Editors Bio Section *xiii*

Preface *xv*

Acknowledgments *xvii*

| | | |
|----------|--|-----------|
| 1 | Thermoelectric Power Generators and Their Applications | 1 |
| | <i>Jianxu Shi and Ke Wang</i> | |
| 1.1 | Introduction | 1 |
| 1.2 | Principles of Thermoelectric Conversion | 1 |
| 1.2.1 | Seebeck Effect | 1 |
| 1.2.2 | Peltier Effect | 2 |
| 1.2.3 | Thomson Effect | 3 |
| 1.2.4 | Evaluation Indicators for Thermoelectric Materials and Devices | 3 |
| 1.3 | Thermoelectric Materials | 4 |
| 1.3.1 | Traditional Thermoelectric Materials | 4 |
| 1.3.2 | Half-Heusler Alloys | 6 |
| 1.3.3 | 2D Thermoelectric Materials | 7 |
| 1.3.4 | Thermoelectric Liquid Materials | 9 |
| 1.4 | Preparation of Thermoelectric Materials | 10 |
| 1.5 | Thermoelectric Devices and Their Applications | 15 |
| 1.5.1 | Conventional Devices | 15 |
| 1.5.2 | Miniature Devices | 16 |
| 1.5.3 | Flexible Devices | 18 |
| 1.6 | Conclusions and Outlook | 20 |
| | Acknowledgment | 20 |
| | References | 20 |
| 2 | Application of Nanomaterials in Organic Solar Cells | 27 |
| | <i>Tongsiliu Wu</i> | |
| 2.1 | Introduction | 27 |
| 2.1.1 | Background | 27 |
| 2.1.2 | Mechanisms and Structure of OSCs | 28 |
| 2.1.3 | Advantages of Adding Nanomaterials | 30 |
| 2.2 | Application of Carbon Materials in OSCs | 33 |

| | | |
|-------|---|----|
| 2.2.1 | Allotropes of Carbon Materials | 33 |
| 2.2.2 | Carbon Nanotubes | 34 |
| 2.2.3 | Graphene | 36 |
| 2.2.4 | Fullerene Receptors and Non-fullerene Receptors | 38 |
| 2.3 | Application of Silver Nanowire-based Nanoarrays in OSCs | 43 |
| 2.3.1 | Influence of Nanomicrostructure | 43 |
| 2.3.2 | Silver Nanowires | 45 |
| 2.4 | Emerging Trends and Future Outlook | 47 |
| 2.5 | Conclusions | 48 |
| | References | 48 |

3 **Advances in Low-temperature Na-ion Battery Energy Storage** 55

Meng Li, Kuan Wang, Qihang Jing, Xuan Yang, Chenxiang Li, Zhou Liao, Dongsheng Geng, and Biwei Xiao

| | | |
|-------|--|----|
| 3.1 | Introduction | 55 |
| 3.2 | LT NIB Cathode Materials | 56 |
| 3.2.1 | Polyanion | 57 |
| 3.2.2 | Layered TMO | 59 |
| 3.2.3 | Prussian Blue and Its Analogues | 62 |
| 3.3 | LT NIB Anode Materials | 63 |
| 3.3.1 | Interleaved Reaction Storage Na Negative Electrode | 64 |
| 3.3.2 | Alloyed Na Storage Anode | 66 |
| 3.3.3 | Transformation-type Na Storage Negative Electrode | 68 |
| 3.4 | LT Organic Electrolyte Research | 70 |
| 3.4.1 | LT Solvent Exploration | 71 |
| 3.4.2 | Selection of Electrolyte Salts | 73 |
| 3.4.3 | Electrolyte Additives | 75 |
| 3.5 | Summary and Outlook | 77 |
| | References | 79 |

4 **Thermochemical Energy Storage for Renewable Solar Energy Utilization** 89

Ruolan Hu, Lihui Zhang, Wei Deng, Bo Tong, and Yong Zhao

| | | |
|---------|--|-----|
| 4.1 | Introduction | 89 |
| 4.2 | Materials/Chemical Reactions and Systems for TCES Technology | 91 |
| 4.2.1 | Gas-Gas TCES Materials/Reactions and Systems | 92 |
| 4.2.1.1 | Organics Reforming, Decomposition and Gasification | 92 |
| 4.2.1.2 | Ammonia Synthesis/Dissociation | 95 |
| 4.2.1.3 | Sulfur-based Reactions | 96 |
| 4.2.2 | Solid-Gas TCES Materials/Reactions and Systems | 97 |
| 4.2.2.1 | Carbonates Calcination/Carbonation | 97 |
| 4.2.2.2 | Hydroxides Dehydration/Hydration | 101 |
| 4.2.2.3 | Metal Hydrides Dehydrogenation/Hydrogenation | 104 |
| 4.2.2.4 | Metal Oxides Oxidation/Reduction | 107 |

