8 Solutions to the Exercises of Chapter VIII (Complement C_{VIII}, § 3). An Elementary Approach to the Quantum Theory of Scattering by a Potential *1*

8.1 Scattering of the *p* Wave by a Hard Sphere *1*

8.2 "Square Spherical Well": Bound States and Scattering Resonances *6*

9 Solutions to the Exercises of Chapter IX (Complement B_{IX}). Electron Spin *21*

9.1 Spin-Related Measurements of a Particle of Spin 1/2 *21*

9.2 An Operator Coupling Momentum **P** and Spin **S** *26*

9.3 The Pauli Hamiltonian *29*

9.4 Polarization of a Neutron Beam by Reflection *31*

10 Solutions to the Exercises of Chapter X (Complement G_X). Addition of Angular Momenta *43*

10.1 The Deuterium Atom *43*

10.2 The Hydrogen Atom *45*

10.3 Two-Particle System *49*

10.4 Disintegration of a Particle *52*

10.5 Three-Particle System *56*

10.6 Two-Particle System and Collision *59*

10.7 Standard Components of a Vector Operator *71*

10.8 Irreducible Tensor Operators; Wigner–Eckart Theorem *79*

10.9 Irreducible Tensor Operators (Follow-up Exercise) *90*

10.10 Addition of Three Angular Momenta *95*

References *103*

11 Solutions to the Exercises of Chapter XI (Complement H_{XI}). Stationary Perturbation Theory *105*

11.1 Punctual Perturbation in an Infinite One-Dimensional Well *105*
11.2 Localized Perturbation in an Infinite Two-Dimensional Well *110*
11.3 Perturbations in a Two-Dimensional Harmonic Oscillator *114*
11.4 Perturbed Circular Motion of a Quantum System *127*
11.5 Three-Dimensional Perturbation *136*
11.6 One Electronic and Two Nuclear Spins, Spin-Spin Interactions *143*
11.7 Interaction Between a Nuclear Spin and an Electric Field via its Electric Quadrupole and Magnetic Dipole Moments *152*
11.8 Linear Perturbation Within an Infinite One-Dimensional Well and Variational Method *163*
11.9 The Hydrogen Atom and the Variational Method *171*
11.10 Determination of the Energies of a Particle in an Infinite One-Dimensional Well Using the Variational Method *173*

12 Solutions to the Exercises of Chapter XII. An Application of Perturbation Theory: The Fine and Hyperfine Structure of Hydrogen *183*

13 Solutions to the Exercises of Chapter XIII. Approximation Methods for Time-Dependent Problems *185*

Part I: Solutions to the Exercises of Complement B_{XIII}. Linear and Nonlinear Responses of a Two-Level System Subjected to a Sinusoidal Perturbation *185*

13.1 Competition Between Pumping and Relaxation in a Two-Level System *185*
13.2 Nonlinear Response of a Two-Level System Subjected to a Sinusoidal Perturbation *189*

Part II: Solutions to the Exercises of Complement F_{XIII} *198*

13.1 One-Dimensional Harmonic Oscillator Subjected to an Electric Field Pulse *198*
13.2 Spin–Spin Interactions During a Collision *205*
13.3 Two-Photon Transitions Between Non-equidistant Levels *211*
13.4 Magnetic Response of a System Placed in an Oscillating Magnetic Field *216*
13.5 The Autler–Townes Effect *220*
13.6 Elastic Scattering by a Particle in a Bound State. Form Factor *229*
13.7 A Simple Model of the Photoelectric Effect *234*
13.8 Disorientation of an Atomic Level due to Collisions with Noble Gas Atoms *239*

13.9 Transition Probability per Unit Time Under the Effect of a Random Perturbation. Simple Relaxation Model *245*
13.10 Absorption of Radiation by a Many-Particle System Forming a Bound State. The Doppler Effect. Recoil Energy. The Mössbauer Effect *252*
References *270*

14 Solutions to the Exercises of Chapter XIV (Complement D_{XIV}). Systems of Identical Particles *271*
14.1 Energy Levels of a System of Three Identical Particles *271*
14.2 Two Identical Bosons in a Central Potential *275*
14.3 Identical Electrons in Hybrid Atomic Orbitals *278*
14.4 Collision Between Two Identical Particles *282*
14.5 Collision Between Two Identical Unpolarized Particles *289*
14.6 Possible Values of the Relative Angular Momentum of Two Identical Particles *292*
14.7 Position Probability Densities for a System of Two Identical Particles *302*
14.8 Symmetrization and Measurements *311*
14.9 One- and Two-Particle Density Functions in an Electron Gas at Absolute Zero *321*

Bibliography *339*
