Preface	<i>XI</i>
Introduction	<i>1</i>
References	<i>3</i>
 Part One The Optical Sensor Construction Kit	 <i>5</i>
2 Light Sources	<i>7</i>
2.1 Important Properties of Light Sources	<i>7</i>
2.2 Thermal Light Sources	<i>8</i>
2.3 Line Sources	<i>12</i>
2.4 Light Emitting Diodes (LEDs)	<i>14</i>
2.5 Lasers	<i>18</i>
 3 Photodetectors	 <i>27</i>
3.1 Photomultipliers	<i>27</i>
3.2 Photodiodes	<i>30</i>
3.3 Other Detector Types	<i>31</i>
3.4 Imaging Detectors	<i>33</i>
3.5 Detector Noise	<i>35</i>
 4 Optical Elements	 <i>37</i>
4.1 Optical Materials	<i>37</i>
4.2 Mirrors, Prisms and Lenses	<i>39</i>
4.3 Dispersive Elements: Prisms and Gratings	<i>42</i>
4.4 Optical Filters	<i>43</i>
4.5 Polarizers	<i>44</i>
4.6 Optical Fibers	<i>46</i>
4.7 Modulators	<i>49</i>
References	<i>53</i>

Part Two Optical Sensors and Their Applications 55

5	Eyes: The Examples of Nature	57
5.1	The Compound Eyes of Insects	57
5.2	Nature's Example: The Human Eye	58
6	Optical Sensor Concepts	63
6.1	Switches	63
6.1.1	Light Barriers	63
6.1.2	Rain Sensor	65
6.2	Spatial Dimensions	66
6.2.1	Distance	66
6.2.2	Displacement	71
6.2.3	Velocity	75
6.2.4	Angular Velocity	83
6.3	Strain	86
6.4	Temperature	90
6.5	Species Determination and Concentration	93
6.5.1	Spectrometry	94
6.5.2	Polarimetry	98
6.5.3	Ellipsometry	102
6.5.4	Refractometry	104
6.5.5	Particle Density and Particle Number	106
6.5.6	Fluorescence Detection	111
6.6	Surface Topography	114
6.6.1	Chromatic Confocal Sensors	115
6.6.2	Conoscopic Holography	117
6.6.3	Multiwavelength Interferometry (MWLI)	118
6.6.4	White-Light Interferometry	119
6.6.5	Near-Field Optical Microscopy	122
6.6.6	Contouring: Structured-Light Techniques	123
6.6.7	Concepts: Cross-Correlation Analysis and 2D Fourier-Transform Techniques	125
6.7	Deformation and Vibration Analysis	127
6.7.1	Laser Vibrometers	127
6.7.2	Speckle-Pattern Interferometry	129
6.7.3	Holographic Interferometry	132
6.8	Wavefront Sensing and Adaptive Optics	135
6.9	Determination of the Sun Angle	138
6.10	Determination of Age	140
	References	143

	Part Three Optics and Sensors at Work: A Laser-Spectroscopic Experiment	147
7	The Measurement Problem	149
8	The Physical Principles behind the Experiment	151
9	Spectroscopic Setups of the Experiment	155
9.1	The Single-Step Approach	155
9.2	The Two-Step Approach	158
	References	165
	Summary	167
	Glossary	169
	Index	173
