Foreword *xiii*

Preface *xv*

1	Introduction	1
	<i>Farooq Azam, Yasir Nawab, and Sheraz Ahmad</i>	
1.1	Hydrogels and Aerogels	3
1.2	Unique Properties Relevant to Textiles	3
1.3	Why Hydrogels and Aerogels in Textiles?	4
1.4	Scope and Structure of the Book	5
1.4.1	Scope	5
1.4.2	Structure	6
1.5	Target Audience and Applications	7
1.6	Challenges and Opportunities	7
	References	8
2	Science of Hydrogels and Aerogels	11
	<i>Zeynep Ulker and Can Erkey</i>	
2.1	Introduction	11
2.2	Hydrogels: Relationship Between Function and Structure	11
2.2.1	Science of Preparing Hydrogels	13
2.2.1.1	Physically Cross-Linked Hydrogels	13
2.2.2	Chemically Cross-Linked Hydrogels	15
2.3	Aerogels: Relationship Between Structure and Functions	16
2.3.1	Science of Preparing Aerogels	16
2.4	Textile Innovations	20
2.5	Conclusions	23
	References	24
3	Types of Hydrogels and Aerogels in Textiles	35
	<i>Talha Siddique, Faheem Ahmad, and Jibran Khaliq</i>	
3.1	Introduction	35
3.2	Natural-Fiber Hydrogels and Aerogels	37

3.2.1	Cotton-Based Hydrogels and Aerogels	37
3.2.2	Silk-Based Systems	39
3.2.3	Wool-Based Materials	39
3.3	Synthetic-Fiber Hydrogels and Aerogels	40
3.3.1	Polyester-Based Hydrogels and Aerogels	40
3.3.2	Nylon-Based Hydrogels and Aerogels	41
3.3.3	Acrylic-Based Hydrogels and Aerogels	41
3.4	Blended Hydrogels and Aerogels in Textiles	42
3.4.1	Natural-Synthetic Blends	43
3.4.1.1	Cellulose-PVA	43
3.4.1.2	Silk-PLA	44
3.4.1.3	Wool-Polyurethane (PU)	44
3.4.2	Composite Textile Substrates	45
3.4.2.1	Laminated/Coated Fabrics	45
3.4.2.2	Functional Coatings	45
3.5	Conclusion	46
	References	46

4 Synthesis Techniques for Hydrogels and Aerogels for Textiles 55

Sana Sadaf and Faheem Ahmad

4.1	Introduction	55
4.2	Synthesis Techniques for Hydrogels and Aerogels from Natural Fiber	57
4.2.1	Synthesis from Cotton	57
4.2.2	Synthesis of Hydrogels and Aerogels from Silk	62
4.2.3	Synthesis from Wool	66
4.3	Synthesis Techniques for Hydrogels and Aerogels from Synthetic Fibers	68
4.3.1	Synthesis from Polyester	68
4.3.2	Acrylic Fiber-Based Hydrogels	71
4.4	Blended-Fiber Hydrogels and Aerogels	73
4.5	Conclusion	74
	References	76

5 Functional Properties of Hydrogels and Aerogels in Textiles 81

Mohamed Assal, Ayoub Nadi, Abdeslam el Bouari, and Omar Cherkaoui

5.1	Introduction	81
5.2	Moisture Management	82
5.3	Thermal Insulation Properties of Aerogel- and Hydrogel-Based Textiles	84
5.4	Antimicrobial and Antibacterial Properties	86
5.5	Flame Retardancy	87

