Preface XI

List of Contributors XIII

1	Introduction	1
	<i>Sergey P. Gubin</i>	
1.1	Some Words about Nanoparticles	1
1.2	Scope	3
1.2.1	Magnetic Nanoparticles Inside Us and Everywhere Around Us	4
1.3	The Most Extensively Studied Magnetic Nanoparticles and Their Preparation	5
1.3.1	Metals	6
1.3.2	Nanoparticles of Rare Earth Metals	9
1.3.3	Oxidation of Metallic Nanoparticles	10
1.3.4	Magnetic Alloys	11
1.3.4.1	Fe–Co Alloys	11
1.3.5	Magnetic Oxides	13
1.3.6	Final Remarks	19
2	Synthesis of Nanoparticulate Magnetic Materials	25
	<i>Vladimir L. Kolesnichenko</i>	
2.1	What Makes Synthesis of Inorganic Nanoparticles Different from Bulk Materials?	25
2.2	Synthesis of Magnetic Metal Nanoparticles	28
2.2.1	Reduction of Metal Salts in Solution	29
2.2.1.1	Electron Transfer Reduction	29
2.2.1.2	Reduction via Intermediate Complexes	32
2.2.2	Thermal Decomposition Reactions	36
2.2.2.1	Decomposition of Metal Carbonyls	36
2.2.2.2	Decomposition of Metal Alkene and Arene Complexes	38
2.2.3	Combination Methods Used for Synthesis of Alloy Nanoparticles	39

2.3	Synthesis of Magnetic Metal Oxide Nanoparticles	40
2.3.1	Reactions of Hydrolysis	40
2.3.1.1	Hydrolysis in Aqueous Solutions	40
2.3.1.2	Hydrolysis in Nonaqueous Solutions	42
2.3.2	Oxidation Reactions	46
2.3.3	Thermal Decomposition of Metal Complexes with O-Donor Ligands	47
2.4	Technology of the Preparation of Magnetic Nanoparticles	49
2.4.1	Stabilizing Agents in Homogeneous Solution Techniques	50
2.4.2	Heterogeneous Solution Techniques	51
2.5	Conclusions	53
3	Magnetic Metallopolymer Nanocomposites: Preparation and Properties	59
	<i>Gulzhian I. Dzhardimalieva, Anatolii D. Pomogailo, Aleksander S. Rozenberg and Marcin Leonowicz</i>	
3.1	Introduction	59
3.2	The General Methods of Synthesis and Characterization of Magnetic Nanoparticles in a Polymer Matrix	60
3.2.1	Magnetic Nanoparticles in Inorganic Matrices	60
3.2.2	Magnetic Nanoparticles in Polymer Matrices	60
3.2.3	Preparation of Magnetic Polymer Nanocomposites in Magnetic Fields	63
3.2.4	Peculiarities of Magnetic Behavior of Metallic Nanoparticles in Polymer Matrix	63
3.3	Magnetic Metal Nanoparticles in Stabilizing the Polymer Matrix <i>In Situ</i> via Thermal Transformations of Metal-Containing Monomers	67
3.3.1	The Kinetics of Thermolysis of Metal-Containing Monomers	68
3.3.1.1	Dehydration	68
3.3.1.2	Polymerization	69
3.3.1.3	Kinetics of Decarboxylation	69
3.3.2	The Topography and Structure of Magnetic Metallopolymer Nanocomposites	75
3.3.3	The Magnetic Properties of the Metallopolymer Nanocomposites	78
3.4	Conclusion	82
	Acknowledgments	83
4	Magnetic Nanocomposites Based on the Metal-Containing (Fe, Co, Ni) Nanoparticles Inside the Polyethylene Matrix	87
	<i>Gleb Yu Yurkov, Sergey P. Gubin, and Evgeny A. Ovchenkov</i>	
4.1	Introduction	87
4.2	Experimental Details	88
4.2.1	Synthesis	88

