

Index

a

absolutely integrable function 129
 admittance 294
 algebra 166
 axial moments of inertia 223

b

bending of elastic bar 315
 bending rigidity 251
 Bernoulli–Euler equation 302
 Bernoulli–Euler hypothesis 213
 Bernoulli–Euler model 301
 Boltzmann's integral relations 237
 boundary value problem 191

c

Cauchy–Bunyakowski–Schwarz inequality 5
 Cauchy principal value 23
 Cauchy problem 174
 Cauchy–Schwarz inequality 4
 Cauchy's equations 256
 center
 – of plane dilatation 213
 – of rotation 210–211
 centrifugal moments of inertia 222
 closed ball 5
 concentrated force 204
 concentrated moment
 – of linear dipole 209
 – of plane dipole type 213
 convolution algebra 166
 convolution equation 167
 convolution matrix equation 167
 convolution product of two distributions 92
 correspondence principle 283
 coupled oscillating circuit 290
 creep distributions 275

d

d'Alembert formula 184

d'Alembert's operator 184

differentiation

– of a distribution 40
 – of a distribution depending on a parameter 81

diffraction 371

Dirac delta distribution 18–19, 21
 – concentrated on a hypersurface 22
 – filter property 21

Dirac representative sequences 70

direct product

– of two distributions 89
 – of two function 88
 – of two set 3

directed concentrated moment 206–207

distribution 16

– characterization theorems 27
 – depending on a parameter 81–82, 84
 – even(odd) 38
 – of finite order 17
 – of first order 24, 43
 – of function type 20, 27
 – of zero-order 28
 – regular 19–20, 40
 – with compact support 18

Doppler effect 365

double electric layer 234

e

elastic foundation 172, 316

elastic repulsive force 248

electric dipole 227

– concentrated at a point 227

electric dipole moment 227

electrostatic field intensity 228

equality of two distribution 20

equation

– of forced oscillations 247
 – of the linear oscillator 246

equations of compatibility 283
 Erdmann–Weierstrass conditions 154
 Euclidean norm 6
 Euclidean real space 5
 Euler equation 153
 Euler–Poisson equation 156, 158
 exterior product 66

f

first-order variation 151–152
 forced longitudinal vibrations 303
 forced torsional vibrations 338
 forced transverse vibrations 312
 Fourier series 113, 116, 118
 Fourier transform
 – for distributions 133
 – inversion formula 131
 – of a function 129
 free vibrations 311
 function
 – locally integrable 8, 19
 – uniformly continuous 7
 functional 16
 fundamental problem,
 – mixed 257
 – the first 256
 – the second 257
 fundamental solution 58
 – of the Cauchy problem 179
 fundamental solution of an operator 165

g

generalized
 – bending moment 216
 – shear force 215
 generalized solution 162
 geometric equations 256
 Green function 191

h

heat conduction equation 190
 Heaviside distribution 20, 90
 Heaviside function 1, 20
 heavy material point 243
 Hilbert space 5
 homogeneous distribution 30, 39, 62
 homothety of a distribution 39
 Hooke’s constitutive law 256
 Hooke’s law 235

i

impedance 294
 inner product 4
 inner product space 4

integration of distributions depending on a
 parameter 84
 inverse Laplace transform 148

j

jump 46–47

k

Kelvin–Voigt model 237, 278
 Kronecker’s symbol 36

l

Laplace operator 170
 Laplace transform
 – of functions 146
 – of the distributions 149
 Leibniz’s formula 46
 locally integrable function 19, 22
 logarithmic potential 231
 Love’s equation 301

m

Maxwell model 279
 metric 5
 metric space 5
 moment of order p 220
 moment of the electric double layer 234
 moments of inertia 220

n

neutral axis 251
 Newton’s law 236
 norm 4
 normed vector space 4–5

o

open ball 5
 operator
 – bending moment 216
 – Fourier 129
 – linear 15
 – linear differential 16
 – of translation 37
 – shear force 215

p

parabolic type equation 187
 Parseval’s formula 131
 partial convolution product
 – of distributions 105
 – of functions 111
 partial differential equation 177
 partial Fourier transform
 – of the function 132

- periodic distribution 37, 122–123
- periodic transform 117
- physical equations 256
- planar moments of inertia 222
- planar static moments 221
- Poisson equation 170, 189
- polar moment of inertia 222
- polar static moment 221
- potential of the electrostatic field 228
- pre-Hilbert space 5
- primitive of a distribution 97
- primitive of order m 160
- pseudofunction 26
- pulsation 246, 248

- q**
- quadrupole 295
- quasi-static problems 349

- r**
- relaxation bulk modulus 274
- relaxation distributions 274
- relaxation shear modulus 274
- RLC circuit 286
- rotational concentrated moment 210

- s**
- Schwartz space 12
- sequence
 - of locally integrable functions 114, 116
 - of locally integrable functions 20
 - uniformly convergent 7
- sesquilinear form 4
- set
 - lower bounded 3
 - upper bounded 3
- single electric layer 232
- single layer potential 232
- singular distribution 19, 21
- static moment 220
- static problem
 - of the elastic half-plane 264
 - of the elastic space 268
- stationary quadrupoles 296
- steady-state longitudinal vibrations 347
- support of a distribution 20
- symmetry of a distribution 38

- t**
- tempered distribution 18
- test function 6, 9–12, 14
- test function space 15
- Titchmarsh's theorem 170
- torsional vibrations 331
- translation of a distribution 37
- transverse vibrations 301, 308
- two-point problem 249

- u**
- unit element 94

- v**
- vector space 3
- viscoelastic isotropic solid 274
- volume potential 229

- w**
- wave equation 182
- weak convergence 17
- Winkler's hypothesis 316

- z**
- Zener model 281
