	About the Authors	<i>xi</i>
	Preface	<i>xiii</i>
1	Introduction	<i>1</i>
1.1	Definition of Chalcogenide Semiconductors	<i>1</i>
1.1.1	Basic Definition of Chalcogenide Semiconductors	<i>1</i>
1.1.2	Classification of Chalcogenides	<i>3</i>
1.2	Basic Properties of Chalcogenide Semiconductors	<i>5</i>
1.2.1	Chemical Properties	<i>5</i>
1.2.2	Physical Properties	<i>5</i>
1.2.3	Optical Properties	<i>6</i>
1.2.4	Optical Force	<i>9</i>
1.3	Application of Chalcogenide Semiconductors	<i>10</i>
1.3.1	Optical Communication	<i>10</i>
1.3.2	Optical Storage	<i>11</i>
1.3.3	Sensing Technology	<i>12</i>
1.3.4	Other Applications	<i>14</i>
1.4	Research Progress of Chalcogenide Semiconductors	<i>15</i>
2	Fundamentals of Chalcogenide Semiconductors	<i>17</i>
2.1	Theory of Electronic Band Structure	<i>17</i>
2.1.1	Band Theory	<i>18</i>
2.1.1.1	Free Electron Gas Model	<i>19</i>
2.1.1.2	Bloch's Theorem	<i>21</i>
2.1.2	Nearly-free Electron Model	<i>24</i>
2.1.2.1	Degenerate Perturbation Theory	<i>26</i>
2.1.2.2	k Not Quite on a Zone Boundary	<i>27</i>
2.1.3	Tight-binding Model in One Dimension	<i>29</i>
2.1.4	Nanoelectronics: Superlattices and Heterostructures	<i>31</i>
2.2	Basic Material Properties	<i>33</i>
2.2.1	Structure Properties	<i>33</i>
2.2.1.1	Crystallinity and Phase Structure	<i>33</i>
2.2.1.2	Surface Morphology and Roughness	<i>34</i>
2.2.1.3	Phase Composition and Structural Units	<i>34</i>

2.2.1.4	Structural Stability and Environmental Durability	34
2.2.2	Electrical Properties	36
2.2.2.1	Density of States	36
2.2.2.2	Temperature Dependence of the d.c. Conductivity	37
2.2.2.3	Drift Mobility and Photoconduction	38
2.2.3	Optical Absorption	40
2.2.4	Other Measurements	43
2.2.4.1	Thermal Conductivity and Specific Heat	43
2.2.4.2	Photoemission and Density of States	44
2.3	Synthesis and Characterization of Chalcogenide Film	44
2.3.1	Synthesis of Chalcogenide Film	45
2.3.1.1	Chemical Vapor Deposition	45
2.3.1.2	Thermal Evaporation	48
2.3.1.3	Pulsed Laser Deposition	49
2.3.1.4	Sputtering	49
2.3.2	Structural and Compositional Characterization	50
2.3.2.1	Structural Characterization	51
2.3.2.2	Component Characterization	57
2.3.2.3	Optical Characterization	60
2.3.2.4	Other Photon-detecting Techniques	64

3 Growth of Chalcogenide Films: Mechanisms and Strategies 67

3.1	Chemical Vapor Deposition	70
3.1.1	Principle and Process	70
3.1.2	Applications in Chalcogenide Films	71
3.1.3	Advantages and Disadvantages	73
3.2	Thermal Evaporation	74
3.2.1	Principle and Process	74
3.3	Vacuum Chamber	75
3.4	Pumping System	76
3.5	Substrate	76
3.6	Source	76
3.7	Filament	77
3.8	Voltage Supply	77
3.9	Quartz Crystal	77
3.9.1	Applications in Chalcogenide Films	77
3.9.2	Advantages and Disadvantages	79
3.10	Pulsed Laser Deposition	80
3.10.1	Principle and Process	80
3.10.1.1	Laser Beam	81
3.10.1.2	Focusing Lens	82
3.10.1.3	Rotor	82
3.10.1.4	Source and Substrate	82
3.10.1.5	Pumping System	83

