

Contents

Preface *xiii*

1	Status and Development of Power Lithium-Ion Battery and Its Key Materials	1
1.1	Market Status of Power Lithium-Ion Battery	1
1.2	Key Materials and Development of Power Battery	3
1.2.1	Dominant Cathode Materials	4
1.2.1.1	Lithium Nickel Cobalt Manganese Oxide	4
1.2.1.2	Lithium Nickel Cobalt Aluminum Oxide	5
1.2.1.3	Lithium Iron Phosphate	6
1.2.1.4	Lithium Nickel Manganese Oxide	7
1.2.2	Anode Materials	8
1.2.2.1	Graphite	8
1.2.2.2	Lithium Titanate	9
1.2.2.3	Silicon Carbon	10
1.2.3	Electrolyte	11
1.2.3.1	Liquid Electrolyte	12
1.2.3.2	Solid Electrolyte	12
1.2.4	Separator	14
1.2.5	Binder	15
1.2.6	Current Collector	16
1.2.6.1	Copper Foil	16
1.2.6.2	Aluminum Foil	17
1.2.6.3	Others	18
1.3	Development and Trends in Power Lithium-Ion Battery	18
1.3.1	The Layout of Lithium-Ion Battery Production Capacity	18
1.3.2	The Changing Trend of Lithium-Ion Battery Material Types	19
1.3.3	Development Goals and Plans in Various Regions of the World	20
1.3.4	Critical Challenges for the Future Lithium-Ion Power Battery Industry	22
1.3.4.1	Reducing the Cost of Lithium-Ion Power Battery	22
1.3.4.2	Improving the Energy Density of Power Battery	22

1.3.4.3	Improving Safety of Power Battery	22
1.3.4.4	Recycling Power Battery	23
1.4	Analysis of the Supply and Demand of Critical Metal Raw Material Resources for Power Lithium-Ion Batteries	23
1.4.1	Geographical Distribution of Critical Metal Raw Materials and Their Production Status	24
1.4.1.1	Lithium	24
1.4.1.2	Nickel	24
1.4.1.3	Cobalt	26
1.4.2	Supply and Demand Outlook of Critical Metal Raw Materials	28
1.4.2.1	Lithium	28
1.4.2.2	Nickel	29
1.4.2.3	Cobalt	31
1.4.3	Scenario Without Recycling	31
1.4.4	Scenario with Recycling	33
2	Battery Recycling Technologies and Equipment	37
2.1	Brief Introduction of Lithium-Ion Battery Recycling	37
2.2	Introduction of the Battery Recycling Process	39
2.2.1	Conventional Process of Cell Disassembly	39
2.2.2	Future Development Direction of Cell Recycling Process	44
2.3	Pretreatment Technology for Battery Recycling	44
2.3.1	Cell Discharge	44
2.3.2	Mechanical Separation	45
2.3.2.1	Crushing	45
2.3.2.1.1	Double-Shaft Shearing Gear Roller Crushing	45
2.3.2.1.2	Single-Shaft Shearing Gear Roller Crushing	46
2.3.2.1.3	Four-Shaft Shearing Gear Roller Crushing	47
2.3.2.1.4	Hammer Crushing	48
2.3.2.1.5	Smash	48
2.3.2.2	Sieving	49
2.3.2.2.1	Vibration Sieving	49
2.3.2.2.2	Relaxation Sieving	50
2.3.2.3	Airflow Sieving	51
2.3.2.3.1	Constant Airflow Sieving	51
2.3.2.3.2	Aortic Flow Sieving	52
2.3.2.3.3	Passive Pulsating Airflow Sieving Technology	53
2.3.2.4	Flotation Separation	54
2.3.3	Heat Treatment	56
2.3.3.1	Rotary Kiln	56
2.3.3.2	Microwave Steel Belt Kiln	56
2.3.3.3	Microwave Roller Kiln	57
2.3.3.4	Carbonization Machine	57
2.3.4	Solvent Dissolution	58
2.3.5	Alkaline Dissolution	59

