Contents

Foreword *xv*
Preface *xvii*

1 Introduction *1*
Yu-Feng Li and Hongzhe Sun
1.1 A Brief Introduction to Metallomics *1*
1.2 Key Issues and Challenges in Metallomics *3*
1.3 About the Structure of this Book *4*
References *6*

2 Nanometallomics *11*
Hongxin Xie, Liming Wang, Jiating Zhao, Yuxi Gao, Bai Li, and Yu-Feng Li
2.1 The Concept of Nanometallomics *11*
2.2 The Analytical Techniques in Nanometallomics *12*
2.2.1 The Analytical Techniques for Size Characterization of Nanomaterials in Biological System *12*
2.2.1.1 Chromatography-based Techniques for Size Characterization *12*
2.2.1.2 Mass-spectrometry-based Techniques for Size Characterization *13*
2.2.1.3 Laser, X-rays, and Neutron-beam-based Techniques for Size Characterization *13*
2.2.2 The Analytical Techniques for Quantification of Nanomaterials and Metallome in Biological System *14*
2.2.3 The Analytical Techniques for Studying the Distribution of Nanomaterials in Biological System *15*
2.2.4 The Analytical Techniques for Studying the Metabolism of Nanomaterials in Biological System *16*
2.3 The Application of Nanometallomics in Nanotoxicology *17*
2.3.1 Understanding the Size Changes, Uptake and Excretion, Distribution, and Metabolism of Nanomaterials in Biological Systems *17*
2.3.2 Comparative Nanometallomics for Distinguishing Nanomaterials Exposure and Nanosafety Evaluation *20*

2.4 Conclusions and Perspectives *21*
Acknowledgments *22*
List of Abbreviations *22*
References *23*

3 Environmetallomics *33*
Lihong Liu, Ligang Hu, Baowei Chen, Bin He, and Guibin Jiang
3.1 The Concept of Environmetallomics *33*
3.2 The Analytical Techniques in Environmetallomics *34*
3.2.1 The Requirements for Environmetallome Analysis *34*
3.2.2 Quantitative Analysis for Environmetallomics *35*
3.2.3 Metal Distribution and Mapping for Environmetallomics *37*
3.2.4 Metal Speciation for Environmetallomics *39*
3.2.5 Metalloprotein Analysis *41*
3.3 The Application of Environmetallomics in Environmental Science and Ecotoxicological Science and the Perspectives *43*
Acknowledgments *44*
List of Abbreviations *44*
References *45*

4 Agrometallomics *49*
Xuefei Mao, Xue Li, Tengpeng Liu, and Yajie Lei
4.1 The Concept of Agrometallomics *49*
4.1.1 Introduction *49*
4.1.2 Agrometallomics and its Concept *51*
4.2 Analytical Techniques in Agrometallomics *52*
4.2.1 Sensitivity and Multi-elemental Analysis in Agrometallomics *52*
4.2.1.1 Mass Spectrometry in Agrometallomics *52*
4.2.1.2 Atomic Spectrometry for Agrometallomics *119*
4.2.2 Elemental Speciation and State Analysis in Agrometallomics *121*
4.2.2.1 Chromatographic Hyphenation for Atomic Spectrometry or Mass Spectrometry *121*
4.2.2.2 Synchrotron Radiation Analysis *122*
4.2.2.3 Energy Spectroscopy Based on X-ray *123*
4.2.3 Spatial Distribution and Micro-analysis Techniques in Agrometallomics *124*
4.2.3.1 Laser Ablation Inductively Coupled Plasma Mass Spectrometry *124*
4.2.3.2 Electrothermal Vaporization Hyphenation Technique *125*
4.2.3.3 Laser-induced Breakdown Spectroscopy *125*
4.2.3.4 Single-Cell and Micro-particle Analysis *126*
4.3 Application and Perspectives of Agrometallomics in Agricultural Science and Food Science *127*
4.3.1 Agricultural Plants and Fungi and Derived Food *127*
4.3.2 Agricultural Animal and Derived Food *131*

4.3.2.1 Application of Sensitivity and Multielemental Analysis in Agricultural Animals *132*
4.3.2.2 Application of Elemental Speciation and State Analysis in Agricultural Animals *135*
4.3.2.3 Application of Spatial Distribution and Micro-analysis in Agricultural Animals *137*
4.3.3 Soil, Water, and Fertilizer for Agriculture *139*
List of Abbreviations *143*
References *144*

