Graphical Abstract *xi*

Foreword *xiii*

Preface *xvii*

Acknowledgments *xix*

**Section I Historical Review of the Development of Natural
Polymers** *1*

References *3*

Section II Polysaccharides for Biomedical Application *5*

1 Sources, Structures, and Properties of Alginate *7*

1.1 Alginate-Based Hydrogel for Biomedical Application *8*

1.1.1 Drug and Cell Delivery *8*

1.1.2 Cell and Organoid Culture *13*

1.1.3 Tissue Regeneration *15*

1.1.4 Other Applications *18*

1.2 Alginate-Based Electrospinning for Biomedical Application *21*

1.2.1 Drug Delivery *21*

1.2.2 Tissue Regeneration *23*

1.3 Alginate-Based 3D Printing for Biomedical Application *28*

1.3.1 Alginate-Based Bio-Ink and Printing Strategies Improvement *28*

1.3.2 Attempts at Bionic Matrix Ink *29*

References *31*

2 Sources, Structures, and Properties of Cellulose *39*

2.1 Cellulose-Based Hydrogel for Biomedical Application *39*

2.1.1 Drug Delivery *39*

2.1.2 Cell and Organoid Culture *44*

2.1.3 Tissue Regeneration *45*

2.2 Cellulose-Based Electrospinning for Biomedical Application *49*

2.2.1	Drug Delivery	49
2.2.2	Antibacterial	51
2.2.3	Tissue Regeneration	52
2.3	Cellulose-Based 3D Printing for Biomedical Application	55
2.3.1	Improvement of Bio-Ink	55
2.3.2	Bacteria and Cell Culture	57
	References	59
3	Sources, Structures, and Properties of Hyaluronic Acid	65
3.1	Hyaluronic-Acid-Based Hydrogel for Biomedical Application	66
3.1.1	Cell and Organoids Culture	66
3.1.2	Cell Behaviors Regulation	67
3.1.3	Drug Delivery	70
3.1.4	Tissue Regeneration	71
3.2	Hyaluronic-Acid-Based Electrospinning for Biomedical Application	74
3.2.1	Drug Delivery and Antibacterial	74
3.2.2	Tissue Regeneration	75
3.3	Hyaluronic-Acid-Based 3D Printing for Biomedical Application	77
3.3.1	Cell and Organoid Culture	77
3.3.2	Tissue Regeneration	78
	References	81
4	Sources, Structures, and Properties of Chitosan	85
4.1	Chitosan-Based Hydrogel for Biomedical Application	85
4.1.1	Cell and Organoid Culture	85
4.1.2	Tissue Regeneration	86
4.2	Chitosan-Based Electrospinning for Biomedical Application	91
4.2.1	Drug and Cell Delivery	91
4.2.2	Tissue Regeneration	92
4.3	Chitosan-Based 3D Printing for Biomedical Application	95
4.3.1	Cell Behavior Regulation	95
4.3.2	Drug Delivery	95
4.3.3	Tissue Regeneration	95
	References	98
5	Sources, Structures, and Properties of Other Polysaccharides	101
5.1	Other Polysaccharides-Based Hydrogel for Biomedical Application	102
5.1.1	Drug Delivery	102
5.1.2	Cell and Organoid Culture	103
5.1.3	Tissue Regeneration	104
5.2	Other Polysaccharides-Based Electrospinning for Biomedical Application	107
5.2.1	Drug Delivery	107
5.2.2	Tissue Regeneration	107

- 5.3 Other Polysaccharides 3D Printing for Biomedical Application 109
- 5.3.1 Drug Delivery 109
- 5.3.2 Tissue Regeneration 109
- References 110