2.3.6	Ultrasound Strengthens the Separation	60
2.3.7	Mechanical Chemistry Strengthens the Separation	62
2.4	Hydrometallurgy	64
2.4.1	Metal Leaching	64
2.4.1.1	Full Leaching	64
2.4.1.1.1	Inorganic Acid Leaching	64
2.4.1.1.2	Organic Acid Leaching	65
2.4.1.1.3	Bioleaching	66
2.4.1.2	Selective Leaching	67
2.4.1.3	Enhanced Leaching	69
2.4.1.4	Chemical Precipitation	70
2.4.2	Metal Extraction Separation	71
2.4.2.1	Solvent Extraction Method	71
2.4.2.2	Chemical Precipitation Method	71
2.4.2.3	Electrochemical Method and Other Methods	73
2.5	Pyrometallurgy	74
2.6	Direct Recycling Technology	75
2.6.1	Direct Recycling Process	75
2.6.2	Direct Regeneration of Cathode Material from Spent LFP Batteries	77
2.6.3	Economic Analysis of LFP Cathode Material Recycling	80
2.6.4	Main Challenges for Direct Recycling and Regeneration	82
2.7	Equipment for Battery Recycling	83
2.7.1	Pretreatment Equipment	83
2.7.1.1	Crushing and Comminution Equipment	83
2.7.1.1.1	Shredder	83
2.7.1.1.2	Crusher	85
2.7.1.2	Nitrogen Protection System	87
2.7.1.3	Separation and Debris Removal Equipment	89
2.7.1.3.1	Wind Sieving Machine	89
2.7.1.3.2	Rotary Kiln Furnace	90
2.7.1.4	Sieving Equipment	92
2.7.1.4.1	Linear Vibrating Screen	92
2.7.1.4.2	Round Shaking Sieve	92
2.7.2	Hydrometallurgy Equipment	93
2.7.2.1	Leaching Equipment	93
2.7.2.1.1	Mechanical Stirring Leaching Tank	93
2.7.2.1.2	Air Stirring Leaching Tank (Pachuca Tank)	94
2.7.2.1.3	Fluidization Leaching Tower	94
2.7.2.1.4	High-Pressure Leaching Kettle	95
2.7.2.2	Extraction Equipment	96
2.7.2.2.1	Mixed Clarifying Tank	96
2.7.2.2.2	Extraction Tower	99
2.7.2.2.3	Centrifugal Extractor	100
2.7.2.3	Solid–Liquid Separation Equipment	102

2.7.2.3.1	Enrichment Facilities	102
2.7.2.3.2	Filtering Equipment	104
2.8	Global Industrial Participants and Their IP Layout	105
2.8.1	Introduction of Main LIB Recyclers	105
2.8.2	IP Layout and Development Trend Analysis	106
2.8.2.1	Patent Development Trend Analysis	106
2.8.2.2	Patent Area Analysis	109
2.8.2.3	Analysis of Major Patent Applicants	110
2.8.2.4	Branch Analysis of Patented Technology	111
2.8.2.5	Patent Branch Analysis of Metal Separation and Extraction	113
2.9	Conclusion	115
3	Typical Cases in Industry	121
3.1	China	121
3.1.1	Botree Cycling	121
3.1.2	Brunp Recycling	124
3.1.3	Huayou Cobalt	126
3.1.4	GEM	128
3.1.5	Shunhua Lithium	129
3.1.6	Ganpower	131
3.1.7	Qiantai Technology	131
3.2	Europe	136
3.2.1	Umicore	136
3.2.2	Accurec	138
3.2.3	TES (Recupyl)	138
3.3	North America	140
3.3.1	Li-Cycle	140
3.3.2	Inmetco	141
3.3.3	Retriev	143
4	Current Status of the Carbon Footprint Life Cycle Analysis of Power Lithium-Ion Batteries and the Impact of Recycling on Them	145
4.1	Life Cycle Analysis of the Power Battery Manufacturing Process	145
4.1.1	Introduction to the Life Cycle Assessment Framework	145
4.1.1.1	Goal and Scope Definition	146
4.1.1.2	Life Cycle Inventory Analysis	146
4.1.1.3	Life Cycle Impact Assessment	147
4.1.1.4	Interpretation	147
4.1.2	Analysis of the Carbon Footprint and Energy Consumption of the Power Battery Manufacturing Process	147
4.1.2.1	Carbon Footprint Analysis	148
4.1.2.2	Energy Consumption Analysis	149
4.2	Carbon Footprint of Different Power Battery Recycling Processes	152
4.2.1	Pyrometallurgical + Hydrometallurgical Method	153
4.2.2	Mechanical Pretreatment + Hydrometallurgical Method	153

4.2.3	Direct Recycling Method	157
4.3	Best Power Battery Recycling Technology from a Life Cycle Carbon Footprint Perspective	158
5	Laws, Regulations, and Standards for Battery Recycling	163
5.1	Laws and Regulations Regarding Battery Recycling in Various Countries	163
5.1.1	The European Union	163
5.1.1.1	Directive 91/157/EEC	165
5.1.1.2	Directive 93/86/EEC	165
5.1.1.3	Directive 98/101/EC	165
5.1.1.4	Council Directive 2006/66/EC	166
5.1.1.5	Regulation (EU) 2019/1020	166
5.1.2	Typical European Countries	167
5.1.2.1	Germany	167
5.1.2.1.1	KrW-/AbfG	167
5.1.2.1.2	Batterieverordnung	168
5.1.2.1.3	BattG	168
5.1.2.2	Norway	169
5.1.2.3	Netherlands	169
5.1.2.4	The United States	170
5.1.2.4.1	State Management Plans for Waste	170
5.1.2.4.2	State Management Plans for Hazardous Waste Producers	170
5.1.2.4.3	State Management Plans for Hazardous Waste Transporters	171
5.1.2.4.4	Management Plans for Treatment, Storage, and Disposal Facilities of Hazardous Waste	172
5.1.3	Typical Asian Countries	172
5.1.3.1	China	172
5.1.3.2	Japan	179
5.1.4	Comparison of Battery Recycling Laws in Different Countries	180
5.2	Management Norms Regarding Battery Recycling	182
5.2.1	Management Norms Regarding Battery Recycling in Various Countries	182
5.2.1.1	The United States	182
5.2.1.2	China	183
5.2.1.3	Japan	184
5.2.2	Comparison of Management Norms in Different Countries	187
5.3	Technical Norms Regarding Battery Recycling	188
5.3.1	Technical Norms Regarding Battery Recycling in Various Countries	188
5.3.2	Comparison of Technical Norms in Different Countries	190
5.4	Support Policies Regarding Battery Recycling	191
5.4.1	Support Policies Regarding Battery Recycling in Different Countries	191
5.4.2	Comparison of Support Policies in Different Countries	194