- 3.10.2 Applications in Chalcogenide Films 83
- 3.10.3 Advantages and Disadvantages 83
- 3.11 Sputtering 85
 - 3.11.1 Principle and Process 85
 - 3.11.1.1 Vacuum Chamber 88
 - 3.11.1.2 Substrate and Cathode 88
 - 3.11.1.3 Reactive Gas 88
 - 3.11.1.4 Magnets 88
 - 3.11.1.5 RF Generator 89
 - 3.11.2 Applications in Chalcogenide Films 89
 - 3.11.3 Advantages and Disadvantages 93
- 4 Optical Properties 95**
 - 4.1 Macroscopic Electrodynamics 95
 - 4.1.1 Overview of Electrodynamics in Chalcogenides 96
 - 4.1.2 Application of DFT in the Field of Chalcogenides 100
 - 4.2 The Dielectric Function 112
 - 4.2.1 Measurement Techniques: Ellipsometry and Reflectance 113
 - 4.2.2 Spectroscopic Ellipsometry for Dielectric Function Analysis 116
 - 4.2.3 Optical Bandgap of Chalcogenide Semiconductors 119
 - 4.3 Raman Spectroscopies 121
 - 4.3.1 Principles of Raman Scattering 121
 - 4.3.2 Raman Spectroscopy in Chalcogenide Semiconductors 123
 - 4.3.3 Applications of Raman Spectroscopy in Nanophotonics 127
 - 4.4 Emission Spectroscopies 129
 - 4.4.1 Optical Emission Mechanisms in Chalcogenides 129
 - 4.4.2 Photoluminescence and Electroluminescence 131
 - 4.4.3 Quantum Efficiency 137
 - 4.5 Light Scattering Spectroscopies 140
 - 4.5.1 Light Scattering Principles and Techniques 141
 - 4.5.2 Application of Light Scattering in Chalcogenide Nanomaterials 145
- 5 Chalcogenide Compounds for Optical Communications 147**
 - 5.1 Introduction 147
 - 5.2 Optical Characters of Chalcogenide Glasses 153
 - 5.2.1 Linear Refractive Index 153
 - 5.2.2 Infrared Transmission Characteristics 158
 - 5.2.3 Photosensitivity Characteristics 166
 - 5.2.4 Nonlinear Characteristic 172
 - 5.3 Preparation Process of Sulfur System Glass Fiber 179
 - 5.3.1 Purification of the Sulfur-series Glass Material 179
 - 5.3.2 Several Methods for the Preparation of Sulfur Glass Fiber 179
 - 5.4 Application 186
 - 5.4.1 Sensing 186
 - 5.4.2 Nonlinear Effects and All-light Treatment 189

- 6 Integrated Optics and On-Chip Photonic Devices of Sulfide Compounds 195**
- 6.1 Introduction 195
 - 6.2 Chalcogenide Photonic Memory 196
 - 6.2.1 Design of Chalcogenide-Based Photonic Memory 198
 - 6.2.2 Design of Photon Memory Based on Sulfide Compounds 199
 - 6.2.3 Practical Application Cases 207
 - 6.3 Chalcogenide Color Pixels and Displays 212
 - 6.3.1 Working Principle of Color Pixel Display 212
 - 6.3.2 Practical Application Cases 214
 - 6.4 Chalcogenide Waveguide 219
 - 6.4.1 Theoretical Basis for the Characteristics of Chalcogenides and Waveguides 219
 - 6.4.2 Application of Chalcogenides in Waveguides 219
 - 6.5 Discussion 229
- 7 Chalcogenide Photonic Crystals 231**
- 7.1 Introduction 231
 - 7.2 Chalcogenide PC Platform 232
 - 7.2.1 Introduction to PCs 233
 - 7.2.1.1 Classification of PCs 233
 - 7.2.1.2 Basic Principle of PCs 236
 - 7.2.2 Characteristics of Chalcogenide PCs 240
 - 7.2.2.1 Characteristics of Chalcogenide Materials 240
 - 7.2.2.2 Advantages of Chalcogenide PCs 241
 - 7.2.3 Preparation Process of the Chalcogenide PC Platform 243
 - 7.2.3.1 Preparation Process of One-Dimensional Chalcogenide PC Platforms 243
 - 7.2.3.2 Preparation Process of Two-Dimensional Chalcogenide PC Platforms 243
 - 7.2.3.3 Preparation Process of Three-Dimensional Chalcogenide PC Platforms 244
 - 7.3 Applications 246
 - 7.3.1 Chalcogenide PCFs 246
 - 7.3.2 Chalcogenide PC Cavity 249
 - 7.3.3 Chalcogenide PCWs 252
 - 7.3.4 Chalcogenide Topological PCs 258
 - 7.4 Discussions 260
- 8 Chalcogenide Metamaterials 263**
- 8.1 Introduction 263
 - 8.2 Chalcogenide Metamaterials Platform 264
 - 8.3 Applications 268
 - 8.3.1 Chalcogenide Optical Switches 268
 - 8.3.2 Chalcogenide Perfect Absorbers 272

