Preface xvii

1 Synthesis of Diverse Nitrogen Heterocycles Explored in Denitrogenative Transformations 1

Monalisa Akter and Pazhamalai Anbarasan

- 1.1 Introduction 1
- 1.2 Synthesis of 1,2,3-Triazoles 1
 - 1.2.1 Synthesis of *NH*-Triazoles 1
 - 1.2.2 Synthesis of *N*-Sulfonyl-1,2,3-triazoles 6
 - 1.2.3 Synthesis of *N*-Trifluoromethyl-1,2,3-triazoles 8
 - 1.2.4 Synthesis of 5-Iodo-1,2,3-triazoles 10
 - 1.2.5 Synthesis of Pyridotriazoles 11
 - 1.2.6 Synthesis of Triazoloindoles 12
 - 1.2.7 Synthesis of Benzotriazoles 12
- 1.3 Synthesis of 1,2,3-Thiadiazoles 13
- 1.4 Synthesis of Tetrazoles 13
 - 1.4.1 Synthesis of 1*H*-Tetrazoles 13
 - 1.4.2 Synthesis of Pyridotetrazoles 15
 - 1.4.3 Synthesis of Tetrazolo[1,5-*a*]quinolines 16
- 1.5 Synthesis of 3-Aminoindazoles 17
- 1.6 Synthesis of Benzotriazinones 18
- 1.7 Summary and Outlook 20
- References 20

2 Transannulation of *N*-Sulfonyl-1,2,3-triazoles with Polar Multiple Bonds 31

Chuan-Ying Li and Ze-Feng Xu

- 2.1 Introduction 31
- 2.2 Reaction of *N*-Sulfonyl-1,2,3-triazoles with Carbonyls 31
- 2.3 Reaction of *N*-Sulfonyl-1,2,3-triazoles with Nitriles 42
- 2.4 Reaction of *N*-Sulfonyl-1,2,3-triazoles with Polar Multiple Bonds Beyond Carbonyls and Nitriles 44
- 2.5 Conclusion 47
- References 47

3	Transannulation of <i>N</i>-Sulfonyl-1,2,3-triazoles with Nonpolar Multiple Bonds such as Alkenes, Alkynes, and Allenes	51
	<i>Prasiddha Nagarajan, Akhil Rampally, and Sudam G. Dawande</i>	
3.1	Introduction	51
3.2	Transannulation of <i>N</i> -Sulfonyl-1,2,3-triazoles with Alkenes	52
3.2.1	Intermolecular Transannulation with Alkenes	52
3.2.2	Intramolecular Transannulation with Alkenes	63
3.3	Transannulation of <i>N</i> -Sulfonyl-1,2,3-triazoles with 1,3-Dienes	64
3.3.1	Intermolecular Transannulation with 1,3-Dienes	65
3.3.2	Intramolecular Transannulation with 1,3-Dienes	68
3.4	Transannulation of <i>N</i> -Sulfonyl-1,2,3-triazoles with Alkynes	69
3.4.1	Intermolecular Transannulation with Alkynes	69
3.4.2	Intramolecular Transannulation with Alkynes	73
3.5	Transannulation of <i>N</i> -Sulfonyl-1,2,3-triazoles with Allenes	75
3.5.1	Intermolecular Transannulation with Allenes	75
3.5.2	Intramolecular Transannulation with Allenes	78
3.6	Summary and Outlook	79
	References	80
4	Transannulations of <i>N</i>-Sulfonyl-1,2,3-triazoles with Carbo/Heterocycles	83
	<i>Mikhail S. Novikov and Nikolai V. Rostovskii</i>	
4.1	Introduction	83
4.2	Transannulations with Ring Retention	85
4.2.1	Aromatic and Heteroaromatic Rings	85
4.2.2	Nonaromatic Rings	89
4.3	Transannulations with Ring Opening	90
4.3.1	Heteroaromatic Rings	90
4.3.2	Nonaromatic Rings	101
4.4	Summary and Outlook	110
	References	111
5	Insertion of Azavinyl Carbenes to C—H/X—H Bond	115
	<i>Yury N. Kotovshchikov and Gennadij V. Latyshev</i>	
5.1	Abbreviations	115
5.2	Introduction	116
5.3	Insertion Reactions of <i>N</i> 1-Sulfonyl-1,2,3-triazoles	116
5.3.1	C—H Insertion	116
5.3.2	O—H Insertion	133
5.3.3	N—H Insertion	149
5.3.4	B—H Insertion	154
5.3.5	Si—H and P—H Insertion	155
5.4	Insertion Reactions of 5-Iodo-1,2,3-triazoles	156
5.5	Summary and Outlook	160
	Acknowledgment	160
	References	160

