

Index

a

active magnetic bearings (AMB) 163
 air knife coating method 95–96
 Al₂O₃ ceramic encapsulation material 161
 alphabetic symbols
 classification 242
 construction elements 241
 deformation test 242–256
 environmental test method 256–261
 general terms 240
 impact and hardness tests 261–268
 performances and specifications 241
 physical characteristics 240–241
 production process 242
 symbols 242
 terminology classification 240
 aluminum nitride (AlN) ceramic
 encapsulation materials 161–162
 Amcor-United States 286–289
 amorphous silicon solar cells 21–22, 184
 atomic layer deposition (ALD) 19
 development of 186–189
 encapsulation 63–64
 introduction to 185–186
 atomic layer epitaxy (ALE) 186, 187

b

balancing method 124–125
 ball drop test 262–263
 ball grid array (BGA) 6, 9–11, 163, 301
 Barix encapsulation layer 180–181

Barix encapsulation technology 17, 204, 206
 barrier film layer 20, 63, 208, 287
 BASF(Rolic)-Germany 29, 305–308, 334
 bending test 136–137
 push bending 140–141
 rolling bending 141–143
 static bending and dynamic bending 137–138
 three point bending and four-point bending 138–140
 beryllium oxide (BeO) ceramic
 encapsulation material 161
 bidirectional drawing molding 98–100
 bioelectronic implants 345–348
 bioresorbable silk substrate 108
 bioresorbable substrate materials 107–108
 bismaleimide (BMI) 164, 167–168
 bismaleimide triazine resin (BT resin) 168
 blanket-cap encapsulation technology 26
 blow molding processing methods 98
 boron nitride (BN) ceramic encapsulation materials 161–162

c

calcium electrical test 129–132
 calcium (Ca) layer 59, 241
 calcium titanite solar cells 21, 24, 25, 147, 148, 341
 calendaring process 96, 98, 99, 319

- capacitive pressure sensors 79, 231
