Preface *xix*

1	Biomass – An Environmental Concern	1
	<i>Deepak S. Khobragade</i>	
1.1	Introduction	1
1.2	Biomass as an Energy Source	4
1.3	The Environmental Concern of Biomass	6
1.4	Air Pollution	7
1.4.1	Gaseous Emissions	7
1.4.2	Dust	7
1.4.3	Biomass Ash (Bottom Ash)	7
1.4.4	Fly Ash	8
1.4.5	Carbon Monoxide Poisoning	8
1.5	Water Use and Water Pollution	8
1.6	Impact on Soil	9
1.7	Indoor Pollution	11
1.8	Deforestation and Land Degradation	11
1.9	Health Hazards	11
1.10	Non-respiratory Illness	11
1.10.1	In Children	11
1.10.1.1	Lower Birth Weight	11
1.10.1.2	Nutritional Deficiency	12
1.10.2	Respiratory Illness in Adults	12
1.10.2.1	Interstitial Lung Disease	12
1.10.2.2	Chronic Obstructive Pulmonary Disease (COPD)	12
1.10.2.3	Tuberculosis	12
1.10.2.4	Lung Cancer	12
1.10.3	Non-respiratory Illness in Adults	13
1.10.3.1	Cardiovascular Disease	13
1.10.3.2	Cataracts	13
1.11	Safe Disposal of Biomass	13
1.12	The Bioeconomy of the Biomass Utilization	15

- 1.13 Biowaste-Derived Functional Materials 15
- 1.14 Conclusion 16
- References 17

2 **Chemistry of Biomass** 23

Wagner M. Cavalini, Breno M. J6ia, Diego E. R. Gonzaga, Rog6rio Marchiosi, Osvaldo Ferrarese-Filho, and dos Santos, Wanderley D.

- 2.1 Introduction 23
- 2.2 Cellulose 25
- 2.3 Hemicellulose 26
 - 2.3.1 Xylans 27
 - 2.3.2 Mannans 27
 - 2.3.3 Arabinogalactans 28
- 2.4 Pectin 28
 - 2.4.1 Homogalacturonan 29
 - 2.4.1.1 Rhamnogalacturonan I 29
 - 2.4.1.2 Rhamnogalacturonan II 29
- 2.5 Lignin 30
 - 2.5.1 Lignin Valorization 31
- 2.6 Reserve Compounds 31
 - 2.6.1 Starch 31
 - 2.6.2 Sucrose 32
 - 2.6.3 Lipids 33
 - 2.6.3.1 Fatty Acids 33
 - 2.6.3.2 Triacylglycerols 34
- 2.7 Natural Compounds (Secondary Metabolites) 34
 - 2.7.1 Terpenoids 35
 - 2.7.2 Phenylpropanoids 35
 - 2.7.3 Alkaloids 36
- 2.8 Conclusion 36
- References 37

3 **Lignin from Biomass – Sources, Extraction, and Application** 43

Irwan Kurnia, Surachai Karnjanakom, and Guoqing Guan

- 3.1 Sources 43
- 3.2 Extraction 45
 - 3.2.1 Alkaline Process 47
 - 3.2.1.1 Sulfur Processes 47
 - 3.2.1.2 Sulfur-Free Processes 48
 - 3.2.2 Acidic Process 48
 - 3.2.2.1 Concentrated Acid Process (Klason Process) 49
 - 3.2.2.2 Dilute Acid Process 49
 - 3.2.3 Solvent-Assisted Extraction Processes 49
 - 3.2.3.1 Organosolv Process 49