4.2.2	Composition and Structure of Magnetic Nanometallopolymers	92
4.3	Magnetic Properties of Metal-Containing Nanoparticles	93
4.3.1	Iron Containing Nanoparticles	93
4.3.2	Iron Oxide Nanoparticles	101
4.3.3	Cobalt Nanoparticles	104
4.3.4	Co@Fe ₂ O ₃ Particles	106
4.4	FMR Investigations of Nanocomposites	108
4.5	Conclusions	112
	Acknowledgments	114
5	Organized Ensembles of Magnetic Nanoparticles: Preparation, Structure, and Properties	117
	<i>Gennady B. Khomutov and Yury A. Koksharov</i>	
5.1	Introduction	117
5.2	Two-Dimensional Systems: Layers and Nanofilms	119
5.2.1	Self-Assembled Nanostructures	121
5.2.2	Langmuir–Blodgett Technique	124
5.2.3	Layer-by-Layer Assembly	130
5.2.3.1	Supported Films	131
5.2.3.2	Nanofilm Capsules	134
5.2.3.3	Free-Standing and Free-Floating Films	135
5.2.4	Bulk Phase Self-Assembled Sheetlike Nanofilms	137
5.3	Anisotropic and Quasilinear (1D) Systems	145
5.3.1	Synthesis under Applied Magnetic Field	146
5.3.2	Ligand Effects and Synthesis in Nanostructured Media	148
5.3.3	Quasilinear Nanoparticulate Structures	153
5.3.4	Templated Structures	156
5.3.5	Nanotubes	160
5.4	Patterned, Self-Organized, Composite, and Other Complex Magnetic Nanoparticulate Nanostructures	163
5.5	Bioinorganic Magnetic Nanostructures	170
5.6	Magnetic Properties of Organized Ensembles of Magnetic Nanoparticles	174
5.7	Conclusions and Perspectives	182
	Acknowledgments	183
6	Magnetism of Nanoparticles: Effects of Size, Shape, and Interactions	197
	<i>Yury A. Koksharov</i>	
6.1	Introduction	197
6.2	Magnetism of Nanoparticles in the View of Atomic and Solid State Physics	198
6.3	Magnetic Finite-Size Effects and Characteristic Magnetic Lengths. Single-Domain Particles	199
6.4	Shape Effects	208

6.5	Superparamagnetism	210
6.6	Surface Effects	214
6.7	Matrix Effects	220
6.8	Interparticle Interaction Effects	223
6.9	Nanoparticles of Typical Magnetic Materials: Illustrative Examples	227
6.10	Antiferromagnetic Nanoparticles	232
6.11	Semiconductor Magnetic Nanoparticles	233
6.11.1	Magnetism of Intrinsic and Diluted Magnetic Semiconductors	233
6.11.2	Unusual Magnetism of Magnetic Semiconductors and Role of Nanosize Effects	235
6.12	Some Applications of Magnetic Nanoparticles	238
6.12.1	High-Density Information Magnetic Storage	238
6.12.2	Traditional and New Applications of Ferrofluids	240
6.12.3	Magnetic Nanoparticles and Spintronics	244
6.13	Final Remarks	246
7	Electron Magnetic Resonance of Nanoparticles: Superparamagnetic Resonance	255
	<i>Janis Kliava</i>	
7.1	Introduction	255
7.2	Superparamagnetic Resonance Spectrum in a Disordered System	257
7.3	Resonance Magnetic Field	259
7.4	Resonance Lineshapes	263
7.4.1	Damped Gyromagnetic Precession	263
7.4.1.1	Definitions	263
7.4.1.2	The Bloch–Bloembergen Equation	265
7.4.1.3	The Modified Bloch Equation	268
7.4.1.4	The Gilbert Equation	269
7.4.1.5	The Landau–Lifshitz Equation	269
7.4.1.6	The Callen Equation	271
7.4.2	Linewidths and Apparent Shift of the Resonance Field	272
7.4.3	Angular Dependence of the Linewidth	274
7.5	Superparamagnetic Narrowing of the Resonance Spectra	275
7.5.1	De Biasi and Devezas model	275
7.5.2	Raikher and Stepanov Model	278
7.6	Nanoparticle Size and Shape Distribution	279
7.6.1	Distribution of Diameters	279
7.6.2	Nonsphericity of Nanoparticles: Distribution of Demagnetizing Factors	280
7.6.3	Joint Distribution of Diameters and Demagnetizing Factors	285
7.7	Superparamagnetic Resonance in Oxide Glasses: Some Experimental Results	287

