 42
2.9.2	Effect of Agitation Time 43
2.9.3	Effect of Adsorbent Dose 43
2.10	Adsorption Isotherms 44
2.11	Adsorption Kinetics 45
2.12	Concluding Remarks 47
	Consent for Publication 48
	Acknowledgment 48
	Conflict of Interest 49
	References 49
3	Nanomaterials for Air and Water Purification 55
	<i>Livia Elisabeth Vasconcellos de Siqueira Brandão Vaz</i>
3.1	Introduction 55
3.2	Nanoscience 56
3.2.1	Historical Contextualization of Technological Development 56
3.2.2	Nanomaterials 57
3.2.3	Nanotechnology and Its Potential Risk 60
3.3	Nanomaterials for Air and Water Purification 61
3.4	Conclusion 66
	References 67
4	Green Nanotechnology for Water Purification 77
	<i>Mahmoud A. Abdulhamid, Nawader Alqadhi, Claudia Osornio, and Gyorgy Szekely</i>
4.1	Introduction 77
4.2	Functionalized Nanoadsorbents 79
4.2.1	Dendrimer-Assisted Filtration 79

4.2.2	Cyclodextrins	80
4.2.3	Zeolites	81
4.2.4	Silica	83
4.2.5	Nanocatalysts and Green Nanoparticles	84
4.3	Carbon-based Nanoadsorbents	84
4.3.1	Activated Carbon (AC)	85
4.3.2	Carbon Nanotubes (CNTs)	86
4.3.3	Fullerenes	87
4.4	Antimicrobial Nanomaterials	88
4.4.1	Chitosan and Peptides	88
4.4.2	Silver NPs	91
4.4.3	TiO ₂ NPs	92
4.4.4	Zinc Oxide NPs	93
4.5	Desalination	93
4.5.1	Membrane-Based Desalination	94
4.5.2	Thermal Desalination	97
4.5.3	Chemical Desalination	98
4.6	Photocatalysis	99
4.6.1	Heterogenous TiO ₂ Photocatalysis	99
4.6.2	Hybrid TiO ₂ /Nanocarbon Composites	101
4.7	Nanomembranes	102
4.7.1	CNT and NP Composite Membranes	102
4.7.2	Ceramic Membranes	103
4.7.3	Nanofiber Membranes for Water Purification	104
4.8	Future Challenges and Prospects	105
	References	106

5 Electrospun Nanofiber Membranes for Effective Air Filtration 115

Narendra Reddy and Kavya S. Bhushan

5.1	Introduction	115
5.2	Electrospun Air Filtration Membranes from Biopolymers	118
5.2.1	Polysaccharide-Based Electrospun Membranes	118
5.2.1.1	Starch-Based Filters/Membranes	123
5.2.1.2	Chitosan-Based Air Filters	124
5.2.2	Protein-Based Air Filtration Membranes	126
5.3	Synthetic Polymers	128
5.3.1	Poly(acrylonitrile) (PAN)-Based Filtration Membranes	128
5.3.2	Poly(vinyl alcohol)-Based Filters	129
5.3.3	Air Filtration Membranes from Poly(lactic acid) (PLA)	135
5.3.4	Miscellaneous Polymer Membranes	138
5.4	Conclusions	140
	References	140