3.2.3.2	Aldehyde-Assisted Process	49
3.2.3.3	GVL-Assisted Process	50
3.2.3.4	Ionic Liquid Process	50
3.2.3.5	Deep Eutectic Solvents Process	51
3.2.4	Physical-Assisted Extraction Processes	51
3.2.4.1	Milled-Wood Process	51
3.2.4.2	Microwave-Assisted Process	51
3.2.5	Enzymatic Process	52
3.3	Application	53
3.3.1	Lignin-Derived Nanomaterials	53
3.3.1.1	Biomedical Materials	54
3.3.1.2	Energy Storage Materials	55
3.4	Summary and Outlook	57
	Acknowledgments	57
	References	58
4	Starch from Biomass – Sources, Extraction, and Application	63
	<i>Abdelaziz Amir, Trache Djalal, Sahnoun Nassima, and Tarchoune A. Fouzi</i>	
4.1	Introduction	63
4.1.1	Starch Source	63
4.1.2	Root and Tuber Starch Sources	63
4.1.2.1	Potato	63
4.1.2.2	Sweet Potato	65
4.1.2.3	Cassava	67
4.1.2.4	Yam	69
4.1.3	Cereal Starch Sources	70
4.1.3.1	Wheat	70
4.1.3.2	Corn	72
4.1.3.3	Rice	73
4.1.3.4	Oats	74
4.1.3.5	Barley	75
4.1.4	Nonconventional Starch Sources	76
4.1.4.1	Legumes	76
4.1.4.2	Fruits	77
4.2	Starch Extraction	80
4.2.1	Milling Process and its Effect on Starch Structure	80
4.2.1.1	Dry Milling	80
4.2.1.2	Wet Milling	81
4.2.1.3	Effect of the Milling Process on Starch Structure	81
4.2.2	Examples of Starch Extraction from Different Sources	82
4.2.2.1	Extraction of Starch from Tubers	82
4.2.2.2	Extraction of Starch from Cereals and Pulses	83
4.2.3	Nonconventionnel Extraction Techniques	85
4.2.3.1	Ultrasound-assisted Milling	85

4.2.3.2	Microwave-Assisted Starch Extraction	85
4.2.3.3	Air-Classification Assisted Milling	86
4.2.3.4	Electrostatic Separation	86
4.2.3.5	Gluten Washing	87
4.3	Starch Applications	87
4.3.1	Medical Applications	87
4.3.1.1	Drug Delivery Systems	87
4.3.1.2	Surgical Sutures	88
4.3.1.3	Bone Fixation and Regeneration	88
4.3.1.4	Tissue Adhesion	89
4.3.2	Water Treatment	89
4.3.3	Agricultural Applications	90
4.3.4	Packaging Applications	93
4.3.5	Food Applications	94
4.4	Conclusions	95
	References	96
5	Recent Trends of Cashew Nutshell Liquid: Extraction, Chemistry, and Applications	117
	<i>Sixberth Mlowe and James Mgaya</i>	
5.1	Introduction	117
5.2	Global Production of Cashew in the World	118
5.3	Extraction of CNSL	118
5.3.1	Thermal Extraction	118
5.3.2	Mechanical Extraction	119
5.3.3	Solvent Extraction	120
5.4	Isolation and the Chemistry of Major Components of CNSL	120
5.4.1	Isolation of the Components of Natural CNSL	121
5.4.2	Isolation of the Components of Technical CNSL	122
5.5	Recent Developments in the Chemical Transformation and Uses of Cashew Nutshell Liquid	123
5.5.1	Pharmaceutical Drugs from Cardanol	123
5.5.2	Anthraquinone-Based Dyes from Anacardic Acid	125
5.5.3	CNSL-Based UV Absorbers	126
5.5.4	CNSL in Preparation of Bioactive Nanocarriers	127
5.5.5	CNSL as a Green Catalyst	127
5.5.6	CNSL-Derived Bifunctional Chemicals	128
5.5.7	CNSL-Based Flame Retardants	129
5.5.8	Use of Cashew Nutshell Liquid in the Synthesis of Nanomaterials	130
5.5.9	Use of Cashew Nutshell for Decontamination of Polluted Environment	131
5.5.10	Use of CNSL for Preparation of Resins, Adhesives, and Coatings	133
5.6	Conclusions	134
	Acknowledgment	134
	References	134