5.6	Biodegradability	89
5.7	Conclusion	91
	References	91
6	Applications in Sustainable Fashion	95
	<i>Bushra Mushtaq, Nauman Ali Choudhry, and Abher Rasheed</i>	
6.1	Introduction	95
6.1.1	The Need for Sustainable Fashion Innovation	95
6.1.2	Role of Hydrogels and Aerogels in Sustainable Textiles	96
6.1.3	Chapter Scope and Objectives	96
6.2	Eco-friendly Clothing	97
6.3	Biodegradable Fashion Accessories	98
6.3.1	The Sustainability Challenges in Fashion Accessories	98
6.3.2	Hydrogel-Based Leather Alternatives	98
6.3.3	Aerogel-Based Functional Accessories	100
6.3.3.1	Jewelry	100
6.3.3.2	Belts and Straps	100
6.3.3.3	Eyewear	100
6.3.3.4	3D-Printed Aerogel Accessories	100
6.3.4	Smart and Responsive Biodegradable Accessories	101
6.4	Sustainable Sportswear	101
6.4.1	The Environmental Impact of Conventional Sportswear	101
6.4.2	Performance Enhancement by Hydrogel	101
6.4.2.1	Moisture Management Systems	101
6.4.2.2	Temperature Control	101
6.4.2.3	Biomechanical Support	102
6.4.3	Aerogel in Athletic Apparel	102
6.4.3.1	Ultralight Insulation	102
6.4.3.2	Increased Breathability	102
6.4.3.3	Impact Protection	102
6.4.4	Sustainable Manufacturing Breakthrough	102
6.4.4.1	Waterless Dyeing	102
6.4.4.2	Closed-Loop Recycling	103
6.4.4.3	3D Knitting	103
6.5	Hydrogel and Aerogel-Infused Footwear	103
6.5.1	Environmental Impact of Conventional Footwear	103
6.5.2	Application of Hydrogel in Footwear	103
6.5.2.1	Advanced Cushioning System	103
6.5.2.2	Moisture Management and Hygiene	104
6.5.3	Application of Aerogel in Sustainable Footwear	104
6.6	Sustainable Manufacturing Breakthrough	105
6.7	Future Perspectives and Challenges	105
6.8	Conclusion	106
	References	106

7 Plant Fiber-Based Hydrogels and Aerogels for Biomedical Applications 111

Atike Köken and Ayşe Çelik Bedeloğlu

- 7.1 Introduction 111
- 7.1.1 Plant Fiber-Based Hydrogels and Aerogels: Synthesis Methods, Properties, and Applications 112
- 7.1.2 Properties and Application Areas of Plant-Based Hydrogels and Aerogels 112
- 7.2 Wound Dressings 113
- 7.2.1 Hydrogel–Textile Composites for Wound Dressings and Applications 114
- 7.2.2 Aerogels for Wound Dressings and Applications 117
- 7.3 Drug Delivery Systems 120
- 7.3.1 Hydrogels for Wound Dressings and Applications 121
- 7.3.2 Aerogels for Wound Dressings and Applications 121
- 7.4 Smart Bandages 122
- 7.4.1 Materials Used in Smart Bandages and Mechanisms 123
- 7.4.2 Applications 124
- 7.4.3 Future Perspective 125
- 7.5 Wearable Electronics and Health Monitors 125
- 7.5.1 Materials Used and Mechanism 126
- 7.5.2 Applications 126
- 7.6 Sensor Applications 127
- 7.7 Wearable Electronics and Health Monitors 128
- 7.8 Future Perspective 129
- References 129

8 Animal Fiber-Based Hydrogels and Aerogels for Biomedical Applications 135

Bushra Mushtaq, Muhammad Amber Fareed, and Muhammad Sohail Zafar

- 8.1 Introduction 135
- 8.1.1 Definition of Hydrogel and Aerogel 135
- 8.1.2 Animal Fiber-Derived Biopolymers and Their Advantages 136
- 8.1.3 Historical Development 136
- 8.1.4 Current Market Landscape and Clinical Impact 137
- 8.1.5 Multidisciplinary Convergence 137
- 8.2 Preparation and Fabrication Methods 138
- 8.2.1 Extraction and Purification 138
- 8.2.1.1 Silk Fibroin Extraction (*Bombyx mori* and Recombinant Spider Silk) 138
- 8.2.1.2 Keratin Extraction (Wool/Human Hair) 138
- 8.2.1.3 Collagen Extraction (Type I from Bovine Tendon) 139
- 8.2.2 Advanced Hydrogel Fabrication 140
- 8.2.2.1 Physical Cross-Linking 140
- 8.2.2.2 Chemical Cross-Linking 140

