Mixing in Laminar Fluid Flows: From Microfluidics to Oceanic Currents 1

Roman O. Grigoriev

Introduction 1

1 Resonances and Mixing in Near-Integrable Volume-Preserving Systems 5

Dmitri Vainchtein

1.1 Introduction 5

1.2 General Properties of Near-Integrable Flows and Different Types of the Resonance Surfaces 8

1.2.1 Metrics of Mixing 10

1.2.2 Correlations of Successive Jumps and Ergodicity 12

1.3 Separatrix Crossings in Volume-Preserving Systems 12

1.3.1 Flow Structure 14

1.3.2 Dynamics Near the Separatrix Surface 15

1.3.3 Finite Perturbations 16

1.4 Passages Through Resonances in Autonomous Flows 17

1.4.1 Scattering on Resonance 19

1.4.2 Capture Into Resonance 20

1.4.3 Improved AI 21

1.4.4 Jump of AI Between First- and Second-Layer Boundaries 22

1.4.5 Long-Time Dynamics and Adiabatic Diffusion 23

1.5 Passages Through Resonances in Nonautonomous Flows 24

1.5.1 Unperturbed Flow 25

1.5.2 Two Perturbations and Averaging 26

1.5.3 Resonant Phenomena 27

1.5.4 Volume of the Mixing Domain 29