6	Plant Biomass Seed and Root Mucilage: Extraction and Properties	141
	<i>Mohsin A. Raza, Paul D. Hallett, and Waheed Afzal</i>	
6.1	Introduction	141
6.2	Extraction and Preparation Methods	144
6.2.1	Mucilage Extraction and Preparation	144
6.2.2	Other Mucilage Extraction Methods	144
6.2.3	Model Compounds Preparation	145
6.2.4	Density and Viscosity Measurements	145
6.3	Results and Discussion	146
6.3.1	Density	146
6.3.2	Viscosity	149
6.3.3	Model Compounds	152
6.4	Conclusion	156
	References	157
7	Plant-Based Colorants: Isolation and Application	159
	<i>Vandana Bhandari, Pratikhya Badanayak, and Seiko Jose</i>	
7.1	Introduction	159
7.2	Classification of Natural Colorants	160
7.2.1	Classification Based on the Sources of Colorants	160
7.2.1.1	Plant-Based Natural Colorants	160
7.2.1.2	Colorant Obtained from Animal Sources	162
7.2.1.3	Mineral-Based Natural Colorants	162
7.2.1.4	Microbial and Fungal Origin	163
7.2.2	Classification on the Basis of Chemical Constituents Present	163
7.2.2.1	Indigoid Dyes	163
7.2.2.2	Anthraquinone Dyes	164
7.2.2.3	Naphthoquinone Dyes	164
7.2.2.4	Flavonoid Dyes	165
7.2.2.5	Carotenoid Dyes	165
7.2.2.6	Tannin-Based Dyes	165
7.2.3	Classification on the Basis of Colors Obtained	165
7.2.3.1	Natural Yellow Dyes	165
7.2.3.2	Natural Red Dyes	165
7.2.3.3	Natural Blue Dyes	166
7.2.3.4	Natural Black Dyes	166
7.2.3.5	Natural Brown Dyes	166
7.2.4	Classification on the Basis of Methods of Applications	166
7.3	Extraction Methods of Naturally Occurring Colorants	167
7.3.1	Conventional/Traditional Methods	167
7.3.1.1	Aqueous Extraction	167
7.3.1.2	Nonaqueous Extraction	168
7.3.2	New Innovative/Modern Methods	169
7.3.2.1	Radiation-Based Extraction (Gamma, Plasma, Microwave, Ultraviolet, and Ultrasonic Radiation)	169

- 7.3.2.2 Gamma Radiation 170
- 7.3.2.3 Ultraviolet Radiation 170
- 7.3.2.4 Ultrasonic Radiation 170
- 7.3.2.5 Supercritical Extraction 170
- 7.3.2.6 Enzymatic Method 171
- 7.4 Mordanting 171
 - 7.4.1 Metal Salts Mordants 172
 - 7.4.2 Oil Mordants 172
 - 7.4.3 Tannins 172
- 7.5 Mordanting Methods 173
- 7.6 Functional Properties of Natural Colorants 173
 - 7.6.1 Antimicrobial Property 173
 - 7.6.2 Deodorant Properties of Natural Dyes 175
 - 7.6.3 UV-Protection Property of Natural Dyes 175
 - 7.6.4 Insect-Repellent Properties of Natural Dyes 176
- 7.7 Fastness Properties of Natural Dyes 176
- 7.8 Advantages and Disadvantages of Natural Dyes 177
 - 7.8.1 Advantages 177
 - 7.8.2 Disadvantages 178
- 7.9 Conclusion 178
- References 179

- 8 Revival of Sustainable Fungal-Based Natural Pigments 189**
Shahid Adeel, Amna Naseer, Bisma, Fazal-ur-Rehman, Noman Habib, and Atya Hassan
- 8.1 Introduction 189
- 8.2 Classification of Natural Dyes Based on Sources 190
- 8.3 Fungal-Based Dyes and Pigments 190
- 8.4 Classification of Fungal Pigments 190
 - 8.4.1 Species of the Trichocomaceae Family Producing Pigments 191
 - 8.4.1.1 *Aspergillus* 191
 - 8.4.1.2 *Penicillium* 193
 - 8.4.1.3 *Talaromyces* Species 194
 - 8.4.2 Species of the Monascaceae Family Producing Pigments 196
 - 8.4.2.1 *Monascus purpureus* 196
 - 8.4.3 Species of the Nectriaceae Family Producing Pigments 198
 - 8.4.3.1 *Fusarium oxysporum* 198
 - 8.4.3.2 *Fusarium graminearum* 199
 - 8.4.3.3 *Fusarium fujikuroi* 201
 - 8.4.4 Species of the Hypocreaceae Family Producing Pigments 202
 - 8.4.4.1 *Trichoderma harzianum* 202
 - 8.4.4.2 *Trichoderma spirale* 204
 - 8.4.5 Species of the Pleosporaceae Family Producing Pigments 205
 - 8.4.5.1 *Pleosporaceae* spp. (*Alternaria*, *Curvularia*, and *Drechslera*) 205
- 8.5 Conclusion 207
- References 207