- 6 Nanocatalysts and Redox Nanoparticles for Water Purification 145**
Kannappan Lakshmi, Arunasalam Sridhar, and Rajmohan Rangasamy
- 6.1 Fenton and Photo-Fenton Processes for the Treatment of Contaminated Water 146
- 6.2 Carbon-Based Nanocatalysts for Water Purification 148
- 6.3 Metal Oxide-Based Nanocatalysts 151
- 6.4 Nano-Zero-Valent Iron (nZVI) 154
- 6.5 Metal-Based Nanocatalyst for Water Purification 156
- 6.6 Conclusion 159
References 160
- 7 Nanomaterials and Water Purification: Opportunities for Improving and Protecting Water 165**
Natalia Scheverin, Aura B. Patiño, Mariel Díaz, and Maria Fernanda Horst
- 7.1 Introduction 165
- 7.2 Zero-Valent Metal-Based Nanomaterials 168
- 7.2.1 Nanosized Zero-Valent Iron 168
- 7.2.1.1 Practical Application of nZVI in Macro-Scale 170
- 7.2.2 Silver Nanoparticles 172
- 7.3 Metal Oxide-Based Nanomaterials 173
- 7.3.1 Iron Oxide Nanoparticles 174
- 7.3.2 Titanium Dioxide Nanoparticles 176
- 7.3.3 Zinc Oxide Nanoparticles 177
- 7.4 Nanosized Zeolite as Adsorbent and Support Material 177
- 7.5 Nanocomposites 178
- 7.6 Classification of Carbon/Polymer Nanocomposites 181
- 7.6.1 Metal/Polymer or Carbon-Based Nanocomposites 181
- 7.6.1.1 nZVI (Nanosized Zero-Valent Iron) Nanocomposites 181
- 7.6.1.2 Silver Nanocomposites (Ag^0) 182
- 7.7 Metal Oxides/Polymer or Carbon-Based Nanocomposites 183
- 7.7.1 Iron Oxide (Magnetite) Nanocomposites 183
- 7.7.2 Titanium Oxide (TiO_2) Nanocomposites 185
- 7.7.3 Zinc Oxide (ZnO) Nanocomposites 185
- 7.8 Silicate/Polymer or Carbon-Based Nanocomposites 186
- 7.8.1 Nanosized Zeolites Composites 186
References 186
- 8 The Use of Sol–Gel Technology to Produce Nanomaterials for Air and Water Purification 197**
Andrei Rex and João Henrique Zimnoch dos Santos
- 8.1 Introduction 197
- 8.2 Water Purification 199
- 8.2.1 Air Purification 205
- 8.2.2 Air and Water Purification 206

8.3	Final Remarks	211
	References	213
9	Graphitic Carbon Nitride (g-C₃N₄)-based Sustainable Photocatalysts for Purification of Antibiotic Containing Wastewater	217
	<i>Dhruti S. Pattanayak, Chandrakant Thakur, Dhananjay Singh, and Dharm Pal</i>	
9.1	Introduction	217
9.2	Structure and Preparation of g-C ₃ N ₄	219
9.2.1	Modification of g-C ₃ N ₄	220
9.3	General Mechanism of Photodegradation by Employing g-C ₃ N ₄	221
9.3.1	Influencing Factors for Photocatalytic Degradation	223
9.4	Antibiotics in Wastewater	223
9.5	Photocatalytic Antibiotic Degradation Using g-C ₃ N ₄ -based Composite	224
9.5.1	Antibiotic Degradation by Using Elemental Doped g-C ₃ N ₄	225
9.5.2	Antibiotic Degradation by Using g-C ₃ N ₄ -based Heterojunctions	228
9.6	Conclusions and Perspectives	229
	Acknowledgments	230
	References	231
10	Development of Noble Metal Supported Nanoparticles for Water Treatment	237
	<i>Hamyal Izhar, Fatima Izhar, Shoomaila Latif, Muhammad Imran, and Nazim Hussain</i>	
10.1	Noble Metal Nanoparticles	237
10.2	Use of Noble Metal Nanoparticles for Purification of Water	238
10.2.1	Against Microorganisms	238
10.2.2	Antioxidant, Antibacterial, Adsorbent, and Antibiofouling Applications	238
10.2.3	Drinking Water Disinfection	238
10.2.4	Decomposition of Pesticides	238
10.2.5	“Green Chemistry” Approach	239
10.3	Chemically Inert Support	240
10.3.1	Modification of Membranes	240
10.3.2	Use of Filters	241
10.4	Chemically Active Support	241
10.5	Photocatalysis	241
10.5.1	Titania as Photocatalyst and Improved Performance of Titania Photocatalysts	242
10.5.2	Plasmonic Photocatalysis	242
10.5.2.1	Improvement in the Activity of Plasmonic Photocatalysts	243
10.6	Removal of Pollutants	243
10.6.1	Physical Procedures for Removal of Contaminants	243

