About the Authors *xi*
Preface *xiii*

1 Introduction 1
1.1 Current Landscape of Transportation Electrification 1
1.2 Overview of the Swapping Industry Development 3
1.2.1 China's Battery Swapping Evolution 3
1.2.2 Key Challenges in the Initial Global Trajectory 4
1.2.3 Global Resurgence of Battery Swapping 4
1.3 Scope of Research and Main Research Contents 5

2 The Impact of Battery Swapping on Global Energy Transition 7
2.1 Sustainable Development Goals and Carbon Neutrality Pathways 7
2.2 The Trend from Fossil Fuels to Electric Vehicles 8
2.3 Role of Battery Swapping in Reducing Greenhouse Gas Emissions 11
2.3.1 The Potential Impact of Battery Swapping on Greenhouse Gas Emissions 12
2.3.2 Battery Swapping Reduces GHG Emissions via Extended Battery Lifespan 14
2.3.3 Battery Swapping Promotes the Development of Standardized Batteries and Reduces GHG Emissions 16

3 Technological Innovation and Standardization Process of Battery Swapping 19
3.1 Literature Visualization Analysis and Technological Research Progress 19
3.1.1 Global Research Hotspots of Battery Swapping Technology 19
3.1.1.1 Prospective Analysis 21
3.1.2 Distribution of Core Journal Paper Topics over the Past 5 Years 24
3.1.2.1 Modular Battery Design 24
3.1.2.2 Optimization of Battery Swap Station Equipment 26
3.1.2.3 Ecological Construction Technology 26

3.1.3	Research Progress and Future Technological Directions	27
3.1.3.1	Technical Foundation and Energy Synergy	27
3.1.3.2	Operational Optimization and User Experience	28
3.1.3.3	Safety System and Economic Model	28
3.2	Patent Layout and Core Technology Competitiveness	29
3.2.1	Global Trend in Battery Swap Patent Applications	29
3.2.2	Patent Comparisons of Key Enterprises	34
3.2.3	Technological Bottlenecks in China's Battery Swapping Sector	40
3.2.3.1	Future Breakthrough Directions	41
3.3	Domestic and International Standard Systems and Interoperability	42
3.3.1	Comparisons of Battery Swapping Standards for EVs	42
3.3.2	Construction of EV Battery Swapping Standard System	46
3.3.3	Challenges of Cross-regional Standard Interoperability	50
3.3.3.1	Europe	50
3.3.3.2	United States	50
3.3.3.3	India	50
3.3.3.4	Southeast Asia	51
3.3.3.5	United States: Small-scale, Fleet-oriented Efforts	51
3.3.3.6	India: Battery Swapping for Two- and Three-wheelers	52
3.3.3.7	Southeast Asia: Targeting Urban Mobility	52
3.3.3.8	Comparison to China's Strategy	53
3.3.3.9	Comparison with China and Other Regions	54
3.3.3.10	Challenges and Opportunities	54
4	Business Models and Case Studies of Battery Swapping: A Comprehensive Analysis	55
4.1	Two-wheeled and Three-wheeled Electric Vehicles: High-frequency and Essential Use Cases	55
4.1.1	Business Models: Subscription vs. Pay-per-use	55
4.1.1.1	Profit Model of Two-wheeled Electric Vehicle Battery Swapping Project	58
4.1.1.2	High Initial Capital Investment for Two-wheeler Swap Stations	62
4.1.2	China Tower Corporation (Rural and Urban Coverage)	63
4.1.2.1	Battery Swap Types	64
4.1.3	Zheli Power Swap (Instant Distribution Service)	65
4.1.4	Risks and Countermeasures for Enterprises in the Standardization Process of Two-wheeler Battery Swaps	67
4.1.4.1	Risks Faced by Enterprises in the Process of Standardization of Battery Swaps	67
4.2	Passenger Vehicles: Exploring User-centric Flexibility	69
4.2.1	An Overview of the Ecology of the Automotive Battery Swap Industry	69
4.2.2	NIO's Battery Swap: Practices, Challenges, and Solutions	72
4.2.3	Vehicle-battery Separation and Swap Network Development	75
4.2.3.1	Driving Assistance	82
4.2.3.2	Battery Monitoring	82

