

Index

a

- acceptance – rejection method 74
- accommodation coefficient
 - definition 34
 - of energy of normal motion 34
 - of tangential momentum 34
 - values 37, 103
- acoustics 231–255
- amplitude of oscillation 232
- atomic weight 2, 257
- attenuation 231
- average value
 - per mass unity 15
 - per particle 15
 - per volume unity 15
- Avogadro number 2, 257

b

- BGK, *see* model equation
- Boltzmann constant 3, 257
- Boltzmann equation
 - full 23–27
 - linearized 43–47
- bulk velocity 15

c

- Chapman – Enskog method 57
- chemical potential 39
- collision integral
 - full 24
 - linearized 45
- condensation coefficient 38
- conservation laws 25
- constitutive equations 57

Couette flow

- cylindrical 145–153
- oscillatory 234–242
- planar 115–121
- cross section
 - differential 8
 - total 9
- cumulative function 74

d

- derivative approximation
 - centered 88, 90, 95, 96, 177, 240
 - one-sided 88–92
- diffuse reflection *see* scattering kernel
- Dirac delta function 259
- direct simulation Monte Carlo 73–82
- discrete velocity method 83–96

e

- effusion 181
- ellipsoidal model *see* model equation
- end correction
 - channel 194–198
 - long pipe 222
 - tube 210–213
- entropy 18
- entropy production
 - due to collisions 27
 - due to gas-surface interaction, 38
- equivalent free path 10
- error function 260

f

- flow through
 - long pipe 219–230
 - orifice 201–210
 - short channel 189–193
 - short tube 201–210

flow through (*contd.*)

- slit 189–193
- flow vector of
 - energy 16
 - entropy 18
 - heat 17
 - mass 16
 - particles 16

flows

- one-dimensional axisymmetric 93, 145
- one-dimensional planar 89, 115
- two-dimensional axisymmetric 201
- two-dimensional planar 90, 173
- Fourier's law 57, 60, 105, 123, 131, 154
- free-molecular flow 116, 122, 137, 148, 156, 165, 177, 181, 202, 238

g

- gas-surface interaction 31–40
- Gauss-Ostrogradsky's theorem 262

h

- H-theorem 27, 40, 66, 68, 70
- heat transfer
 - cylindrical 153–161
 - planar 121–128
- hydrodynamic velocity *see* bulk velocity

i

- intermolecular collisions frequency 27
- intermolecular potential
 - *ab initio* 5, 62, 120, 127, 207
 - definition 4
 - hard sphere 4, 27, 61, 79, 101, 113, 120, 138, 169, 190, 207, 208, 242
 - Lennard-Jones 5, 8, 9, 61, 62, 68, 102, 107, 113, 138
- internal energy 3
- iterative procedure 87

j

- jump boundary condition *see* temperature jump coefficient

k

- kinetic coefficients 53, 54, 109, 133, 165, 185, 249
- Knudsen layer 98, 100
- Knudsen number 10
- Kronecker delta 259

l

- linearization of
 - Boltzmann equation
 - near global Maxwellian 43
 - near local Maxwellian 46
 - boundary condition 48
- Loschmidt constant 12, 13, 257

m

- Mach belt 193
- Mach disk 210
- Maxwellian distribution function
 - global 18
 - local 20
 - reference 46
 - wall 38
- model equation
 - BGK 65, 70, 99, 112, 118, 120, 147, 189, 193, 197, 204, 213, 237
 - ellipsoidal model 69, 155
 - general form 71
 - linearized 71
 - S-model 67, 99, 110, 124, 138, 155, 163, 175, 184, 207, 217, 247
- molar gas constant 3, 257
- moments of distribution function 15, 44, 47, 84, 110, 116, 129
- momentum flux tensor 16

n

- Navier-Stokes equations 57, 146, 174, 205, 212, 235
- Newton's law 57, 186, 235
- no time counter method 78
- number density 2, 15

o

- oscillation parameter 233

p

- peculiar velocity 16
- phase of oscillation 232
- Poiseuille flow
 - cylindrical 161–171
 - planar 128–142
 - through finite channel 183–188
 - through rectangular channel 173–180
 - through slit 183–188
- polar coordinates 75, 86, 92
- Prandtl number 58

pressure 3, 17
 pressure tensor 17

q

quadrature rule
 – Gauss 85, 119, 134, 149, 263
 – Simpson 85, 86, 136, 150, 178

r

rarefaction parameter 10, 71
 reciprocal relations 53, 108, 133, 165, 249

s

S-model, *see* model equation
 scattering kernel
 – Cercignani-Lampis 34, 76
 – definition 31
 – diffuse 33, 75
 – diffuse-specular 33
 – specular 33
 signum function 261
 slip boundary condition, *see* velocity slip coefficient
 slip regime flow 130, 146, 163, 174, 235
 source term
 – bulk 47
 – surface 49
 specular reflection, *see* scattering kernel
 standard atmosphere 257
 state equation 3
 statistical scatter 81

t

temperature 16
 temperature jump coefficient 110–113
 thermal conductivity coefficient 59
 thermal creep
 – cylindrical 161–171
 – planar 128–142
 – through finite channel 183–188
 – through rectangular channel 173–180
 – through slit 183–188
 transient flow through
 – long tube 226–230
 – orifice and short tube 213–217
 transmission probability through
 – channel 182
 – tube 203

v

velocity distribution function 13–18
 velocity slip coefficient
 – thermal 104–108
 – viscous 98–103
 viscosity coefficient 58

w

wave number 231
 wave propagation
 – longitudinal 242–255
 – transversal 234–242