6	Insertion of Azavinyl Carbenes to C—X/X—X Bond	171
	<i>Claire Empel and Rene M. Koenigs</i>	
6.1	Introduction	171
6.2	1,3-Difunctionalization	172
6.3	[2,3]-Sigmatropic Rearrangement Reactions	180
6.4	Insertion into X—X bonds	184
6.5	Conclusion	184
	References	184
7	Denitrogenative Rearrangements of N-Sulfonyl-1,2,3-triazoles	189
	<i>Om Prakash Dash, Shivam Pandey, and Chandra M. R. Volla</i>	
7.1	Introduction to Carbenes	189
7.2	Metal Carbenoids	189
7.3	Metal Carbenoids Derived from Diazo Compounds	191
7.4	α -Imino Metal Carbenoids and Their Reactivity	191
7.5	Denitrogenative Rearrangements of N-Sulfonyl-1,2,3-triazoles Through Azadiene Formation	193
7.6	Denitrogenative Rearrangements of N-Sulfonyl-1,2,3-triazoles Through Zwitterionic Intermediate	200
7.7	Denitrogenative Rearrangements of N-Sulfonyl-1,2,3-triazoles Through Ylide Formation	201
7.8	Denitrogenative Rearrangements of N-Sulfonyl-1,2,3-triazoles Through Ketenimine Formation	206
7.9	Conclusion	207
	Acknowledgments	208
	References	208
8	Denitrogenative Transformations of NH- and N-Fluoroalkyl-1,2,3-triazoles	211
	<i>Vladimir Motornov and Petr Beier</i>	
8.1	Introduction	211
8.2	Denitrogenation of NH-1,2,3-Triazoles	211
8.3	Denitrogenation of N-Fluoroalkyl-1,2,3-triazoles	218
8.4	Summary and Outlook	223
	Acknowledgments	223
	References	223
9	Asymmetric Perspective on Denitrogenative Transformation of 1,2,3-Triazoles	227

9.1	Introduction	227
9.2	Rhodium-Catalyzed Cyclopropanation Reactions	227
9.3	Rhodium-Catalyzed C—H Insertion Reactions	233
9.4	Rhodium-Catalyzed Transannulation Reactions	236

9.5	Miscellaneous Reactions	240
9.5.1	Relay Catalysis	240
9.5.2	Atom Transfer Reactions	242
9.6	Application in Natural Product and Total Synthesis	243
9.7	Summary and Outlook	246
	Acknowledgments	246
	References	246
10	Denitrogenative Transformations of 3-Diazoindolin-2-imines	251
	<i>Kavuri Rupa and Pazhamalai Anbarasan</i>	
10.1	Introduction	251
10.2	Synthesis of 3-Diazoindolin-2-imines	251
10.3	Insertion Reactions of 3-Diazoindolin-2-imines	253
10.3.1	Insertion into X—H Bonds	253
10.3.2	Insertion into C—H Bonds	255
10.3.3	Insertion into C—X Bonds	257
10.4	Annulation Reactions of 3-Diazoindolin-2-imines	260
10.5	Miscellaneous Reactions	271
10.6	Summary and Outlook	277
	References	277
11	Metal-Catalyzed Denitrogenative Transformations of Pyridotriazoles	281
	<i>Deepa Rawat, Abhisek Joshi, and Subbarayappa Adimurthy</i>	
11.1	Introduction	281
11.2	Rhodium-Catalyzed Transannulation of Pyridotriazoles	283
11.2.1	Rhodium-Catalyzed Transannulation of Pyridotriazoles with Alkyl Silane, Alkynes, and Nitriles	283
11.2.2	Rhodium-Catalyzed Transannulation of Pyridotriazoles with Amine and Amides	287
11.2.3	Rhodium-Catalyzed [4 + 3] Cycloaddition of Pyridotriazoles with 2-Phenylpyridine and <i>S</i> -Aryl Sulfoximines	288
11.2.4	Rhodium-Catalyzed Transannulation of Pyridotriazoles with 1,3-Dienes	290
11.2.5	Rhodium-Catalyzed Transannulation of Pyridotriazoles with <i>N</i> -Phenylbenzimidamides	291
11.2.6	Rhodium-Catalyzed [4 + 1] Cycloaddition of Pyridotriazoles with Propargyl Alcohols	292
11.3	Palladium-Catalyzed Ring-Opening of [1,2,3]Triazolo [1,5- <i>a</i>]pyridines	293
11.3.1	Palladium-Catalyzed Ring-Opening of Pyridotriazole with Aryl Halides	294
11.3.2	Palladium-Catalyzed Ring-Opening of Pyridotriazole with Acetic Anhydride	297

