

## Contents

<b>Preface</b>	<i>xi</i>
<b>1 Introduction</b>	<i>1</i>
1.1 Research Status of Photofunctional Polymer Composites	<i>1</i>
1.1.1 Photofunctional Materials	<i>1</i>
1.1.2 Photofunctional Composites	<i>4</i>
1.1.2.1 Photoelectronic Devices Based on Photofunctional Polymer Composites	<i>6</i>
1.1.2.2 Photocatalytic Application of Photofunctional Polymer Composites	<i>7</i>
1.1.2.3 Biomedical Application of Photofunctional Polymer Composites	<i>8</i>
1.1.3 Structure and Morphology of Photofunctional Polymer Composites	<i>9</i>
1.2 Classification of Photofunctional Polymer Composites	<i>11</i>
1.2.1 Nanocomposites	<i>11</i>
1.2.1.1 Composite Nanoparticles	<i>12</i>
1.2.1.2 Emulsion	<i>18</i>
1.2.1.3 Liposome	<i>20</i>
1.2.1.4 Micelle	<i>22</i>
1.2.1.5 Capsule	<i>24</i>
1.2.2 Fibers	<i>26</i>
1.2.2.1 Natural Material-based Fibers	<i>26</i>
1.2.2.2 Synthetic Polymer Fibers	<i>31</i>
1.2.3 Films	<i>35</i>
1.2.3.1 Fluorescent Film	<i>36</i>
1.2.3.2 Photochromic Films	<i>38</i>
1.2.3.3 Photoelectric Conversion Thin Film	<i>40</i>
1.2.3.4 Near-infrared (NIR) Absorption Films	<i>41</i>
1.2.4 Hydrogel	<i>43</i>
1.2.4.1 Structure and Composition	<i>45</i>
1.2.4.2 Physical Properties	<i>46</i>
1.2.4.3 Fluorescent Hydrogel	<i>46</i>
1.2.4.4 Photochromic Hydrogel	<i>47</i>
1.2.4.5 Photothermal Hydrogel	<i>48</i>

1.2.4.6	Photoelectric Conversion Hydrogel	50
1.2.4.7	Light-controlled Release Hydrogel	51
1.3	Prospects for Bioapplications of Photofunctional Polymer Composites	53
1.3.1	Biological Detection and Imaging	54
1.3.1.1	Fluorescence Imaging	54
1.3.1.2	Fluorescence Detection	56
1.3.2	Photodynamic Therapy (PDT)	60
1.3.2.1	Principle of Photodynamic Therapy	60
1.3.2.2	Application of Photofunctional Polymer Composites in Photodynamic Therapy	61
1.3.3	Light-controlled Release	64
1.3.3.1	Principle of Light-controlled Release	64
1.3.3.2	Application of Photofunctional Polymer Composites in Light-controlled Release	65
1.3.4	Photothermal Therapy (PTT)	67
1.3.4.1	Principle of Photothermal Therapy	67
1.3.4.2	Application of Photofunctional Polymer Composites in Photothermal Therapy	67
1.3.5	Photocatalytic Effect	70
1.3.5.1	Photocatalytic CO <sub>2</sub> Reduction	71
1.3.5.2	Photocatalytic Production of H <sub>2</sub>	72
1.3.5.3	Light-driven Biotransformation	74
1.3.5.4	Photocatalytic Therapy	76
	References	79
<b>2</b>	<b>Structures and Properties of Photofunctional Materials</b>	<b>93</b>
2.1	Small Organic Molecules	93
2.1.1	Photoluminescence	93
2.1.1.1	Fluorescence	93
2.1.1.2	Phosphorescence	97
2.1.2	Electroluminescence	100
2.1.3	Chemiluminescence	104
2.1.4	Mechanoluminescence	106
2.2	Conjugated Polymers	109
2.2.1	Main Chain Structure	109
2.2.2	Side Chain Structure	113
2.2.3	Conformation of Conjugated Polymers	116
2.2.4	Aggregation States of Conjugated Polymers	119
2.2.4.1	Static Aggregation	119
2.2.4.2	Dynamic Aggregation	120
2.2.4.3	Influencing Factors and Regulatory Strategies of Aggregation States	122
2.2.5	Luminescence Sensing Mechanism of Conjugated Polymers	123
2.2.5.1	Förster Resonance Energy Transfer Mechanism	124
2.2.5.2	Photoinduced Electron Transfer Mechanism	125

