Preface *xiii*

1	Application of MOFs on Removal of Emerging Water Contaminants	1
	<i>Nguyen Minh Viet, Tran Thi Viet Ha, and Nguyen Le Minh Tri</i>	
	Abbreviated list	1
1.1	Introduction	1
1.1.1	Sources of Emerging Water Contaminants	1
1.1.2	Emerging Water Contaminants Treatment Methods	2
1.1.3	MOFs as Exceptional Materials for Water Remediation	7
1.2	MOFs Strategies in Water Remediation	7
1.2.1	Adsorption	8
1.2.2	Catalyst	10
1.2.3	Synergistic Effect of Adsorption and Photocatalyst	12
1.3	Emerging Water Contaminants by MOFs	12
1.3.1	Organic Dyes	12
1.3.2	Adsorption	12
1.3.3	Photocatalytic and Electrostatic Activities	13
1.3.4	PPCPs	13
1.3.5	Adsorption	14
1.3.6	Photocatalytic Activities	14
1.3.7	Herbicides and Pesticides	15
1.3.8	Adsorption	15
1.3.9	Photocatalytic Activities	16
1.3.10	Industrial Compounds/By-products	17
1.3.11	Adsorption	17
1.3.12	Photocatalytic Activities	17
1.4	Challenges and Perspective in Using MOFs for the Removal of Emerging Water Contaminants	17
1.5	Conclusion	18
2	Metal-Organic Frameworks and Their Stepwise Preparatory Methods (Synthesis) for Water Treatment	27
	<i>Debarati Chakraborty and Prof. Siddhartha S. Dhar</i>	
2.1	Introduction	27
2.2	Classification of Metal-Organic Frameworks	28

2.3	Synthesis of MOFs	29
2.3.1	Conventional Solvothermal/Hydrothermal and Non-Solvothermal Method	29
2.3.2	Room-Temperature Synthesis	30
2.3.3	Unconventional Methods	30
2.4	Alternative Synthesis Methods	31
2.4.1	Microwave-Assisted Synthesis	31
2.4.2	Electrochemical Synthesis	32
2.4.3	Sonochemical Synthesis	34
2.4.4	Surfactant-Assisted Synthesis	35
2.4.5	Layer-by-Layer Synthesis	36
2.5	Factors Affecting the Synthesis of MOFs	37
2.5.1	Solvents	37
2.6	Temperature and pH Effects on the Synthesis of MOFs	38
2.7	Water Regeneration and Wastewater Treatment Using MOF Membranes	39
2.8	Membrane Filtration	39
2.9	Microfiltration (MF)	39
2.10	Ultrafiltration (UF)	40
2.11	Nanofiltration (NF)	40
2.12	Reverse Osmosis (RO) and Forward Osmosis (FO)	41
2.13	Membrane Distillation (MD)	41
2.14	Membrane Pervaporation (PV)	42
2.15	Conclusion	43

3 Application of MOFs in the Removal of Pharmaceutical Waste from Aquatic Environments 53

Gagandeep Kaur, Parul Sood, Lata Rani, and Nitin Verma

3.1	Introduction	53
3.2	The Potential of MOFs and Their Analogs to Resist Water Stability	55
3.3	Methods for the Development and Design of Aqueous-Stable Composites of Metal-Organic Frameworks	56
3.4	Synthesis and Design of Water-Stable MOF-Derived Materials	57
3.5	MOFs and Their Hybrids as Versatile Adsorbents for Capturing Pharmaceutical Drugs	58
3.6	MILs and Their Derived Compounds	58
3.7	Pristine MILs	58
3.8	MILs Composites	59
3.9	MILs-Derived Materials	60
3.10	ZIFs and Their Derived Compounds	60
3.11	Pristine ZIFs	60
3.12	ZIFs Composites	61
3.13	Materials Derived from ZIFs	61
3.14	UiOs Composite Materials	62
3.15	UiOs-Derived Materials	63
3.16	Pharmaceutical Drug Resistance	63
3.17	Conclusion	64

