Preface XI

1	Introduction to Cosmology and String Theory	1
	<i>Johanna Erdmenger and Martin Ammon</i>	
1.1	Introduction	1
1.2	Foundations of Cosmology	1
1.2.1	Metric and Einstein Equations	2
1.2.2	Energy Content of the Universe	4
1.2.3	Development of the Universe	6
1.3	Inflation	7
1.3.1	Puzzles Within the Big Bang Model	7
1.3.2	The Concept of Inflation	7
1.4	Fluctuations	9
1.4.1	Characterization of Small Fluctuations	9
1.4.2	Power Spectrum	10
1.4.3	Fluctuations and Inflation	11
1.5	Bosonic String Theory	12
1.5.1	Open and Closed Strings	14
1.5.1.1	Closed Strings	15
1.5.1.2	Open Strings	15
1.5.2	Quantization	16
1.5.3	String Perturbation Theory: Interactions and Scattering Amplitudes	17
1.5.4	Bosonic String Theory in Background Fields	19
1.5.5	Chan–Paton Factors	22
1.5.6	Oriented Versus Unoriented Strings	22
1.6	Superstring Theory	23
1.6.1	The RNS Formalism of Superstring Theory	23
1.6.2	Boundary Conditions for Fermions	24
1.6.2.1	Open Strings	24
1.6.2.2	Closed String	25
1.6.3	Type IIA and Type IIB Superstring	26
1.6.4	Type I Superstring	26

1.6.5	Heterotic Superstring	27
1.7	String Dualities and M-Theory	28
1.7.1	Low-Energy Effective Action of Superstring Theory	28
1.7.2	T-Duality	29
1.7.2.1	T-Duality of Closed Strings	30
1.7.2.2	T-Duality of Open Strings	31
1.7.2.3	T-Duality in Superstring Theory	32
1.7.3	S-Duality	32
1.7.4	Web of Dualities and M-Theory	33
1.7.4.1	Type IIA String Theory and M-Theory	34
1.7.4.2	Heterotic $E_8 \times E_8$ String Theory and M-Theory	35
1.8	D-Branes	36
1.8.1	Effective Action of D-Branes	36
1.8.2	D-Branes as Charged BPS Objects	38
1.9	Compactification	38
1.9.1	String Theory on Calabi–Yau Manifolds	39
1.9.1.1	Low-Energy Effective Theory	40
1.9.2	String Theory on Orbifolds	41
1.9.3	String Moduli and Their Stabilization	42
1.10	String Thermodynamics	43
1.11	Gauge–Gravity Duality	44
1.12	Summary	45
	References	45

2 String Inflation I: Brane Inflation 47

Marco Zagermann

2.1	Introduction	47
2.1.1	Inflation in String Theory and Moduli Stabilization	49
2.1.2	Brane Inflation Models	50
2.1.3	The Rest of this Chapter	51
2.2	Moduli Stabilization in Type IIB String Theory	52
2.2.1	Type IIB Calabi–Yau Orientifolds and Their Moduli	52
2.2.2	The Tree-Level Effective Action	56
2.2.3	The Volume Modulus	57
2.2.4	de Sitter Uplifting	58
2.3	Warped $D3/\overline{D3}$ -Brane Inflation (Slow-Roll)	59
2.3.1	The Warped Throat Geometry	61
2.3.2	Towards Slow-Roll Inflation	61
2.3.3	Volume Stabilization	63
2.3.4	The Inflaton Dependence of W	64
2.4	$D3/D7$ -Brane Inflation	67
2.4.1	A Compactified Example	70
2.4.2	Moduli Stabilization	71
2.5	DBI Inflation	73
2.5.1	Generalizing the Slow-Roll Conditions	76

2.6	Gravitational Waves and Inflaton Field Range	77
2.6.1	D3-Branes on a Symmetric Torus	79
2.6.2	D3-Branes in a Warped Throat	79
2.6.3	DBI Inflation	80
2.6.4	Wrapped Branes	81
2.6.5	Other Approaches and Related Work	82
2.7	Conclusions	83
	References	84
3	String Inflation II: Inflation from Moduli	89
	<i>C.P. Burgess</i>	
3.1	Introduction	89
3.1.1	Closed-String Moduli as Inflatons	90
3.1.2	A Brief Roadmap	91
3.1.3	Justifying the Approximations	92
3.2	Accelerated Expansion in Supergravity	92
3.2.1	Accelerated Expansion in Higher Dimensions	92
3.2.2	Acceleration in 4D Supergravity	93
3.3	Type IIB Moduli and Their Stabilization	94
3.3.1	Leading-Order Expressions	94
3.3.2	Corrections to the Leading Approximation	95
3.3.2.1	Leading α' Corrections	96
3.3.2.2	String-Loop Corrections	96
3.3.2.3	Superpotential Corrections	97
3.3.3	Supersymmetry Breaking Potentials	98
3.4	Inflation from Kähler Moduli	99
3.4.1	Racetrack Inflation	100
3.4.2	Blow-Up Mode Inflation	103
3.4.3	Fiber Inflation	107
3.4.4	K3-Fibration Calabi–Yaus	107
3.4.5	The Scalar Potential	108
3.4.5.1	Kinetic Terms	111
3.4.5.2	Inflationary Slow Roll	111
3.5	What We’ve Learned so far	116
	References	118
4	Cosmic Superstrings	121
	<i>Robert C. Myers and Mark Wyman</i>	
4.1	Introduction	121
4.1.1	Symmetry Breaking and Topological Defects	122
4.1.2	A Brief Review of Cosmic-String Networks	124
4.1.2.1	Small-Scale Structure	126
4.2	Superstring Theory on Cosmological Scales	127
4.2.1	Low String Tensions?	129
4.2.2	Strings After Inflation?	131
4.2.3	Stability of Cosmic Superstrings?	134

