A Head Full of Everything

Inspiration for Teenagers With the World on Their Mind

Gavin Oattes

Summary

This is the book we all needed as a teenager but it didn't exist. It still doesn't. Well, it does but it's been in my head for 15 years. No waffle, no dad chat, no fluff. The difference between this book and every other teenage book is that parents *and* teenagers will want to pick this up.

A Head Full of Everything is a no nonsense guide to teenagery the hell out of life. Youth is not a time of life. It's not a moment in time. It's forever and more, and more teenagers need to learn this.

They tell us that our teenage years are the best years of our lives. But the truth is that for so many they aren't. Instead it's a time riddled with anxiety, fear and all sorts of pressures to conform.

This book is about daring to choose, fitting out instead of fitting in, discovering that adolescence truly sucks and that growing up is just a trap!

It's about staying true to the dreams of your youth, whoever you choose to be.

Thus Spake Zarathustra

The Philosophy Classic

Friedrich Nietzsche, Tom Butler-Bowdon, Christopher Janaway

Summary

Thus Spake Zarathustra is a treatise by Friedrich Nietzsche, written in four parts and published in German between 1883 and 1885. The work is among the first of Nietzsche's mature philosophy and is considered the masterpiece of his career. It received little attention during his lifetime, but its influence since his death has been considerable both in the arts and in philosophy.

Written in the form of prose narrative, *Thus Spake Zarathustra* presents Nietzsche's mature philosophy through the protagonist Zarathustra, who after years of meditation has come down from a mountain to offer his wisdom to the world. It is this work in which Nietzsche made his famous (and much misconstrued) statement that "God is dead" and in which he presented some of the most influential and well-known ideas of his philosophy, including those of the Übermensch ("superman") and the "will to power."

Part of the bestselling Capstone Classics series, This high-quality, hardcover volume is a must-have for readers interested in the philosophy of Nietzsche.

Mindset Mathematics: Visualizing and Investigating Big Ideas, Grade 2

Jo Boaler, Jen Munson, Cathy Williams

Summary

Engage students in mathematics using growth mindset techniques

The most challenging parts of teaching mathematics are engaging students and helping them understand the connections between mathematics concepts. In this volume, you'll find a collection of low-floor, high-ceiling tasks that will help you do just that, by looking at the big ideas in second grade through visualization, play, and investigation.

During their work with tens of thousands of teachers, authors Jo Boaler, Jen Munson, and Cathy Williams heard the same message—that they want to incorporate more brain science into their math instruction, but they need guidance in the techniques that work best to get across the concepts they needed to teach. So, the authors designed *Mindset Mathematics* around the principle of active student inquiry, with tasks that reflect the latest brain science on learning. Open, creative, and visual math tasks have been shown to support student learning, and more importantly change their relationship with mathematics and start believing in their own potential. The tasks in *Mindset Mathematics* reflect the lessons from brain science that:

- There is no such thing as a math person and anyone can learn mathematics to high levels.
- Mistakes, struggle, and challenge are opportunities for brain growth.
- Speed is unimportant, and even counterproductive, in mathematics.
- Mathematics is a visual and beautiful subject, and our brains want to think visually about mathematics.

With engaging questions, open-ended tasks, and four-color visuals that will help kids get excited about mathematics, *Mindset Mathematics* is organized around nine big ideas which emphasize the connections within the Common Core State Standards (CCSS) and can be used with any current curriculum.

Her previous book with Wiley, *Mathematical Mindsets* (ISBN: 9780470894521, 10/15), has sold over 130,000 copies. Cathy Williams is the co-founder and the executive director of [youcubed](http://youcubed.org). Cathy's former roles have included a high school mathematics teacher, AVID coordinator, math department chair and district curriculum leader over an 18-year span, before she became a curriculum and instruction administrator in 2003. Diversity and Inclusion Matters

Tactics and Tools to Inspire Equity and Game-Changing Performance

Jason Thompson

Summary

Diversity, equity, and inclusion has been a hot topic especially in the tech industry. "Between 2017 and 2018, postings for diversity and inclusion positions had increased by nearly 20%--and that number is growing." Many companies are struggling to achieve their DEI goals and develop successful programs. Thompson addresses one of the major issues: there is no handbook that helps people develop and create an effective DEI program. Most work is currently being done on ROI, what diversity means, and how to define it, but there are not books that help you develop an actual program. Thompson provides diversity officers with a blueprint, information, and tools to implement a successful diversity program.