4	Efficiency of MOFs in Water Treatment Against the Emerging Water Contaminants Such as Endocrine Disruptors, Pharmaceuticals, Microplastics, Pesticides, and Other Contaminants	73
	<i>Jogindera Devi and Ajay Kumar</i>	
4.1	Introduction	73
4.2	Chemical Contaminants: Those Mysterious Ingredients in Ground and Surface Water	74
4.2.1	Endocrine Disruptors (EDs)	74
4.2.2	Microplastics (MPs)	74
4.2.3	Contaminants from the Agriculture Sector	75
4.2.4	Pharmaceutical Effluents	75
4.3	MOFs	76
4.3.1	MOF Stability in the Aqueous Phase	77
4.3.2	Improving the Water Stability of MOFs: General Enhancement Strategies	77
4.4	Possibilities for Wastewater Treatment Applications Using MOFs	78
4.4.1	MOF-Supported Adsorption & Photocatalysis	79
4.4.2	π - π Interactions	80
4.4.3	Electrostatic Interactions	80
4.4.4	Hydrophobic Interactions	81
4.4.5	H-Bonding	82
4.5	Use of MOFs for Water Remediation: Issues & Perspectives	82
4.6	Future	85
4.7	Conclusions	85
5	Metal-Organic Frameworks for Wastewater Contaminants Removal	95
	<i>Khushbu Sharma, Priyanka Devi, and Prasann Kumar</i>	
5.1	Introduction	95
5.2	Aqueous Phase MOF Stability	96
5.3	MOF Degradation in Water	97
5.4	Influence of MOF Structure	97
5.5	2D Nanostructured Coating	97
5.6	3D Nanostructure of MOF	98
5.7	MOF-Based Materials' Adsorption Processes for Heavy Metal Oxyanion	99
5.8	Remediation Through Perfect MOFs	102
5.9	Interaction of MOFs with Other Species	102
5.10	With the Use of MOF Composites	103
5.11	Removal of Metal Ions through Adsorption	105
5.12	MOF Composites are Used for Removal	106
5.13	COFs are a New Class of Materials that Have Similar MOF Structures	107
5.14	Application of MOF Composites	108
5.15	Gas Separation and Adsorption	109
5.16	MOF Composites	110
5.17	Agrochemical Adsorption and Removal	111
5.18	Pharmaceutical and Personal Care Adsorption Removal Products (PPCPs)	112

- 5.19 MOFs for Photocatalytic Elimination of Organic Pollutants 113
- 5.20 Conclusion 113
- Acknowledgment 114
- Author Contributions 114
- Conflicts of Interest 115
- 6 “Green Applications of Metal-Organic Frameworks for Wastewater Treatment” 119**
- Ankita Saini, Sunil Kumar Saini, and Parul Lakra*
- 6.1 Introduction 119
- 6.2 Role of Green Chemistry in Preparation of MOFs 122
- 6.3 Green Application of MOFs in the Removal of Contaminants from Wastewater 124
- 6.3.1 MOFs for the Removal of Inorganic Contaminants 125
- 6.3.2 MOFs for the Removal of Organic Contaminants 136
- 6.4 Conclusion and Future Prospects 138
- 6.5 Conflict of Interest 139
- 7 Case Studies (Success Stories) on the Application of Metal-Organic Frameworks (MOFs) in Wastewater Treatment and Their Implementations; Review 151**
- Arpit Kumar, Mahesh Rachamalla, and Akshat Adarsh*
- 7.1 Introduction 151
- 7.2 Metal-Organic Framework (MOF) 154
- 7.2.1 Properties and Applications of MOFs 154
- 7.3 Applications of MOFs in Wastewater Treatment: Case Studies 156
- 7.3.1 Forward Osmosis (FO) Membranes 159
- 7.3.2 Application and Effectiveness 159
- 7.3.3 Reverse Osmosis (RO) Membranes 160
- 7.3.4 Application and Effectiveness 161
- 7.3.5 Nano Filter (NF) Membranes 162
- 7.3.6 Application and Effectiveness 163
- 7.3.7 Ultrafiltration (UF) Membranes 164
- 7.3.8 Application and Effectiveness 165
- Summary 166
- Acknowledgment 167
- 8 Prospects and Potentials of Microbial Applications on Heavy-Metal Removal from Wastewater 177**
- Dipankar Ghosh, Shubhangi Chaudhary, and Snigdha Dhara*
- 8.1 Introduction 177
- 8.2 Mainstream Avenues to Remediate Heavy Metals in Wastewater 178
- 8.3 The Microbial Recycling Approach 179
- 8.4 General Overview of Heavy-Metal Pollution in Wastewater 181
- 8.5 Techniques for Heavy-Metal Removal 183

