Preface xv

1 Introduction to Plastic Wastes: Processing Methods, Environmental and Health Implications 1

Ali Mahmoudnia, Behnam Nejati, Mahsa Kianmehr, Masood R. Deiranloei, and Farshad G. Kootenaei

- 1.1 Introduction 1
- 1.2 Plastic materials: Composition and Classification 2
 - 1.2.1 Thermoplastics 2
 - 1.2.2 Thermosets 4
- 1.3 Techniques of Plastic Processing 5
 - 1.3.1 Primary Techniques 5
 - 1.3.2 Secondary Techniques 6
- 1.4 Global Plastic Production 6
- 1.5 The Health and Environmental Effects of Plastic Debris 10
 - 1.5.1 Plastic Debris and Microplastics 11
 - 1.5.2 Plastic Effects on Human Health 13
 - 1.5.3 Plastic and Climate Change 16
- 1.6 Management Strategies for Plastic Debris 20
 - 1.6.1 Improving 4R Concept 21
 - 1.6.2 Landfills 22
 - 1.6.3 Development of Cleanup Technologies 22
- 1.7 Conclusion 23
- References 24

2 Management Strategies for Plastic Wastes: A Roadmap Toward Circular Economy and Environmental Sustainability 31

Tarhamba Tobias Nyam, Olusola Olaitan Ayeleru, Ishmael Matala Ramatsa, and Peter Apata Olubambi

- 2.1 Introduction 31
- 2.2 Waste Plastics Management Strategies 33
 - 2.2.1 Recycling 34
 - 2.2.2 Pyrolysis 35

| | | |
|---------|-------------------------------------------------------------------------------------------------------|----|
| 2.2.2.1 | Challenges Associated with the Pyrolysis Process | 35 |
| 2.2.3 | Bioremediation | 37 |
| 2.2.4 | Incineration | 38 |
| 2.2.5 | Landfilling | 41 |
| 2.3 | Recycling and Reuse of Waste Plastic in a Circular Economy | 42 |
| 2.3.1 | Chemical Recycling of Waste Plastic in a Circular Economy | 42 |
| 2.3.2 | Mechanical Recycling of Plastic Waste | 42 |
| 2.4 | Circular Economy in Waste Plastic Management | 43 |
| 2.4.1 | Definition of a Circular Economy and Compatibility with Environmental Sustainability | 43 |
| 2.4.2 | Circular Economy Action Plan | 44 |
| 2.4.3 | Stakeholders' Involvement in the Implementation of Circular Economy | 45 |
| 2.4.4 | Identified Challenges in Implementation of the Circular Economy in Developed and Developing Economies | 45 |
| 2.4.5 | Strategies for Implementation of a Circular Economy | 47 |
| 2.5 | Conclusions | 48 |
| | Acknowledgment | 49 |
| | References | 49 |

3 Implementation of Analytical Hierarchy Process for Developing Better Waste Collection System 55

Sharafat Ali, Yasir Ahmed Solangi, Waqas Ahmed, Muhammad Asghar, and Arbab Mustafa

| | | |
|---------|--------------------------------------------------------------------|----|
| 3.1 | Introduction | 55 |
| 3.2 | Barriers to Better Waste Collection and Management Systems | 58 |
| 3.2.1 | Political Barriers to Waste Collection and Management | 58 |
| 3.2.1.1 | Lack of Government Commitment and Political Will | 58 |
| 3.2.1.2 | Political Instability | 58 |
| 3.2.1.3 | Corruption and Bureaucratic Obstacles | 58 |
| 3.2.1.4 | Lack of Transparency | 59 |
| 3.2.2 | Economic Barriers to Waste Collection and Management System | 60 |
| 3.2.2.1 | High Operating Costs and High Cost of Technology | 60 |
| 3.2.2.2 | Limited Financial Resources and Lack of Cost Recovery Mechanisms | 60 |
| 3.2.2.3 | Limited Market Demand | 60 |
| 3.2.2.4 | Informal Waste Management Sector | 60 |
| 3.2.2.5 | Lack of Economic Incentives and High-Risk Perception | 60 |
| 3.2.3 | Sociocultural Barriers to Waste Collection and Management System | 61 |
| 3.2.3.1 | Limited Education, Awareness, Knowledge, and Skills | 61 |
| 3.2.3.2 | Societal Norms and Attitudes Toward Recycling | 61 |
| 3.2.3.3 | Limited Public Participation and Limited Community Ownership | 61 |
| 3.2.3.4 | Discrimination, Perceived Social Stigma, and Traditional Practices | 62 |
| 3.2.4 | Technical Barriers | 62 |
| 3.2.4.1 | Lack of Technology and Incompatible Technology | 62 |