8.3.3	Chalcogenide Beam Steering	276
8.3.3.1	Generalized Laws of Reflection and Refraction	277
8.3.3.2	Classification of Chalcogenide Beam Control	278
8.3.4	Chalcogenide Metalens	284
8.3.4.1	Basics of Metalens	284
8.3.4.2	Chalcogenide Metalens	285
8.3.5	Chalcogenide Chiral and Non-chiral Metamaterials	288
8.3.5.1	Chirality	288
8.3.5.2	Applications of Chalcogenide Chiral Metamaterials	288
8.3.5.3	Applications of Chalcogenide Non-chiral Metamaterials	298
8.3.6	Chalcogenide Polarization Converter	303
8.3.7	Chalcogenide Optical Tweezers	306
8.3.7.1	Optical Tweezers	306
8.3.7.2	Chalcogenide Optical Tweezers	308
8.4	Discussions	309
9	Perspectives	311
9.1	Future of Chalcogenide Nanophotonics	311
9.1.1	Advanced Materials for Next-Generation Photonic Devices	311
9.1.2	Chalcogenides in Quantum and Nonlinear Photonics	312
9.1.2.1	Nonlinear Optical Response	312
9.1.2.2	Quantum Photonics	313
9.1.2.3	Challenges in Fabrication and Device Design	313
9.1.3	Integration with Silicon Photonics	313
9.1.3.1	Material Compatibility	313
9.1.3.2	Interface Quality and Device Integration	313
9.1.3.3	Scalability and Fabrication Techniques	314
9.1.3.4	Applications and Future Directions	314
9.2	Challenges in Chalcogenide Nanophotonics	314
9.2.1	Material Quality	314
9.2.1.1	Thin Film Uniformity and Reproducibility	314
9.2.1.2	Defect Control and Optical Loss	315
9.2.1.3	Challenges in Scalable Fabrication	315
9.2.2	Challenges in Micro- and Nanofabrication	315
9.2.2.1	High-Resolution Patterning Techniques	315
9.2.2.2	Process Compatibility and Integration	315
9.2.2.3	Exploration of Novel Processing Methods	316
9.2.3	Thermal Stability	316
9.2.3.1	Optimization of Material Stability	316
9.2.3.2	Thermally Induced Phase Transition Control	316
9.2.3.3	Packaging and Interface Stability	316
9.2.4	Advances in Modulation Mechanisms	316
9.2.4.1	Electric Field Modulation	317
9.2.4.2	Optical and Thermal Control	317
9.2.4.3	Mechanical and Strain Engineering	317

x | *Contents*

9.3	Conclusion and Outlook	317
9.3.1	Material Optimization and Intelligent Design	318
9.3.2	Advanced Fabrication Processes and Nanoscale Device Integration	318
9.3.3	AI-Driven Adaptive Photonic Systems	319
9.3.4	Expanding Chalcogenide Photonic Technologies for Future Applications	320
9.3.5	The Future of Chalcogenide Nanophotonics	320
