

Index

a

absorption, CO₂ absorption methods
117

acetate–polymalonate pathway 133

activated sludge process 5, 198–201

adsorption
CO₂ absorption methods 118
nanoremediation of water 231

aerobic biological treatment 198

aerobic condition 36–38

agri-biomass (biochar) 217

agricultural biotechnology
applications of 12, 13
benefits of 23
defined 11, 12
genetic engineering 12
molecular diagnostics 12
molecular markers 12
tissue culture 12
vaccines 12

agricultural crops 211, 214

agriculture pollutants 194

Agrobacterium radiobacter 18

alkalophiles 40

anaerobic biological treatment
bioremediation 201–204
membrane bioreactors (MBR) 201

anaerobic condition 32, 38

anaerobic digestion 200, 201, 212, 213

animal biotechnology 12, 13

animal manure 211

antagonistic activity 96, 97

antibiotics production 98

antimicrobial chemicals 258, 259

aquatic hydrophytes 205

A-protein 255

assisted reproductive technology (ART)
13

b

bacteriocins production 99, 100

bioaugmentation 56, 57, 196, 205

biochar 6, 217

biocontrol agents 96

biodiesel 10, 212, 214–216, 258

bioenergy 116, 209–218

bioethanol 10, 214

biofuel 10
biomass to 214
Indian Governance in 214–217
generations of 215

biogas
biomass to 212–214
biomethane 212
production 6, 213

biogenic materials 211

biological assays 10

biological conversion 212

biological filters-fixed film systems 199

biomarker 10

biomass
to biofuels 214, 215
to biogas 212–214
sources 211
use of 278

biomass-energy 210–217
