

## Index

### **a**

Ampère Law 208–209  
 angular velocity 64  
 annihilation operator 279  
 Argand diagram 32

### **b**

band structure 263  
 Bell inequalities 275–279  
 Block's theorem 263  
 Block waves 261  
 Bohr  
 – atom 243–246  
 – radius 245  
 branch point  
 – algebraic 34  
 – logarithmic 34

### **c**

canonical commutator relations 268  
 Cauchy integral formula 183  
 Cauchy–Riemann equations 176–178,  
 180–181  
 Cauchy–Schwarz inequality 73  
 Cauchy's theorem 181–184  
 center of gravity 123  
 centrifugal force 66  
 centroid 124  
 chain rule  
 closure relation 166  
 complex numbers 29–49  
 – argument 32  
 – – principal value 33  
 – modulus 32  
 complex velocity 180  
 conic sections 297, 301–304  
 – polar coordinates 304  
 constraint 112

continuity equation 137, 206  
 convolution theorem 162  
 coordinates  
 – cylindrical polar 128  
 Coriolis force 66  
 Coulomb's law 199  
 creation operator 279  
 current  
 – density 205  
 – steady 206  
 cyclotron frequency 59, 67

### **d**

death 287  
 de Broglie hypothesis 246  
 delta function 159–169  
 De Moivre's formula 48  
 derivative 5  
 determinant 83–85  
 differential  
 – exact 100  
 – total 98–107  
 differential equation  
 – homogenous 45  
 – inhomogenous 45  
 – particular solution 45  
 Dirac notation 257–258  
 divergence theorem 146, 149  
 divergent sequence 3  
 Doppler effect 232

### **e**

eigenenergies 252  
 emf 206, 207  
 equilibrium point  
 – stable 40  
 – unstable 40  
 Euler's formula 31

Euler–Lagrange equation 290–293  
 Euler’s solution 104  
 expectation value 259  
 exponential function 19  
 extrema  
 – functions of one variable 17

**f**

Faraday  
 – law 206–208  
 fictitious forces 66  
 fluid  
 – dynamics 135–141, 179–180  
 – incompressible 137, 180  
 – irrotational 139, 180  
 Fourier  
 – integral theorem 162  
 – inverse transform 162  
 – series 75–79  
 – transform 162  
 four momentum 229  
 four vectors 220–226  
 four velocity 227–229  
 fundamental theorem of calculus 12

**g**

Galilean transformation 218  
 gauge conditions 211–212  
 – Coulomb 212  
 – Lorenz 212, 236  
 Gauss’s law  
 – differential form 200  
 – integral form 198  
 geometric series 4  
 gradient operator 130  
 Gram–Schmidt orthogonalization  
 75, 88  
 Green’s functions 163–165  
 Green’s theorem  
 – in the plane 152  
 – in three dimensions 148

**h**

Hamiltonian 279  
 Hamilton’s equations 109,  
 293–298  
 Hamilton’s principle 290  
 harmonic function 177  
 harmonic oscillator 279  
 – isotropic 61–62  
 Helmholtz theorem 167, 169  
 Hilbert space 271  
 hydrogen spectra 245  
 hyperbolic functions 34–36

**i**

inertial frames 217–220  
 – standard configuration 217  
 integrals  
 – multiple 113–121  
 integrating factor 24  
 integration 10–11  
 – by parts 13, 16  
 interchanging derivatives and integrals 97  
 intermediate value theorem 4  
 interval of convergence 18  
 inverse function theorem 9  
 inverse square force 64

**j**

Jacobian 103–104, 117–121  
 Jacobian matrix 103  
 Jordan’s Lemma 188

**k**

Kepler’s second law 61  
 Kroneker delta function 48

**l**

Lagrange multiplier 112  
 Lagrangian 290  
 L’Hôpital’s rule 27  
 Laplacian 108  
 Larmor effect 67  
 Larmor frequency 67  
 Larmor precession 274–275  
 Laurent series 184  
 Liénard–Wiechert Potentials 237–239  
 limit  
 – definition for complex numbers 174  
 – definition for real numbers 3  
 linear approximation 297  
 line integral 131  
 Lorentz force 58  
 Lorentz invariant 222  
 Lorentz matrix 221  
 Lorentz transformation 217–220

**m**

mass  
 – relativistic 229  
 matrix 80  
 – hermitian 86  
 – trace  
 Maxwell–Ampère Law 209–210  
 Maxwell’s equations 197–215, 234–237  
 Maxwell’s thermodynamic relations 121  
 mean value theorem 28, 96, 97  
 mean value theorem for integrals 10, 16

meromorphic function 184  
 Minkowski space 220–226  
 molecules 254–256  
 multivalued function 34

**n**

Newton's laws 57, 291  
 Newton's second law 8

**o**

observables  
 – functions of 261  
 operators  
 – linear 78–91  
 – self-adjoint 85–89, 257  
 – unitary 89  
 orbital  
 – antibonding 255  
 – bonding 255  
 ordinary differential equation  
 – first order 24–25  
 orthogonal vectors 74  
 orthonormality relation 165  
 orthonormal vectors 74  
 oscillator  
 – critically damped 45  
 – damped 43–45  
 – forced 45–47  
 – over damped 45  
 – under damped 44

**p**

parity  
 – even 251  
 – odd 251  
 Parseval's theorem 162  
 partial derivatives 95–113  
 Pauli spin matrices 273  
 permittivity of free space 198  
 phase space 109, 296  
 photon 232  
 Poisson's equation 212  
 precession 67

**q**

quadratic equation 303

**r**

radius of convergence 179  
 residue theorem 186  
 resonance 47

Rolle's theorem 27  
 rotating frames 64–66  
 Runge–Kutta method 104–107

**s**

Schrödinger equation 246, 265  
 simple harmonic oscillator 36–47, 110  
 sin 287  
 singularities 179  
 step function 161  
 Stern–Gerlach Experiment 269–275  
 Stokes' law 209  
 Stokes' theorem 149–154  
 superposition of states 257  
 surface integrals 142–145

**t**

tangent vector 126  
 Taylor's series 15–17, 36, 104, 296  
 – remainder term 19  
 – – Cauchy form 16  
 – – integral form 15  
 – – Lagrange form 16  
 teleological argument 291  
 time dilation 226–227

**u**

unit vector 53

**v**

variational principles 287–300  
 vectors  
 – equation  
 – – of a line 56  
 – – of a plane 57  
 – inner product 72  
 – in  $\mathbb{R}^3$  51–67  
 – integration 133–134  
 – linear dependent 72  
 – linear independent 72  
 – norm 73  
 – scalar product 52  
 – space  
 – – basis 72  
 – – definition 71  
 – vector product 54

**w**

wave equation 210, 211  
 work 132  
 work–energy theorem 38–41, 132