2.2.5.3	Exciplexes and Excimers	126
2.2.5.4	Metal-enhanced Fluorescence Effect	126
2.3	Noble Metal Nanomaterials	127
2.3.1	Noble Metal Nanoparticles	128
2.3.1.1	Gold Nanoparticles	129
2.3.1.2	Silver Nanoparticles	133
2.3.1.3	Copper Nanoparticles	135
2.3.2	Optical Properties of Noble Metal Nanoparticles	136
2.3.2.1	Metal-enhanced Fluorescence Effect (MEF)	136
2.3.2.2	Photothermal Effect	138
2.3.3	Noble Metal Nanoclusters	139
2.3.3.1	Gold Nanoclusters	139
2.3.3.2	Silver Nanoclusters	142
2.3.3.3	Copper Nanoclusters	143
2.3.4	Optical Properties of Noble Metal Nanoclusters	144
2.3.4.1	Photoluminescence	146
2.3.4.2	Two-photon Absorption	146
2.3.4.3	Aggregation-Induced Emission Effect	147
2.3.4.4	Photothermal Effect	148
2.3.4.5	Photosensitive Effect	149
2.4	Inorganic Nonmetallic Materials	150
2.4.1	Quantum Dots	151
2.4.2	Carbon Materials	154
2.4.2.1	Carbon Nanotube	154
2.4.2.2	Carbon Dots	155
2.4.2.3	Graphene	155
2.4.2.4	Fullerene	156
2.4.3	Carbon Nitride	156
2.4.3.1	Photocatalysis	159
2.4.3.2	Photoluminescence	160
2.4.3.3	Photothermal Effect	161
2.4.4	Transition Metal Disulfides	161
2.4.5	Perovskite	166
2.4.6	Titanium Dioxide	168
2.5	Other Materials	171
2.5.1	Metal-organic Framework (MOFs)	171
2.5.1.1	Structure of MOF	172
2.5.1.2	Optical Properties of MOF	172
2.5.2	Covalent Organic Framework (COFs)	176
2.5.2.1	Structure of COF	177
2.5.2.2	Optical Properties of COF	181
2.5.3	Photofunctional Protein	184
2.5.3.1	Light-harvesting Protein	184
2.5.3.2	Fluorescent Protein	187

- 2.5.4 Other Polymers 189
- 2.5.4.1 Block Copolymers 189
- 2.5.4.2 Dendrimers 191

- 3 Construction of Photofunctional Polymer Composites 211**
- 3.1 Construction of Photofunctional Organic Polymer Composite Systems 211
- 3.1.1 Coprecipitation 212
- 3.1.2 Self-assembly Method 218
- 3.1.3 Microemulsion Method 225
- 3.1.4 Direct Polymerization 227
- 3.1.5 Covalent Modification 228
- 3.1.6 Physical Mixing Method 229
- 3.2 Construction of Photofunctional Organic/Inorganic Polymer Composite Systems 230
- 3.2.1 Self-assembly Method 231
- 3.2.2 Coprecipitation Method 235
- 3.2.3 Microemulsion 236
- 3.2.4 Covalent Modification 238
- 3.2.5 In Situ Reaction Method 240
- 3.2.6 Physical Mixing Method 243
- References 245
  
- 4 Photofunctional Polymer Nanocomposites 253**
- 4.1 Structures of Photofunctional Polymer Nanocomposites 253
- 4.1.1 Core-shell Structure 253
- 4.1.2 Hollow Structure 259
- 4.1.3 Hybrid Structure 261
- 4.1.4 Emulsion 267
- 4.1.5 Liposome 270
- 4.1.6 Micelle 272
- 4.1.7 Capsule 274
- 4.2 Functions of Photofunctional Polymer Nanocomposites 276
- 4.2.1 Metal Enhanced Fluorescence Effect 276
- 4.2.2 Energy Transfer Mechanism 281
- 4.2.3 Electron Transfer Mechanism 289
- 4.2.4 Aggregation-induced Emission Effect 294
- 4.2.5 Photosensitization Effect 298
- 4.2.6 Photothermal Effect 303
- 4.3 Bioapplications of Photofunctional Polymer Nanocomposites 309
- 4.3.1 Cell Imaging 309
- 4.3.2 Optical Therapies 317
- 4.3.3 Optical Detections 325
- 4.3.4 Drug Delivery 332
- 4.3.5 Photosynthesis 334
- References 338