| | | |
|----------|--------------------------------------------------------------------------------------------------------------------------------------|-----------|
| 3.2.4.2 | Limited Capacity and Limited Infrastructure | 62 |
| 3.2.4.3 | Limited Technical Expertise | 63 |
| 3.2.4.4 | Limited Access to Technology | 63 |
| 3.2.4.5 | High Cost of Technology | 63 |
| 3.2.5 | Legal and Administrative Barriers to a Better Waste Collection System | 63 |
| 3.2.5.1 | Inadequate and Weak or Inconsistent Legal Frameworks | 64 |
| 3.2.5.2 | Lack of Institutional Capacity and Coordination | 64 |
| 3.2.5.3 | Conflicting Regulations and Weak Governance Structures | 64 |
| 3.2.5.4 | Complex Regulatory Frameworks and Limited Monitoring and Evaluation | 64 |
| 3.2.5.5 | Inefficient Procurement and Contracting Processes | 65 |
| 3.3 | Fuzzy Analytical Hierarchy Process | 65 |
| 3.4 | Prioritization of Barriers and Sub-Barriers of Developing Better Waste Collection System | 71 |
| 3.4.1 | Prioritization of Barriers to Developing a Better Waste Collection System | 71 |
| 3.4.2 | Prioritization of Sub-Barriers with Respect to Respective Barriers | 72 |
| 3.4.2.1 | Prioritization of Sub-Barriers with Respect to Political Barriers (B1) | 72 |
| 3.4.2.2 | Prioritization of Sub-Barriers with Respect to Economic Barriers (B2) | 73 |
| 3.4.2.3 | Prioritization of Sub-Barriers with Respect to Sociocultural Barriers (B3) | 74 |
| 3.4.2.4 | Prioritization of Sub-Barriers with Respect to Technical Barriers (B4) | 76 |
| 3.4.2.5 | Prioritization of Sub-Barriers with Respect to Legal and Administrative Barriers (B5) | 77 |
| 3.4.3 | Prioritization of Sub-Barriers with Respect to the Goal of Better Waste Collection System | 78 |
| 3.5 | Conclusions | 79 |
| | References | 82 |
| 4 | Processing and Recycling of Plastic Wastes for Sustainable Material Management | 89 |

7 Plastic Waste Management During and Post COVID-19 Pandemic: Challenges and Strategies 173

Biswajeet Acharya, Amulyaratna Behera, Kalim Deshmukh, and Srikanta Moharana

- 7.1 Introduction 173
- 7.2 Biomedical Plastic Wastes' Environmental Effects? 175
- 7.3 Impact of COVID-19 on Plastic Waste Generation 176
- 7.4 Packaging Plastic During and Post COVID-19 Pandemics 178
- 7.5 Types of Plastic Product Use During and Post COVID-19 Pandemics 180
- 7.6 The Status of Uses of Personal Protective Equipment Before, During, and Post COVID-19 Pandemic 180
- 7.7 Major Material and Composition used During the Production of PPE During Pandemic 181
- 7.8 Status of Biodegradable and Nonbiodegradable Plastics Used in COVID-19 Management 182
- 7.9 Role of Medical Waste on the Plastic Industry During and Post-COVID 19 Pandemic 183
- 7.10 Waste Management During the COVID-19 Pandemic 185
- 7.11 Challenges for the Current Waste Management Systems 186
- 7.12 Strategies for the Current Waste Management System 187
- 7.13 Biological Advantages of Plastic Waste Management During and Post-Pandemic 189
- 7.14 The Economic Development and Advantages of Plastic Waste Management During and Post-Pandemic 191
- 7.15 Future Prospects 192
- 7.16 Conclusion 193
- References 194

8 Biodegradation of Plastic Waste: Mechanisms, Perspectives, and Challenges 201

Ajifa Shabbir and Nazim Hussain

- 8.1 Introduction 201
- 8.2 Plastic Wastes Degradation 203
 - 8.2.1 Factors Influencing Plastic Degradation 203
 - 8.2.1.1 Physical and Chemical Properties of Plastics 203
 - 8.2.1.2 Factors Affecting Plastic Degradation 205
 - 8.3 Biodegradation 205
 - 8.3.1 Roles of Fungi and Bacteria in the Plastic Breakdown 206

- 8.3.2 Functions of Algae in the Decomposition of Synthetic Plastic Polymers 207
- 8.3.3 Several Insect Species and the Biodegradation of Plastics 209
- 8.4 C–C Backbone Degradation in Plastic Polymers 210
 - 8.4.1 Microbial Degradation of Polyethylene (PE) 210
 - 8.4.2 Microbial Degradation of Polystyrene (PS) 211
 - 8.4.3 Microbial Degradation of Polyvinyl Chloride (PC) 212
 - 8.4.4 Microbial Degradation of Polypropylene (PP) 212
- 8.5 C–O Backbone Degradation in Plastic Polymers 212
 - 8.5.1 Microbial Degradation of Polyurethane 213
 - 8.5.2 Microbial Degradation of Polyethylene Terephthalate (PET) 213
- 8.6 Synthetic Plastic Polymer Biodegradation Method 214
- 8.7 Toxicological Aspects of Plastic Waste Biodegradation 217
- 8.8 Future Outlook, Recommendations, and Viable Alternatives 218
- 8.9 Conclusion 219
- References 219

9 Conversion of Waste Plastics into Value-added Materials: A Global Perspective 227

Tarhamba Tobias Nyam, Olusola Olaitan Ayeleru, Ishmael Matala Ramatsa, and Peter Apata Olubambi

- 9.1 Introduction 227
- 9.2 From Recycling to Upcycling 228
- 9.3 Chemical Recycling 229
 - 9.3.1 Feedstock Recycling 230
 - 9.3.1.1 Gasification 233
 - 9.3.1.2 Pyrolysis 234
 - 9.3.1.3 Hydrothermal/Solvothermal Method 239
 - 9.3.2 Purification 239
 - 9.3.3 Carbonization 240
- 9.4 Emergent Technology in Waste Plastic Conversion 243
 - 9.4.1 Supercritical Water Gasification 243
 - 9.4.2 Microwave Irradiation 243
 - 9.4.3 Plasma Gasification 243
 - 9.4.4 Conversion of Plastic Waste into Fuel and Other Chemicals and Products Under Mild Conditions 245
 - 9.4.4.1 Enzyme-driven Conversion 245
 - 9.4.4.2 Solar-driven Conversion 246
 - 9.4.4.3 Plastic Depolymerization at Low-temperature-driven Catalytic Conditions 246
 - 9.4.4.4 Reductive Depolymerization 246
 - 9.4.4.5 Fenton Oxidation 246
- 9.5 Mechanical Recycling 248