| | | |
|----------|--|------------|
| 4.2.3 | Liquid-Gas TCES Materials/Reactions and Systems | 111 |
| 4.2.3.1 | Isopropanol Dehydrogenation/Hydrogenation | 111 |
| 4.2.3.2 | Ammonium Hydrogen Sulfate Synthesis/Dissociation | 112 |
| 4.3 | Solar Receivers/Reactors for TCES Systems | 112 |
| 4.3.1 | Gas-Gas TCES Receivers/Reactors | 113 |
| 4.3.1.1 | Solar Methane Reforming Receivers/Reactors | 113 |
| 4.3.1.2 | Solar Methane Decomposition Receivers/Reactors | 118 |
| 4.3.1.3 | Solar Ammonia Dissociation/Synthesis Receivers/Reactors | 120 |
| 4.3.1.4 | Solar Sulfur-based Cycle Receivers/Reactors | 123 |
| 4.3.2 | Solid-Gas TCES Receivers/Reactors | 124 |
| 4.3.2.1 | Fixed/Packed Bed Receivers/Reactors | 124 |
| 4.3.2.2 | Fluidized Bed Receivers/Reactors | 129 |
| 4.3.2.3 | Moving Bed Receivers/Reactors | 131 |
| 4.4 | Conclusion | 135 |
| | Acknowledgment | 137 |
| | Conflict of Interest | 137 |
| | References | 137 |
| 5 | Recent Progress in Triboelectric Nanogenerators and New Challenges | 161 |
| | <i>Rong Xue and Xiaojia Wei</i> | |
| 5.1 | Introduction | 161 |
| 5.2 | Recent Research on Potential Mechanism and Four Working Modes of TENG | 162 |
| 5.2.1 | Recent Research on Potential Mechanism | 162 |
| 5.2.2 | CS Mode | 163 |
| 5.2.3 | LS-Mode | 165 |
| 5.2.4 | SE-Mode | 168 |
| 5.2.5 | FT-mode | 171 |
| 5.3 | Conclusion | 174 |
| | Conflict of Interest | 174 |
| | References | 174 |
| 6 | Wind Turbine Blades in Wind Power Generation: Manufacturing, Recovery and Reuse | 181 |
| | <i>Zichun Feng, Chunbao Du, Bingjia Wang, Baoli Li, and Gang Zhang</i> | |
| 6.1 | Introduction | 181 |
| 6.2 | Recycling of Waste WTBs | 182 |
| 6.2.1 | Manufacturing of WTBs | 183 |
| 6.2.2 | Burial and Incineration | 183 |
| 6.2.3 | Physical Recovery Method | 184 |
| 6.2.4 | Chemical Recovery Methods | 184 |
| 6.2.4.1 | Supercritical Fluid Degradation Method | 184 |
| 6.2.4.2 | Solvent Dissolution Method | 186 |
| 6.2.5 | Thermal Recovery Methods | 187 |

| | | |
|---------|--|-----|
| 6.2.5.1 | High Temperature Pyrolysis Recovery | 187 |
| 6.2.5.2 | Fluidized Bed Method | 189 |
| 6.2.5.3 | Microwave Pyrolysis Method | 190 |
| 6.2.6 | Electrochemical Recovery Treatment Method | 191 |
| 6.2.7 | Energy Recovery Method | 193 |
| 6.3 | Application Procedure for WTBs after Recycling | 193 |
| 6.3.1 | Local Post-cut Reuse | 193 |
| 6.3.2 | Reuse after Crushing | 194 |
| 6.4 | Future Direction of WTB Improvement | 196 |
| | Conflict of Interest | 198 |
| | References | 198 |

| | | |
|----------|---|------------|
| 7 | Electrocatalysts for the Oxygen Reduction Reaction in Fuel Cells | 205 |
| | <i>Shichao Ding, Zhaoyuan Lyu, Yu Meng, Yuehe Lin, and Jin-Cheng Li</i> | |
| 7.1 | Introduction | 205 |
| 7.2 | Classification | 207 |
| 7.2.1 | Proton Exchange Membrane Fuel Cells | 208 |
| 7.2.2 | Alkaline Fuel Cells | 210 |
| 7.2.3 | Solid Oxide Fuel Cells | 211 |
| 7.3 | Electrocatalysts | 211 |
| 7.3.1 | Noble Metal-Based Catalysts | 212 |
| 7.3.1.1 | Low Pt Catalysts | 213 |
| 7.3.1.2 | Pt-alloy with Carbon Support | 214 |
| 7.3.2 | Non-precious-metal Catalysts | 217 |
| 7.3.2.1 | Transition Metal Oxide-based Catalysts | 217 |
| 7.3.2.2 | Metal-N-C-based Catalysts | 218 |
| 7.3.3 | Non-metal-based Catalyst | 221 |
| 7.3.3.1 | N-doped Carbon-based Catalysts | 221 |
| 7.3.3.2 | Other Heteroatom-doped Catalysts | 223 |
| 7.4 | Future Outlook | 224 |
| 7.5 | Conclusion | 225 |
| | Acknowledgments | 225 |
| | Conflict of Interest | 226 |
| | References | 226 |