8.2.3	Advanced Aerogel Fabrications	140
8.2.3.1	Sol–Gel Transition Control	140
8.2.3.2	Drying Technology Comparison	141
8.2.3.3	Freeze-Drying (Lyophilization)	141
8.2.3.4	Supercritical Drying	141
8.2.3.5	Ambient Pressure Drying	142
8.3	Properties and Characterization	142
8.3.1	Physicochemical Properties	142
8.3.1.1	Swelling Behavior	142
8.3.1.2	Porosity and Pore Size	143
8.3.2	Mechanical Properties	143
8.3.3	Thermal Stability	143
8.3.4	Biodegradability and Enzymatic Degradation	144
8.3.5	Surface Morphology and Microstructure	144
8.3.6	Biocompatibility and Cytotoxicity	144
8.3.7	Water Vapor Transmission Rate	145
8.3.8	Cross-Linking and Network Structure	145
8.3.9	Summary Table of Key Properties and Methods	145
8.4	Biomedical Applications	146
8.4.1	Wound Healing and Skin Regeneration	146
8.4.2	Tissue Engineering Scaffolds	147
8.4.3	Drug Delivery Systems	147
8.4.4	Injectable and In Situ-Forming Gels	148
8.4.5	Biosensors and Diagnostic Devices	148
8.4.6	Hemostatic and Antibacterial Applications	148
8.4.7	Ophthalmic and Dental Applications	148
8.4.8	Summary Table of Biomedical Applications	149
8.5	Conclusion	149
8.6	Future Trends	149
	References	150
9	Advancements in Hydrogel and Aerogel Textile Technology	157
	<i>Syeda Rubab Batool, Rahima Hussain, and Muhammad Anwaar Nazeer</i>	
9.1	Introduction	157
9.2	Fundamentals of Hydrogel and Aerogel Materials	158
9.2.1	Hydrogels	158
9.2.2	Aerogels	160
9.2.3	Comparison and Complementarity in Textile Applications	162
9.3	Fabrication and Integration Methods	163
9.3.1	Hydrogel–Textile Integration Techniques	163
9.3.2	Aerogel Textile Integration Techniques	166
9.4	Conductive Hydrogel and Aerogel	167
9.4.1	Material Design and Composites	167
9.4.2	Electrical and Electrochemical Properties	170

9.4.3	Applications for E-Textiles	171
9.4.3.1	Hydrogel in E-Textiles	171
9.4.3.2	Aerogel in E-Textiles	172
9.5	Responsive and Adaptive Textile Systems	173
9.5.1	Stimuli-Responsive Hydrogels and Aerogels	173
9.5.1.1	Physical Stimuli	173
9.5.1.2	Chemical Stimuli	175
9.5.2	Adaptive Clothing Systems	176
9.6	Sustainability and Biocompatibility	177
9.7	Challenges	179
9.8	Conclusions	180
	References	180
10	Applications of Aerogels in Protective Clothing	187
	<i>Abdul Salam, Farooq Azam, Yasir Nawab, and Jibran Khaliq</i>	
10.1	Introduction	187
10.2	Mechanism of Thermal Insulation	188
10.3	Types of Aerogels	189
10.3.1	Inorganic	189
10.3.2	Organic Aerogels	191
10.4	Impact Resistance and Chemical Protection of Aerogels	192
10.4.1	Use of Aerogels in Ballistic-Resistant Textiles	193
10.4.2	Laboratory Test Methods	194
10.4.3	Chemical Protection	195
10.5	Aerogels as Lightweight Protective Gear	197
10.6	Hybrid Applications and Smart Integration of Aerogels in Protective Textiles	198
10.7	Manufacturing Techniques and Textile Integration	200
10.7.1	Synthesis of Aerogels	201
10.7.2	Aerogel-Textile Integration Techniques	201
10.7.3	Structural Challenges in Aerogel-Textile Composites	202
10.8	Conclusion	203
	References	203
11	Challenges and Solutions in the Use of Hydrogels and Aerogels for Textiles	209
	<i>Farooq Azam and Shahid Rasul</i>	
11.1	Introduction	209
11.2	Environmental Impact Assessment	210
11.3	Recycling and Upcycling Strategies	211
11.3.1	Recycling	212
11.3.2	Upcycling	212
11.4	Biocompatibility Concerns in the Use of Hydrogels and Aerogels for Textiles	214
11.5	Consumer Acceptance and Education	215

11.6	Economic Feasibility and Life Cycle Analysis	216
11.7	Conclusion	218
	References	218
12	Future Horizon	223
	<i>Bushra Mushtaq and Sheraz Ahmad</i>	
12.1	Sustainable Hydrogel and Aerogel Textile Innovations	223
12.2	Collaborations and Interdisciplinary Research	224
12.3	Potential Market Trends	224
12.4	Regulations and Safety Standards	225
12.5	Conclusion	225
	References	226
13	Conclusion	227
	<i>Yasir Nawab and Sheraz Ahmad</i>	
	Index	229