5 Metrometallomics *153*
Liuxing Feng
5.1 The Concept of Metrometallomics *153*
5.2 The Analytical Techniques in Metrometallomics *154*
5.2.1 Analytical Techniques of Protein Quantification in Metrometallomics *154*
5.2.2 Analytical Techniques of Quantitative *In Situ* Analysis in Metrometallomics *155*
5.3 The Application of Metrometallomics in Life Science and the Perspectives *159*
5.3.1 Absolute Quantification of Metalloproteins in Metrometallomics *159*
5.3.1.1 Naturally Present Elements (P, S, Se, Metals) *159*
5.3.1.2 Elemental Labeling *160*
5.3.1.3 Directly Protein Tagging (I, Hg, Chelate Complexes) *162*
5.3.1.4 Immunological Tagging *164*
5.3.1.5 Direct Quantification of Proteins by LA-ICP-MS *165*
5.3.1.6 Calibration for Metalloprotein Quantification by ICP-MS *167*
5.3.1.7 Perspectives of Absolute Quantification of Metalloproteins *168*
5.3.2 Calibration Strategies of Quantitative *In Situ* Analysis in Metrometallomics *168*
5.3.2.1 Internal Standardization *168*
5.3.2.2 External Calibration *174*
5.3.2.3 Calibration by Isotope Dilution *182*
5.3.2.4 Perspectives of Quantitative In Situ Analysis in Metrometallomics *185*
Acknowledgments *186*
References *186*

6 Medimetallomics and Clinimetallomics *193*
Guohuan Yin, Ang Li, Meiduo Zhao, Jing Xu, Jing Ma, Bo Zhou, Huiling Li, and Qun Xu
6.1 The Concept of Medimetallomics and Clinimetallomics *193*
6.1.1 Medimetallomics *195*
6.1.2 Clinimetallomics *195*
6.2 The Analytical Techniques in Medimetallomics and Clinimetallomics *195*

6.2.1 Total Analysis of Clinical Elements *196*
6.2.1.1 Atomic Spectroscopy Detection Technology *196*
6.2.1.2 Mass Detection Technology *197*
6.2.1.3 Electrochemical Analysis *198*
6.2.1.4 Neutron Activation Analysis *198*
6.2.2 Clinical Element Morphology and Valence Analysis Technology *199*
6.2.2.1 Atomic Spectroscopy Detection Technology *200*
6.2.2.2 Mass Spectrometry Detection Technology *201*
6.2.3 Summary and Outlook *203*
6.3 The Application of Medimetallomics and Clinimetallomics in Medical and Clinical Science and the Perspectives *204*
6.3.1 Medimetallomics *204*
6.3.1.1 Global or National Medimetallomics Research *204*
6.3.1.2 Standardized Protocol for Medimetallomics Research *205*
6.3.1.3 The Application of Medimetallomics Results *207*
6.3.1.4 Next Steps and Opportunities for Medimetallomics *208*
6.3.2 Clinimetallomics *208*
6.3.2.1 Diseases Associated with Trace Elements *208*
6.3.2.2 Toxic-Element-Related Diseases *221*
6.3.2.3 Combined Toxicity of Multiple Heavy Metal Mixtures *223*
6.3.2.4 Genetic Diseases Associated with Metallomics *224*
6.3.2.5 Application of Metallomics in Disease Treatment *224*
6.3.2.6 Perspectives *226*
List of Abbreviations *226*
References *229*

7 Matermetallomics *237*
Qing Li, Zhao-Qing Cai, Wen-Xin Cui, and Zheng Wang
7.1 The Concept of Matermetallomics *237*
7.1.1 Introduction *237*
7.1.2 Metallic Elements as Dopant *239*
7.1.3 Metallic Elements as Impurities *241*
7.1.4 Metallic Elements as Crosslinkers *242*
7.2 The Analytical Techniques in Matermetallomics *243*
7.2.1 Element Imaging Analysis *243*
7.2.1.1 Laser Ablation Inductively Coupled Plasma Mass Spectrometry (LA-ICP-MS) *246*
7.2.1.2 Laser-Induced Breakdown Spectroscopy (LIBS) *247*
7.2.1.3 Secondary Ion Mass Spectrometry (SIMS) *247*
7.2.1.4 TEM/X-EDS *248*
7.2.1.5 Synchrotron Radiation X-Ray Fluorescence Spectrometry (SR-XRF) *249*
7.2.2 Quantitative and Qualitative Analysis *250*
7.2.2.1 Inductively Coupled Plasma Atomic Emission Spectrometry (ICP-AES) *250*

