Invest like a Barbarian

Share in the spoils of a Private Markets revolution

Ross Butler

[View on Edelweiss](#)

Private markets will make your money work harder. Here's how:

Step out of the regulated stock market casino and you will find a vast ocean of investment opportunity. But it doesn't have to be any riskier. Private markets managers are trusted by the world's largest institutions to provide returns well in excess of those on any public market – and individual investors can now get a piece of that action.

In *Invest Like a Barbarian*, Ross Butler will show how you can *Share in the spoils of a Private Markets revolution*. The book explains why private equity is not a new idea – it follows ancient investment principles, forgotten in age of liquidity and high-frequency trading. It explains how the rise of private credit is a hugely under-appreciated secular phenomenon that will allow individuals – not just banks – to become the lenders and financiers of the third industrial revolution. And it explains why making yourself wealthy by investing in private markets isn't just good for you, it's good for the world.

Step outside your comfort zone and do something worthwhile (with your money).

Inside the book:

- The ancient and modern roots of private markets, and how the major sub-asset classes work: venture capital, private equity, private credit, and private real assets.
- How individual investors can enjoy the spoils on the same – and sometimes better – terms as the largest institutional investors.
- Why everything you've probably heard about private equity and private markets is wrong. Private markets are anti-establishment, creative-disruptors. Even mainstream investment theory can't put it in a box.

Geopolitical Alpha

An Investment Framework for Predicting the Future

Marko Papic

Forecast geopolitics and markets with this clear and insightful resource

Geopolitical Alpha – An Investment Framework for Predicting the Future provides readers with an original and compelling approach to forecasting the future and beating the markets while doing so. Persuasively written by author, investment strategist, and geopolitical analyst Marko Papic, the book applies a novel framework for making sense of the cacophony of geopolitical risks with the eye towards generating investment-relevant insights.

Geopolitical Alpha posits that investors should ignore the media-hyped narratives, insights from "smoke-filled rooms," and most of their political consultants and, instead, focus exclusively on the measurable, material constraints facing policymakers. In the tug-of-war between policymaker preferences and their constraints, the latter always win out in the end. Papic uses a wealth of examples from the past decade to illustrate how one can use his constraint-framework to generate *Geopolitical Alpha*. In the process, the book discusses:

- What paradigm shifts will drive investment returns over the next decade
- Why investment and corporate professionals can no longer treat geopolitics as an exogenous risk
- How to ignore the media and focus on what drives market narratives that generate returns

Perfect for investors, C-suite executives, and investment professionals, *Geopolitical Alpha* belongs on the shelf of anyone interested in the intersection of geopolitics, economics, and finance.

Move First, Align Fast

Frameworks and Scorecards for Human-AI Alignment

Deepika Chopra

Move First, Align Fast is a human playbook for AI-driven transformation. It offers a candid, practical guide for leaders navigating the disconnect between bold AI strategies and organizational readiness. After nearly two decades leading enterprise-wide transformations in complex, regulated organizations like Citi, AIG, Siemens, and LPL, author Deepika Chopra saw the same pattern everywhere: companies had the right strategy, the best tools, and strong technical teams-yet the transformation stalled. The challenge wasn't technology. It was trust, culture, and human alignment.

Today, that challenge isn't limited to enterprises. High-growth startups and the VCs who fund them are facing the same problem in real time: AI tools are scaling, but organizations and people are not. Founders are struggling to build conviction and cohesion inside fast-moving teams. Investors are starting to recognize that product-market fit isn't enough without organizational alignment. In this new wave of AI-native companies, human readiness is the real differentiator.

This book aims to provide a practical system for aligning people and culture with AI ambition. Through Chopra's proprietary ACT Framework (Align, Cultivate, Transform), the ACT+M Scorecard, and the Human-AI Alignment Score (HAAS), it offers measurable tools that help leaders build trust, accelerate adoption, and lead with clarity.