11.4	Copper-Catalyzed Denitrogenative Transannulation of Pyridotriazoles	299
11.4.1	Copper-Catalyzed Transannulation of Pyridotriazoles with Alkynes	299
11.4.2	Copper-Catalyzed Transannulation of Pyridotriazoles with Amines and Amino Acids	300
11.5	Cobalt-Catalyzed Transannulation of Pyridotriazoles with Isothiocyanates and Xanthate Esters	302
11.6	Ruthenium-Catalyzed Transannulation of Pyridotriazoles with Naphthoquinones	303
11.7	Summary and Conclusion	305
	Acknowledgments	306

14	Denitrogenative Transannulation of Thiadiazoles	359
	<i>Phil Ho Lee</i>	
14.1	Introduction	359
14.2	Rh-Catalyzed Reaction of 1,2,3-Thiadiazoles with Alkynes	359

14.2.1	Rh-Catalyzed Thiavinyl Carbenes from 1,2,3-Thiadiazoles for the Synthesis of Multisubstituted Thiophenes	359
14.2.2	Rh-Catalyzed Intramolecular Transannulation Reaction of Alkynyl Thiadiazoles for the Synthesis of 5, <i>n</i> -fused Thiophenes	361
14.2.3	Rh-Catalyzed Denitrogenative Transformations of 1,2,3-Thiadiazoles for the Synthesis of Multisubstituted Furans and Thiophenes	361
14.2.4	Rh-Catalyzed 1,1-Hydroacylation of Thioacyl Carbenes with Alkynyl Aldehydes and Subsequent Cyclization for the Synthesis of 4 <i>H</i> -Thiopyran-4-ones	362
14.3	Rh-Catalyzed Reaction of 1,2,3-Thiadiazoles with Alkenes	363
14.3.1	Regioselective Synthesis of Dihydrothiophenes and Thiophenes via the Rh-Catalyzed Transannulation of 1,2,3-Thiadiazoles with Alkenes	363
14.3.2	Ir-Catalyzed Diastereospecific and Enantioselective (3 + 2) Transannulations of 1,2,3-Thiadiazoles with Norbornenes	366
14.3.3	Rh-Catalyzed 1,1-Hydroacylation of Thioacyl Carbenes with Alkynyl Aldehydes and Subsequent Cyclization	367
14.4	Rh-Catalyzed Reaction of 1,2,3-Thiadiazoles with Carbonyl Compounds	368
14.4.1	Ag-Mediated Annulation of 5 <i>H</i> -1,2,3-Thiadiazoles with 1,3-Dicarbonyls for the Synthesis of Polysubstituted Furans	368
14.5	Rh-Catalyzed Reaction of 1,2,3-Thiadiazoles with Nitriles	369
14.5.1	Rh-Catalyzed Transannulation of 1,2,3-Thiadiazoles with Nitriles for the Synthesis of Isothiazole	369
14.5.2	Synthesis of Bicyclic Isothiazoles <i>via</i> Intramolecular Rh-Catalyzed Transannulation of Cyanothiadiazoles	372
14.5.3	Rh-Catalyzed Highly Chemoselective and Diastereoselective (3 + 2) Transannulations of 1,2,3-Thiadiazoles with Cyanoepoxides	373
14.5.4	Transannulation of 1,2,3-Thiadiazoles and Alk-2-enenitriles for the Synthesis of 3-(Alk-1-enyl)isothiazoles	374
14.6	Rh-Catalyzed Reaction of 1,2,3-Thiadiazoles with Imines	375
14.6.1	(2 + 2 + 2) Annulations of Thioketenes and Imines	375
14.7	Rh-Catalyzed Reaction of 1,2,3-Thiadiazoles with Phosphaalkynes	376
14.7.1	Rh-Catalyzed Cyclization Reactions of Thiadiazoles with Phosphaalkynes for the Synthesis of 1,3-Thiaphospholes	376
14.8	Rh-Catalyzed Reaction of 1,2,3-Thiadiazoles with Aziridines	377
14.8.1	Synthesis of Thiazolines <i>via</i> the Thioketene-Induced Ring Expansion of Aziridines	377
14.9	Conclusions	378
