chitin and chitosan 137–138

nanocellulose (NCE) 141

conventional textile fibers 135

general processes in 134–135

therapeutic bionanomaterials 227

thermoplastic starch (TPS) 194, 197,
199, 205, 206

3-dimensional bioprinting 84

titanium dioxide (TiO₂) 25, 28, 56, 63,
95, 111, 177, 179–181, 195, 197,
234, 235, 297

titanium dioxide nanoparticles (TiO₂ NPs)
177, 195

transmission electron microscope (TEM)
88, 91, 92, 154, 155, 262

u

ultrafiltration 86, 123, 233

UV-visible spectroscopy 156

v

viral nanoparticles (VNPs) 7, 18

virus based nanoparticles 226, 257

virus-like particles (VLPs) 7, 78

Vyxeos™ 19

w

waste banana tree pseudostem (BTPT)
296

wasted mushroom substrate (SMS) 296

water contamination 105, 110

water management 26, 128, 233–235,
274–277

water pollution 27, 28, 105, 133, 234, 274

water quality management 304–305

water quality monitoring 234–235,
303–304

water remediation 27, 33

whey protein concentrate (WPC) 12

x

X-ray diffraction 88, 156

z

ZnO/poly(butylene adipate-co-
terephthalate) (PBAT) 195