4.2.3.1	Breakage on Space-Filling Branes	134
4.2.3.2	Confinement by Axion Domain Walls	136
4.2.3.3	“Baryon Decay”	136
4.2.3.4	Tachyon Condensation	137
4.2.3.5	An Example: The KKLMMT Model	137
4.2.4	Novel Physics from Cosmic Superstrings	140
4.2.4.1	Potential Problems for Superstring Networks	142
4.3	Observing Cosmic Superstrings	143
4.3.1	Experimental Limits and Observational Tests	144
4.3.1.1	Current Limits	144
4.3.1.2	Signatures Testable by Near-Term Observations	146
4.3.2	Novel Physics from Cosmic Superstrings: Observational Aspects	149
4.3.2.1	Reduced Intercommutation Rates	149
4.3.2.2	Cosmic (p, q) -Strings	150
4.3.3	Monopoles and Beads	150
4.3.4	Semilocal Strings	151
4.3.5	Miscellaneous Observations	151
4.4	Conclusion	152
	References	152
5	The CMB as a Possible Probe of String Theory	157
	<i>Gary Shiu</i>	
5.1	Introduction	157
5.2	String Theory and Inflation	158
5.3	Example 1: Initial State of Inflation	160
5.3.1	Initial State Effects in the CMB and Their Relation to New Physics	163
5.3.2	Corrections to the Primordial Spectrum from Scale-Invariant Initial Conditions	165
5.3.3	Corrections to the Primordial Spectrum from Boundary EFT	165
5.3.4	Observable Parameters and Physical Quantities	167
5.4	Example 2: Non-Gaussianities in the CMB	169
5.4.1	The Shape of Non-Gaussianities and Experimental Constraints	173
5.5	Example 3: Probing the Shape of Extra Dimensions	177
5.5.1	The Warped Deformed Conifold and Other Warped Throats	178
5.5.2	Observing Warped Geometries via the CMB	182
5.6	Summary and Future Directions	186
	References	188
6	String Gas Cosmology	193
	<i>Robert H. Brandenberger</i>	
6.1	Introduction	193
6.1.1	Motivation	193
6.1.2	The Current Paradigm of Early Universe Cosmology	193

6.1.3	Challenges for String Cosmology	195
6.1.4	Preview	197
6.2	Basics of String Gas Cosmology	197
6.2.1	Principles of String Gas Cosmology	197
6.2.2	Dynamics of String Gas Cosmology	199
6.3	Moduli Stabilization in String Gas Cosmology	203
6.3.1	Principles	203
6.3.2	Stabilization of Geometrical Moduli	204
6.3.3	Dilaton Stabilization	207
6.4	String Gas Cosmology and Structure Formation	209
6.4.1	Overview	209
6.4.2	String Thermodynamics	212
6.4.3	Spectrum of Cosmological Fluctuations	217
6.4.4	Spectrum of Gravitational Waves	219
6.4.5	Discussion	221
6.5	Conclusions	222
	References	225
7	Gauge–Gravity Duality and String Cosmology	231
	<i>Sumit R. Das</i>	
7.1	Introduction	231
7.2	Null Singularities and Matrix Theory	232
7.2.1	Matrix String Theory and Matrix Membrane Theory	232
7.2.1.1	Matrix String Theory	232
7.2.1.2	Matrix Membrane Theory	235
7.2.2	Matrix Big Bangs	236
7.2.2.1	IIB Big Bangs	237
7.2.2.2	pp-Wave Big Bangs	239
7.2.2.3	Issues	241
7.3	Cosmological Singularities and the AdS/CFT Correspondence	242
7.3.1	Time-Dependent Sources in Gauge Theory and Their Dual Cosmologies	243
7.3.1.1	Solutions with Null Singularities	243
7.3.1.2	Solutions with Space-Like Singularities	245
7.3.1.3	Energy–Momentum Tensors	247
7.3.1.4	General Properties of the Dual Gauge Theory	248
7.3.1.5	The Wavefunctional	250
7.3.1.6	Energy Production	253
7.3.1.7	Particle Production	254
7.3.1.8	The Fate of the System	255
7.3.1.9	Summary	256
7.3.2	AdS Cosmologies with Unstable Potentials and Their Duals	256
7.3.2.1	The Bulk Cosmology	257
7.3.2.2	The Dual Gauge Theory	258
7.3.2.3	Self Adjoint Extensions	259

7.3.2.4	Evolution of the Homogeneous Mode	260
7.3.2.5	The Inhomogeneous Mode and Particle Production	262
7.4	Conclusions	263
	References	264

8 Heterotic M-Theory and Cosmology 267

Axel Krause

8.1	Introduction	267
8.2	Heterotic M-Theory Flux Compactifications	269
8.2.1	Geometry	269
8.2.2	G-Flux	271
8.2.3	SU(3) Structure	272
8.3	Heterotic Cosmic Strings	272
8.3.1	Wrapped M2 and M5-Branes	273
8.3.2	Cosmic String Tensions	275
8.3.3	Stability	278
8.3.4	Production	281
8.3.5	Relation to Other Types of Cosmic Strings	283
8.4	Towards Dark Energy from M-Theory	284
8.4.1	The Dark Energy Enigma	285
8.4.2	Fine-Tuning Problem and Two-Step Strategy	287
8.4.3	Dark Energy and Supergravity	288
8.4.4	Heterotic versus Type IIB String Theory	289
8.4.5	Vacuum Energy in Heterotic String Theory	291
8.4.6	Vacuum Energy in Heterotic M-Theory	293
8.5	Multibrane Inflation and Gravitational Waves	296
8.5.1	Multi M5-Brane Inflation	296
8.5.2	Detectable Gravitational Waves	299
	References	300