7.2.2.2 Inductively Coupled Plasma Mass Spectrometry (ICP-MS) *251*
7.2.2.3 X-Ray Fluorescence (XRF) *252*
7.2.2.4 GD Optical Emission Spectroscopy (GD-OES) and GD Mass Spectrometry (GD-MS) *253*
7.2.3 Metal Speciation Analysis *254*
7.2.3.1 Raman Spectroscopy *254*
7.2.3.2 X-Ray Photo Electron Spectroscopy (XPS) *255*
7.2.4 Techniques Providing Depth Information *255*
7.3 The Application of Matermetallomics in Material Science and the Perspectives *256*
7.3.1 Matermetallomics in Semiconductor Materials *256*
7.3.2 Matermetallomics in Artificial Crystal Materials *257*
Acknowledgments *258*
List of Abbreviations *258*
References *260*

8 Archaeometallomics *265*
Li Li, Yue Zhou, Sijia Li, Lingtong Yan, Heyang Sun, and Xiangqian Feng
8.1 The Concept of Archaeometallomics *265*
8.2 The Analytical Techniques in Archaeometallomics *266*
8.2.1 Neutron Activation Analysis (NAA) *266*
8.2.2 X-Ray Fluorescence Analysis (XRF) *266*
8.2.3 Laser Ablation Inductively Coupled Plasma Mass Spectrometry (LA-ICP-MS) *267*
8.2.4 Laser-induced Breakdown Spectroscopy (LIBS) *267*
8.2.5 Atomic Absorption Spectroscopy (AAS) *267*
8.2.6 X-Ray Absorption Fine Structure Spectroscopy (XAFS) *267*
8.2.7 X-Ray Diffraction (XRD) *268*
8.2.8 Neutron Diffraction *268*
8.3 The Application of Archaeometallomics in Archaeological Science *269*
8.3.1 The Application of Archaeometallomics in Ancient Ceramics *269*
8.3.1.1 Archaeometallomics in Studying the Origin and Dating of Ancient Ceramics *269*
8.3.1.2 Archaeometallomics in Studying the Color Mechanism and Firing Technology of Ancient Ceramics *271*
8.3.2 The Application of Archaeometallomics in Metal Cultural Relics *272*
8.3.2.1 Archaeometallomics in Studying the Origin of Metal Cultural Relics *273*
8.3.2.2 Archaeometallomics in Studying the Manufacturing Technology of Metal Cultural Relics *274*
8.3.2.3 Archaeometallomics in Studying the Corrosion of Metal Cultural Relics *275*
8.3.3 The Application of Archaeometallomics in Ancient Painting *275*

8.3.3.1 Archaeometallomics in Studying the Aging Mechanism of Painting Cultural Relics *276*
8.3.3.2 Archaeometallomics in Studying the Authenticity Identification of Painting Cultural Relics *278*
8.4 Summary and Perspectives *279*
Acknowledgments *279*
List of Abbreviations *279*
References *280*

9 Metallomics in Toxicology *285*
Ruixia Wang, Ming Gao, Jiahao Chen, Mengying Qi, and Ming Xu
9.1 Metallomic Research on the Toxicology of Metals *285*
9.2 Recent Progresses in Understanding the Health Effects of Heavy Metals *287*
9.2.1 Mercury, Oxidative Stress, and Cell Death *287*
9.2.2 Arsenic and Lung Cancer *291*
9.2.3 Epigenetic Effects of Cadmium *292*
9.2.4 Nephrotoxicity of Uranium in Drinking Water *294*
9.3 Knowledge Gaps, Challenges, and Perspectives *297*
Acknowledgments *298*
List of Abbreviations *298*
References *300*

