

## Subject Index\*

### a

- abdomen dose 109, 388
- absolute risk 630 ff.
- absorbed dose 78, 645
  - neutrons 371
  - point source approximation 565
- absorbed fraction 110, 412, 583
- absorption
  - biological systems 278, 575
  - HATM (blood) 617 f.
  - ICRP 590, 613 ff.
  - laser radiation 303
  - tissues 545
  - tritium 88
- accelerators 237–272, 510
  - activation 655
  - beam containment 257
  - physics 48
  - radiation 516 ff.
  - universities 97
- accessible emission limit (AEL) 289
- accuracy of instrument response 325
- acoustic waves 283
- actinides 123, 211
- actinon 202
- activated charcoal 475
- activation 644
  - accelerator/reactors 655
  - air 252
  - components 162
  - hadronic cascade 247
  - production equations 656
  - soil 252
  - sources 158, 573
  - water 251
- activation equation 162
- activation products
  - ALARA associated with fusion confinement methods 102
  - effluents 171
  - fusion energy research 99
  - ITER 101
  - power reactors 161, 165
- active safety systems 158
- activity 562, 644
  - constant intake 478
  - counting samples 92
  - fuel cycle 142
  - Kr-88 194, 470
  - plutonium 144
  - ponds/surfaces accumulation 208
  - Rb-88 194, 468
  - single-compartment model 579
- activity balance relationship 164
- activity median aerodynamic diameter (AMAD) 588
- acute exposures 33, 108, 141, 358 f., 579, 607 f., 628
- acute radiation syndrome 134
- additive risk model 360
- Adler's relationship 244
- aerosol inhalation 588
- age determination, C-14 method 311
- age-specific cancer risk 631
- agricultural/environmental research 93, 214
- air
  - gamma doses 211
  - kerma 64, 80
  - monitoring 143
  - residual radioactivity 251
  - samples 142
  - samplers 10

\* This index was developed by Wiley-VCH with limited author input.

- supply systems 90, 100
    - see also* activation, derived air concentrations
  - air ionization chamber 12
  - airborne hazards 87 ff.
  - airborne radioactivity 390
  - Al-28 decay 500
  - ALARA 170
    - associated with fusion confinement methods 102
    - collective doses 185
    - muon colliders 250
    - plasma-confinement 102
    - reactor accidents 180
    - spent-fuel pool 190
  - alarm setpoint 190
  - algebraic equations 661
  - alignment error 257
  - alimentary tract 618
  - alpha activity 321
  - alpha contamination 106, 143
  - alpha decay, U/Th series 121, 202 f.
  - alpha emitters 53 f., 579
  - alpha energy 11, 120
  - alpha particles 595
    - hadronic cascade 247
    - radiation weighting factors 602
  - alpha track detectors 475
  - alternate MIRL equation 584
  - aluminum 20
  - alveolar–interstitial region 612
