

Contents

Preface *xi*

1 Introduction to Titanium Carbide (Ti_3C_2) MXenes for Energy and Environmental Applications *1*

Muhammad Tahir

- 1.1 Introduction *1*
- 1.2 Layout of the Book *4*
 - Acknowledgment *5*
 - References *5*

2 Fundamentals, Properties, and Characteristics of Titanium Carbides MXenes ($\text{Ti}_3\text{C}_2\text{T}_x$) *9*

Areen Sherryna and Muhammad Tahir

- 2.1 Introduction *9*
- 2.2 Fundamentals of MXene *10*
 - 2.2.1 Structural Overview of MXene *10*
 - 2.2.2 MXene–Semiconductor Interface Junction *11*
 - 2.2.3 Opto-electronic Properties of MXene *13*
 - 2.2.4 Electrical Properties of MXene *15*
- 2.3 Photocatalytic Attributes of MXene *17*
 - 2.3.1 $\text{Ti}_3\text{C}_2\text{T}_x$ MXene Functionalization *17*
 - 2.3.2 Intrinsic 2D Accordion-like Nanosheets *20*
- 2.4 Conclusion and Future Perspectives *24*
 - Acknowledgment *25*
 - References *25*

3 Synthesis and Characterization of Titanium Carbide (Ti_3C_2) MXenes *33*

Azmat Ali Khan, Muhammad Tahir, and Nazish Khan

- 3.1 Introduction *33*
- 3.2 Different Synthesis Techniques of MXene *35*
 - 3.2.1 HF Etching *38*
 - 3.2.2 Acid-Containing Fluoride Ions *39*

3.2.3	Electrochemical Etching	41
3.2.4	Alkali Etching	42
3.2.5	Water-Free Etching	44
3.2.6	Molten-Salt Substitution	44
3.3	Characterization of MXenes	46
3.3.1	X-Ray Diffractions (XRD)	46
3.3.2	Field Emission Scanning Electron Microscopy (FESEM) and Transmission Electron Microscopy (TEM)	47
3.3.3	UV-Visible Spectroscopy	47
3.3.4	Photocurrent Analysis	49
3.4	X-Ray Photoelectron Spectroscopy (XPS)	50
3.5	Raman Spectroscopy and Photoluminescence (PL)	50
3.6	Conclusions	51
	Acknowledgment	52
	References	52
4	Synthesis and Characterization of TiC MXene-Based Composites for Energy Storage and Conversion	57
	<i>Azmat A. Khan, Muhammad Tahir, Areen Sherryana, Muhammad Madi, Abdelmoumin Y. Zerga, Nazish Khan, and Naveen Kumar</i>	
4.1	Introduction	57
4.2	Synthesis of TiC-Based Composites	58
4.2.1	Synthesis and Processing of TiO ₂ /Ti ₃ C ₂ MXene Composite	58
4.2.2	Synthesis of TiC/g-C ₃ N ₄ Composite	60
4.2.3	General Synthesis and Processing of LDH/TiC MXene Composites	62
4.2.4	Synthesis of Ti ₃ C ₂ MXene-Based Perovskite Composites	64
4.2.5	Synthesis of MXene-Based MOF Composite	65
4.3	Characterization of Ti ₃ C ₂ -Based Composites	69
4.3.1	Characterization of TiO ₂ /TiC MXene	69
4.3.2	Characterization of g-C ₃ N ₄ /TiC MXene	71
4.3.3	Characterization of LDH/TiC MXene Composites	74
4.3.4	Characterization of Ti ₃ C ₂ MXene-Based Perovskite Composites	77
4.3.5	Characterization of MOF-Based TiC MXene Nanocomposite	79
4.4	Conclusion	82
	References	82
5	Titanium Carbide (TiC) MXene-Based Titanium Dioxide Composites for Energy and Environment Applications	87
	<i>Riyadh R. Ikreedeeh and Muhammad Tahir</i>	
5.1	Introduction	87
5.2	Recent Developments in TiC-Based TiO ₂ Composites	88
5.2.1	General Overview	88
5.2.2	Synthesis of MXenes	89
5.2.2.1	Direct HF Etching	91
5.2.2.2	In Situ HF Etching	91

5.2.2.3	Alkali Etching	91
5.2.2.4	Halogen Etching	91
5.2.2.5	Molten Salt Etching	91
5.2.2.6	Electrochemical Etching	92
5.2.3	Role of MXenes in Enhancing TiO ₂ Photocatalytic Performance	92
5.2.3.1	Formation of Schottky Heterojunctions	92
5.2.3.2	Enhancing Light Harvesting	93
5.2.3.3	Enhancing Reactant Adsorption	95
5.3	TiC-Based TiO ₂ Composite for CO ₂ Reduction	96
5.4	TiC-Based TiO ₂ Composite for Hydrogen Production	100
5.5	TiC-Based TiO ₂ Composite for Degradation	102
	Acknowledgment	108
	References	109
6	Titanium Carbide (TiC) MXene-based Graphitic Carbon Nitride Composites for Energy and Environment Applications	115
	<i>Abdelmoumin Y. Zerga and Muhammad Tahir</i>	
6.1	Introduction	115
6.2	Principle of Photocatalysis for Using MXene/g-C ₃ N ₄ Composites	116
6.3	Applications of TiC MXene-based Carbon Nitride for H ₂ Evolution	118
6.3.1	TiC/g-C ₃ N ₄ Composites	120
6.3.2	TiC/Sensitizer/g-C ₃ N ₄ Composite	123
6.3.3	TiC/Semiconductor/g-C ₃ N ₄ Composite	124
6.4	Conclusions	127
	Acknowledgment	128
	References	128
7	Titanium Carbide MXene-Based MOF Composites for Energy and Environment Applications	133
	<i>Animesh T. Partho, Muhammad Tahir, and Naveen Kumar</i>	
7.1	Introduction	133
7.2	Overview of MXenes and MOFs for Photocatalytic Applications	135
7.2.1	Overview of MXenes	135
7.2.2	Overview of MOF	136
7.2.3	Structure and Properties of MXenes	137
7.2.4	Structure and Properties of MOFs	140
7.2.5	Photocatalytic Mechanism	143
7.3	Photocatalytic Hydrogen Production	144
7.3.1	TiC Supported Nanohybrids	144
7.3.2	TiC Supported Nanocomposites	150
7.4	Photocatalytic Degradation Application	153
7.5	Photocatalytic CO ₂ Reduction Application	156
7.6	Conclusion and Outlook	158
	Acknowledgment	159
	References	159