<b>5</b>	<b>Photofunctional Polymer Fiber Composites</b>	<b>345</b>
5.1	Preparation and Structures of Photofunctional Fiber Composites	346
5.1.1	Electrospinning	346
5.1.2	3D Printing	351
5.1.3	Wet Spinning Process	352
5.1.4	Stretching Process	354
5.1.5	Capillary-templated Polymerization	355
5.1.6	Microfluidic Method	357
5.2	Functions of Photofunctional Fiber Composites	359
5.2.1	Energy/Electron Transfer Effect	359
5.2.2	Photochromic Effect	363
5.2.3	Photosensitization Effect	364
5.2.4	Photocatalytic Effect	365
5.2.5	Photothermal Conversion Effect	370
5.2.6	Light-guiding Properties	371
5.3	Bioapplications of Photofunctional Fiber Composites	373
5.3.1	Optical Detection	374
5.3.2	Optical Therapy	377
5.3.3	Optical Display	383
5.3.4	Optogenetics	386
	References	390
<b>6</b>	<b>Photofunctional Polymer Composite Films</b>	<b>395</b>
6.1	Structures of Photofunctional Polymer Composite Films	395
6.1.1	Self-Supported Film	396
6.1.2	Substrate-Supported Film	406
6.2	Functions of Photofunctional Polymer Composite Films	412
6.2.1	Fluorescence Enhancement Effect	412
6.2.2	Energy/Electron Transfer Effect	416
6.2.3	Photoisomerization Effect	422
6.2.4	Photothermal Effect	424
6.2.5	Other Photofunctions	426
6.3	Bioapplications of Photofunctional Polymer Composite Films	429
6.3.1	Optical Detection	430
6.3.2	Optical Therapy	437
6.3.3	Energy Storage	443
6.3.4	Food Packaging	446
	References	448
<b>7</b>	<b>Photofunctional Polymer Hydrogel Composites</b>	<b>453</b>
7.1	Structures of Photofunctional Polymer Hydrogel Composites	453
7.1.1	The Network Structure of Chemical Cross-linking Hydrogels	454
7.1.1.1	Permanent Covalent Bond	454
7.1.1.2	Dynamic Covalent Bonds	457
7.1.2	The Network Structure of Physical Cross-linking	464
7.1.2.1	Hydrogen Bond Cross-Linking	465
7.1.2.2	Metal Coordination Effect	468

x | Contents

- 7.1.2.3 Hydrophobic Interaction 470
- 7.1.2.4 Host–Guest Interaction 472
- 7.1.2.5 Crystallization and Cross-Linking 476
- 7.2 Functions of Photofunctional Polymer Hydrogel Composites 477
  - 7.2.1 Electron Transfer Mechanism 477
  - 7.2.2 Energy Transfer Mechanism 481
  - 7.2.3 Fluorescence Enhancement Effect 483
  - 7.2.4 Photothermal Conversion Effect 487
  - 7.2.5 Photosensitization Effect 490
  - 7.2.6 Photoisomerization Effect 493
- 7.3 Bioapplications of Photofunctional Polymer Hydrogel Composites 495
  - 7.3.1 Optical Detection and Sensing 496
  - 7.3.2 Phototherapy 502
  - 7.3.3 Light-Controlled Drug Release 507
  - 7.3.4 Cell Culture 514
- References 518

**8 Future Development of Photofunctional Polymer Composites 525**

- 8.1 Structural Optimization of Photofunctional Polymer Composites 525
  - 8.1.1 Selection of Components for Intelligent Light Response 525
  - 8.1.2 In Situ Assembly Strategy 526
  - 8.1.3 In Situ Aggregation Strategy 531
- 8.2 The Functional Improvement of Photofunctional Polymer Composites 533
  - 8.2.1 Multifunctional Integration 533
  - 8.2.2 Interdisciplinary Integration 540
- 8.3 Expansion of Biological Applications 546
  - 8.3.1 Personalized Medicine 546
  - 8.3.2 Artificial Biological Photosynthesis 550
- References 556