- 8.6 Microbial and Biological Approaches for Removing Heavy Metals from Wastewater 186
- 8.7 Biological Remediation Approaches for Heavy-Metal Removal 187
- 8.8 Microbial Bioremediation Approaches 190
- 8.9 Bioengineering Approaches on Microbes for Improving Heavy-Metal Removal from Wastewater 191
- 8.10 Conclusion 192
Acknowledgment 193

9 Removal of Organic Contaminants from Aquatic Environments Using Metal-Organic Framework (MOF) Based Materials 203

Linkon Bharali and Siddhartha S. Dhar

- 9.1 Introduction 203
- 9.2 MOF-Based Materials 205
 - 9.2.1 MOF—Metal Nanoparticle Materials 205
 - 9.2.2 MOF—MO Materials 206
 - 9.2.3 MOF—Quantum Dot Materials 207
 - 9.2.4 MOF—Silica Materials 207
 - 9.2.5 MOF—Carbon Materials 208
 - 9.2.6 Core—shell Structures of MOFs 209
 - 9.2.7 MOF—Enzyme Materials 210
 - 9.2.8 MOF—Organic Polymer Materials 210
- 9.3 Environmental Effects of MOF-Based Materials 211
- 9.4 Conclusion 215

10 Reformed Metal-Organic Frameworks (MOFs) for Abstraction of Water Contaminants – Heavy-Metal Ions 227

Prakash B. Rathod, Rahul A. Kalel, Mahendra Pratap Singh Tomar, Akshay Chandrakant Dhayagude, and Parshuram D. Maske

- 10.1 Introduction 227
- 10.2 Metal-Organic Frameworks 228
- 10.3 Sorption Enrichment by Modification of MOFs 229
- 10.4 Toxic-Metal Ion Adsorption by MOFs 231
 - 10.4.1 MOFs for Mercury Adsorption 231
 - 10.4.2 MOFs for Lead Adsorption 234
 - 10.4.3 MOFs for Cadmium Adsorption 235
 - 10.4.4 MOFs for Chromium Removal 236
 - 10.4.5 MOFs for Arsenic Removal 238
 - 10.4.6 MOFs for Heavy Metals Phosphate Removal 239
 - 10.4.7 MOFs for Nickel Adsorption 240
 - 10.4.8 MOFs for Selenium Adsorption 240
 - 10.4.9 MOFs for Uranium Adsorption 240
- 10.5 Future Perspective 241
- 10.6 Future Scope 241
- 10.7 Conclusions 242

11 Application of Algal-Polysaccharide Metal-Organic Frameworks in Wastewater Treatment 251

Dharitri Borah, Jayashree Rout, and Thajuddin Nooruddin

- 11.1 Introduction 251
 - 11.1.1 Water Pollutants and Sources 251
 - 11.1.2 Common Wastewater Treatment Techniques 252
 - 11.1.3 Metal-Organic Frameworks for Wastewater Treatment 252
 - 11.1.4 Polysaccharide-Metal-organic Frameworks (Ps-MOFs) 253
- 11.2 Polysaccharides in Algae/cyanobacteria (AIPs) 254
 - 11.2.1 Polysaccharides in Cyanophyceae 254
 - 11.2.2 Polysaccharides in Chlorophyceae 258
 - 11.2.3 Polysaccharides in Rhodophyceae 258
 - 11.2.4 Polysaccharides in Phaeophyceae 259
- 11.3 Synthesis of Algal Polysaccharide MOFs (ALPs-MOFs) 259
 - 11.3.1 Alginate-MOFs 260
 - 11.3.2 Cellulose-MOFs 262
 - 11.3.3 Agar-MOFs 263
- 11.4 Characterization of AIP-MOFs 264
- 11.5 Adsorption Mechanism of AIPs-MOFs 268
- 11.6 Regeneration of AIPs-MOFs 271
- 11.7 Conclusion and Future Prospects 272