6	New Application Scenarios for Power Lithium-Ion Batteries	197
6.1	The Existing Application Scenarios of Power Batteries	197
6.1.1	Two-Wheeled Electric Vehicles	197
6.1.1.1	Global Market Development Status	197
6.1.1.2	Impact of National Policies	200
6.1.1.3	Development Outlook of EV Battery for Two-Wheeled Electric Vehicle	201
6.1.2	Electric Vehicles	201
6.1.2.1	Global Market Development Status	201
6.1.2.2	Segmentation – Electric Passenger Vehicles	204
6.1.2.3	Segmentation – Electric Buses	206
6.1.2.4	Segmentation – Electric Heavy Trucks	207
6.1.2.5	Development Outlook of Electric Vehicle EV Battery	210
6.1.3	Electric Ships	211
6.1.3.1	Background	211
6.1.3.2	National Support Policies	211
6.1.3.3	Global Market Development Status	212
6.1.3.4	Battery Technology for Electric Boats	214
6.1.3.5	Development Outlook of Electric Boat Power Battery	215
6.1.4	Energy Storage Device	215
6.1.4.1	Segmentation – V2G Technology	215
6.1.4.2	Segmentation – Cascade Utilization	217
6.1.4.3	Development Outlook of Energy Storage Power Battery	219
6.2	Development of Emerging Business Mode	219
6.2.1	Power Swap Mode of Two-Wheeled Vehicles	219
6.2.1.1	Industry Demand Drives the Development of Power Swap Mode	219
6.2.1.1.1	Instant Delivery (2B)	219
6.2.1.1.2	Shared Travel (2B)	220
6.2.1.1.3	Individual Cycling (2C)	220
6.2.1.2	New National Standard Boosts the Power Swap Mode	220
6.2.1.3	Battery Swapping Cabinet – A Huge Blue Ocean Market is Forming	220
6.2.1.4	Battery Technology for Power Swapping Two-Wheeled Electric Vehicles	221
6.2.1.5	Advantages and Disadvantages of the Power Swap Mode	222
6.2.1.5.1	Advantage	222
6.2.1.5.2	Disadvantage	223
6.2.2	Power Swapping Electric Vehicles	223
6.2.2.1	History of Power Swapping Electric Vehicles	223
6.2.2.1.1	Pathfinder: Better Place	223
6.2.2.1.2	Successor: Tesla	223
6.2.2.1.3	Promoters	223
6.2.2.2	Policy Makes Power Swap Popular	224
6.2.2.3	Battery Asset Management Company	225
6.2.2.4	Advantages and Disadvantages	225

6.2.2.4.1	Advantage	225
6.2.2.4.2	Disadvantage	225
6.2.2.5	Recycling Route of Decommissioned Lithium-Ion Power Batteries in the Power Swap Mode	225
6.2.3	Power Swapping Electric Trucks	226
6.2.3.1	Demand for Power Swapping Heavy Trucks	226
6.2.3.2	Economic Advantages of Power Swapping Heavy Trucks	226
6.2.3.3	Application Scenarios for Power Swapping Heavy Trucks	227
6.2.4	Power Swapping Electric Ships	228
6.2.4.1	Exploration of Power Swapping Electric Ships	228
6.2.4.2	LFP, The Mainstream of Shipboard Lithium-Ion Power Battery	228
6.2.4.3	Suggestions	230
6.3	Sub-summary	230
7	Battery Recycling Technology Outlook	235
7.1	Advanced Battery Recycling System	235
7.1.1	Economical Environmental Discharge Technology	235
7.1.2	High-Flux Battery Disassembly Equipment	235
7.1.3	High-Efficiency Separation System for Valuable Metals	236
7.1.4	High-Value Utilization of Low-Value Batteries/Components	236
7.1.5	Intrinsic Safety and Pollution Prevention	236
7.2	Green Battery Design for Recycling	236
7.2.1	Battery Raw Materials	237
7.2.2	Material Production	239
7.2.3	Battery Production	240
7.2.3.1	Single Battery	240
7.2.3.2	Battery Pack	241
7.2.3.3	Battery Management System	241
7.2.4	Battery Passport	242
	Index	247