10 Pathometallomics: Taking Neurodegenerative Disease as an Example *311*
Xiubo Du, Xuexia Li, and Qiong Liu
10.1 Introduction to Pathometallomics *311*
10.1.1 The Concept and Scope of Pathometallomics *311*
10.1.2 Brief Introduction to Methodologies for Pathometallomics *312*
10.2 Application of Pathometallomics in Neurodegenerative Diseases *314*
10.2.1 Pathometallomics in Alzheimer's Disease *314*
10.2.1.1 Dysregulation of Metal Homeostasis in AD *315*
10.2.1.2 Metal-Associated Dysfunction in AD *320*
10.2.1.3 Application of Metallomics in the Prognosis of AD *321*
10.2.1.4 Metal Chelators as AD Therapeutics *322*
10.2.2 Pathometallomics in Parkinson's Disease *324*
10.2.2.1 Dysregulation of Metal Homeostasis in PD *324*
10.2.2.2 Application of Metallomics in the Prognosis of PD *332*
10.2.2.3 Application of Metallodrugs and Metalloproteins in the Treatment of PD *333*
10.2.3 Pathometallomics in Amyotrophic Lateral Sclerosis *333*
10.2.3.1 Dysregulation of Metal Homeostasis in ALS *333*
10.2.3.2 Metal-Associated Dysfunction in ALS *334*
10.2.4 Pathometallomics in Autism Spectrum Disorder *336*

10.3 The Perspectives of Pathometallomics *338*
Acknowledgments *338*
List of Abbreviations *338*
References *340*

11 Oncometallomics: Metallomics in Cancer Studies *349*
Xin Wang, Chao Li, and Yu-Feng Li
11.1 Introduction to Oncometallomics *349*
11.2 The Application of Oncometallomics in Cancer Studies *351*
11.2.1 The Application of Oncometallomics in Cancer Diagnosis *351*
11.2.1.1 Prostate Cancer *351*
11.2.1.2 Breast Cancer *351*
11.2.1.3 Lung Cancer *352*
11.2.1.4 Gastric Cancer *352*
11.2.1.5 Colorectal Cancer *353*
11.2.1.6 Esophageal Cancer *353*
11.2.1.7 Liver Cancer *353*
11.2.1.8 Ovarian Cancer *354*
11.2.1.9 Cervical Cancer *354*
11.2.1.10 Thyroid Cancer *354*
11.2.2 The Application of Oncometallomics in Cancer Treatment *354*
11.3 The Metallome that Involved in the Occurrence and Development of Cancer *355*
11.4 Conclusions and Perspectives *356*
Acknowledgments *358*
List of Abbreviations *358*
References *358*

12 Bio-elementomics *363*
Dongfang Wang, Jing Wu, Bing Cao, Lailai Yan, Qianqian Zhao, Tiebing Liu, and Jingyu Wang
12.1 Introduction *363*
12.1.1 The Concept of Bio-elementomics *363*
12.1.2 The Development History of Bio-elementomics *363*
12.1.3 Research Scope *364*
12.2 Basic Laws of Bio-elementomics *364*
12.2.1 Review of Bio-elementomics *364*
12.2.2 Organizational Selectivity of Bio-elements *365*
12.2.3 Specific Correlation of Bio-elements *365*
12.2.4 Orderliness of Bio-elements *366*
12.2.5 Diversity of Bio-elements *366*
12.2.6 Biological Fractionation *366*
12.2.7 The Correlation Between the Bio-elementomes and Other "Omes" *367*
12.3 Rare-Earth Elementome *367*
12.3.1 Association of Rare-Earth Elements and Related Diseases *367*

12.3.2 The Mechanism Studies of the Hormesis Effect of REEs Based on the Bio-elementomics *369*
12.3.3 Beneficial Rebalancing Hypothesis for Hormesis Effect *370*
12.4 Limitations of Bio-elementomics *371*
12.4.1 Statistically Higher Level of Some Elements in the Patient's Body *371*
12.4.2 Environment-independent Biomarkers *372*
12.4.3 Trace Elements in Immortalized Lymphocytes *372*
12.5 Perspectives *373*
12.5.1 Speciation Analysis of Elements *373*
12.5.2 Bio-elements and Their Interactions with Proteins, Genes, and Small Molecules *373*
12.5.3 Research Based on the Hormesis "Beneficial Rebalancing" Hypothesis *374*
12.5.4 Multi-element Analysis of Immortalized Lymphocytes *374*
12.5.5 Analysis of Bio-elements in Single Cell *374*
References *374*