8	Titanium Carbide (TiC) MXene-Based Layered Double Hydroxide (LDH) Composites for Energy and Environment Applications	169
	<i>Azmat A. Khan, Muhammad Tahir, and Nazish Khan</i>	
8.1	Introduction	169
8.2	Basic Principles of Energy Storage and Conversion	170
8.2.1	Principle of Electrochemical Energy Storage and Conversion System	170
8.2.1.1	Supercapacitors	170
8.2.1.2	Batteries	173
8.2.1.3	Fuel Cells	173
8.2.2	Working Principle of Photochemical Processes	174
8.3	Properties of TiC MXene	175
8.3.1	Structural Properties	175
8.3.2	Optical Properties	176
8.4	Properties of LDH	176
8.4.1	Structural Properties	176
8.4.2	Optical Properties	177
8.5	Structural and Optical Properties of LDH/TiC MXene	177
8.5.1	Structural Properties	177
8.5.2	Optical Properties	178
8.6	LDH-Based TiCMXene Composite Applications	179
8.6.1	Electrochemical Energy Storage Application	179
8.6.2	Ni-Based LDH/TiC Composite	179
8.6.3	Co-Based LDH TiC Composite	183
8.7	Photocatalytic CO ₂ Reduction Application	185
8.7.1	Ni-Based LDH/TiC Composite	185
8.7.2	Co-Based TiC Composite	186
8.8	Photocatalytic Degradation Application	187
8.9	Conclusions and Future Recommendations	189
	Acknowledgment	189
	References	189
9	Titanium Carbide MXene-Based Perovskites Composites for Energy and Environment Applications	193
	<i>Mohamed Madi, Muhammad Tahir, and Naveen Kumar</i>	
9.1	Introduction	193
9.2	Properties and Application of Perovskite	194
9.3	Principle of Photocatalysis Using MXene/Perovskite Composite	195
9.4	Applications of TiC MXene-Based Perovskite Composite for CO ₂ Reduction	197
9.5	Applications of TiC MXene-Based Perovskite Composite for Degradation	199
9.6	Prospects and Challenges	201
9.7	Conclusions	202
	Acknowledgment	202
	References	202

10	Titanium Carbide (Ti_3C_2) Based MXenes for Energy Storage Applications	207
	<i>Ebrima Ceesay, Shamaila Fatima, Muhammad Z. Iqbal, and Syed Rizwan</i>	
10.1	Introduction	207
10.2	Requirements for Energy Storage	208
10.3	Classification of MXenes	209
10.3.1	Mono Transition-Metal MXenes	209
10.3.2	Double Transition n-metal (DTM) MXenes	209
10.3.2.1	Solid-solution MXenes	210
10.3.2.2	Ordered DTMs MXenes	210
10.4	Synthesis of Titanium and Vanadium Carbide MXenes	212
10.4.1	Synthesis and delamination of $Ti_3C_2T_x$	212
10.4.1.1	Synthesis of $Ti_3C_2T_x$	212
10.4.1.2	Delamination of the Multi-layered $Ti_3C_2T_x$ (ml- $Ti_3C_2T_x$)	212
10.4.2	Synthesis and Delamination of V_2CT_x	213
10.4.2.1	Synthesis of V_2CT_x	213
10.4.2.2	Delamination of V_2CT_x	213
10.5	Typical Characterization of MXenes	213
10.5.1	X-ray Diffraction	214
10.5.2	Scanning Electron Microscopy (SEM)/Energy-Dispersive X-ray Spectroscopy (EDS)	215
10.5.3	Raman Spectroscopy	216
10.5.4	X-ray Photoelectron Spectroscopy (XPS)	218
10.5.5	Other Characterization Techniques	218
10.6	Electrochemical Energy Storage (EES) Devices	219
10.6.1	MXene for Energy Storage	220
10.6.2	Batteries	220
10.6.2.1	Lithium-Ion Batteries (LIBs)	220
10.6.2.2	Other Batteries	221
10.6.2.3	Application of MXenes as Electrode in Batteries	221
10.6.3	Supercapacitors (SCs)	221
10.6.3.1	Electrical Double Layer Capacitor (EDLC)	222
10.6.3.2	Pseudo-capacitor	223
10.6.3.3	Hybrid Supercapacitor (HSC)	223
10.6.3.4	Application of MXenes as an Electrode in Supercapacitors	223
10.7	Thermodynamic and Cycle Stability of MXenes	224
10.7.1	Thermodynamic Stability of MXenes	224
10.7.2	Cycle Stability of MXenes	225
10.8	Future Recommendations	226
10.9	Summary	227
	Acknowledgments	227
	References	228
	Index	239