9	Modern Approach Toward Algal-Based Natural Pigments for Textiles	213
	<i>Mahwish Salman, Shahid Adeel, Mehwish Naseer, Muhammad Zulqurnain Haider, and Fozia Anjum</i>	
9.1	Introduction	213
9.1.1	Bio-Pigments	216
9.2	Diversity of Bio-Pigments Present in Algae	216
9.2.1	Chlorophyll	217
9.2.2	Carotenoids	218
9.2.3	Phycobilisomes	218
9.2.4	Phycobilins	219
9.2.5	Phycocyanin	219
9.2.6	Phycocerythrin	220
9.3	Extraction Methods of Bio-Pigments	220
9.4	Conventional Extraction Methods	220
9.4.1	Classic Extraction	220
9.4.1.1	Solvent-Based Extraction	220
9.4.1.2	Thermal Treatment	221
9.4.1.3	Freeze-Thaw Method	221
9.4.1.4	Enzymatic Extraction	221
9.4.2	Modern Extraction Methods	222
9.4.2.1	Pressurized Systems	222
9.4.2.2	Wave-Energy-Based Cell Disruption	222
9.4.2.3	Cell Milking	224
9.4.2.4	Electroextraction	224
9.4.2.5	Supercritical Fluid Extraction	225
9.4.3	Novel Extraction Methodologies	225
9.4.3.1	Laser	226
9.4.3.2	Hydrodynamic Cavitation	226
9.4.3.3	High Voltage Electrical Discharge (HVED)	226
9.4.3.4	Ohmic Heating (OH)	226
9.5	Algal-Based Natural Dyes	227
9.6	Bio-Pigments in the Textile Industry	229
9.7	Utilization of Algal-Based Natural Dyes in Different Industries	230
9.8	Future Prospective of Algal-Based Bio-Pigments	231
9.9	Conclusion	232
	References	233
10	Biorefinery from Plant Biomass: A Case Study on Sugarcane Straw	243
	<i>Fahriya P. Sari, Nissa N. Solihat, Nur I. W. Azelee, and Widya Fatriasari</i>	
10.1	Introduction	243
10.2	Biorefinery Concept and Current Trend	245
10.3	Biorefinery Concepts for Sugarcane Straw Valorization	250
10.3.1	Cellulose-Derived Bioproducts (Isolation, Characterization, Derivative Products)	250

10.3.1.1	Bioethanol	250
10.3.1.2	Cellulose Nanofiber (CNF) and Cellulose Nanocrystal (CNC)	253
10.3.1.3	Biomethane	253
10.3.1.4	Biohydrogen	254
10.3.2	Hemicellulose-Derived Bioproducts (Isolation, Characterization, Derivative Products)	254
10.3.2.1	Xylose and Xylooligosaccharides Derived from Hemicellulosic Sugarcane Straw	258
10.3.2.2	Xylitol Derived from Hemicellulosic Sugarcane Straw	258
10.3.2.3	Furfural Derived from Hemicellulosic Sugarcane Straw	259
10.3.2.4	Alcohols and Biogas Derived from Hemicellulosic Sugarcane Straw	259
10.3.3	Lignin-Derived Bioproducts (Isolation, Characterization, Derivative Products)	259
10.3.4	Other Components (Extractives and Ash) Derived Bioproducts	260
10.4	Challenges and Future Perspectives	262
10.5	Conclusion	263
	Acknowledgment	263

- 13 Chemical Routes for the Transformation of Bio-monomers into Polymers 329**
Catarina P. Gomes, Amir Bzainia, Ayssata Almeida, Cláudia Martins, Rolando C.S. Dias, and Mário Rui P.F.N. Costa
- 13.1 Introduction 329
- 13.2 Main Chemical Routes for the Transformation of Bio-monomers into Polymers 329
 - 13.2.1 Ring-Opening Polymerization 330
 - 13.2.2 Condensation Polymerization 333
 - 13.2.3 Free Radical Polymerization 336
- 13.3 Exploitation of Olive Tree and Olive Oil Residues as Feedstock for Biopolymers Production 339
 - 13.3.1 Second Generation Bioethanol and Platform Chemicals for the Polymer Industries from Lignocellulosic Fractions 341
 - 13.3.2 Polyhydroxyalkanoates 342
 - 13.3.3 Exploitation of Residual Oils from Olive Mills and Olive Pomace to Get Polymerizable Monomers 343