4.2.3.3	Off-peak Charging	83
4.2.3.4	Vehicle/Station Grid Interaction	84
4.2.3.5	The Primary Business Model and Technical Foundation Includes	84
4.3	Commercial Vehicles: Pathways to Cost Reduction Through Scale	86
4.3.1	An Overview of the Battery Swapping Model for Heavy-duty Trucks	86
4.3.1.1	Introduction to the Battery Swap Process	91
4.3.2	The Market for Heavy-duty Truck Battery Swapping and Mainstream Technologies	94
4.3.2.1	Self-operated Swap Station	103
4.3.2.2	Joint Venture Model	103
4.3.2.3	Entrusted Operation of Swap Station	103
4.3.2.4	Leased Swap Station	103
4.3.2.5	Franchise Model	103
4.3.3	Strategic Recommendations for the Evolution of Heavy-duty Truck Battery Swapping	104
4.4	Ships: Technological Validation in Emerging Applications	106
4.4.1	Overview of Battery Swapping for Electric Ships	106
4.4.1.1	Saving Operation and Maintenance Costs	109
4.4.1.2	Industrial Chain Driving Effect	109
4.4.1.3	Promotion of Related Industries	110
4.4.1.4	Comprehensive Economic Effects	110
4.4.1.5	Key Technologies for Battery Swapping in Electric Ships	110
4.4.1.6	Current Development Status of China's Industrial Chain	113
4.4.1.7	Current Development Status of Overseas Industrial Chains	115
4.4.1.8	Development Trends of Electric Ship Battery Swapping Mode	119
4.4.1.9	Impact of Battery Swapping Vessels on the Vessel Market	119
4.4.1.10	Impact of Battery Swapping Vessels on the New Energy Vessel Market	119
4.4.1.11	Study of Representative Cases	120
4.4.2	Overview of Battery Swapping in Electric Aviation	126
4.4.2.1	Current Development Status of eVTOL in China	127
4.4.2.2	Current Development Status of Overseas eVTOL	127
4.4.3	Battery Swapping Trends in Electric Aviation and Marine Sectors	128
4.4.3.1	Current Landscape of Electric Aviation Battery Swapping	128
4.4.3.2	Technological Advancements Propelling the Mode Forward	128
4.4.3.3	Infrastructure Expansion and Integration	129
4.4.3.4	Regulatory and Safety Enhancements	129
4.4.3.5	Development Trends of Battery Swapping Ships	130
4.4.3.6	Challenges Faced by Battery Swappable Ships	131
4.4.3.7	Key Technologies for Battery Swapping in Electric Ships and Core Enterprise Practices	132
4.4.3.8	Practices of Core Enterprises	132
4.5	Economic Analysis of Battery Swapping Cases	134
4.5.1	Economic Modeling for Two-wheelers	135
4.5.2	Economic Modeling for Vehicles: A NIO Case Study	136
4.5.3	Economic Modeling for Heavy Trucks	139

5	Overview of the Battery Bank Industry	141
5.1	Introduction to Battery Bank Industry	141
5.1.1	Political Background and Environment	141
5.1.2	Definition and Business Model	143
5.2	Industry Analysis	145
5.2.1	Forecast of the Battery Bank Industry Market Size	145
5.2.1.1	China	145
5.2.1.2	Global	147
5.2.2	Competitive Landscape in the Battery Bank Sector	148
5.2.3	Future Development Trend in the Battery Bank Sector	149
5.2.3.1	Standardization Gaps	150
5.2.3.2	Data Monetization	151
5.2.3.3	Virtual Power Plant	151
5.2.3.4	Carbon Footprint	152
6	Key Players and Strategic Positions in the Battery Swapping Ecosystem	153
6.1	Upstream Hardware and Software Suppliers	155
6.1.1	Battery Cell Manufacturers	155
6.1.1.1	Planning of Battery Swapping Products for Different Scenarios	155
6.1.1.2	Key Elements of Long Service Life and High Safety	156
6.1.1.3	Mechanical Design and Battery Pack Design	156
6.1.1.4	The Whole-pack LFP Battery Swapping Package Scheme	157
6.1.2	Charging Station Hardware Providers	162
6.1.2.1	Harmontronics	164
6.1.2.2	BOZHON Precision Industry Technology Co., Ltd.	173
6.1.2.3	Weida Group	174
6.1.2.4	CSG Smart Science & Technology Co., Ltd	175
6.1.3	Battery Management System and Related Software Technology Suppliers	175
6.1.3.1	Requirements for BMS in the Battery Swapping Mode	177
6.1.3.2	Benefits of BMS in Combined Battery Swapping Mode	178
6.1.3.3	Third-party Suppliers	178
6.1.3.4	Global BMS Battery Swapping Suppliers' Information	179
6.2	Midstream Battery Swapping Operators and Electric Transportation Equipment Manufacturers	179
6.2.1	Battery Swapping Service Providers	179
6.2.1.1	Electric Two- and Three-wheelers	179
6.2.1.2	Passenger Cars and Commercial Vehicles	181
6.2.1.3	Electric Ships	188
6.2.2	Electric Two- and Three-wheeler Manufacturers	188
6.2.3	Passenger EV Manufacturers	191
6.2.4	Commercial Vehicle Manufacturers	197
6.2.5	Electric Maritime and Aviation	200
6.2.6	Drone and Aircraft Manufacturers	205

6.3	Downstream Market Applications and Services	206
6.3.1	B2B Users	206
6.3.2	Consumer (C) End-users	208
6.3.3	Aftermarket Services and Retired Battery Recycling Utilization	210
7	Challenges and Opportunities	215
7.1	Infrastructure, Cost, and Safety	215
7.1.1	Infrastructure Construction Challenges	215
7.1.2	Cost Challenges	216
7.1.3	Safety Challenges	217
7.2	Standardization of Battery Swapping	218
7.3	Technological Advancements and Policy Support	219
7.3.1	Development Opportunities Brought by Technological Progress	219
7.3.1.1	Enhancing Battery Swapping Efficiency	219
7.3.1.2	Optimizing Battery Performance	219
7.3.1.3	Expanding Application Scenarios	220
7.3.2	Development Opportunities Brought by Policy Support	221
7.3.2.1	Clarifying the Development Direction	221
7.3.2.2	Increasing Capital Investment	221
7.3.2.3	Optimizing the Market Environment	222
7.4	Future Market Demand	222
7.4.1	New Energy Vehicles Market	222
7.4.1.1	Taxi and Ride-hailing Sector	222
7.4.1.2	Logistics and Transportation Field	223
7.4.1.3	Private Passenger Vehicle Field	223
7.4.2	Electric Two-wheeler Battery Swapping Market	223
7.4.3	Electric Ship Battery Swapping Market	224
7.5	Industrial Development Prospects	224
	Index	227