| | | |
|----------|--|------------|
| 8 | Carbon Fiber in Renewable Energy Development | 233 |
| | <i>Guoqing Xu, Tong Li, Feixiang Wang, Zhiqiang Duan, and Yimin Jing</i> | |
| 8.1 | Introduction | 233 |
| 8.2 | Carbon Fiber Classification: Pitch-Based, Viscose Based, PAN Based | 234 |
| 8.3 | Application of Carbon Fiber | 236 |
| 8.4 | Application of Carbon Fiber in Wind Power | 237 |
| 8.5 | Application of Carbon Fiber in the Photovoltaic Industry | 239 |
| 8.5.1 | Heating Field | 239 |

| | | |
|-----------|--|------------|
| 8.5.2 | Photovoltaic Cell Carrier Board | 241 |
| 8.6 | Application of Carbon Fiber in the Hydrogen Production Industry | 243 |
| 8.6.1 | Hydrogen Fuel Cells | 243 |
| 8.6.2 | Application of Activated Carbon Fiber in Hydrogen Storage Technology | 245 |
| 8.7 | Redox Fluid Flow Batteries | 246 |
| 8.8 | Phase Change Energy Storage | 247 |
| 8.9 | Biofuel Cells | 248 |
| 8.10 | Emerging Trends and Future Outlook | 249 |
| 8.11 | Recycling of Carbon Fiber | 250 |
| 8.12 | Summary | 253 |
| | References | 253 |
| 9 | Sustainable Carbon Nanofluids of Petroleum Extraction | 257 |
| | <i>Chunbao Du and Yuan Cheng</i> | |
| 9.1 | Introduction | 257 |
| 9.2 | Carbon Nanofluids for EOR | 259 |
| 9.2.1 | Graphene-based Nanofluid | 259 |
| 9.2.2 | CNTs-based Nanofluid | 262 |
| 9.2.3 | GO-based Nanofluid | 265 |
| 9.2.4 | QDs-based Nanofluid | 269 |
| 9.3 | Influencing Factors of Carbon Nanofluids on EOR | 272 |
| 9.4 | Mechanisms | 274 |
| 9.4.1 | Wettability | 274 |
| 9.4.2 | Interfacial Tension | 274 |
| 9.4.3 | Separation Pressure | 275 |
| 9.4.4 | Mobility Ratio | 275 |
| 9.5 | Emerging Trends and Future Outlook | 275 |
| 9.6 | Conclusions | 277 |
| | Acknowledgment | 277 |
| | Conflict of Interest | 277 |
| | References | 277 |
| 10 | Carbon Dioxide Capture and Chemical Conversion into Fuels | 283 |
| | <i>Yanan Zhu</i> | |
| 10.1 | Introduction | 283 |
| 10.2 | CO ₂ Capture | 284 |
| 10.2.1 | Technologies for CO ₂ Capture | 284 |
| 10.2.1.1 | Pre-combustion Carbon Capture Technology | 284 |
| 10.2.1.2 | Oxy-fuel Combustion Carbon Capture Technology | 285 |
| 10.2.1.3 | Post-combustion Carbon Capture Technology | 286 |
| 10.2.2 | Materials for CO ₂ Capture | 286 |
| 10.2.2.1 | Porous Organic Polymers | 287 |
| 10.2.2.2 | Metal-organic Frameworks | 288 |

xii | *Contents*

| | | |
|----------|--|-----|
| 10.2.2.3 | Carbon Materials | 290 |
| 10.3 | Chemical Conversion of CO ₂ into Fuels | 292 |
| 10.3.1 | CO ₂ Conversion into Fuels by Catalytic Hydrogenation | 293 |
| 10.3.2 | CO ₂ Conversion into Fuels by Photocatalysis | 295 |
| 10.3.3 | CO ₂ Conversion into Fuels by Electrocatalysis | 297 |
| 10.4 | Conclusions | 299 |
| | Acknowledgment | 299 |
| | Conflict of Interest | 299 |
| | References | 299 |
