

## Contents

**Preface** xv

### **Part I DNA Nanotechnology for Cellular Recognition (Cell SELEX, Cell Surface Engineering) 1**

- 1 Developing DNA Aptamer Toolbox for Cell Research 3**  
*Liang Yue, Shan Wang, and Weihong Tan*
- 1.1 Cells and Their Complexity 3
  - 1.2 Features and Advantages of DNA Aptamers 4
  - 1.3 On-demand Synthesis and Screening of DNA Aptamers 5
  - 1.4 Toward a Toolbox of DNA Aptamers for Cellular Applications 9
    - 1.4.1 Chemical Modifications via Solid-Supported Synthesis Strategy 10
    - 1.4.2 Chemical Modifications Through Covalent Conjugation 13
    - 1.4.3 Self-assembly Systems Based on Chemically Modified DNA Aptamers 15
    - 1.4.4 DNA Aptamers Engineered with Nanotechnology 19
  - 1.5 Summary and Outlook 21
    - Acknowledgments 22
    - References 22
- 2 Bacterial Detection with Functional Nucleic Acids:  
*Escherichia coli* as a Case Study 31**  
*Yash Patel and Yingfu Li*
- 2.1 General Introduction to Bacteria 31
  - 2.2 *E. coli* 32
  - 2.3 Conventional Methods for General *E. coli* Detection 33
    - 2.3.1 Sorbitol MacConkey Agar 34
    - 2.3.2 PCR 34
  - 2.4 Biosensors for *E. coli* Detection 35
    - 2.4.1 Protein Biosensors for *E. coli* Detection 35
    - 2.4.2 Functional Nucleic Acid-Based Sensors for *E. coli* Detection 36
      - 2.4.2.1 DNAzyme-Based Biosensors for *E. coli* Detection 36

2.4.2.2	Aptamer-Based Sensors for <i>E. coli</i> Detection	39
2.5	Conclusion	41
	References	42
<b>3</b>	<b>From Ligand-Binding Aptamers to Molecular Switches</b>	<b>47</b>
	<i>Sanshu Li, Xiaojun Zhang, Tao Luo, Xuejiao Liu, Tingting Zhai, and Hongzhou Gu</i>	
3.1	Aptamers Can Be Generated by SELEX	47
3.2	Various Subtypes of SELEX Have Been Invented	48
3.3	Riboswitches Are Natural RNA Aptamers Carrying Expression Platforms	49
3.4	Riboswitches Use Various Mechanisms to Regulate Gene Expression	52
3.5	Riboswitches Are Potential Drug Targets	55
3.6	Fusing Aptamer with Expression Platform to Construct Artificial RNA Switches	55
3.7	Conclusions	57
	Acknowledgments	57
	References	57
<b>4</b>	<b>DNA Nanotechnology-Based Microfluidics for Liquid Biopsy</b>	<b>63</b>
	<i>Qi Niu, Shanqing Huang, Chaoyong Yang, and Lingling Wu</i>	
4.1	Introduction	63
4.2	DNA Nanotechnology-Based Microfluidics for Isolation of Circulating Targets	65
4.2.1	Aptamer-Modified Micro/Nano-Substrate Microfluidic Chip	65
4.2.1.1	Inorganic Nanostructured “Hard Substrates”	66
4.2.1.2	Organic Nanostructured “Soft Substrates”	66
4.2.1.3	Multivalent Aptamer-Functionalized Micro/Nano-Substrates	69
4.2.2	DNA Framework-Supported Affinity Substrate Microfluidic Chip	73
4.2.2.1	DNA Framework-Supported Aptamer Substrates	73
4.2.2.2	DNA Framework-Supported Antibody Substrates	75
4.3	DNA Nanotechnology-Based Microfluidics for Release and Detection of Circulating Targets	77
4.3.1	Efficient Release	77
4.3.1.1	Aptamer Conformation Alteration	77
4.3.1.2	Detaching Aptamers from Capture Interface	79
4.3.2	Analysis and Destruction of CTCs	81
4.3.2.1	CTC Detection and In-depth Analysis	81
4.3.2.2	CTC Destruction for Therapy	83
4.3.3	Sensitive Detection of EVs	85
4.3.3.1	Signal Transduction for EV Detection	85
4.3.3.2	Signal Amplification	85
4.4	DNA-Assisted Microfluidics for Single-Cell/Vesicle Analysis	88
4.4.1	Single-Cell Analysis by Sequencing	89

4.4.2	Single-Cell Analysis by Spectroscopy	93
4.4.3	Single-Vesicle Analysis	95
4.5	Summary and Outlook	97
	References	98
<b>5</b>	<b>Spatiotemporal-Controlled Cell Membrane Engineering Using DNA Nanotechnology</b>	<b>105</b>
	<i>Wenxue Xie, Cong Ren, Minjie Lin, and Hang Xing</i>	
5.1	Background	105
5.2	DNA Modifications on the External Cell Membrane Surface	107
5.2.1	Strategies to Incorporate DNA onto External Cell Membrane Surface	107
5.2.1.1	Nonspecific DNA Modification Strategies	107
5.2.1.2	Specific DNA Modification Strategies	111
5.2.2	Applications of External Membrane-modified DNA	114
5.2.2.1	Sensing and Imaging on Cell Membrane Using DNA Probes	114
5.2.2.2	DNA-Mediated Cell Assembly and Communication	117
5.2.2.3	Cell Protection Using DNA Structures on Membrane	119
5.3	DNA Modifications on the Internal Cell Membrane Surface	120
5.3.1	Transmembrane Modification of DNA	121
5.3.1.1	Transmembrane Modification Using Single-Stranded and Double-Stranded DNA	121
5.3.1.2	Transmembrane Modification Using DNA Nanostructures	122
5.3.2	Inner Leaflet Modification Approaches	124
5.3.2.1	Small-Molecule Ligand Targeting Approach	125
5.3.2.2	Cell-Penetrating Peptide Approach	127
5.3.3	Liposome Fusion-Based Transport (LiFT) Approach	129
5.4	Perspectives	130
	Acknowledgments	132