10.6.1.1	Physicochemical Processes	243
10.6.1.2	Nanofiltration or Reverse Osmosis	243
10.6.2	Degradation of Chemical Pollutants	244
10.6.2.1	Catalytic Reduction	244
10.6.2.2	Oxidative Decomposition	244
10.6.2.3	Reductive Decomposition	244
10.7	Elimination of Microbiological Pollutants	245
10.7.1	Direct Antimicrobial Action Using Noble Metal Nanoparticles	245
10.7.1.1	Platinum	245
10.7.1.2	Gold	245
10.7.1.3	Copper	245
10.7.1.4	Silver	246
10.7.1.5	Other Noble Metals	246
10.8	Conclusions	246
	References	247
11	Immobilized Enzyme Systems for Wastewater Treatment	257
	<i>Ambreen Aisha, Muhammad J. Iqbal, Razia Noreen, Naila Mukhtar, Asim Hussain, and Asim Rehman</i>	
11.1	Immobilization Techniques	257
11.2	Solid Matrix/Supports for Immobilization	258
11.3	Pollutants From Industry	260
11.4	Wastewater From Decolorization and Bleaching Operations	261
11.5	The Involvement of Microbes in Detoxifying	262
11.6	Pesticides, Including Herbicides, Insecticides, and Fungicides	263
11.7	Adsorption Treatment of Antibiotics From Effluents	264
11.8	Removal of Antibiotics with Waste-Based Adsorbents	265
11.9	Effective Removal of Phenols and Dyes	265
11.10	Remediation Chemistry Using Biogenic Nanoparticles	266
11.10.1	Photocatalysis	267
11.10.2	Carbon Nanotube (CNT)-Based Nanotechnologies	268
11.10.3	Mn Oxide-Coated Carbon Nanotubes (MnO ₂ /CNTs)	268
11.10.4	Glutaraldehyde Activated Carbon Nanospheres (GCN)	268
11.10.5	Surfactant Concentration and Fly Ash Nanoparticles (FANPs)	268
11.11	Conclusion	269
	References	269
12	Bioactive Nanoparticles for Water Purification	275
	<i>Madhushree Hegde, Akshatha Chandrashekar, Jineesh A. Gopi, Niranjana Prabhu, Deepu A. Gopakumar, Jinu Jacob George, Midhun Dominic C.D., and Jyotishkumar Parameswaranpillai</i>	
12.1	Introduction	275
12.2	Bioactive Nanoparticles	277
12.2.1	Bioactive Metallic Nanoparticles for Water Purification	277

- 12.2.1.1 Silver Nanoparticles for Water Treatment 277
- 12.2.1.2 Copper Nanoparticles for Water Treatment 278
- 12.2.1.3 Selenium Nanoparticles in Water Treatment Processes 279
- 12.2.2 Bioactive Metal Oxides Nanoparticles for Water Purification 279
- 12.2.3 Bioactive Bio-Based Nanoparticles for Water Purification 283
- 12.2.4 Carbon-Based Nanomaterials for Water Purification 283
 - 12.2.4.1 Carbon Nanotubes (CNTs) 283
 - 12.2.4.2 Graphene-Based Nanomaterials 286
- 12.2.5 Hybrid Nanoparticles for Water Purification 287
- 12.3 Concluding Remarks and Future Perspectives 291
- References 291

13 Cellulose Nanofibers-Based Porous Materials, a Green Platform to Construct Advanced Sorbents for Oil/Spill Cleanup 305

Aiswarya Poullose, Ajith Mathew, Deepu A. Gopakumar, Daniel Pasquini, A. Mathiazhagan, and Jinu Jacob George