12 Ecological Risk Assessment of Heavy Metal Pollution in Water Resources 281

Swati Singh and K. V. Suresh Babu

- 12.1 Introduction 281
- 12.2 Natural and Anthropogenic Sources of Heavy Metals in the Environment 282
- 12.3 Impacts of Heavy Metal Pollution 283
- 12.4 Water Quality Assessment Using Pollution Indices 286
 - 12.4.1 Heavy Metal Pollution Index (HPI) 287
 - 12.4.2 Statistical Technique 288
- 12.5 MOFs for Heavy Metal Contaminant Removal from Water 289
- 12.6 Conclusion 290

13 Organic Contaminants in Aquatic Environments: Sources and Impact Assessment 299

Shipa Rani Dey, Priyanka Devi, and Prasann Kumar

- 13.1 Introduction 299
- 13.2 The Various Forms and Causes of Chemical Pollutants 300
- 13.3 Increasing Contaminant Occurrence in Aquatic Systems 302
- 13.4 Identifying Potential Points of Entry for New Pollutants into Aquatic Systems 304
- 13.5 Groups of Trace Pollutants and ECs 305
 - 13.5.1 Polybrominated Diphenyl Ethers (PBDEs) 305

- 13.6 Pharmaceuticals and Personal Care Products (PPCPs) 306
- 13.7 Concentrations of Micropollutants in Aquatic Organisms 308
- 13.8 Methods for Micropollutant Removal 308
- 13.9 Mitigation of Aqueous Micropollutants 310
- 13.10 Chemical Treatment of Wastewater Discharge 311
- 13.11 Conclusion 311
 - Acknowledgment 312
 - Authors Contributions 312
 - Conflicts of Interest 312

14 Physicochemical Properties and Stability of MOFs in Water Environments 319

Priya Saharan, Vinit Kumar, Indu Kaushal, Ashok Kumar Sharma, Narender Ranga, and Dharmender Kumar

- 14.1 Introduction 319
- 14.2 Background and Future Scope of MOFs 320
- 14.3 Techniques Used to Determine the Physicochemical Properties of MOFs 320
 - 14.3.1 Powder X-Ray Diffraction (PXRD) 321
 - 14.3.2 BET Surface Area Analyzer 321
 - 14.3.3 Electron Microscopy and Elemental Analysis 322
 - 14.3.4 Thermogravimetric Analysis (TGA) 322
 - 14.3.5 Fourier-Transform Infrared (FT-IR) 322
- 14.4 Physicochemical Properties of MOFs and Their Effects on Various Applications 322
 - 14.4.1 Porosity 322
 - 14.4.2 Size and Morphology 323
 - 14.4.3 Chemical Reactivity 325
 - 14.4.4 Chemical Stability 327
 - 14.4.5 Thermal Stability 329
 - 14.4.6 Mechanical Stability 331
- 14.5 Conclusion 332

15 Metal-Organic Framework Adsorbents for Industrial Heavy-Metal Wastewater Treatment 337

Gopal Sonkar

- 15.1 Introduction 337
- 15.2 The Applications of MOFs 338
- 15.3 Comparison Between MOF Adsorbents and Bio-Based Adsorbents 338
- 15.4 Heavy Metal Contaminant Sources and Impacts 340
- 15.5 Adsorption 343
 - 15.5.1 The Adsorption Process 343
 - 15.5.2 Adsorption Mechanisms 344
 - 15.5.3 Adsorption Parameters 344
 - 15.5.4 Different Processes for Methods of Adsorption 345

xii | Contents

- 15.6 A Specific Review on Tea-Waste Adsorption 347
- 15.7 Conclusions 348

16 Evaluation of MOF Applications for Groundwater Arsenic Mitigation of the Middle Ganga Plains of Bihar, India 355

Arun Kumar, Vivek Raj, Mohammad Ali, Abhinav, Mahesh Rachamalla, Dhruv Kumar, Arti Kumari, Rakesh Kumar, Prabhat Shankar, and Ashok Kumar Ghosh

- 16.1 Arsenic Contamination in the Groundwater of Bihar 355
- 16.2 Status of Groundwater Arsenic Exposure in the Affected Population 361
 - 16.2.1 Mitigation Status in the Arsenic-Exposed Area of Bihar 364
 - 16.2.2 Application of MOFs in Arsenic Removal from Groundwater 364
 - 16.2.3 Conclusion 365