- 8 Illuminating RNA in Live Cells with Inorganic Nanoparticles-Based DNA Sensor Technology 189**  
*Fangzhi Yu, Xiangfei Li, Xiulin Yi, and Lele Li*
  - 8.1 RNA Detection and Imaging 189
  - 8.2 RNA Imaging Based on Direct Hybridization 190
  - 8.3 RNA Imaging Based on Strand Displacement Reactions 192
  - 8.4 Signal-amplified RNA Imaging 194
    - 8.4.1 HCR-Based DNA Nanosensors for Amplified RNA Imaging 194
    - 8.4.2 CHA-Based DNA Nanosensors for Amplified RNA Imaging 196
    - 8.4.3 Amplified RNA Imaging Based on DNA Nanomachines 198
  - 8.5 Spatiotemporally Controlled RNA Imaging in Live Cells 203
  - 8.6 Conclusion 206
    - Acknowledgment 207
    - References 207
  
- 9 Building DNA Computing System for Smart Biosensing and Clinical Diagnosis 211**  
*Jiao Yang and Da Han*
  - 9.1 DNA Computing 211
    - 9.1.1 DNA Logic Gates Based on Functional DNA Motifs 212
    - 9.1.2 DNA Logic Gates Based on DNA Cascading Reactions 215
  - 9.2 DNA-Based Computing Devices for Biosensing 217
    - 9.2.1 *In Vitro* Biosensing 217
    - 9.2.2 Cellular Biosensing 220

9.3	DNA Computing for Clinical Diagnosis	223
9.4	Conclusion	226

**Part III DNA Nanotechnology for Regulation of Cellular Functions 279**

- 12 Adopting Nucleic Acid Nanotechnology for Genetic Regulation *In Vivo* 281**  
*Friedrich C. Simmel*
- 12.1 Introduction 281
  - 12.2 Toehold-Mediated Strand Displacement: Switching Nucleic Acids with Nucleic Acids 282
  - 12.3 Toehold Riboregulators and Related Systems 283
    - 12.3.1 Riboswitches 283
    - 12.3.2 Translational Switching with Toehold Switches 284
    - 12.3.3 Toehold Switching in Eukaryotes 285
    - 12.3.4 Transcriptional Switching 286
    - 12.3.5 Applications as Sensors 286
    - 12.3.6 Applications in Biocomputing 287
  - 12.4 Applying Nucleic Acid Nanotechnology to CRISPR and RNA Interference 288
    - 12.4.1 CRISPR Techniques 288
    - 12.4.2 Switchable Guide RNAs 289
    - 12.4.3 Implementing More Complex Programs in Mammalian Cells 291
    - 12.4.4 Combining CRISPR with Origami 292
    - 12.4.5 MicroRNAs and RNA Interference 292
  - 12.5 Delivery of Nucleic Acid Devices, *In Vivo* Production, and Challenges for *In Vivo* Operation 293
    - 12.5.1 Delivery 293
    - 12.5.2 *In Vivo* Production 293
    - 12.5.3 Challenges 294
  - 12.6 Conclusion and Outlook 294
    - Acknowledgments 295
    - References 295
- 13 Cell Membrane Functionalization via Nucleic Acid Tools for Visualization and Regulation of Cellular Receptors 303**  
*Shan Chen, Jingying Li, and Huanghao Yang*
- 13.1 Nucleic Acid-Based Functionalization Strategies: From Receptor Information to DNA Probes 303
  - 13.2 Uncovering Molecular Information of Cellular Receptors 307
  - 13.3 Governing Cellular Receptors-Mediated Signal Transduction 313
  - 13.4 Conclusion 318
    - Acknowledgments 318
    - References 318

<b>14</b>	<b>Harnessing DNA Nanotechnology for Nongenetic Manipulation and Functionalization of Cell Surface Receptor</b>	<b>325</b>
	<i>Hexin Nan, Hong-Hui Wang, and Zhou Nie</i>	
14.1	Introduction	325
14.2	Principle of DNA-enabled Molecular Engineering for Receptor Regulation	329
14.2.1	Recognition Module for Receptor Manipulation	330
14.2.2	Spatial Scaffold Module for Receptor Organization	330
14.2.3	Dynamic Assembly Module for Kinetic Control of Receptor	331
14.3	DNA Nanodevices for Programming Receptor Function	332
14.3.1	Bivalent Aptamer Mimicking Natural Ligand to Induce Receptor Dimerization	332
14.3.2	DNA Nanodevices to Customize Receptor Responsiveness	333
14.3.3	Light-Responsive DNA Nanodevices for Spatiotemporal Receptor Regulation	335
14.3.4	DNA Nanodevices for Visualization of Receptor Activation	337
14.4	Elaborate and Intelligent DNA Nanodevices Reprogramming Receptor Function	339
14.4.1	Mechanical Control Over Receptor-Mediated Cellular Behavior	339
14.4.2	Precise Cell Targeting for Selective Receptor Modulation	341
14.4.3	Spatial Organization of Nanoscale Receptor Distribution	344
14.5	Conclusions and Perspectives	347
	Acknowledgments	348
