

Table of Content

Preface	<i>v</i>
Biography	<i>vii</i>
1 Cationic Polymers and Their Applications	<i>1</i>
2 Design, Synthesis, and Cutting-edge Applications of Novel Cationic Antimicrobial Polymers	<i>35</i>
3 Zwitterionic Polymers-based Antibacterial Surfaces	<i>85</i>
4 Bifunctional and Smart Antibacterial Surfaces	<i>113</i>
5 Superhydrophobic Antifouling and Antimicrobial Materials	<i>139</i>
6 Antimicrobial Peptides: From Natural to Synthetic, Conjugated, and Polypeptides	<i>179</i>
7 Protease Antibacterial Materials	<i>203</i>
8 Antimicrobial Nanometallics	<i>227</i>
9 Antimicrobial Metal-organic Frameworks	<i>263</i>
10 One-dimensional Antibacterial Materials	<i>275</i>
11 Two-dimensional Antimicrobial Materials	<i>323</i>
12 Nitric Oxide Delivery Materials for Antimicrobial Applications	<i>369</i>
13 Recent Progress of Biomaterials for Antibacterial Photodynamic Therapy	<i>387</i>
14 Antibacterial Photothermal Materials: Mechanism, Classification, and Applications	<i>421</i>

15 Sonodynamic Sterilization Materials	449
16 The Role of Piezoelectric Materials for Antibacterial Therapy	481
17 Advancements in Photocatalytic Antimicrobial Materials: Synthesis, Mechanisms, and Applications	531
18 Microneedle Technology for the Management of Bacterial Skin Infections	553
19 Antimicrobial Surfaces for <i>In Vivo</i> Applications	587
20 Polymer-based Antibacterial Ureteral Stents: A Critical Discussion	617
Index	643