7.7.1	Lithium Borate Glass	287
7.7.2	Sol–Gel Silica Glass	292
7.7.3	Potassium-Alumino-Borate Glass	295
7.7.4	Gadolinium-Containing Multicomponent Oxide Glass	297
7.8	Conclusions and Prospective	297
8	Micromagnetics of Small Ferromagnetic Particles	303
	<i>Nickolai A. Usov and Yury B. Grebenshchikov</i>	
8.1	Introduction	303
8.2	Particle Morphology and Single-Domain Radius	306
8.2.1	Quasiuniform States	306
8.2.1.1	Particles of Perfect Geometrical Shape	306
8.2.1.2	Particle of Quasiellipsoidal Shape	310
8.2.2	Nonuniform States	313
8.2.2.1	Spherical Particle	314
8.2.2.2	Ellipsoidal Particle	317
8.2.2.3	Cylindrical Particle	319
8.2.2.4	Cubic Particle	321
8.2.3	Effective Single-Domain Radius	322
8.3	Surface and Interface Effects	322
8.3.1	Brown's Surface Anisotropy	324
8.3.2	Surface Spin Disorder	327
8.3.3	Interface Boundary Condition	330
8.4	Thermally Activated Switching	332
8.4.1	Analytical Estimates of the Relaxation Time	333
8.4.2	Stochastic Langevin Equation	334
8.4.3	Simple Examples	335
8.4.3.1	Uniaxial Anisotropy	335
8.4.3.2	Nonsymmetrical Case	336
8.4.3.3	Cubic Anisotropy	339
8.4.4	Nonuniform Modes	341
8.5	Conclusions	343
9	High-Spin Polynuclear Carboxylate Complexes and Molecular Magnets with VII and VIII Group 3d-Metals	349
	<i>Igor L. Eremenko, Aleksey A. Sidorov, and Mikhail A. Kiskin</i>	
9.1	Introduction	349
9.2	High-Spin 3d-Metal Pivalate Polymers as a Good Starting Spin Materials	351
9.3	Chemical Design of High-Spin Polynuclear Structures with Different Magnetic Properties	365
9.4	Pivalate-Bridged Heteronuclear Magnetic Species	374
9.5	Pivalate-Based Single Molecular Magnets	385
9.6	Conclusions	388

10	Biomedical Applications of Magnetic Nanoparticles	393
	<i>Vladimir N. Nikiforov and Elena Yu. Filinova</i>	
10.1	Introduction	393
10.2	Biocompatibility of Magnetic Nanoparticles	397
10.3	Magnetic Separation for Purification and Immunoassay	401
10.3.1	Cell Labeling for Separation	402
10.3.2	Magnetic Separator Design	404
10.3.3	The Biomedicine Applications	405
10.3.4	The Immunomagnetic Separation	405
10.3.5	Basic Principles of Magnetic Separation of Proteins and Peptides	408
10.3.6	Examples of Magnetic Separations of Proteins and Peptides	410
10.3.6.1	Perspectives	412
10.4	Magnetic Nanoparticles in Cancer Therapy	414
10.4.1	Is a Heat Suitable for Health?	415
10.4.2	Basics of Hyperthermia	419
10.4.3	Magnetic Hyperthermia in Cancer Treatment	422
10.4.4	Prospective of Clinical Applications	425
10.4.5	Conclusions	428
10.5	Targeted Drug and Gene Delivery	429
10.5.1	Magnetic Targeting Local Hyperthermia	431
10.5.2	Magnetic Targeting Applications	431
10.5.3	Targeted Liposomal Drug and Gene Delivery	432
10.5.4	Magnetic Targeting of Radioactivity	436
10.5.5	Other Magnetic Targeting Applications	436
10.5.6	MRI Contrast Enhancement	437
10.6	Prospective of MRI	443
10.7	Problems and Perspectives	444
	Index	457
