	Foreword	<i>xiii</i>
	Preface	<i>xvii</i>
1	Aromaticity and Antiaromaticity in Nanographenes: An Overview	1
	<i>Albert Artigas and Miquel Solà</i>	
1.1	Introduction	1
1.2	Global and Local Aromaticity	2
1.3	Methods to Quantify Aromaticity	6
1.3.1	Energetic Descriptors of Aromaticity	7
1.3.2	Electronic Descriptors of Aromaticity	9
1.3.3	Geometric Descriptors of Aromaticity	13
1.3.4	Magnetic Descriptors of Aromaticity	14
1.4	The Analysis of Aromaticity in Nanographene Systems	20
1.5	Concluding Remarks	23
	Acknowledgments	24
	References	24
2	Covalent Patterned Functionalization of Graphene	31
	<i>Tao Wei and Andreas Hirsch</i>	
2.1	Introduction	31
2.2	Substrate-Mediated Chemical Patterning	33
2.3	Tip-Induced Patterned Functionalization	35
2.4	Lithography-assisted Molecular Engineering	37
2.5	Laser Writing	44
2.6	Conclusion	50
	References	51
3	Nanographenes by Bottom-up Approach: The Scholl Reaction	55
	<i>Daniel T. Gryko, Wojciech D. Petrykowski, and Krzysztof J. Kochanowski</i>	
3.1	Introduction	55
3.2	Planar Nanographenes	56

- 3.3 Heterocyclic Analogs of Planar Nanographenes 63
- 3.4 Nonplanar, Curved, and Twisted Nanographenes 66
- 3.5 Heterocyclic Analogs of Nonplanar Nanographenes 71
- 3.6 Surface-assisted (cyclo)Dehydration 74
- 3.7 Summary and Outlook 76
- Acknowledgment 77
- References 77
- 4 Racemization Barriers in Chiral Molecular Nanographenes 83**
Jesús M. Fernández-García, Patricia Izquierdo-García, Salvatore Filippone, and Nazario Martín
- 4.1 Introduction 83
- 4.2 Structural Motifs for Chirality in Nanographenes 84
- 4.2.1 Gaussian Curvature 85
- 4.2.2 Helicenes 85
- 4.2.3 Rolling 86
- 4.2.4 Strain 87
- 4.3 Classification of Chiral Molecular NGs According to Their Isomerization Barriers 87
- 4.4 Flexible Nanographenes (<5 kcal mol⁻¹) 87
- 4.5 Nanographenes with Spectroscopically Detectable Chirality (5–20 kcal mol⁻¹) 89
- 4.6 Isolable Nanographenes (20–35 kcal mol⁻¹) 90
- 4.7 Rigid Nanographenes (>35 kcal mol⁻¹) 93
- 4.8 Enantioselective Synthesis of Rigid Molecular Nanographenes 95
- 4.9 Conclusion 98
- References 99
- 5 Synthesis of Helicenes 105**
Irena G. Stará and Ivo Starý
- 5.1 Introduction 105
- 5.2 Characteristics of Helicenes 106
- 5.3 Synthetic Methodologies 107
- 5.3.1 Photocyclodehydrogenation of 1,2-Diaryl Olefins or Arenes 107
- 5.3.2 Oxidative Aromatic Coupling: Scholl Reaction 111
- 5.3.3 Transition Metal-Catalyzed [2 + 2 + 2] Cycloisomerization of π -Electron Systems 111
- 5.3.4 Diels–Alder Cycloaddition of Aromatic Vinylethers with *p*-Benzoquinone 117
- 5.3.5 Transition Metal-Catalyzed Hydroarylation of Alkynes 119
- 5.3.6 Other Synthetic Approaches 120
- 5.4 Advanced Helicene Architectures 123
- 5.5 Summary and Outlook 137
- Acknowledgment 137
- References 137

- 6 Carbon Nanobelt History and Chemistry 149**
Hiroki Shudo, Daiki Imoto, Akiko Yagi, and Kenichiro Itami
- 6.1 Introduction 149
- 6.2 Synthetic Attempts to CNBs 151
- 6.2.1 Some Synthetic Attempts to Cyclacenes 151
- 6.2.2 CNBs Observed by Mass Spectroscopy 152
- 6.2.3 Top-Down Approach to CNBs 152
- 6.3 Synthesis of CNBs 153
- 6.4 Synthesis of Related Aromatic Nanobelts 154
- 6.5 Synthesis of Topological Aromatic Nanobelts 157
- 6.6 Conclusion 159
- References 159
- 7 Negatively Curved Nanographenes 163**
Ka Man Cheung and Qian Miao
- 7.1 Introduction 163
- 7.2 Negatively Curved Nanographenes Containing Seven-Membered Rings 164
- 7.2.1 Incorporation of Seven-Membered Rings at an Early Stage of Synthesis 165
- 7.2.2 Formation of Seven-Membered Rings at a Late Stage of the Synthesis 168
- 7.3 Negatively Curved Nanographenes Containing Eight-Membered Rings 174
- 7.3.1 Incorporation of Eight-Membered Rings at an Early Synthetic Stage 175
- 7.3.2 Formation of Eight-Membered Rings at the Final Step of Synthesis 179
- 7.4 Structures and Stereochemical Dynamics and Properties 181
- 7.5 Negatively Curved Molecular Nanocarbons Beyond Nanographenes and Bottom-up Approaches to Carbon Schwarzites 184
- 7.6 Conclusion and Outlook 186
- References 188
- 8 From PAH-based Cyclophanes to Nanographenophanes 193**
Parinaz Salari and Graham J. Bodwell
- 8.1 Introduction 193
- 8.2 Synthetic Considerations 197
- 8.3 Pentacenophanes (C₂₂) 199
- 8.4 Indeno[2,3-*b*]triphenylenophanes (C₂₅) 201
- 8.5 Dibenzo[*c,l*]chrysenophanes (C₂₆) 203
- 8.6 Dibenzo[*f,j*]picenophanes (C₃₀) and Tetrabenz[*a,c,h,j*]anthracenes (C₃₀) 205
- 8.7 Teropyrenophanes (C₃₆) 207
- 8.8 A π -Extended Azacorannulenophane (C₃₆N) 211
- 8.9 Hexabenzocoronophanes (C₄₂) 213
- 8.10 *hept*-Hexabenzocoronophanes (C₄₃) 217

- 8.11 Summary and Outlook 218
References 219
- 9 Bilayer and Multilayer Nanographenes: Synthesis and Properties 223**
Patricia Izquierdo-García, Juan Lión-Villar, Jesús M. Fernández-García, and Nazario Martín
- 9.1 Introduction 223
9.2 Van der Waals Molecular Nanographenes 225
9.3 Bilayers from Fused Radicals 230
9.4 Covalently Linked Bilayers 232
9.5 Conclusions 238
