

## Index

Note: Page numbers in *italics* and **bold** refers to figures and tables, respectively.

### **a**

AAV mouse model of HBV (AAV-HBV) 189  
abacavir (ABC) 4, 135  
absorption, distribution, metabolism, and excretion (ADME) 51, 371, 455  
absorption, distribution, metabolism, excretion, and toxicity (ADME-Tox) 433  
early evaluation of *in vitro* 433  
acquired immunodeficiency syndrome (AIDS) 103, 127, 448  
active triphosphate 352  
acute-disease RNA viruses 413  
acute RNA respiratory viruses 11–14, **13**  
acyclic nucleoside phosphonate (ANP) 4, 132, 448  
acyclovir 77–79, 77  
chemical pathway of 78  
high-dose IV 80  
adefovir (AFV) 9  
adeno-associated virus (AAV) 189  
adenosine kinase (AK) 392  
adenosine monophosphate (AMP) 398  
adenoviruses (AdVs) 447, 449, 463  
adenovirus type and response to BCV 466–467, **466, 467**  
ATHENA study 468–469, **468**  
clinical experience with oral BCV for AdV 464–466  
resistance to BCV 467  
adverse events (AEs) 283, 402  
AdV species C type 5 (AdVC5) 463  
*Aedes* mosquitoes 428  
AiCuris 38–39, 52, 55  
alanine aminotransferase (ALT) 215  
allogeneic hematopoietic cell transplant (allo-HCT) 449  
2'- $\alpha$ -F, 2'- $\beta$ -C-methyl cytidine nucleoside (PSI-6130) 248–250, 249

*in vitro* potency and rat pharmacokinetic study of **251**  
metabolic profile of 252  
Alzheimer's disease (AD) 477–478  
amenavir, 77 78  
amine in presatovir 323  
amino azetidine 316  
angiotensin-converting enzyme 2 (ACE2) 367  
animal models  
of BCV 456, 459–460  
RSV 319–320  
of SARS-CoV-2 infection 417  
Animal Rule 459  
scaling to humans 461–462  
animal studies  
antiviral activity in humanized mice 150–151  
antiviral activity in rhesus macaques 151–152  
with EFdA 149, **155–159**  
long-acting activity in various animals 152–160  
for papillomavirus-associated tumors 480  
pharmacokinetic studies in rodents 149  
antibody-dependent enhancement of infection (ADE) 428  
anti-CMV drug development 38–39  
antigenomic RNA 413  
antiproliferative activity of BCV 478–483  
antiproliferative MOA 483  
EBV-associated tumors 481–482  
glioblastoma 482–483  
papillomavirus-associated tumors 479–481  
antiretroviral therapy (ART) 4, 103, 127  
anti-SARS-CoV-2 drugs 390, 404  
antiviral activity  
against double-stranded DNA viruses 450–453

- antiviral activity (*continued*)  
 against RNA viruses 453–454  
 of BCV 450–454  
 of ensitrelvir 374–384  
 imdusiran 197–200  
 of molnupiravir 412–413  
 of VV116 398
- antiviral drugs  
 acute RNA respiratory viruses 11–14, **13**  
 hepatitis B virus 9–10, **9**  
 hepatitis C virus 11, **12**  
 hepatitis D virus 10, **10**  
 human herpesviruses 2–4, **3**  
 human immunodeficiency virus 4, **5–6**  
 integrase strand transfer 7  
 new trends and challenges 15–16  
 protease 6–7  
 reverse transcriptase 4–6  
 SARS-CoV-2 14–15  
 viral capsid 8  
 viral entry 7–8  
 viral infections 1–2
- antiviral pharmacology of RDV 343–348
- antiviral prophylaxis 37–38
- antiviral resistance  
 of LET 35–37, **36**  
 of RDV 351–353  
 structural model of SARS-CoV-2 RdRp 352
- antiviral success of zidovudine 134
- ARO-HBV/JNJ-3989 217  
 chronic hepatitis B virus infection 211, 212–215  
 clinical studies in chronically HBV-infected patients 220–238  
 development of RNAi therapeutics 216–217  
 discussion and perspectives 238–239  
 pharmacokinetics and safety in humans 218–220