6 Summary 113

Section III Polypeptides for Biomedical Application 115

7 Sources, Structures, and Properties of Collagen 117

- 7.1 Collagen-Based Hydrogel for Biomedical Application 117
 - 7.1.1 Drug Delivery 117
 - 7.1.2 Cell and Organoid Culture 119
 - 7.1.3 Cell Behavior Regulation 119
 - 7.1.4 Tissue Regeneration 120
- 7.2 Collagen-Based Electrospinning for Biomedical Application 121
 - 7.2.1 Cell and Organoid Culture 121
 - 7.2.2 Tissue Regeneration 122
- 7.3 Collagen-Based 3D Printing for Biomedical Application 122
 - 7.3.1 Tissue Regeneration 122
 - References 124

8 Sources, Structures, and Properties of Gelatin 127

- 8.1 Gelatin-Based Hydrogel for Biomedical Application 127
 - 8.1.1 Cell Culture and Behavior Regulation 127
 - 8.1.2 Drug Delivery 129
 - 8.1.3 Tissue Regeneration 129
- 8.2 Gelatin-Based Electrospinning for Biomedical Application 129
 - 8.2.1 Cell Culture 129
 - 8.2.2 Tissue Regeneration 130
- 8.3 Gelatin-Based 3D Printing for Biomedical Application 131
 - 8.3.1 Tissue Regeneration 131
 - References 132

9 Sources, Structures, and Properties of Silk Fibroin 135

- 9.1 Silk-Fibroin-Based Hydrogel for Biomedical Application 135
 - 9.1.1 Drug Delivery and Cell Culture 135
 - 9.1.2 Tissue Regeneration 136
- 9.2 Silk-Fibroin-Based Electrospinning for Biomedical Application 137
 - 9.2.1 Drug Delivery and Antibacterial 137
 - 9.2.2 Tissue Regeneration 138
- 9.3 Silk-Fibroin-Based 3D Printing for Biomedical Application 138
 - 9.3.1 Tissue Regeneration 138
 - References 139

10	Sources, Structures, and Properties of Other Polypeptides	143
10.1	Other Polypeptides-Based Hydrogel for Biomedical Application	143
10.1.1	Cell Culture and Delivery	143
10.1.2	Tissue Engineering and Drug Delivery	144
10.2	Other Polypeptides-Based Electrospinning for Biomedical Application	144
10.2.1	Drug Delivery	144
10.2.2	Tissue Regeneration	145
10.3	Other Polypeptides-Based 3D Printing for Biomedical Application	146
10.3.1	Cell and Organoid Culture	146
10.3.2	Tissue Regeneration	147
	References	149
11	Summary	153
	Section IV Other Kinds of Natural Polymers for Biomedical Application	155
12	Sources, Structures, and Properties of Catechins	157
12.1	Catechins-Based Hydrogel for Biomedical Application	157
12.2	Catechins-Based Electrospinning for Biomedical Application	158
12.3	Catechins–Metal Complexes for Biomedical Application	158
	References	159
13	Sources, Structures, and Properties of Quercetin	161
13.1	Quercetin-Based Hydrogel for Biomedical Application	161
13.2	Quercetin-Based Electrospinning for Biomedical Application	162
13.3	Quercetin–Metal Complexes for Biomedical Application	162
	References	163
14	Sources, Structures, and Properties of Resveratrol	167
14.1	Resveratrol-Based Hydrogel for Biomedical Application	167
14.2	Resveratrol-Based Electrospinning for Biomedical Application	168
14.3	Resveratrol–Metal Complexes for Biomedical Application	169
	References	170
15	Sources, Structures, and Properties of Curcumin	173
15.1	Curcumin-Based Hydrogel for Biomedical Application	173
15.2	Curcumin-Based Electrospinning for Biomedical Application	175
15.3	Curcumin–Metal Complexes for Biomedical Application	176
	References	177

16	Summary	<i>181</i>
	References	<i>181</i>
17	Conclusion and Outlook	<i>183</i>
	References	<i>184</i>
	Declaration of Competing Interest	<i>187</i>
	Nomenclature	<i>189</i>
	Index	<i>191</i>
