

Index

a

Abelian model 133
 amplitude peak 56
 amplitudes modulation 109

b

Bianchi's identity 189
 bifurcation control method 53, 69
 Bose-Einstein condensates 209
 Boussinesq equation 96
 breather-like structures 117, 129, 142,
 168

c

Cauchy problem 108, 111, 124
 chaotic dromion and lump patterns 145,
 147, 169
 chaotic line soliton solutions 145, 168
 chaotic-chaotic patterns 143, 145, 168
 chaotic-periodic patterns 143, 145, 168
 C-integrable model 107, 112, 121, 125
 confinement and asymptotic freedom
 203, 206
 covariance principle 188, 200
 covariant "t Hooft gauge" 133

d

dark energy density 197
 Davey-Stewartson (DS-I) equation
 98, 103, 108, 121, 131,
 155
 Davydov alpha-helix solitons 209

discretization techniques 84
 Draupner wave 151
 dromions 139
 Duffing equation 20, 69
 Dulac's criterion and energy 19, 20, 31,
 42

e

Einstein equation 187, 193
 Einstein theory 188
 Einstein-de Broglie soliton-particle theory
 178
 electron acoustic waves 108
 El Naschie's theory 177
 entropy production 195, 197
 envelope solitons 173
 equivalence principle 188, 200
 Euler-Bernoulli beam 83

f

feedback control 69
 Fourier expansion, and time rescaling
 19, 41
 Fourier mode 96
 fractal dromion (lump) solution
 147–148, 169
 Friedmann model 193

g

Galerkin method 84, 85
 geodesics equation 203
 Green's theorem 31

h

harmonic balance method 4, 56, 84
 Hirota-Maccari equation 103–104
 homoclinic bifurcation 19

i

infinite-period homoclinic bifurcation
 35, 41
 instantons 117, 129, 167
 intrinsic trembling 202

j

Jacobian matrix 24, 74, 90

k

Kadomtsev-Petviashvili (KP) equation
 95, 97–98, 101, 103, 126
 KBM method 3
 Klein-Gordon equation 173, 177,
 178

l

Langmuir solitons 155
 Lax pair 95
 Liènard system 29
 Lindstedt procedure 85
 linear field theory 187
 linear velocity feedback 54
 Lorentz invariant 173
 lumps 116
 Lyapunov exponents 13

m

Maccari nonlinear system (MS) 151
 Maccari system 154–155
 and blowing solutions 156–157
 motion of light 207
 multiple ring solitons 127, 167
 multiple scale methods 2, 56

n

Newtonian orbits 203
 nonlinear continuous systems
 primary resonance of 86–91
 sub-harmonic resonance of 91–93

nonlinear differential equation 2
 nonlinear dynamical systems 3, 5
 nonlinear Galerkin method 4
 nonlinear partial differential equations
 (NPDEs) 151, 173
 Kadomtsev-Petviashvili equation
 97–98, 101–103
 Lax pair 98–100
 Hirota equation in 2+1 dimensions
 100–101
 Hirota-Maccari equation 103–104
 Maccari system 154–155
 mathematical framework 153–154
 nonlinear quantum mechanics 178
 nonlinear Schrodinger (NLS) equation
 174, 179, 209
 for $a_1 < 0$ 176–177
 for $a_1 > 0$ 174–176
 nonlinear systems
 global analysis of, model system
 27–35
 infinite-period homoclinic bifurcation
 35–41
 periodic solutions and their stability
 21–28
 quasiperiodic attractor 42–44
 results 46–51
 nonlinear wave 138
 nonlocal fractal solutions 147, 169
 nonlocality principle 189, 200
 nuclear spin generator (NSG) system
 168

p

Peregrine solitons 157
 perturbation method 56, 59
 perturbation methods 2
 Planck constant 180
 Poincaré-Lindstedt method 3, 4
 Poincaré-Bendixson theorem 19, 32, 33,
 35, 46

q

quantum mechanics 185, 188, 199
 quantum number 182

quark-quark-gluon coupling 205
 quasiperiodic forcing 43

r

Regge relation 206
 relativistic correction 185
 resonance, nonlinear oscillator in
 11, 16
 reverse infinite-period bifurcation
 210–212, 215
 Ricci tensor 188–189, 200
 ring soliton 116–118
 ring solitons 116
 Roberson–Walker metrics 191, 195
 Runge-Kutta method 10
 Runge-Kutta-Fehlberg method
 24, 75

s

single-mode discretization 85
 spacetime deformations 188
 spatio-temporal rescaling 108, 122, 130
 stochastic fractal dromion, and lump
 excitations 48–150, 170–171

t

temporal rescaling 211
 time delay
 feedback control 55, 69

 and feedback gains 56
 state feedback 53–56, 70
 time-delayed feedback control method
 55

u

uncertainty principle 201, 203
 uniqueness principle 188, 200

v

Van der Pol equation 4, 68
 Van der Pol-Duffing oscillator 3, 4
 vibration control
 frequency–response curve 62
 other nonlinear systems 68
 perturbation method 56–59
 stability analysis and parametric
 resonance control 59–63, 74–80
 time delay state feedback 53–56
 two-period quasiperiodic motion
 63–68, 79–82
 for van der Pol equation 72–73

w

Weierstrass function 148, 170, 171

z

Zakharov-Kusnetsov equation 107, 108
 zero-mode amplitude 76