13 Methodology and Tools for Metallomics *377*
Xiaowen Yan, Ming Xu, and Qiuquan Wang
13.1 Brief Description of Metallomics *377*
13.1.1 Why Do Research on Biometals? *377*
13.1.2 What's the Goal of Metallomics? *378*
13.1.3 How to Perform a Metallomic Study? *379*
13.2 Methodologic Strategy for Metallomic Research *380*
13.2.1 In Vivo *381*
13.2.2 Ex Vivo *381*
13.2.3 In Vitro *382*
13.2.4 In Silico *383*
13.3 Tools for Metallomics *383*
13.3.1 Tools for Quantitative Metallomics *383*
13.3.2 Tools for Qualitative Metallomics *384*
13.3.3 Imaging Tools for Metallomics *386*
13.4 Concluding Remarks *387*
List of Abbreviations *387*
References *388*

14 ICP-MS for Single-Cell Analysis in Metallomics *391*
Man He, Beibei Chen, and Bin Hu
14.1 Introduction *391*
14.2 ICP-MS Instrumental Optimization for Single-Cell Analysis *392*
14.2.1 Sample Introduction System *392*
14.2.1.1 Pneumatic Nebulization *392*
14.2.1.2 Laser Ablation *399*
14.2.2 Mass Analyzer and Detector *400*

14.3 Microfluidic Platform for Single-Cells Analysis *401*
14.3.1 Droplet-Encapsulation-Based Single-Cell Separation *403*
14.3.2 Hydrodynamic-Capture-Based Single-Cell Separation *407*
14.3.3 Magnetic-Separation-Based Single-Cell Capture *408*
14.4 ICP-MS-Based Single-Cells Analysis in Metallomics *408*
14.4.1 Endogenous Elements in Single Cells *409*
14.4.2 Exogenous Metal Exposure to Single Cells *409*
14.4.3 Nanoparticles Uptake by Single Cells *415*
14.4.4 Metal-containing Drugs Uptake by Single Cells *416*
14.4.5 Biomolecular Quantification at Single-Cell Level *417*
14.4.6 Other Applications *418*
14.5 Summary and Perspectives *419*
List of Abbreviations *420*
References *420*

15 Novel ICP-MS-based Techniques for Metallomics *429*
Panpan Chang and Meng Wang
15.1 Introduction *429*
15.2 ICP-MS: A Powerful Method in Metallomics *430*
15.2.1 Solution Introduction System and Plasma Source *430*
15.2.2 Time-of-flight Mass Analyzer *431*
15.2.3 Laser Ablation Systems *432*
15.3 Recent Advances in ICP-MS-based Metallomics *433*
15.3.1 Single-particle Analysis *433*
15.3.2 Single-cell Analysis *435*
15.3.3 Spatial Metallomics *441*
15.4 Conclusions *442*
Acknowledgment *443*
List of Abbreviations *443*
References *444*

16 Machine Learning for Data Mining in Metallomics *449*
Wei Wang and Xin Wang
16.1 Data Mining Methods in Metallomics *450*
16.1.1 Data Preprocessing *450*
16.1.1.1 Smoothing Process *450*
16.1.1.2 Normalization *450*
16.1.1.3 Fourier Transform *451*
16.1.1.4 Wavelet Transform *451*
16.1.1.5 Convolution Operation *452*
16.1.2 Data Dimensionality Reduction *452*
16.1.2.1 Principal Component Analysis *453*
16.1.2.2 Independent Component Analysis *453*
16.1.2.3 Multidimensional Scaling *454*
16.1.2.4 Local Preserving Projection *454*

16.1.2.5 T-Stochastic Neighbor Embedding *454*
16.1.3 Sample Set Division *455*
16.1.3.1 Random Sampling *455*
16.1.3.2 Kennard–Stone Sampling *455*
16.1.3.3 Sample Set Partitioning Based on Joint x–y Distances *455*
16.1.3.4 Cross-Validation *456*
16.1.3.5 Leave-One-Out Cross Validation *457*
16.1.4 Predictive Model Building Method *457*
16.1.4.1 Partial Least Squares Regression *457*
16.1.4.2 Support Vector Machine *457*
16.1.4.3 Decision Tree *458*
16.1.4.4 K-means Clustering *458*
16.1.4.5 Deep Learning *459*
16.1.5 Model Evaluation *461*
16.1.5.1 Evaluation Index of the Quantitative Model *461*
16.1.5.2 Evaluation Indicators of the Qualitative Model *462*
16.2 Application of Machine Learning for Data Mining in Metallomics *463*
16.2.1 Applications in Medical Science *463*
16.2.2 Applications in Agricultural Science *466*
16.2.3 Applications in the Environmental Science *467*
References *469*