- 13.3.4 Polyphenols in Olive Tree Residues for Advanced Functional Polymers 343
- 13.4 Exploitation of Winemaking Residues for Biopolymers Production 345
 - 13.4.1 Bioethanol 345
 - 13.4.2 Lactic Acid, Xylitol and Furfural 346
 - 13.4.3 Succinic Acid 346
 - 13.4.4 Poly(hydroxyalkanoates) 347
 - 13.4.5 Bio-oils from Winemaking Residues for Generation of Polymerizable Monomers 347
 - 13.4.6 Polyphenols in Winery Residues for Advanced Functional Polymers 348
- 13.5 Conclusion 348

18.3.3.2	Plant Biomass-Derived AC	477
18.4	Plant Biomass-Based Water Purification Processes/Techniques	479
18.4.1	Adsorbent-Based Process	480
18.4.2	Solar Steam Generation (SSG) Device for Desalination and Filtration	481
18.4.3	Biosorption	482
18.4.4	Membrane Filtration	485
18.5	Purification Mechanism	486
18.5.1	For Dye Removal	486
18.5.2	For Heavy Metal Removal	487
18.5.3	For Other Compounds Removal	489
18.6	Sector-Based Water Purification	489
18.6.1	Drinking Water	491
18.6.2	Industrial Wastewater	493
18.6.3	Domestic Wastewater	494
18.6.4	Agricultural Wastewater	494
18.7	Regeneration and Reuse	495
18.8	Limitations, Challenges, and Future Outlooks	497
18.9	Conclusion	498
	References	498
19	Sustainable Biocomposite-Based Biomass for Aerospace Applications	517
	<i>Mazlan Norkhairunnisa, Tay Chai Hua, Farid Bajuri, Izzat N. Yaacob, and Kamarul A. Ahmad</i>	
19.1	Introduction	517
19.2	Bioresin	518

19.2.1	Biodegradability and Properties of Sustainable Bioresin	519
19.3	Biocomposite	523
19.3.1	Design of Biocomposite for Aerospace Application Reinforcement	524
19.3.1.1	Plant-Based Fiber	524
19.3.1.2	Animal-Based Fiber	524
19.3.1.3	Biofillers	525
19.3.2	Material Selection and Its Properties in Aerospace Applications	525
19.3.3	Biocomposite Performances and Applications in Aerospace Structure Design	526
19.3.3.1	Advantageous and Disadvantageous of Composite in Aerospace Applications	526
19.3.3.2	Application of Biocomposite in Aircraft Structure	527
19.3.4	Sustainability and Environmental Effects	528
19.4	Summary	529

21 Recycling Plant Biomass and Life Cycle Assessment in Circular Economy Systems 557

Joan Nyika, Megersa Dinka, and Adeolu Adesoji Adediran

- 21.1 Introduction 557
- 21.2 Process of Recycling Plant Biomass 558
 - 21.2.1 Gasification of Plant Biomass 559
 - 21.2.2 Pyrolysis of Plant Biomass 560
 - 21.2.3 Combustion of Plant Biomass 561
 - 21.2.4 Biological Conversion of Plant Biomass 562
- 21.3 Processes of Life Cycle Assessment 562
- 21.4 Literature Review on Life Cycle Assessment for Plant Biomass Recycling 564
- 21.5 Conclusion 568
- References 568

22 The Handling, Storage, and Preservation of Plant Biomass 575

Joan Nyika, Megersa Dinka, and Adeolu A. Adediran

- 22.1 Introduction 575
- 22.2 Characteristics of Plant Biomass 576
- 22.3 Handling of Plant Biomass 578
- 22.4 Storage and Preservation of Plant Biomass 580
 - 22.4.1 Dry Storage Systems 581
 - 22.4.2 Wet Storage Systems 583
 - 22.4.3 Preservation of Plant Biomass 584
- 22.5 Conclusion 586
- References 586