Thompson's insights can jumpstart and help implement a diversity program that can gain immediate traction. He walks you through the process of execution on a weekly and even daily basis. His book shares practical, concrete steps about what data to collect and how to analyze and assess that data, choose the right diversity goal given your current resources, and how to measure the impact of your DEI efforts. He shares practical step-by-step lessons learned, the order you should build your program, and what things you should be working on. You can implement a program in which there previously was no roadmap.

You will learn:

- How to build a successful diversity program with step-by-step instructions
- How to manage and lead a diversity council
- How to not just develop programs but understand the order they should be built to insure success
- How to get early buy-in and long-term commitments from CEOs by knowing when to push and what to ask for
- How to set appropriate expectations from a DEI program for the CEO and the executive leadership team
- How to understand your company
- How to build a plan and program that is tailored to your company and its culture
- How to set the right DEI goals, collect the right data, and measure your success
- How to know the difference between a program that is failing and one that is taking awhile to get going

Contributor Bio

Jason R. Thompson is a professor at Western Governors University and has experience in developing or leading diversity programs in higher education, sports, health care and tech. There are few other professionals who can say they have started successful DEI programs in 3 distinct industries. His work in DEI has been recognized nationally and internationally. Jason's work was Awarded the number 1 rated initiative of the 13th Annual International Innovation in Diversity Award by the Profiles in Diversity Journal in 2016, the 2015 Diversity Champion Award from the Colorado Chapter of the Society for Human Resource Management (COSHRM) and he was twice named a Diversity Leader by Profiles in Diversity Journal. Jason has been quoted in The New York Times, The Washington Post, The Guardian, USA Today, FOX News, and CNN.

Accountability and Ownership

Brian P. Moran, Michael Lennington

Summary

Accountability is the bedrock upon which all lasting success is built. It is *the* necessary virtue for both individuals, and organizations, to realize their full potential. Accountability enables learning and growth, improves well-being, reduces stress, and drives results.

But what if nearly everyone is wrong about the true nature of accountability? What if we have substituted something else in its place, something that works to improve short-term results, but limits long term organizational health and success? What if the widespread management approach of "holding others accountable" instead of creating accountability, encourages blame, limits results and growth, inhibits risk-taking, generates fear, fosters workplace conflict, and lowers over-all health and well-being?

Authors Brian Moran and Mike Lennington make the argument for what accountability truly is – personal ownership of one's goals, actions, and progress. They show individuals how to take personal ownership, and thereby change their circumstances. They will also show leaders how to stop managing by consequences through "holding others accountable," and instead start leading to ownership by "holding others capable." In this way can individuals and organizations deliver on what they are truly capable of.

Inner Work

How to Find Clarity, Purpose, and Your Own Hidden Potential at Work

Alexi Robichaux

Summary

Much of the workday, in mindshare and time, is dedicated to *outer* work: meetings with co-workers, interactions with customers, or working on a deck or other tangible deliverables. For most of us, this is the very *definition* of “work”: external, externally-focused activity. *Inner Work* puts forth an assertion that is novel today, but that successful leaders have known for millennia: *inner* work--the practice of thoughtful attention to the inner experience of yourself and others--is “work” as well, and of crucial importance; *not* just as a question of wellness or employee satisfaction, but as the engine of a potential transformation in the efficacy (and, yes, happiness) of most organizational workplaces.

