

Index

a

amplitude object 70
 angular spectrum 34–36
 apodization 96
 arrayed waveguide grating 312
 AWG 312
 axicon 152

b

band structures 373
 beam guiding 238
 beam homogenization 235
 beam steering 239
 Bessel beam 89, 152
 Bloch 359
 boundary condition 14
 Bragg grating 147
 Bragg reflection 357
 Brewster angle 261
 Brillouin zone 372
 bulk micromachining 129

c

Clausius–Mosotti relation 167
 complex number 1
 coupled mode theory 301
 coupling length 298
 critical angle 255, 260
 cut-off 272
 cut-off frequency 272
 cut-off wavelength 272

d

Dammann grating 145
 deposition 188
 – chemical vapor 190
 – physical vapor 188
 – thermal 188
 diffraction efficiency 144

diffraction limit 104
 diffraction theory
 – rigorous 164, 169
 diffractive lens 158
 diffractive optical element (DOE) 137
 dispersion relation 269, 274
 Drude model 325

e

effective index 148, 263, 269
 effective medium 165
 effective refractive index 263
 eigenmode 262
 electric field 11
 electrowetting 217
 etch depth 141
 etching 185
 – anisotropic 185
 – chemical 186
 – deep reactive ion 194
 – dry 187
 – isotropic 185
 – physical 187
 – plasma 187
 evanescent modes 290
 evanescent wave 37
 Ewald sphere 34

f

4*f* setup 103
 fabrication
 – holographic 201
 far-field 82
 fiber parameter 284
 film parameter 269
 Floquet 359
 Fourier spectrum 3
 Fourier transform 3
 Fourier transformation 3

free-space optics 41, 69
 – integrated 241
 free space wave impedance 252, 257
 free space wave number 252
 free spectral range 322
 Fresnel–Kirchhoff formula 77
 Fresnel number 82
 Fresnel zone plate (FZP) 158

g

Gabor superlens 230
 Gaussian beam 31, 35
 – Poynting vector 55
 Gaussian function 6
 Goos–Haenchen shift 273
 Gouy phase 33
 gradient-index element (GRIN) 116
 grating
 – beamsplitter 144
 – blazed 134, 201
 – Bragg 147
 – fabrication 198
 – lamellar 168
 – linear 96
 – zero-order 167

h

Helmholtz equation 30
 – paraxial 31
 high resolution lens 406
 Huygens–Fresnel–Kirchhoff theory 75, 76

i

imaging 100
 – hybrid 233
 – integral 229
 – microchannel 232
 – microoptical 225
 – multi-aperture 225
 integrated free-space optics 241
 – MEMS 241
 – PIFSO 242
 – stacked 242
 intensity 49
 irreducible Brillouin zone 372

k

Kirchhoff approximation 70

l

LIGA 195
 liquid crystal 208
 lithographic process 174

lithography

– analog 202
 – contact 178
 – electron beam 179
 – laser 179
 – mask-based 177
 – projection 179
 – proximity 179
 Littrow mount 134
 local period 139
 Lorentzian function 6

m

M^2 -parameter 62
 magnetic field 11
 Maxwell's equations 11
 McCutchen's theorem 86
 method of stationary phase 15
 microelectromechanical system (MEMS) 192
 microlens
 – gradient-index 120
 – GRIN rod 123
 – membrane-based 220
 – microfluidic 217
 – tunable 207
 micromachining
 – bulk 192
 – surface 193
 microoptics
 – tunable 207
 microprism 127
 molecular beam epitaxy (MBE) 190
 Moore's law 173

n

near field 82
 nondiffracting beam 152
 Novolac 176
 numerical aperture 280

o

optical interconnection 231

p

paraxial approximation 27, 28
 pattern transfer 184
 perfect lens 406
 period 138
 permeability 11
 permittivity 11
 PHASAR 312
 phase front 28
 phase object 70

- phase parameter 269, 284
- phase quantization 137
- photon sieve 162
- photoresist 175
- planar integrated free-space optics (PIFSO) 242
- plane wave 22
- PMMA 175
- Poynting vector 47, 48, 407
- proximity effect 181

- r**
- radiation modes 290
- ray of light 29
- Rayleigh criterion 106
- Rayleigh parameter 32, 33
- Rayleigh–Sommerfeld–Debye theory 76
- reciprocal lattice 369
- rect-function 4
- rectangular waveguides 305
- reflection coefficient 259
- reflective microoptics 115
- reflow process 118
- refractive index 21
- refractive microoptics 115
- resolution 105
- retroreflector 131

- s**
- scaling 111
- self-imaging 87
- shift theorem 9
- sinc-function 4
- Snell's law 115, 255, 404
- space-bandwidth product 57
- spatial frequency 3

- spatial light modulator
 - liquid crystal 208
 - MEMS 215
- spatial light modulator (SLM) 208