- 13.1 Introduction 305
- 13.2 Aerogels as Material for Oil Recovery 306
- 13.3 Cellulose; a Biodegradable Polymer 307
 - 13.3.1 Sources of Cellulose 309
 - 13.3.2 Cell Wall Composition 309
 - 13.3.3 Classification of Cellulose 311
 - 13.3.3.1 Cellulose Nanocrystals 311
 - 13.3.3.2 Bacterial Cellulose 312
 - 13.3.3.3 Cellulose Nanofibers: Perfect Substrate for Fabrication of Cellulose Aerogels 312
- 13.4 Cellulose-Based Aerogels 315
 - 13.4.1 Cellulose-Based Aerogels for Oil Absorption 316
 - 13.4.2 Mechanism of Oil Absorption 317
 - 13.4.3 Hydrophobic Modification of Cellulose Aerogel 317
 - 13.4.3.1 Chemical-Vapor Deposition Method 318
 - 13.4.3.2 Cold Plasma Treatment Method 319
 - 13.4.3.3 Sol–Gel Process Method 321
 - 13.4.3.4 Modification by Surface Roughness and Esterification 322
- 13.5 Conclusion 325
- References 325

14 Novel Carbon-Based Nanomaterials (CNMs) for Air Purification 329

Neelakandan M. Santhosh

- 14.1 Introduction 329
- 14.2 Nanomaterials for Air Purification 331
 - 14.2.1 CNMs: Structures and Properties 332
- 14.3 CNMs: Applications for Air Purification 335

- 14.4 Future Perspectives 340
- 14.5 Conclusion 341
- References 341

- 15 Metal/Metal Oxide Nanoparticles Modified Polymeric Composite Membranes for Water Treatment 347**
Akshatha Chandrashekar, Madhushree Hegde, Jineesh A. Gopi, Niranjana Prabhu, Deepu A. Gopakumar, Jinu Jacob George, Midhun Dominic C.D., and Jyotishkumar Parameswaranpillai
- 15.1 Introduction 347
- 15.2 Metal and Metal Oxide Nanomaterials Incorporated Polymeric Membrane for Water Treatment 349
 - 15.2.1 Fabrication of Metal and Metal Oxide-Incorporated Polymeric Membrane 350
 - 15.2.2 Antifouling Property of Metal and Metal Oxide-Incorporated Polymeric Membrane 353
 - 15.2.3 Antibacterial Properties of Metal and Metal Oxide-Incorporated Polymeric Membrane 355
 - 15.2.4 Photocatalytic Properties of Metal and Metal Oxide-Incorporated Polymeric Membrane 357
 - 15.2.5 Adsorption and Chemical Stability of Metal and Metal Oxide-Incorporated Polymeric Membrane 357
- 15.3 Prospects of Metal and Metal Oxide-Incorporated Polymeric Membranes 362
- 15.4 Conclusions 362
- References 363

- 16 Nanocellulose-Based Ultralight Porous Material for Various Environmental Applications 373**
Ajith Mathew, Aiswarya Poulouse, Deepu A. Gopakumar, Daniel Pasquini, Yves Grohens, and Jinu Jacob George
- 16.1 Introduction 373
- 16.2 Morphology and Structure of Cellulose 375
- 16.3 Types of Nanocellulose 376
 - 16.3.1 Cellulose Nanofiber (CNF) 376
 - 16.3.2 Cellulose Nanocrystals (CNC) 377
 - 16.3.3 Bacterial Nanocellulose (BNC) 377
 - 16.3.4 Aerogels 378
- 16.4 Preparation of Nanocellulose-Based Aerogels 379
 - 16.4.1 Preparation of Hydrogels 379
- 16.5 Drying Process 381
 - 16.5.1 Ambient Pressure Drying (APD) 381
 - 16.5.2 Freeze Drying (FD) 382
 - 16.5.3 Supercritical Drying (SCD) 383
- 16.6 Application of NC-Based Light Weight Porous Material 383

16.6.1	NC-Based Aerogels: Advancements in Water Decontamination	383
16.6.2	Dye Removal	384
16.6.3	Removal of Heavy Metals	385
16.6.4	Oil/Water Separation	385
16.6.5	Removal of Pharmaceutical Waste	386
16.6.6	Air Filtration	387
16.6.7	Removal of PM and VOCs	388
16.6.8	CO ₂ Separation or Adsorption	389
16.7	Conclusion	390
	References	391
	Index	399