Inner Work draws on a legacy of thought that spans both the Western and Eastern traditions to frame leadership, creativity, and work as an inner experience. For thousands of years across geographies and cultures, humans have understood that leadership and productivity depend on an individual’s *inner* balance and understanding. The importance of these lessons in a knowledge economy is well understood today--from Netflix to Zappos to Google to Valve, leading companies are constantly seeking to create value by empowering employees to unlock their own potential. And for the individual--leader, employee, or both--the need is even more urgent and plain: *how can you create more value in your work for your human life?*

Inner Work is a book about self-exploration; it’s also a toolkit for how to improve. Its assertion is that, by looking into ourselves with rigor and integrity, we each have the power to achieve both these goals. This is a book that will help leaders and employees create value for themselves and their organizations by actively exploring their own *inner* processes, values, and mental models: the tools we use, constantly, to operate in the world.

Prior to BetterUp, Robichaux was the Director of Product Management at VMware and co-founded Youth Leadership America, a non-profit organization that fosters peer-to-peer leadership in high school students.

The Handbook of Credit Risk Management^(2nd Edition) Originating, Assessing, and Managing Credit Exposures

Sylvain Bouteillé, Diane Coogan-Pushner

Summary

The Handbook of Credit Risk Management, Second Edition presents a comprehensive overview of the practice of credit risk management (CRM) for a large institution. We introduce readers to credit risk by defining it, outlining how institutions are exposed to it, explaining why its management is critical to the success of an institution, and why an institution's organizational structure matters. The book is then divided into four sections, each covering an essential step of CRM: Origination, Credit Assessment, Portfolio Management, and Mitigation & Transfer.

The Handbook offers a holistic treatment of credit risk management, unlike some highly technical books on particular facets of CRM such as credit scoring and distance-to-loss models, is specifically written to be readable and simple to understand, and presented in a logical format that is consistent with a commonly employed risk management framework: Identification, Measurement, Pricing/Capital Allocation, Mitigation and Transfer/Distribution.

Sylvain Bouteillé, the primary author, is a senior credit professional who has managed credit and portfolio teams in numerous credit-related transactions. Diane Coogan-Pushner, formerly the Chief Risk Officer of a public company, the secondary author, spent a career in industry and at the onset of the financial crisis, had the mission of developing graduate risk management programs to bridge financial theory with practical applications, and founded the Risk Management profile of Queens College, which belongs to the largest urban university in the US.

The Cycle of the Gift (2nd Edition)

Family Wealth and Wisdom

James E. Hughes, Jr., Susan E. Massenzio, Keith Whitaker

Summary

The Cycle of the Gift: Family Wealth and Wisdom 2E speaks directly to the questions and concerns of parents and grandparents who are making significant gifts to family members. How do I prepare the recipient of such a hefty gift? With that question in mind, Hughes, Massenzio, and Whitaker have written *Wisdom and Wealth* in three main parts: "The Who of Giving," "The How of Giving," and "The What and Why of Giving." The first part deals exclusively with the people most deeply involved in family giving, especially the recipients and givers (parents, grandparents, spouses, trustees). The second part, "The How of Giving," addresses the delicate balance of givers who want to maintain some level of control and recipients who want some level of freedom in accepting and growing the gift. The final part, "The What and Why of Giving" describes various types of gifts, from money to business interests to values and rituals. The authors update these concepts in this new edition, plus new chapters on "the Big Reveal" which lays out the importance of a "pause" when rising generation family members are introduced to knowledge of the family financial wealth.

The Voice of the Rising Generation (2nd Edition)**Family Wealth and Wisdom**

James E. Hughes, Jr., Susan E. Massenzio, Keith Whitaker

**No Image
Available****Summary**

One of the greatest sources of pain within families with wealth is the belief that there are no choices. Sometimes even wealth creators who feel more than able in their business lives feel at the same time that their wealth will inevitably become a pernicious influence on their children and grandchildren. The next generation must awaken to the problem of treating financial wealth as more important than it is and therefore not developing a sense of self separate from the wealth.

The book will:

- Explain the challenge that wealth poses to rising generations--the challenge of silence
- Discuss the "rising generations" and what their future might look like
- Share strategies that help members of the rising generation find their voices

The Voice of the Rising Generation 2E will discuss the successors of family wealth and what they can do to keep focused on human capital rather than putting too much emphasis to the role of financial wealth. Updated version to focus on clearer discussions of the importance of character development as the key to recipients' leading healthy lives. This is a point the authors have focused on in recent years, and want to emphasize in the books.
